# PETERBOROUGH BOY SCOUTS GIVEN AN ENTHUSIASTIC RECEPTION ON RETURN

**Youngsters Are Welcomed by Bugle Band and Crowd of Citizens and Congratulated Upon Their Fine Showing in Toronto.**

**A HAPPY BUNCH**

The first public recognition that Peterborough has given the Boy Scout movement was tendered last night, when the Peterborough patrol of Boy Scouts were welcomed on their arrival from the Toronto Exhibition on the local C. P. R. train by the 57th Bugle Band and an enthusiastic gathering of citizens, who escorted them in triumph to the armouries, where Col. Stevenson congratulated them on the success they had scored.

The reception was a big surprise to the youngsters, who were not looking out for anything of the kind. Citizens, however, especially the military authorities, recognized the showing they had made in the big gathering at Toronto and felt that some recognition should be forthcoming. The announcement in last evening's papers was evidently notice enough for the people who turned out in large numbers and waited patiently, although the train was late. Many evidently did not know that the local leave Toronto an hour later during the Exhibition and accordingly they had long wait for the train. It is an indication of the interest that they felt in the Scouts that they should wait patiently for an hour and a half. The 57th Bugle Band with their usual willingness to lend assistance to any movement of the kind were on hand and made the wait more endurable by rendering several selections and demonstrating their ability as vocalists.

**Big Reception.**

The station was crowded when the train finally pulled in at 9.07. As it entered the station the Bugle Band played a spirited selection, and the crowd cheered heartily. Passengers on the train crowded to the station side and heads were thrust out everywhere. The Scouts were just as much perplexed as to the reason for the demonstration, but they were quickly informed that it was all for them and maybe they were not a proud and happy bunch. A procession was formed, headed by the Bugle Band, and rear-guarded by a number of automobiles and proceeded to the armouries by way of George street, both sides of the main thoroughfare being lined with admiring people. The scouts, headed by Scout Master D. O Waring, swung along with their staves at the trail, heads back and keeping splendid step to the stirring march of the buglers. Neatly clad in khaki shirts with handkerchief around their neck, kit strapped on their backs, black knickers and Stetson hats, and marching like soldiers they made a fine impression and were greeted with volley after volley of applause as they marched up the street.

On reaching the armouries another flattering reception was given them by the people there. They were drawn up in order and presented to Lieut.-Col. Stevenson, commanding officer of the 57th Regiment, who addressed them briefly.

**Congratulations For Scouts.**

"Boys I have only a few words to say to you," he remarked. "I desire to congratulate you upon the splendid showing you have made in Toronto, as is evidenced by the despatches in the evening papers. You have been brought into close touch with one of the greatest soldiers in the Empire.

(Continued on page 3.)

# LORD KILMARNOCK SHOT; WAS GUEST OF THE KING

Special Wire to The Examiner.

LONDON, ENG., SEPT. 1.—Was it King George himself who accidentally shot Lord Kilmarnock while hunting near Balmoral Castle yesterday. His Majesty as very nervous on returning to the castle after the accident, details of which are being suppressed. Lord Kilmarnock was injured with small shot in the ear, nose and arm; his glasses were also broken. The injuries are thought not to be serious.

# Cecil Richardson, Boy Scout, Receives A Baden Powell Medal

**Member of the Local Patrol Honoured by the General for His Courage in Saving the Life of Seven-year-old Cyril Hughes, Who Was Drowning in the Otonabee River.**

**BOY SCOUT HEROES.**

Bronze medal for gallantry—Donald Smith, of ———, who lost his life in trying to save a boy friend from drowning. The medal was awarded to his parents.

Bronze medal for life-saving—George Jackson, of Dunnville, Ont., who saved a boy from drowning.

A certificate of merit—Thomas Hobbs, of "Wolf" patrol, 36th Boy Scouts, Toronto, for rescuing a boy from a deep hole.

Silver medal for life-saving—Cecil Richardson, of Peterborough, for saving a boy's life.

Two other Ontario boys have been recommended for honours, but the circumstances of each case are being investigated before the awards are made.

TORONTO, AUG. 31.—These are the Ontario Boy Scouts who for bravery in saving life, have been awarded the Baden-Powell medals for noble conduct.

The General himself referred to the little group of heroes, in his address to the thousands of boy scouts in front of the Grand Stand at the Exhibition yesterday afternoon, and complimented them for their splendid reports, he was receiving from patrol leaders all over the Dominion.

**Boys' Acts of Bravery.**

"The first impression I had of the Toronto scouts on arriving here," said the General, "was that patrol leader Thomas Hobbs had saved a boy from drowning in a deep hole, and had been awarded a certificate of merit. Then I heard of Scout Cecil Richardson, of Peterborough, who gained the silver medal for life saving, and also George Jackson, of Dunnville, who showed remarkable bravery in going the second time to rescue a drowning lad after he had nearly lost his life in a previous attempt to save him. Jackson got the bronze medal.

**Lad Who Lost His Life.**

"The highest award the Boy Scout movement bestows is the bronze medal for gallantry. That was won by Donald Smith, who, however, lost his life in trying to save a boy friend from drowning. The medal was awarded to his parents in grateful recognition of their son's bravery."

**Pins for Toronto Officers.**

General Baden-Powell then turned to Captain Wilson and aCptain Tod, the leader and secretary, respectively of the Boy Scout forces in Toronto, and presented each of the two officers with a "Swastika" gold pin, the Brotherhood medal of the Boy Scouts. "They have done magnificent work for the Boy Scouts in Toronto," he said in making the presentation.

"When you see an accident, be prepared to act. You may see one anywhere, any day. Wade in and do your best. Help a fellow creature in distress. Fear God, honour the King, obey the Scout Law and do a good turn to anybody you can."

These words the General spoke yesterday were words of peace, of encouragement, of duty. It was a fitting climax to the events of the afternoon when the thousands of assembled boy scouts were reviewed by their leader, by the man who had formulated the scouting movement which has extended already all over the British Empire.

The scene presented will long be remembered by the crowds who sat on the Grand Stand. In the foreground thousands of khaki-clad boy scouts crowded around the little platform on which stood "The Chief Scout," their leader, and friend. The youthful army kept their ears on the alert to catch every word.

**Carry Out Your Orders.**

"Carry out your orders, the moment you get them. That's what you should always remember to do. You may be a good scout all round, but never forget to carry out your orders. You, Boy Scouts of Canada, are doing great things. I have heard of many acts of kindness you have done to other people. I'm glad to hear these things. They are what I want you to do. Remember you belong to a big brotherhood which extends not only over the whole Dominion, but also to South Africa, New Zealand and all over the Empire. Out in Vancouver a few days ago I heard about the splendid work done by some Boy Scouts in putting out forest fires. The people of Vancouver appreciated the boys' action so much that they gave them a banquet. Your brother Scouts in Great Britain have been saving life in many instances. They don't care about their personal risk, and reports show that neither do you, here in Canada."

## SUDDEN DEATH

**Dr. Isaac Wood, a Kingston Specialist, Dead of Paralysis.**

Examiner Special.

KINGSTON, SEPT. 1.—Dr. Isaac Wood, specialist, aged sixty-two, was stricken with paralysis and died this morning. He was a Liberal and Methodist, and formerly a professor in Queen's University.

**This Will Make You BETTER Looking**

Rexall Pearl ToothPowder has worked a revolution in the science of Dentistry and has made hundreds of people happy and better looking. Don't comdare it with any other Liquid Powder or Paste you have ever used. It is absolutely pure and delightfully refreshing.

It cleans the teeth perfectly without injuring the enamel.

It leaves a cool, refreshing feeling in the mouth that sweetens your whole being.

## STRIKE CRISIS

**Troops Are Being Called Out in Spain**

Special Wire to the Examiner.

BILBOA, SPAIN, SEPT. 1.—The strike situation is extremely critical, and the government fears that it may develop into national insurrection. More troops are on the way to the scene and there is a probability of Bilboa being declared under martial law.

## APOPLEXY

**Toronto Dry Goods Wholesaler Dies Suddenly**

Special Wire to the Examiner.

TORONTO, SEPT. 1.—Andrew Darling well known here as a dry goods wholesaler, died suddenly in his home this morning of apoplexy.

## WAS DROWNED

**Land Surveyor Meets Death at Athabasca Landing**

Special to The Examiner.

EDMONTON, SEPT. 1.—W. H. Selby, a Dominion land surveyor, was drowned at Athabasca Landing several days ago. His wife and members o fhis family live in Ontario.

***The Cause***

of Eye Troubles is usually not disease, but defect in the structure or muscles of the Eye.

Consider the incessant work of the Eye, the instantaneous and exact adjustment demanded that sight may be always equal, single and ready to every change in position, distance and light. The nerves compel and control the mechanism in these instant adjustments. The mechanism may be defective, that is—

There may be defects in the structure, or focus of one or both Eyes;

The Muscles may be imperfectly balanced, so that both Eyes do not work in harmony;

There may be inability to focus for close work;

There may be strain through overwork, abuse, poor lights, bright reflections, etc.

*An examination will tell you just what condition your Eyes are in.*

### WHAT ABOUT THE LAWN-JUDGING?

Some persons are naturally inquiring when the judging of lawns in the competition, under the auspices of the Horticultural Society, is to take place. It is pointed ut that the season is getting late; that lawns and flowers are getting beyond their best, and can with great difficulty be retained in good condition and that the leaves begin to fall and litter the lawns very untidily. "The Preacher" tells us that "for everything there is a season and a time to every purpose under heaven." The lawns are "under heaven" and under heaven's showers, and sunshine they are in the best shape, and the flowers in the finest bloom considerably earlier in the season than the present. Will someone tell us when the lawns are to be judged?

### THE CATTLE EMBARGO.

John Bull is a sturdy old gentleman, both in physique and morals; yet he sometimes loses sight of fair play. There was recently an outbreak of cattle disease in Yorkshire, and restriction orders were imposed; but the moment the actual danger disappeared the order was revoked by the British Board of Trade. This was fair and right. There was no justification in retaining in force a necessarily vexatious order after its purpose had been served. In this case there was actual disease and, of course, danger to neighbouring herds. For the past generation British embargo has rested on Canadian cattle, although it was based upon a bogus case or two; and though for years and years there has been no trace of disease in Canadian cattle shipped to the Old Country, the embargo has remained in force, and no British administration has had the courage, not to say, fairness, to remove it. It is a practical slander of the soundness of Canadian cattle, which, though notoriously free from disease, have had to be slaughtered on landing in Great Britain to great disadvantage and loss. Canada recognizes the British right to exclude our cattle in the interests of home breeding, but it is unique injustice on the part of the Mother Country to this country, to retain in force an embargo which has lost its force by the notorious freedom of Canadian cattle from communicable disease.

### WASTE AND CONSERVATION.

It is estimated by experts that the forest fires which recently devastated Washington, Oregon and Idaho and Montana, in the United States, destroyed and damaged more than seven hundred million feet of timber in these four states. Such destruction of natural assets and commercial value added to recent destruction of forest by fire in British Columbia and Northern Ontario, impresses the sense of more effective preventive measures. The Dominion Conservation Association should find here scope for its usefulness, the provincial systems of fire ranging are notoriously ineffective. It would seem thta the Conservation Commission would do well to originate and organize a system applicable to all the provinces when there is any considerable stand of timber. The application of sucha system would not be subject to the indifference of individual provinces, which now have not the initiative to devise and energ yto enforce regulations to preserve a valuable source of revenue as well of profitable exportation. A generally aplicable system would, of course, involve provincial cooperation what might be more efficiently extended by reason of its inexpensiveness and freedom from administrative responsibility. What we have, we'll save, is a sensible variant of the celebrated British motto, and upon the extent and thoroughness with which it is observed depends, to a very high degree, the future development and prosperity of Canada. Our neighbours to the south of us have offered many expensive lessons of the wickedness of waste of natural and national resources. They have taken the lessons to heart, as Canada is doing, and fotrunately we have began before there has been the great destruction of natural resources which our neighbours have permitted.

### BAD MANAGEMENT.

Toronto is a great city, but somewhat megalocephalous—to the extent that it would feel hurt at the suggestion that it could make a mistake. The National Exhibition has grown great, largely from the same cause that has influenced the marvellous growth of Canada the past fifteen years—good management. But this year there have been very serious lapses in management of details. The limelight department is a most important one, but in this there has been sad miscarriage. The Grenadier Guards Band was brought three thousand miles to charm the Exhibition visitors with its majestic music. A big reception was planned, perfect in every way, except taking the band into account. They were not informed of the reception. They consequently came in quietly in mufti and strayed away inconspicuously to their hotels and the crowd of ten thousand receptionists was robbed of its prey.

Another blunder in management was the failure of the pyrotechnic welcome to Sir Baden-Powell, perfect in every way except that the subject of the reception was utterly ignored. He, therefore, got off at a suburban station, and thus escaped a great reception.

But the biggest blunder of all came later. After bringing the distinguished warrior three thousand miles to open the Exhibition, and give a little speech, which would be well worth hearing, he was compelled to speak in competition with a brass band in full cry, the band of the Highland Regiment playing vigorously during the progress of his speech. Common courtesy would suggest that it is good manners to listen to a gentleman when he is speaking. Sir Baden-Powell is not much given to speech-making, and when he essays it he should have a fair chance of being heard.

Yet, in spite of these little blunders of management Toronto retains her smug complacency, and the "greatest annual exhibition" is a tremendous success, a credit to not only Toronto, but to Canada.

### POLES AND PAVEMENTS.

Ottawa is setting a splendid example in making arrangements to remove the telephone, telegraph, and lighting poles that disfigure and obstruct its streets. No city nor town can have good and beautiful streets where hideous lines of poles, with sagging wires exist. No work of permanent paving or improvement of streets is justifiable where there are poles to interfere with a desirable result. They are an obstruction to the first essential to permananetly good streets, drainage by the gutters; the poles are placed in the gutters and constitute dams at every hundred feet or so. Our city fathers are wise in postponing the permanent paving of George street till the poles are removed. At least, it looks as if the proposal were, for the present, abandoned, from the fact of the street being treated to a top dressing of baby boulders and building stone. Ottawa is to be commended for its enterprise and progressiveness in its anti-pole crusade. Peterborough should follow its example. When it has eliminated the pole nuisance, then, and not till then, will it be in a position to consider the matter of permanent street improvement. But altogether apart from the paving consideration, the removal of street poles would be an immense boon to the citizens. On Hunter street, where the poles have been removed, we can see the vast improvement which their disappearance makes.

We can't have beautiful streets or attractive boulevards, or sightly private premises, so long as we tolerate the poles. One of the lawns entered for the lawn competition this season is fronted by a beautiful boulevard, with neat concrete curbing, and tidy street in front—perfect, except for being disfigured by a ghastly pole in the midst of the velvetty turf of the boulevard, not only a present disfurement, but subject to being dug up and shifted any day. A neighbour contemplating putting in a curb in his boulevard, said he would not do it so long as a pole was planted there. It had been shifted so often that the grass was constantly disturbed and littered with earth and gravel. We thus are advised of the necessity of the removal of poles from the streets and enclosing the wires in underground conduits, if we expect to have streets fit for permanent pavements, or capable of being made permanently beautiful.

**PILES** Dr. Chase's Ointment is a certain and guaranteed cure for each and every form of Itching, Bleeding and Protruding Piles. Sold by druggists, or sent by mail on receipt of price. 60 cents a box. You can try it at your own expense if you first send a postal to Edmanson, Bates & Co., Toronto, for a free sample box. Dr. Chase's Ointment.

### SIR JAMES' BLUSTER.

(Ottawa Free Press)

Speaking at Nelson Sir Wilfrid Laurier gave a courteous but effective rebuff to Sir James Whitney who, in an interview with a Tariff Reform paper in London, declares that unless Britain granted a tariff preference to Canada there was every probability that the Dominion would drift away from the British Empire. Sir Wilfrid said:

I have heard it said that unless Britain gave Canada some mutual tariff arrangement there was danger of estrangement of our Dominion. This is an insult to the Canadian people. Let the world know that the loyalty of Canada to the British Empire, of which she is proud to be a part, is not dependent on any tariff agreement. Canada is united to the motherland in heart and in life, independent of all tariff arrangements.

That is the true Canadian sentiment. That is the view of this preferential tariff question that the Free Press has taken over and over again, and no later than last Saturday referring to the Whitney interview:

The probable reply of the majority of the people of the Old Country to such ungenerous bluff and bluster as that of Sir James Whitney is aptly described thus by a contemporary:

Then a voice came out of the deep heart of John Bull, "My man, aren't you fairly treated now, all the markets of Britain are open to what you have to sell, while your Canadian markets are barricaded high against what we have to sell. What more do you want? Do you ask that we tax ourselves a little more for our food and pay you higher prices for your wheat? Surely not?"

To demand at the pistol point concessions from the British people is for us to put on the coat of a churl or a fool.

**Ate Unwisely?** Sometimes people do, and suffer, because the stomach balks.

## GENERAL SMITH-DORRIEN'S WAY OF PRACTICAL MUSKETRY TRAINING

(Ottawa Citizen.)

General Sir Horace Smith-Dorrien, now commanding at Aldershot, is well known to the Canadian contingents who served in South Africa. He commanded the brigade in which the Royal Canadian regiment served at Paardeberg, and during some period of the campaign most of the mounted troops served under him. After the war General Smith-Dorrien was subsequently promoted to the Aldershot command, which is probably the best in the army, as the troops there are supposed to be under the highest possible training and ready for service in any part of the world at a moment's notice.

Like all practical soldiers who have seen service under modern conditions of gun range fire, General Smith-Dorrien evidently considers that target shooting at fixed ranges while useful as primary training for the recruit in teaching him how to set his sights and hold his rifle, by no means fulfils the necessity of more advanced instruction. Under this instruction soldiers, instead of having their ranges marked for them, must be able to estimate distances not only with a fair degree of accuracy, but with considerable rapidity. This can only be secured by considerable training in range estimation, supplemented by actual tests in the field. A correspondent has forwarded to The Citizen the following description of a new system of instruction devised by General Smith-Dorrien and put into operation only ten days ago at Aldershot:

The shoot is open to teams of 30, commanded by an officer. In its first phase a team is marched into a valley from which nothing is visible but the hillside with its overhanging bushes. Suddenly a scout descends the hill and whispers to the captain of the team that the head of a column is visible on a hill some nine or ten hundred yards away. Instantly the team dashes to the top of the eminence, and for two minutes and a half rains bullets at the troops which stand boldly out against the distant skyline. The column disappears, and the team charges forward, to be brought to a sudden halt by the spectacle of a line of skirmishers about 500 yards ahead. Instantly the men fling themselves on their faces, and spurts of sand around the heads peering from the heather 500 yards away tell that bullets are finding billets of some sort.

In a few seconds the skirmishers, too, disappear, but before the men of the team can rise to their feet a column of cavalry rides obliquely across their front, and another storm of rifle fire breaks out. The horsemen gallop to an adjacent thicket, and the team rises and charges rapidly towards the line of flight, to be again arrested by the spectacle of the dismounted cavalrymen spread out in skirmishing order at the bottom of an unexpected nullah. Again the crackle of rude fire begins and continues until the arresting whistle of the umpire, notifies the close of the test.

The competition brings the soldier as near to active service conditions as anything can do short of an armed enemy. The distant column of infantry is represented by disappearing screens, and the first line of skirmishers by vanishing head and shoulder targets. The cavalry target is more complicated and consists of life-size figures of men and horses mounted on a cable-controlled trolley.

To-day the eliminating stages had reduced the original 60 teams to 6, which will compete in a final phase on Friday. Of the six teams, three belong to the 3rd Rifle Brigade.

It will be noted from the above that the test is largely similar to that which the Artillary have to undergo at Petawawa each year, except that of course, in the case of the big guns the distances are much longer. It also approximates the suggestions made in these columns last week, except that instead of thirty men, The Citizen suggested that the ordinary militia company of forty-two men should be the unit, under the command of its three officers. When shot, there would be little difficulty in carrying out similar training almost anywhere in Canada where hilly ground exists. One of the strongest complaints that come from the rural infantry and cavalry regiments is that they have no rifle ranges. The creation of a rifle range means considerable work in the way of erecting targets, stop butts, places for the markers, and marking apparatus, and the building up of comfortable positions for the marksmen to lie down upon at every hundred yards on the range. Under such a system as has been introduced by General Smith-Dorrien practically the same course of training could be secured at comparatively little expense if the competitive incentive existed as between companies of rural regiments, their officers would have comparatively little difficulty in almost any locality in securing the use, say, on Saturday afternoons, of a stretch of open country with a good sized hill or ridge at the end of it, which would act as a stop butt for bullets. A few dozen dummy figures consisting of pieces of one inch board would be all the targets necessary, and they could be placed in different positions for each practice by a small range party sent out beforehand. In the same way disappearing and moving targets can be manufactured and operated at a minimum of expense. A few hundred yards of wire cable attached to a light framework, with casks for rollers and wooden figures above, will provide a first rate cavalry target, and a line of white wooden disks or squares on a framework can be operated in a similar manner from a flank, so that when the wire or cable is tightened the target will rise up out of the ground and fall back again. All this simple apparatus could be extemporised by even a rural infantry company or the members of a rifle association at comparatively little expense or trouble, and the practice would be found so interesting as to gradually stimulate preparatory training before the companies went to camp. As a result of the subsequent tests at the district training camps the best companies could be selected for competition at one general meet. Even if twenty companies were so selected and their transport paid by the government, it would only mean the moving of about 800 men, and the competitions that would result would be extremely interesting both from the standpoint of the competitors and of the spectators. And best of all, the training so secured would prepare the militia of Canada for real service.

Training in estimation of distances calls for no expense whatever, and very little trouble. It can be carried on during rests between drills at a training camp or at any other convenient time, and would prove highly interesting to the men as a respite from the goose step, forming fours, and counter marching, which at present constitute almost their only training in camp.

**CANADIAN PACIFIC RAILWAY**
Leave Toronto for Peterborough 9:02 a.m., 10:00 p.m. from Aug. 31st to Sept. 10th. Local train will leave Toronto at 6 p.m. and run Sept. 10th to Sept. 13th extra train will leave Toronto at 10:30 p.m., daily except Sunday. 4d49

# "THE PILLAR OF LIGHT"

By Louis Tracey, (Copyrighted)

(Continued from Wednesday)

wi' the wind backin' round to the nor'ard it on'y means a drop o' wet."

"You think we will make the rock in good time?"

"We'm do our best, Miss Enid."

She sat up suddenly.

"Don't you *dare* tell me, Ben Pollard, that after all we've done preparations we may have to turn back, or run for *mybonnis* shelter into Lamorna."

Her mock indignation induced a massive grin. "A," mahogony table breaking into mirth," was Enid's private description of Ben's face when he smiled.

"Ee knaw the coast as well as most," he said. "Further go, stronger blow, 'ee knaw."

"And not so slow, eh, Ben? Really you and the Daisy look more tubby every time I see you."

Thus disparaged, Pollard defended himself and his craft.

"Me an' Daisy 'll sail to Gulf Light quicker'n any other two tubs in Penzance, missy. Her be a long run at this time o' year, but you'm get there all right, I 'xpect. Wi' a narrard breeze we'm be safe enough. If the wind makes 'ee c'n zee et comin', 'ee knaw."

She laughed quietly. Any reflection on the spanking powers of his pilchard-driver would rouse Ben instantly.

"As if I didn't know all you could teach me," she cried, "and as if any one in all Cornwall could teach me better."

The old fisherman was mollified. He looked along the quay.

"Time we'm cast off," he said. "Miss Constance be a plaguey long time fetchin' *them* wraps."

"Oh, Ben, how can you say that? She had to go all the way to the cottage. Why, if she ran—"

"Here she be," he broke in, "an she b'ain't runnin' neither. Her's got a young man in tow."

What announcement would straighten the back of any girl of nineteen like unto that? Enid Trevillion turned and stood upright.

"Why, it's Jack!" she cried, waving a delighted hand.

"*So it be*," *admitted* Pollard, after a surprised stare. "When I look landword my eyes b'ain't so good as they was."

He stated this fact regretfully. No elderly sea-dog will ever acknowledge to failing vision when he gazes at the level horizon he knows so well. This is no pretence of unwilling age: it is wholly true. The settled chaos of the shore bewilders him. The changeful sea cannot.

Meanwhile, the dawdlers lining the *wharf, following* Enid's signals with their eyes, devoted themselves to a covert staring at the young people hurrying along the quay.

Constance Brand, being a young and pretty woman, secured their instant suffrages. Indeed, she would have won the favourable verdict of a more severe audience. Taller than Enid, she had the brown hair and *hazel eyes of her father*. To him, too, she owed the frank, self-reliant pose of head and clearly cut, refined features which conveyed to others that all-important first good impression. Blended with Stephen Brand's firm incisiveness, and softening the quiet strength of her marked resemblance to him was an essential femininity which lifted her wholly apart from the ruck of handsome English girls, who find delight in copying the manners and even the dress of their male friends.

Her costume was an exact replica of that of Enid. She walked well and rapidly, yet her alert carriage had a grace and subtle elegance more frequently seen in America than England. Her lively face, flushed with exercise, and, it may be, with some little excitement, conveyed the same Transatlantic characteristic. One said at seeing her: "Here is a girl who has lived much abroad." It came as a surprise to learn that she had never crossed the Channel.

The man with her, Lieutenant John Percival Stanhope, R.N., was too familiar a figure in Penzance to evoke muttered comment from the gallery.

A masterful young gentleman he looked, and one accustomed to having his own way in the world, whether in love or war. True type of the British sailor, he had the physique of a strong man and the adventurously cheerful expression of a boy.

The skin of his face and hands, olive-tinted with exposure, his dark hair and the curved eyelashes, which drooped over his blue eyes, no less than the artistic proclivities suggested by his well-chiselled features and long, tapering fingers, proclaimed that Stanhope, notwithstanding his Saxon surname and bluff bearing, was a Celt. His mother, in fact, was a Tregarthen of Cornwall, daughter of a peer, and a leading figure in local society.

One may ask: "Why should a youth *of good birth* and social position be on such terms of easy familiarity with two girls, one of whom was the daughter of a lighthouse-keeper, and the other her sister by adoption?"

Indeed, a great many people did ask this pertinent question; among others Lady Margaret Stanhope put it often and pointedly to her son, without any cogent answer being forthcoming.

If she were denied enlightenment, although her maternal anxiety was justifiable, the smokers on the pier, *as representing* the wider gossip of the town, may also be left unsatisfied.

"This is a nice thing," he cried, when he came within speaking distance of the girl in the boat. "I manage to bamboozle the admiral out of three days' leave and I rush to Penzance to be told that Constance and you are off to the Gulf Rock for the day. It is too bad of you, Enid."

Eyebrows were raised and silent winks exchanged among the human sparrows lining the rails.

"So Master Jack came to see Miss Trevillion, eh? What would her ladyship say if she heard that?"

"Why not come with us?" The audacity of her!

"By Jove," he agreed, "that would be jolly. Look here. Wait two minutes until I scribble a line to the mater—"

"Nothing of the sort, Jack," interposed the other girl quietly, taking from his arm the water-proof cloaks he was carrying for her. "You know Lady Margaret would be very angry, and with very good reason. Moreover dad would be annoyed, too."

"The old girl is going out this afternoon," he protested.

"And she expects you to go with her. Now, Jack, don't let us quarrel before we have met for five minutes. We will see you to-morrow."

He helped her down the stone steps.

"Enid," he murmured, "Connie and you must promise to drive with me to Morvah in the morning. I will call for you at eleven sharp."

"What a pity you can't sail out to the rock with us to-day. To-morrow is so distant."

The minx lifted her blue eyes to his with such ingenuous regret in them that Stanhope laughed, and pipes were shifted to permit the listeners above their heads to snigger approval of her quip.

"Dad will wig us enough as it is, Enid," said the other girl. "We are bringing him a peace-offering of fruits of the earth, Jack."

"Will you be able to land?"

"One never can tell. It all depends on the state of the sea near the rock. Anyhow, we can have a chat, and send up the vegetables by the derrick."

"We'm never get there thicey tide if we'm stop here much longer," interrupted Ben.

"Hello, old grampus! How are you? Mind you keep these young ladies off the stones."

"And mind you keep your tin-pot off the stones," growled Pollard. "They was a-sayin' last night her were aground at Portsea."

"They said right, Father Ben. That is why I am here."

Enid glanced at him with ready anxiety. There was nothing of the flirt in her manner now.

"I hope you had no mishap," she said, and Constance mutely echoed the inquiry. Both girls knew well what a serious thing it was for a youngster to run his first boat ashore.

"Don't be so glum," he chuckled. "*I am all right. Got a bit of kudos* out of it really. We fouled the Volcanic and strained our steering gear. That is all."

It was not all. He did not mention that, during a torpedo attack on a foggy night, he ran up to three battleships undefended by nets and stencilled his initials within a white square on five different parts of their sleek hulls, thus signifying to an indignant admiral and three confounded captains (dictionary meaning of "confounded") that *these leviathans* had been ingloriously sunk at their moorings by torpedoes.

"It sounds unconvincing," said Constance. "You must supply details to-morrow. Enid, that horrid pun of yours ruins the word."

"Are we also to supply luncheon?" chimed in Enid.

"Perish the thought. I have lived on sandwiches and bottled beer for a week. There! Off you go."

He gave the boat a vigorous push and *stood* for a little while at the foot of the steps, ostensibly to light a cigar. He watched Constance shipping the rudder whilst Enid hoisted the sail and old Ben plied a pair of oars to carry the boat into the fair way of the channel.

They neared the harbour lighthouse. The brown sail filled and the Daisy got way on her. Then she

(To be continued)

Stomach Troubles

OFTEN COME FROM WEAK, EXHAUSTED NERVES — GREAT RESULTS FROM USING.

DR. CHASE'S NERVE FOOD

When the nerves become exhausted the first sign of trouble often comes from the stomach. The nerves which control the flow of digestive fluids fail and the result is loss of appetite, indigestion, nervous headache and sleeplessness.

Opiates and narcotics cannot possibly do more than afford temporary relief, and aids to digestion are merely make-shifts. To get well you must get the nervous system back into condition by such treatment as Dr. A. W. Chase's Nerve Food. Here is a letter which illustrates the point.

Mr. John McLean, 316 Hunter St., W., Hamilton, states: "My trouble was principally with my stomach. As a result of weak nerves my appetite was poor, and I had severe attacks of indigestion. I found that Dr. Chase's Nerve Food relieved me and since using it regularly for some time my digestion is excellent, my appetite is good, my nerves strong and vigorous and I feel an altogether different person. I feel very grateful for the benefit I have derived from this medicine."

If you are in earnest about a cure why not make it thorough by using Dr. A. W. Chase's Nerve Food regularly and persistently until the whole nervous system is restored and you can know again the joys of living."

Dr. A. W. Chase's Nerve Food, 60 cents a box, 6 for $2.50, all dealers; or Edmanson, Bates & Co., Toronto.

# BOY SCOUTS GIVEN RECEPTION ON RETURN

Continued from Page 1.

and I feel sure that it cannot help but be an inspiration to you. I congratulate you heartily. You deserve the reception.

The boys greeted the speech with the characteristic Scout cheer. Placing their Stetson hats on their long staves they waved them vigorously, while they gave three cheers for Col. Stevenson and the Bugle Band with right good will. The crowd then followed with three enthusiastic cheers *for the Boy Scouts*.

**Praise From "B. P."**

Scout Master Waring expressed the thanks of the boys for their reception. He explained that the Peterborough Scouts had had a lot of hard work, but had given a good account of themselves. They arrived in Toronto early Tuesday morning and went direct to the encampment in the Exhibition grounds. Then they had to parade to Trinity College for inspection and in the afternoon took part in the review at the Exhibition. "When General Sir Robert Baden Powell finished reviewing our patrol," remarked the scout master, "he said to me, that we were the cleanest and smartest squad of boys in the whole review. As there were 3,000 scouts there, Peterborough evidently held its own."

The scout master then dismissed his troop with the instruction to meet for drill at the armouries on Monday night at 7:30 o'clock.

"We are open to take recruits," he explained, "but remember, we want boys of good moral standing, who obey their parents and do not smoke."

The Scouts were then dismissed after giving three cheers for the King and were taken in charge by fond mothers and proud fathers.

**What the Boys Say.**

The Examiner managed to get hold of a couple of them before they fell into the parental grasp, however, and elicited from them that they had a great time in Toronto. "Gee it was swell," said one youngster with boyish enthusiasm. "There were thousands of Scouts there from all over *Ontario*, all dressed like us and it looked fine when we were marching past the grand stand. Last night they gave each one of us a light and we did the march past with them. It looked great. We had a fine time, but it was hard work all day Tuesday. They had us marching every half hour and it was late when we got to bed. We slept in a tent at the Exhibition grounds and it rained hard through the night. The water came in under the tent and we had to get up and fix things so we did not get much sleep."

"They used us fine," said another Scout to the Examiner. "They took us all over and we saw everything around the Exhibition. It was a great time and I am glad I am a Scout. Gee, we *didn't expect* this tonight. When we got to the station and heard the Bugle Band we were wondering what was up. We didn't think it was for us."

**Tired But Happy.**

They were a tired but happy bunch of youngsters indeed and their Toronto trip and last night's reception should put the organization on a firm footing in Peterborough. There will be no trouble in getting recruits. All the "kids" in town were envious of the Scouts last night and they all want to join. Next time Baden Powell comes to Canada Peterborough will show him hundreds of Boy Scouts.

**A Step in the Right Direction.**

The movement is a step in the right direction and cannot have too many members. It teaches the boys courtesy, obedience, manliness, courage, a hatred of that which is mean and a love for that which is brave, takes him away from mischief, instils in him love of country and a desire to do right. Let the good work go on. Here's to Baden Powell and his British Boy Scouts all over the Empire.

**What the General Says.**

General Baden Powell, speaking at the banquet at the Exhibition, says of the movement:

"I have come here with a fad of my own, and I already find it received as something that may be of value to your country. And if it is extended it may be of value to the Empire also.

"The thing reflects no credit upon me. Its success depends on the manner in which it is taken up locally; and I assure you that if you make it a success you will be doing a great work.

The General went on to outline the purpose of the movement, which he pointed out, was in no sense military.

"Military drill," said he, "is inclined to develop a machine-like discipline, which we aim primarily to develop into individuality."

The scouts, he said, were taught to emulate the example of explorers, woodsmen, hunters, and such men as the members of the Royal North West Mounted Police Force. This, he said, would teach them to rely on themselves, and instil in them the manly qualities of resourcefulness, energy, endurance and pluck.

"Such men as these," he said, "full of self-sacrifice, and chivalry, are the best type of manliness in our race."

**Is it Needed Here?**

"It is for you to decide whether the movement is needed here," continued the speaker. "In the Old Country, with its great teeming cities, such training is very desirable. For, after all, they do not learn much manliness or character or energy in the schools. A man does not get on by what is taught to him in the school, but by the character which he develops in himself."

The general pointed out that the healthy boy might be inclined to have too much self-reliance and independence. Consequently the scout movement gave particular attention to instruction in discipline, courtesy, and chivalry.

"We aim to instil by example," he said, "all the points that go to make up a man of strength and character, physically as well as morally. Our scheme gives the outline. It is left to the locality to develop it."

"We have been accused of not giving much attention to religion," he continued. "To be sure, we do not deem it advisable in this connection to take the place of pastors and parents. But we expect every boy to have a religion of his own and profess it, and put it into practice while he is with us.

**One Boy's Good Turn.**

"I have received a note from one of the Toronto scouts, who says that he went to bed the other night without having done the daily good turn, which is expected of every member. Hearing a mouse struggling in a trap, he got up and handed it to the cat. (Laughter).

"There has been some criticism," said the speaker, "of our attitude towards the cadets. But I hope and believe that we are backing up the cadet movement, and filling in blanks where the sparseness of population has rendered cadet corps impossible."

**Made Fine Showing.**

It is evident that Peterborough Scouts made a fine impression in Toronto. Local people who were in attendance inform the Examiner that they were complimented most highly by General Sir Baden Powell, who expressed to Scout Master Waring his pleasure at seeing such a smart and clean patrol. The General took especial interest in the Beaver Patrol with Reginald Stratton as scout leader, as they are affiliated with the British Boy Scouts while the Beaver are members of the Canadian Scouts. The distinguished visitor shook hands with the youthful leader and congratulated him and his patrol. Afterwards the Peterborough contingent were photographed for "Exhibition Illustrated," another tribute as they were the only individual *crops to be honoured* in this way.

**Names of the Corps.**

Following are the scouts who went to Toronto:

Peewit Patrol—
Cecil Richardson.
Kenneth McClelland.
Gerald McClelland.
George Babcock.
Trevor Cuffe.
Allan Kingscote.
John Common.
Fred Walker.

Beaver Patrol—
Reginald Stratton, patrol leader.
Herbert McClellan.
Alexander Fortye.
Alfred Austin.
Sam Mills.

A PLACE IN THE FAMILY

Depend on one medicine, what would you choose? It is not difficult to guess what medicine Mrs James Gray, Bartells, N. B., would choose, for she writes: "For five years my husband and I have used Dr. Chase's Kidney and Liver Pills for kidney troubles, biliousness and constipation and find them indispensable as a family medicine."

NORMAL SCHOOL BOARDING HOUSES

Householders who can furnish rooms and board for students should send their names and addresses to the Principal of the Normal School at as early a date as possible. The School re-opens Tuesday, 20th September.

# FAMILY OF FIVE WERE POISONED BY BAD MILK

Special to The Examiner.

BUFFALO, Aug. 31.—Attacked by ptomaine poisoning probably caused by drinking impure milk, five members of the family of Frank Parlotta, of 18 Morgan Street were hurried to the Columbus Hospital yesterday afternoon, and several hours later one of the children, Jeneli, 4 years old, died. The mother, Mattia Parlotta, 36 years old, is said by physicians to be in a dangerous condition. Her other three children, Nichola, Giuseppe, and Vincenzo are expected to recover.

Th milk that is supposed to have poisoned them was served during a little lunch in the Parlotta home, Saturday evening. During the night all of the members of the family, with the exception of the father, Frank Parlotta, became ill. Parlotta summoned Dr. Giambrome, who sent all five to the Columbus Hospital. There the mother and Jeneli continued to grow worse and last evening the child died. Medical Examiner Danser sent the body to the morgue and an autopsy will be held.

Superintendent of Police Regan sent several detectives to make an investigation and they learned that E. A. Gilmour, of 326 Front Avenue, had sold the milk to the Parlotta family, and seized several cans of the fluid. They will be subjected to an analysis. Gilmour told the authorities last night that he had always tried to keep his milk cans and refrigerators absolutely clean, and that he had never received a complaint concerning his goods. He has not been placed under arrest.

# CHILD A TORCH

**Sparks From Bon-Fire Ignites Skirt and She Runs Down Hill With Clothes Ablaze**

Examiner Special.

CORRY, Aug. 31—Screaming in agony, little Minnie Hanson, ten-year-old daughter of Nels Hanson, ran down a hill near her home yesterday, her clothes in flames. The little girl was playing with a number of other children about a bonfire. Suddenly a spark touched her flimsy dress and in a moment the flames were greedily licking up her clothes.

A passerby caught the crazed child and tearing the burning garments off, wrapped her in his coat and rolled her on the ground. The flames were extinguished before they reached her face, saving her life. Medical aid was summoned, and it was found she was seriously burned about the back and arms, but will recover.

**HEALTHY PLANTS**

**Require the Most Careful Attention as Well as Good Soil.**

Did you ever see a rosebush which—despite the most beneficent environment of soil of sunshine—and of atmosphere—seemed never to achieve a healthy growth.

A ton of manure will not help a plant that has canker eating out its heart.

You must destroy the cause before you can remove the effect.

You cannot cure Dandruff and Baldness by rubbing on hair lotions, and rubbing in vaseline, etc.

You must look to the cause of the trouble it's a germ at the roots of your hair which causes it to fall out.

Newbro's Herpicide destroys the germ, and healthy hair is the sure result.

Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

For sale by McDermid and Jury, druggists; also Payne's drug store. $1 bottles guaranteed.

Miss Moore has been a faithful and energetic worker here, and will be greatly missed in local church circles where she has been a popular and prominent figure

If your hair is thin, brittle or poorly nourished, apply Bearine, (made from Canadian bear grease.) It saves hair. 50c. a jar.

# JUMPED IN RIVER

**Wisconsin Politician Was Driven Insane by Charge of Grafting**

Examiner Special.

LACROSSE, WIS., SEPT. 1.—Driven insane by the charge of grafting, which political opponents held over him, Frank L. Tucker, Republican candidate for State Attorney-General, committed suicide by jumping in Oshkosk River. He was charged with using state envelopes and postage to the value of fifteen dollars in circulating campaign literature.

# ONE DEER PER MAN IS THE RULE THIS SEASON

(Ottawa Free Press.)

With a view to reducing the annual slaughter of deer, the Ontario and Quebec authorities have made a provision that for this season each licensed hunter will be allowed to shoot but one deer. The true sportsman is not likely to complain over this regulation. It is to his interest to see that our valuable game supply is not permitted to become extinct.

In the olden days we recklessly killed off the buffaloes that roamed the prairies by the thousands. We see the mistake now when it is too late. Government restrictions would have preserved the buffalo and left us one of the most valuable of Canadian game animals.

For the past few years the deer slaughter has been mounting up annually. Not long ago it was 5000 dead deer that were shipped out of the wilds annually by the express companies. Last year it was more than double that figure, even with a shorter period than that which used to prevail. There were probably 10,000 more that were left fatally wounded or dead in the woods.

There are good and valid reasons for imposing the restrictions that are announced.

# MANY ARRESTED

**Hungry Strikers Plead Story of Lazarus and the Rich Man.**

Examiner Special.

NEW York, SEPT. 1.—Pleading the story of Lazarus and the rich man, about four hundred striking garment workers invaded fashionable Fifth Avenue this morning crying for work or bread. Sixty-three men and eleven women were arrested, charged with disorderly conduct.

Sixty-three men and eleven women garment workers were arrested parading Fifth Ave. to-day and were each fined $3 by Magistrate. The majority couldn't pay and were returned to confinement.

T. C. Elliott, 392 George Street.

# THREE KILLED BUT ALAS THE UMPIRE ESCAPED

BROOKS, GA., AUG. 31.—A ball game between negro teams for the championship of Fayette county yesterday broke up in a riot in the 9th innings, and, as a result three ball players are dead, three probably fatally injured, and several more or less seriously hurt. The dead men are "Kid" Iverson, Kim Barrett and Harvey Mayes, members of the Brooks team, which was opposing the Hartford team.

Pistols, knives, and baseball bats were used in the riot, scores of spectators taking sides with the rival teams.

The trouble was caused by a close decision of Umpire Smith in the ninth inning, which allowed the Brooks team to score the winning run.

Members of the Hartford team and friends at once moved on the umpire, who was protected by the Brooks team. Although nearly all the fighting raged about the umpire, he escaped without serious injury.

**Dr. McPherson, Medical Health Officer, will be in his Office, corner Murray and Water Sts. the first Saturday in each month from 1 to 3 o'clock for the purpose of vaccinating those who are unable to pay for it.** 2d-52

# A BIG 'LUNGE

The biggest lunge captured in the Otonabee river this year, and one of the biggest recorded this season anywhere in the district, has fallen a victim to Mr. T. H. Hooper. While trawling near the mouth the Otonabee Mr. Hooper hooked on to the big fellow and landed him after a hard fight. When brought to Peterborough and placed on the scales he was found to weigh exactly twenty pounds while he measured four feet in length.

**Dr. de Van's Female Pills**

A reliable regulator, never fails. While these pills are exceedingly powerful in regulating the generative portion of the female system, they are strictly safe to use. Refuse all cheap imitations. Dr. de Van's are sold at $5.00 a box, or three for $10.00. Mailed to any address. The Scobell Drug Co., St. Catharines, Ont.

# FORMER CITIZEN DIES SUDDENLY: IN THE WEST

**James Warnes, Formerly Steward of the Peterborough and Albany Clubs, Passes Away at Saskatoon.**

**WELL KNOWN HERE**

His many friends in Peterborough especially the older residents, will learn with deep regret of the sudden death in Saskatoon, Sask., of Mr. James Warnes, a former resident of Peterborough. The deceased came to Peterborough about twenty-five years ago and entered the employ of Mr. Alex. Elliott, who was then engaged in the grocery business. He was with Mr. Elliott about five years. Afterwards he was steward of the Peterborough Club for some time and then occupied a similar position with the Albany Club. Afterwards he went to Pigeon Lake to take charge of the property of Mr. Bates at Oak Orchard. On his return to Peterborough, he was engaged for some time as agent for a steam heating system. Afterwards he was employed by Mr. John Crane. He left Peterborough some years ago for the west.

A Saskatoon contemporary has the following to say of his death:

James Warnes, of 312 Avenue D., died suddenly about 3:30 yesterday afternoon at his home from heart disease. Deceased, who was 52 years of age, was the janitor of the Drinkle block, and was at work till noon yesterday, when he went home to dinner. After dinner he complained of feeling cold [illegible] his chair up to the stove, sitting there some time, but as he still felt the cold he rose and put on a sweater. His wife suggested that he should lie down on the sofa and she would cover him up warmly. Just as he went to lie down as she had suggested, he passed away. Medical aid was telephoned for but before the doctor's arrival life was extinct.

The remains are at his home on Avenue D. The funeral will be held to-morrow at 2 o'clock and the body interred at the city cemetery.

It was from the deceased's home that the late Mrs. Burgess was buried last Sunday.

Warnes leaves a wife and grown up family of five, four girls and one son.

**CANADIAN PACIFIC RAILWAY**

# SUITS and COATS

The beauty of the new Autumn showing of Women's Suits and Coats is almost beyond description. Already we have had very favourable criticism from women who know & are lovers of refined style & graceful lines in wearing apparel. We have on exhibit in our centre window to-day three select models which are fair representatives of the styles most popular this season. A visit in our spacious showroom on the second floor will reveal dozens just as nice and perhaps some will suit you better—We have styles for all tastes—Come. :: :: :: ::

DEPARTMENT STORES Gossman's

## THE EVENING CHIT-CHAT

By Ruth Cameron

Is it safe and proper for a young girl to travel alone, when necessary?" is a question that is sometimes put to me, and I have always one answer for it.

It depends on the girl.

Some girls I'd back to travel around the world alone absolutely unmolested, and others I wouldn't be sure could make a hundred-mile journey without being liable to insult and annoyance or even worse.

In the first place it undoubtedly makes a difference whether a girl is striking looking or not.

Beauty is a great blessing but also a bane. If you work with a very sharp tool you can accomplish more than with the less keen instrument, but you are also in more danger of getting badly cut. Beauty is like an exquisitely keen tool.

But please don't think that I mean that a pretty girl *should* never travel alone.

Not by any means.

I simply mean that other things being equal a striking looking girl is always less safe from undesirable attentions than her plainer sisters.

But there is one quality infinitely more important than beauty or the lack of it for the girl who is obliged to travel unchaperoned.

And that is common sense.

With it Helen of Troy would be quite safe anywhere. Without it the most beautiful woman in the world might get into trouble.

So if your girl has good common sense, no matter how pretty she may be, I don't believe you need have any fear of permitting her to travel alone when occasion demands it.

Of course, see that she goes dressed very quietly. A striking gown is as bad for the purpose of the girl who wants to avoid undesirable attentions as a pretty face. Or rather worse because it shows a deliberate effort to win attention.

Warn her to speak very quietly. The refinement of a quiet voice and manner is an armour that few will attempt to penetrate.

Impress it very strongly upon her that if she must ask directions at any time, she shall not ask them of a passerby or cabman, but only of a regular policeman.

If it is possible to get along without the use of cabs or hacks in a city of which she has no knowledge, I think it is infinitely better for an unchaperoned girl to do so, but of course that would not always be possible.

If she is to go to a hotel have it arranged so that she will arrive as early in the day as possible and as it if possible have the room engaged in advance.

Never—

But here I am at the end of my space and the half of what I'd have you advise that hypothetical daughter not yet told.

Suppose I say the rest to-morrow.

Ruth Cameron

## NON-UNION MOULDER VICIOUSLY ASSAULTED

**Was Knocked Down With a Black-Jack and Kicked Into Insensibility.**

**DRAGGED FROM CAR**

Special to The Examiner.

LOCKPORT, Aug. 31.—John Cronge, an elderly non-union moulder of Buffalo, who was employed at the Dussault foundries here, is in a precarious condition at the Sisters' Hospital, Buffalo, and the fact has added another chapter to the violent strike, which is now in its eighth week. Cronge was hit in a car going to Buffalo Saturday night and two Lockport men, whose names the authorities have not given out, are alleged to have done the job as the car stopped at Pendleton, seven miles west. Arrests are expected.

Cronge was going to Buffalo with a dozen other strike-breakers to spend Sunday with his family. He stood on the rear platform. Suddenly there was a scuffle and he was knocked down by a black jack in the hand of a man near him, according to the railway officials. Another immediately gave him a kick and then both pulled him off the platform and jumped on him as he struck the ground. He was left unconscious and the men got away.

Cronge was taken to Buffalo. Albert Dussault of the Dussault foundries states that his nose and two ribs were broken, his face and body badly cut, and he was given a kick in the groin which may prove fatal. Dussault immediately took up the prosecution of the case and laid it to the union men. Arrests will be made and the case taken up immediately. The International Railway Company officials are incensed about the assault and Supt. Thomas Kinsella of the Buffalo-Lockport Olcott division, laid the matter before the local police yesterday, saying that the conductor would be ready to tell the story of the affair.

"The D&L" MENTHOL PLASTER

**WHAT PARISIAN SAGE WILL DO OR MONEY BACK**

Stops falling hair in two weeks. Cures dandruff in two weeks. Stops itching scalp immediately. Grows more hair. Makes harsh hair soft, silky and luxuriant. Brightens up the hair and eyebrows.

As a hair dressing it is without a peer—it contains nothing that can possibly harm the hair, it is not sticky, oily or greasy, it is used by thousands to keep the hair healthy—it prevents as well as cures diseases.

For women and children it is the most delightful dressing and should be in every home. Druggists everywhere and Wm. Madill sell it for 50 cents, a large bottle. The girl with the auburn hair is on every bottle. Mail orders filled by Canadian makers, Giroux Mfg Co., Fort Erie, Ont.

The Girl With the Auburn Hair is on every package

## THE LESSON TAUGHT BY A BOTTLED CUCUMBER

Mr. Wm. Ashley, of Mark street, Ashburnham, has been amusing himself this summer by growing, under glass, a rather phenomenal cucumber. He enclosed a cucumber, still attached to the vine, in the early period of its growth in a cylindrical half-pint bottle, about two inches in diameter, and about seven inches in length. The cucumber has grown so that it completely fills the bottle, conforming to its interior shape—a mystery to anyone not knowing the circumstances, as to how the cucumber could thus be placed in the bottle. This is a type of the manner in which moral growth can be influenced. Take a child at an early age, surround him with good influences and environment, and he will take the form of his surroundings, and develop growth in moral qualities from which he cannot or will not, escape, any more than the cucumber can escape from the bottle. The Boy Scouts, captured young, and subjected to the influences of training, surrounded with the influences of discipline and respect for authority, and they will grow into men who will live in society with the environment of good character and wholesome lives.

**IT'S WORRY THAT KILLS**

Nothing so wastes the vital nerve force as worry. Nothing so certainly retards restoration to health. Get out into the sunshine, be cheerful, use Dr A. W. Chase's Nerve Food to rebuild the wasted, nervous system, and you will be surprised how quickly there will be a change for the better. This advice will be better than gold to you if you will but follow it.

**SOCIAL DANCE**

**A dance will be held in the Chemong Park Pavilion on Thursday night. Halpany's Orchestra will provide music. 2-51**

## BURGLARS VERY NEARLY ASPHYXIATE A FAMILY

**Break Open Gas Meter in a House and Leave Gas Escaping --- Sleepers Have Narrow Escape --- Heroic Measures Save Their Lives.**

Special to The Examiner.

PHILADELPHIA, Aug. 30.—A gas main torn open by thieves in attempting to rob a slot meter in the basement of Harry Pyken's home, at 55th and Pearl Streets, poured a continual stream of gas into that house and the one adjoining until 7 o'clock, when it was found that 10 persons were lying in the two houses unconscious from breathing the fumes.

All were resuscitated through the vigorous measures taken by Dr. Kiley of 39th Street and Haverford Avenue, but if the main had been left open a half-hour longer it is his opinion that not one of the 10 would have survived.

A number of other persons in the same row of houses were affected, and many were taken with fits of vomiting.

TRIED TO AROUSE SLEEPING INMATES

The escaping gas was detected by John McCallin of 5434 Haverford Avenue. He summoned some of the neighbors, and while two men attempted to shut off the gas he began trying to arouse the inmates of the house.

Unable to get any response, he climbed the fence and clambered to the second floor window by means of a rain conductor. Breaking in, he saw a cat lying dead on the floor, and at the same time he was met with a rush of gas.

He stuck his head out of the window to take a breath of air before attempting to arouse the sleepers, and to his surprise saw a youth lying in the back yard.

This was James Bennett, who had left his bed because of the fumes. Pyken and his wife, who were the only other occupants of the house, were aroused with great difficulty.

Next door to the Pyken house there were seven persons—Mr. and Mrs. Heyne and their four children, Grace, Helen, Emma and Ethel, 11, 8, and 3 years, and 9 months old, respectively, together with Mrs. Heyne's mother, Mrs. Mary A. Bennett.

GIRL FELL IN SWOON

Mrs. Bennett, Grace, and Helen occupied the back room. Grace was the only one to awaken of her own accord, and, knowing that something was wrong, she staggered into the front room, but there fell in a swoon, striking her head on the foot of the bed. The thump aroused her father, and soon all were aroused.

Pyken said after he regained his senses that he had noticed the fumes about 3.30 in the morning but after warning Bennett he had fallen asleep again.

## WALTER WRIGHT RECEIVES PENALTY OF SIX MONTHS IN CENTRAL PRISON

**Robbed Drunken Man of Gold Watch Valued at $25—Boy of Fifteen Years Receives Term of Two Months at Hard Labour in Local Gaol.**

**TWO DRUNKS FINED**

For several hours this morning a large audience at the police court gave their undivided attention to the evidence taken in the watch stealing case, in which Ernest Lowes and Walter Wright were accused of having stolen a watch from a young man on August 24th. The complainant and defendant, Lowes, gave evidence, besides many others. The man had been working the night previous to the day of the stealing and the next morning he was at Nixon's hotel, where he saw Wright. About 4.30 in the afternoon Lowes and Wright invited him to go down to the back of the Temperance House on George street, where a keg of lager had been brought by the former at a local liquor shop. Lowes helped the man from near the C. P. R. tracks, where he fell, on account of his intoxication to a bush behind the house. A tap was put in the keg and they prepared to have a drink, but discovered that they had no utensil for drinking out of. During the performance Wright said that he was going to take the watch of the man. Lowes claimed that he told Wright not to take it and that he made the excuse to get away by saying that he would go up town and obtain a glass. They went away from the keg, Lowes going first and Wright following. Coming to Nixon's hotel Wright went in and returned with a glass and then they journeyed to the keg. They moved it across the bridge and there had drinks and then returned home for supper.

About 5.15 the young man awoke from his drunken sleep and started on his way home. Nearing his destination he found that his watch was taken. He immediately hurried to his home, obtained the number of his watch and went to the police station, where he informed Chief Thompson of the incident. That evening P. C. Meagher arrested Wright at the C. P. R. station where he, Lowes and several others were preparing to make for the keg. Wright was searched at the police station and at the court house and the watch wasn't to be found on him. On the day following Lowes, at the request of Chief Thompson, called at the police station and there told the chief that Wright had the watch. The watch was afterwards obtained of Wright at the court house.

His Worship after an examination of the evidence, convicted Wright for a term of six months in Central prison and discharged Lowes. Mr. R. E. Wood prosecuted and Mr. G. N. Gordon defended Lowes.

Roy Schweir, a mere child, in the neighbourhood of fifteen years, was given a term of two months at hard labour in the county jail for stealing a gold watch valued at thirty dollars. The boy pleaded guilty to the charge of having gone to a neighbour's house to borrow a tub, and while there he stole the watch, the lady of the house being out. Schweir, though very young, has had a large experience within his few years. When but nine years of age he was sent to the Reformatory for three years and for the past two years he has been out, during which time he committed two offences.

His Worship imposed the above penalty.

John Surrey, a Havelock police court customary, was asked to pay two dollars within ten days for being drunk in a public place. John, when arrested, had pitched his bed near the G.T.R. track, for the night.

Joseph Kenner, Rochester, was asked to pay two dollars, forthwith, for being drunk and disorderly in his boarding house yesterday, and in default of payment ten days in jail behind the inky walls. Kinner claimed the landlord stabbed him, but this was strongly denied.

## MONTREAL CROWDED WITH VISITORS TO THE CONGRESS

Special Wire to The Examiner.

MONTREAL, SEPT. 1.—The local hotels are already rushed by the influx of visitors for the Eucharist Congress, and by to-morrow their capacity will be taxed to the utmost. A great reception will be accorded Cardinal Vannutelli, Papal delegate, upon his arrival on the Empress of Ireland at Quebec this afternoon. A procession will be formed and will proceed to the throne with him, where addresses will be given by the Mayor and Archbishop.

## "I'LL KILL YOU," WAS WHAT CAUSED THE MAN TO ACT

Mr. Spis, informed the Examiner to-day that the statement made by Mr. Kenner in the police court this morning, was wrong in every way, and gave the following statements which can be verified by his (Spis) wife and two gentlemen lodgers.

"Last night about eleven-thirty, Kenner came to my house with another party who opened the door for him and then fled, as Kenner was intoxicated to extremes. Kenner scrambled upstairs into his room, where he let loose every melody that he knew and thus raised a terrible noise. Mr. W. J. Perrin, a student of Science, who is attending the Canadian General Electric works and a lodger at my house, went to Kenner's door and told him not to disturb the peace. For a short time a squabble resulted, but the student succeeded in freeing himself from the assailant's clutches and ran to his own room, going through the window and landing on the roof. He called vile names, so I put on my pajamas and went to the acting mad man. He hit me in the face and I ran down stairs and he came after calling, "I'll kill you." Then in self-defence I hit him with some light wood that lay by the stove.

A doctor on examining the cut in the side of the head will say that it was not a knife that cut him, as Kenner said in the court this morning. Several people can testify to the truth of this statement."

**WEDDING BELLS**

SHEA—CROWLEY.

On Tuesday, Aug. 30, at St. Thomas' church, Warren, Ont., by the Rev. T. J. Crowley, brother of the bride, Michael J. Shea of Cache Bay, Ont., to Miss Nellie Crowley, Warren, formerly of this city.

STERLING—GIRVEN.

A pretty house wedding took place at the residence of Mrs. Girven, William street, Lakefield, on Wednesday afternoon, when Miss Ethel Girven and Mr. Chas. Sterling were united in marriage.

The drawing room was prettily decorated with palms, and pink and white asters.

The bride wore a dainty gown of cream silk voile with touches of silver and chiffon the customary veil caught with orange blossoms and carried a bouquet of bridal roses. She was given away by her brother, Mr. H. Girven.

Miss M. Edwards attended the bride. She was gowned in pale blue silk mull with touches of gold and chiffon, and carried a sheaf of white asters.

Mr. Cecil Sterling supported the groom. Rev. Mr. Clegg, pastor of the Methodist church, officiated. During the signing of the register Mrs. H. Girven sang most acceptably "O, Promise Me."

Mr. and Mrs. Sterling left on the evening train for a short trip to Toronto and points east, the bride travelling in a tailored suit of green broad cloth, and a large Gainsborough hat. Mr. and Mrs. Sterling will make their home in Tillsonburg, Ont.

SEWARD—BRACKEN.

A pretty, but quiet, wedding was solemnized this morning at 9.30, at St. John's church, by Rev. Canon Davidson, assisted by Rev. Harry Bracken, of Toronto, brother of the groom, when Miss Lulu Alford Seward, eldest daughter of Mr. Lewis Alford Seward, 323 Simcoe street, was united in the holy bonds of matrimony to Mr. Oscar Alexander Bracken of Toronto.

Miss Harriet Kimpton, Galesburg, Illinois, cousin of the bride, presided at the organ, and played Wagner's "Bridal Chorus," and Mendelssohn's wedding march.

Mr. and Mrs. Bracken left on the second section of the C.P.R. for Quebec and Lower St. Lawrence summer points, and on their return will reside in Parkdale, Toronto.

## ALL YOUR STOMACH TROUBLE VANISHES

**No Indigestion, Gas, Heartburn or Dyspepsia Five Minutes Later**

Every year regularly more than a million stomach sufferers in the United States, England and Canada take Pape's Diapepsin, and realize not only immediate but lasting relief.

This harmless preparation will digest anything you eat and overcome a sour, gassy out-of-order stomach five minutes afterwards.

If your meals don't fit comfortably, or what you eat lies like a lump of lead in your stomach, or if you have heartburn, that is a sign of indigestion.

Get from your Pharmacist a 50-cent case of Pape's Diapepsin and take a dose just as soon as you can. There will be no sour risings, no belching of undigested food mixed with acid, no stomach gas or heartburn, fullness or heavy feeling in the stomach. Nausea, Debilitating Headaches, Dizziness or Intestinal griping. This will all go, and, besides, there will be no sour food left over in the stomach to poison your breath with nauseous odours.

Pape's Diapepsin is a certain cure for out-of-order stomachs, because it takes hold of your food and digests it just the same as if your stomach wasn't there.

Relief in five minutes from all stomach misery is waiting for you at any drug store.

These large 50-cent cases contain more than sufficient to thoroughly cure almost any case of Dyspepsia, Indigestion or any other stomach disorder.

# B. P. Wants Ship Now

**Scoutmaster, Addressing a Toronto Gathering, Describes the Methods of Training the Lads of the Empire —He Is Looking For Vessels Which Will Serve as Training Quarters For Boys on Lakes.**

Toronto, Sept. 1.—That Canada, with its lakes and waterways, is well adapted for the launching of a sea scouts organization, was a statement by Gen. Baden-Powell at the Canadian Club yesterday who drew attention to the start made on the Pacific coast and to the establishing of the Canadian navy as giving a special incentive.

It was, as J. F. McKay, president of the Canadian Club, remarked, a memorable event. The guest of honor sat between Mr. McKay and President J. Castell Hopkins of the Empire Club, and the 600 persons who crowded the banquet hall were well representative of the two organizations.

"B.-P." was greeted with a great volume of cheers. He had come to Canada, he said, with a fad and had found that it was received as something of value. From the way in which the movement was extending he hoped it would be of value to the whole Empire. He was merely offering a suggestion as to training boys. It all depended on how it was taken up in each centre.

He looked at it from a peace point of view. The aim was to cultivate the principles which actuated the frontiersman, who had promoted civilization under exceptionally difficult circumstances. These men were full of resource, hope and pluck. Men who did this work because it was their duty were the very best type of the race, and it was this type which was held up to the lads as an ideal, whatever their religion or nationality.

In the old country, with its great cities teeming with lads, such a work seemed very desirable. The boys could learn the "three R's," but not character in the schools. A man did not succeed from what he learned at school, but from the character he developed in himself. A school for character seemed needed in the old country. In Canada it was different. This country was not suffering from the same disease of unemployedness and unemployableness. The Canadian boys were fine, independent lads.

"B.-P." drew applause when he explained how the plan of offering badges for proficiency in various branches of handicraft stimulated boyish ambition. There were 32 different kinds of badges covering useful trades. The boys were not taught, but given incentive to secure training elsewhere, so that they could pass the examinations. Probably the boy would find one or other occupation most suitable and make that his life's work, "and not be absolutely helpless and hopeless like so many wasters at home to-day." One application was a bank account. While only a shilling was required, the boy had broken the ice and had his bank book.

Speaking of the latitude given scoutmasters resulting in varied activities including sea scouting and mission work, "B.-P." declared:

"With Canada's great lakes and rivers it is quite possible to raise a large force of sea scouts, and, in view of the navy, it may be useful in time to come." All that was needed was a few ships or hulks to serve as training quarters or clubs. In Vancouver a gentleman had offered a ship, and he understood it was the same in Victoria. A few more only were needed to start the sea scouts movement, and he hoped his hearers would give encouragement where they found it possible and that "the whole boyhood of Canada would be made into a solid block of good citizens."

Accompanied to the depot by prominent citizens and a body of boy scouts, the scoutmaster took the train in the evening for Ottawa.

### Monoplane Was Wrecked.

Boston, Sept. 1. Horace Kearny of Kansas yesterday made the first flight of the Boston-Harvard aero meet at the Atlantic aviation field here, and wound up in a wreck. In the Pfitzner monoplane Kearny flew fifty yards finally tumbling in a heap from a height of 25 feet. Kearny was unhurt.

# Lack Of Interest

**Indifference of Public In Civic Affairs Is Touched Upon at the Convention of the Union of Canadian Municipalities — Railways Not Doing Their Best For the Citizens of the Province of Ontario.**

Toronto, Sept. 1.—Apathy by the general public in the administration of municipal government and in solving its great problems was freely referred to at the tenth annual convention of the Union of Canadian Municipalities, which opened in the City Hall yesterday.

"I do not believe our people take an intelligent, lively and active enough interest in municipal affairs," was the way Mayor Geary put it when tendering the civic welcome.

"The indifference of the public in municipal administration gives evidence that the problem of self-government has not yet been fully solved," was the view of President W. Sandford Evans, mayor of Winnipeg.

"This country," said Mayor Geary, "is not getting the service from the railway companies which it is entitled to. We all feel that it is a matter of interest to everyone that freight and passenger traffic should receive more attention. It is a state of things that should not exist in a growing country."

The address of welcome was replied to by Ald. Delian of Montreal, representing Mayor Guerin.

'Municipal finance," said President Evans, "as a distinct problem in municipal administration, has not, I believe, received the attention its importance deserves. Municipal accounting, which is the science of keeping the record of the money raised and expended by a municipality, is very properly receiving careful consideration, but before monetary transactions can be recorded, money must be obtained, and this primary problem of raising the money, of which the account is to be kept, is not sufficiently studied or discussed.

"What principles or conditions govern the amount of money a municipality is justified in borrowing or in collecting through the rates? What is the best form of municipal securities? What are the best methods of marketing these securities? How can municipal credit best be maintained and improved? In other words, how much money should we raise and how can we most successfully raise it? No questions can be more important to a municipality, and yet there are no aspects of municipal work less clearly understood.

"Publications to which reference can be made are very few. Each succeeding administration is left to find out something by experience, or in a blind traditional way to continue to offer occasional series of securities to a market that somehow absorbs them."

He considered London the market where best terms could be obtained for issues exceeding $500,000. Issues of smaller amounts, he thought, should be absorbed in Canada.

"If smaller municipalities wish to reach London it would be better for them to accumulate securities until they can issue at least the minimum of $500,000.

Secretary W. D. Lighthall, in reporting on the work of the union, said:

"We have found specially troublesome certain large combinations. One was the Bell Telephone Co., which, as regards us, is an essentially United States corporation. After years of contestation we obtained our points and it is now quiet. Another, of Canadian origin, and which has proved the most serious and deftly managed organization the municipalities have thus far had to fight is the Mackenzie-Mann combination, which has pulled Ottawa political wires on a large scale against our cities for many years, and has been said to 'own the house.' Their enterprise is admirable, but some of their methods regrettable; perhaps we may expect more agreement with them in the future. But both are now overshadowed by a new combination to which the attention of every Canadian citizen ought to be directed. I refer to the Pierpont Morgan influence. We have it on good authority that this financial organization is so complete that all the principal city franchises, water powers and great resources generally of Canada are mapped out in New York for systematic invasion, on the same lines as those of the United States."

### May Settle Builders' Lockout.

Winnipeg, Sept. 1.—The lockout of masons and bricklayers by the contractors of the Winnipeg Builders' Exchange is on a fair way to settlement by arbitration, following mediation by Mayor Evans, who succeeded in getting the disputants together. Arbitration has been agreed upon, but the present question is as to the international union allowing the men to return to work pending the result of the arbitration proceedings. An effort to organize a Canadian national union seems to have proved abortive.

### Charge Against Choate.

Chattanooga, Tenn., Sept. 1.—Charges that Joseph H. Choate of New York, former ambassador from the United States to Great Britain, has been guilty of the violation of the constitution of the American Bar Association, in a failure to uphold the honor of the profession of the law, and a petition that he be expelled, were presented to the association yesterday and referred to the committee on grievances.

### Dr. Creed Is Dead.

Fredericton, N.B., Sept. 1.—Dr. H. C. Creed, one of the best known educationalists in eastern Canada, and prominent in the Masonic Order and Baptist denomination, died yesterday afternoon, after only a few hours' illness.

### Divided in the Grave.

Toronto, Sept. 1.—The funeral of Gustav Merkt, who killed himself after murdering his wife, took place yesterday to Buffalo. The remains of Mrs. Merkt were taken to New York City, the family ancestral [illegible]

**Is Your Loaf Like This?**

IF your flour is of the right quality, it ought to produce uniformly good bread. When the loaf comes out of the oven it ought to be appetizing and inviting in appearance. The crust should be crisp, tender and sweet as a nut. The pores of the bread should be regular showing uniform expansion by the yeast and every loaf should be light, plump and should expand over the top of the pan. Bread made from Ogilvie's

**Royal Household Flour**

always comes up to the highest standard of excellence when made right. It is always uniform and good to look at as well as good to eat.

Summer and winter, day after day, month after month, "ROYAL HOUSEHOLD" is milled by exactly the same process from exactly the same standard uniform grade of the best *Red Fyfe* wheat. And this uniformity *is guaranteed* by rigid safeguarding tests at the mills before the flour is shipped out.

Get ROYAL HOUSEHOLD FLOUR from your grocer and *stick to it.*

THE OGILVIE FLOUR MILLS CO., LIMITED, - MONTREAL.

# Preference, As Fixed

**Government Party Spends Night In Mountains and Arriving In Alberta Sir Wilfrid Receives Congratulations From American Citizens For His Work In Building Up West—Graham Loses Voice.**

Lethbridge, Sept. 1.—Leaving the Pacific coast province, Sir Wilfrid Laurier emerged yesterday morning through the Crow's Nest Pass into the fields of Southern Alberta, passing by the way the town of Frank, made famous by the rock slide of two years ago and rich coal deposits contiguous to the Crow's Nest district. Night was spent at the summit of the pass, and the first stop in the morning was at MacLeod, where a reception was tendered the Premier, who spoke briefly. Hon. F. Oliver, Minister of the Interior, stated that satisfactory progress was being made towards the settlement of the Indian reserve question, in which MacLeod is interested.

Arriving at Lethbridge at 2 o'clock, Sir Wilfrid and party were received by a large crowd and an escort of mounted police. Two thousand people attending the open air meeting in the afternoon.

In an address presented to Sir Wilfrid by the "American residents of Southern Alberta," they were gratified to observe that the Liberal Government "has anticipated the need of the future. We wish to congratulate you upon your safeguarding the future, by the foundations of a Canadian navy."

The Premier thought that, if Lethbridge shipped coal to Montana, that it would be a good argument for reciprocity. At the time the reciprocity treaty was abrogated, the claim was that it was solely of advantage to Canada. "I am not prepared to agree with that," added the Premier.

Sir Wilfrid discussed the preference at length, stating that it would remain a fixed part of Canada's fiscal policy, and answered criticisms that Canada should enact something in return, by observing "the only way in which the British Empire can be maintained in the lead is for each part to develop according to its own necessities."

Replying to the address from the Americans, Sir Wilfrid told his hearers that Canada was establishing a navy because "We think it is the duty of Canada to undertake her own share of the defence of the British Empire."

F. F. Pardee spoke in place of Hon. G. P. Graham, who has lost his voice.

### Victimizing the Charitable.

St. John, N.B., Sept. 1.—A stylishly dressed woman has victimized local merchants to the tune of nearly $400 by soliciting advertisements for an alleged W.C.T.U. shopping card, receipts from which were to be sent to Campbellton fire sufferers.

### WRECK INQUEST.

**Farmer Says Torpedo Explosion and Wreck Were Almost Simultaneous.**

Durand, Mich., Sept. 1.—The inquest into the recent Grand Trunk wreck here, in which eight lives were lost was nearly two hours late beginning owing to a conference between the members of the Michigan State Railroad Commission and Attorneys representing the Grand Trunk.

When the jurors finally got together in the diminutive town hall there was little room left for spectators, but fifty of these managed to squeeze in.

Coroner Hatchell announced that thirty witnesses were on hand to testify, but less than half of these had been heard when adjournment was taken last night until Sept. 7.

The most important witness was Alexander McAfee, a farmer of Vernon Township, whose home is less than one mile from where the wreck occurred. He had heard the torpedo explode as train No. 4 rushed down towards No. 14, the train ahead, and almost the same instant came the crush of the collisions. There could not have been more than a couple of seconds' time elapse between the two he declared.

This evidence is considered most important, fixing, as it does beyond all doubt, the fact that the track torpedo had not been placed half a mile in rear of No. 14, as the railway company has all along declared was the case.

Twenty minutes after the trains came together, McAfee swore, he had dressed and reached the scene in his automobile. By this time the Pullman, a mass of flames, and although the bodies of several of the victims could be distinctly seen inside, McAfee asserts the trainmen then near by made no attempt to rescue them.

From the line of action being pursued by the railway company, it is apparent they will endeavor to show Engineer Spencer of No. 4 is to blame for the collision, and already they are offering the press access to what are declared to be the findings of the secret railway investigation held at Battle Creek last week.

### Gen. Forestier Walker Dead.

London, Sept. 1.—Gen. Sir Frederick William Edward Forestier Walker, K.C.B., C.M.G., is dead. He was born in 1844, and had been governor of Gibraltar since 1905. He served in Bechuanaland in 1884 and was lieutenant-general in command of lines of communication in South Africa during the Boer war.

# IN THE WORLD OF SPORT

KEN CRANE

Clever Hockeyist, who is leaving Peterborough.

JACK TAIT

Famous Y. M. C. A. Athlete, who will be here for Penman games.

## WHAT PENMAN GAMES MEAN TO PETERBOROUGH

Wonder if the people of Peterborough realize just what a big thing the Penman contest to be held here Labour Day, is?

It will be by long odds the biggest athletic meet ever held in this city, and, incidentally will be the formal opening of Riverside Park as a full-fledged athletic grounds.

There has never been together in Peterborough at one time such a collection of famous athletes as will be here for the Y.M.C.A. games. The very names of such men as Jack Tait, Lou Seibert, Geo. H. Goulding, E. P. McDonald, Irving Parkes, Arnold Knox, Harry Tressider et al should be sufficient to ensure a record attendance. The keen rivalry between the West End and Central Y.M.C.A.'s of Toronto, for possession of the trophy, means that each institution will have every promising athlete attached to its colours here for the meet. Neither can afford to allow the other any advantage and therefore the events are assured of the classiest fields that have ever come together in this city. There will be competition and rivalry right from the drop of the hat in every event upon which the trophy depends and there will not be a dull moment all the way through.

*In the open events*, that is the events which are not confined entirely to Y.M.C.A. members, there will be equally large fields. Peterborough will be well represented as a number of promising athletes are in training and will endeavour to see that as many as possible of the prizes remain in this city. There is special interest in the 100 yards' race for the championship of Peterborough, which promises to be one of the big events of the day.

The appearance here of Geo. H. Goulding of the Central Y. M. C. A., Toronto, Canada's champion walker, should alone be worth the price of admission. Goulding is matched to race Webb, of England, for the world's championship at Toronto Exhibition on Sept. 10th, and this will give Peterborough people a chance to get a line on the Canadian crack. He will not be without competition here, as E. P. McDonald and others will make him step to the limit and he may be forced to break some records before he pulls off a victory.

The local Y.M.C.A. is to be congratulated upon its enterprise in securing the Penman games for Peterborough. Other cities were after the competition, and it is a tribute to the wide-awakeness of the Peterborough officials that they were enabled to pull down the plum. The Y.M.C.A. should be thanked for arranging for Peterborough the best athletic meet that has ever been seen here.

Riverside Park, where the games are to be held, is an ideal spot for such an event. A splendid track, five laps to the mile, has been completed, and is now in the best of condition. The sprinting path is laid on a parallel to the grandstand, and with the finish about the centre of the structure, so that the people in the reserve seats will have a chance to see the most exciting moments in the sprints. The park, as it is now laid, is one of the prettiest athletic grounds in Canada.

*Seats are on sale* at the Y.M.C.A. and already there has been a good sale. There will be a big attendance from outside points. Many will, of course, come down from Toronto, while Lindsay and other district points are sending contingents.

Usually the cry in Peterborough before a holiday is "Where are you going for the holiday?" There is no need of leaving the city in order to have a day's sport. The Penman games provide all the amusement that is necessary. You may never have a chance to see such a bunch of athlet together in Peterborough at one tim .

## CALGARY REFUSES TO GIVE UP THE SHIELD

### Committee Expect to Get It In Time for Big Soccer Tourney in Which C. G. E. Team Will be Contestants ---A Banquet Arranged for the Players by City.

TORONTO, SEPT. 1.—Where is the People's Shield?

Saturday at Scarboro Beach the greatest soccer tournament ever held in Canada opens and the competition continues Monday (Labour Day) and during the next week. The finest teams in all Canada compete for "the People's Shield," a trophy put up by a famous English sporting publication but right here let it be known that the whereabouts of the same trophy is a mystery.

**Callies Won't Surrender.**

The shield was originally won by the great Caledonians of Calgary, was declared forfeited last season by the trustees because the "Callies" would not play off a tie, but the cowboy soccerites refused to surrender. They clung to the trophy, and when Geo. A. Parker, the chief trustee, announced this competition, told him to go to Kalamazoo or some place else for his trophy, and that they would not play in the tourney. Parker persisted, but still no trophy was forthcoming. Then the Hillhursts of Calgary, a cracker-jack team, took up the "Callies" task, and will start East tonight, wiring that they would bring the shield with them if they had to raid the house of Dr. Ings, president of the Callies, and bring it by force.

"Now it's up to the Hillhursts," says Parker. "If they don't bring it, why I'll sue the Caledonians for it."

All of which is very fine business.

**A Civic Banquet.**

Anyway, this is such a big tourney that the city will take official cognizance, and will dine the Cobalters, the Calgarians, the Reginans, the Quakers, Gallonians, and all the other visitors Tuesday, and Tuesday night at the Toronto Rowing Club P. J. Mulqueen, Tom Flanagan, John McCarthy, Hy. Jackman, Jim McCafferty, and other well-known hotel men will entertain them with a smoking concert.

**Johnson, Too.**

Today Parker and Wm. Hilton, his right bower, received a wire from Jack Johnson announcing that he would kick off the ball on Monday afternoon.

The programme for Saturday and Monday follows:

**Saturday.**

Thistles vs. Peterborough, 2.45.
Ottawa vs. Westinghouse, 4 p.m.

**Monday.**

Cobalt vs. Montreal, 10.30.
Fort William v. Galt, 10.30.
Winner Thistles-Peterborough vs. Calgary, 4 p.m.
Winner Ottawa-Westinghouse vs. Regina, 2.45 p.m.

**OURES**

DIARRHOEA, DYSENTERY, COLIC, CRAMPS, CHOLERA MORBUS, CHOLERA INFANTUM, SEASICKNESS, SUMMER COMPLAINT, and all LOOSENESS or FLUXES of the BOWELS

MRS. HOLLIDAY, Box No. 86 Worcester, Ont., writes:—"I must say that we have used Dr. Fowler's EXTRACT OF WILD STRAWBERRY for over seventeen years, and have found nothing to equal it for all Summer Complaints, Diarrhoea, Dysentery, etc. Our house is never without a bottle of the Extract and I can recommend it to be kept in every home, especially where there are children."

**NOTICE**—We wish to warn the public against being imposed on by unscrupulous dealers who substitute the so-called "Strawberry Compounds" for Dr. Fowler's.

If you want to be on the safe side ask for DR. FOWLER'S EXTRACT OF WILD STRAWBERRY, and insist on getting what you ask for.

The original is manufactured only by The T. Milburn Co., Limited, Toronto, Ont. Price 35 cents.

MRS. HARRY GILLILAND, Cardinal, Ont., writes:—"Our baby, was so very bad with Diarrhoea that it seemed her bowels were fairly raw. We tried everything we thought would help her but failed. A neighbor advised trying DR. FOWLER'S EXTRACT OF WILD STRAWBERRY. We tried it and before the end of a week our baby was as well as ever. We always keep "Dr. Fowler's in our home."

## A PROMISING YOUNG HOCKEYIST LEAVING

Peterborough is losing another most promising young athlete next week in the person of Kenneth Crane, son of Mr. John Crane of the Dominion Bank who is leaving on Tuesday next for Toronto to accept a position with the Bank of Commerce. In his departure there is lost one of the best junior hockey players in the city. He was being counted upon for the Peterborough team for the coming winter and would undoubtedly have proved a source of strength either to the intermediates or juniors. Last winter he was the mainstay of the West End City League team, his great work at rover, especially, his splendid scoring ability, keeping the yellow and black in the hunt all the way. It was his first season in the City League but he was second best scorer, with an average of nearly four goals per game. He was also of great assistance to the Collegiate Institute O. H. A. team.

He is a promising baseball and rugby player, as well and will be great missed.

## BASEBALL YESTERDAY.

### The Eastern League.

Toronto ..... 5 1 0 0 0 0 0 1 0—7
Providence ..... 0 0 0 0 0 0 0 0 0—0

## Over 140 Entries For Penman Games On Monday Next

### Toronto West End Y. M. C. A. Heads the List With 60, While Toronto Central is a Close Second With 49.

### A GREAT MEET

That the Penman meet, to be held at Riverside Park, Labour Day, will eclipse anything ever attempted of an athletic nature in Peterborough is a foregone conclusion, with an entry list of over 140 in the different events.

Toronto West End P. M. C. A. head the list with 60 entries, including Tait, Seibert, Archibald, Bricker, Pratt, Holden, Worthington, Mel Brock and several other good men.

Toronto Central has 49 and will be headed by George Goulding, the world's greatest walker, who is to meet E. J. Webb, of England, at the Toronto Exhibition for the World's Championship. This will be a grand opportunity for the people of Peterborough to see him in action before the big race in Toronto.

Arnold Knox, the Canadian half-mile champion, will be along, also Geo. Barber, the high and broad jumper; Tressider, the five-mile Canadian champion; J. Near, Cecil Howard, Alex. Cameron, Thorley, McDonald, H. L. Smith, Geo. Lister, H. Duke and several others, to say nothing of those from Ottawa, Belleville, Orillia, and Montreal.

With such men as the above in line there should be some of the best contests ever held in Canada at Riverside Park Labour Day.

The grandstand plan will be on sale at Madill's Drug Store and also at the Y.M.C.A., where you can reserve your seats in advance. The prices are general admission 25c, grandstand 10 cents extra, and reserved seats 20 cents extra.

## PERSONAL AND SOCIAL

Miss McGivern has returned after attending the millinery openings.

Mrs. Telford and children, of Concession street, are visiting friends in Toronto.

Miss J. Trenwith, Rubidge street, is visiting Senator and Mrs. McHugh, Lindsay.

Mrs. W. T. Junkin returned to Fenelon Falls this week after visiting friends here.

Miss M. Sherin returned home last evening after an extended visit in Ridgeford Park, N.J.

Miss Katie Skinner of Keene, returned home to-day after spending a few days in the city.

Miss La Fleur has resumed her position with Miss McGiverin, after visiting Buffalo and Detroit.

Miss Nellie Thompson, who has spent several weeks with friends at Fenelon Falls, has returned home.

Miss Maggie Walsh, 19 Cargill street, city, has gone to Port Hope, where she has secured a position.

Mr. and Mrs. Wm. Smith have returned home after spending a few weeks visiting friends at North Bay.

Mrs. W. H. Waram left this evening for rToronto, where she will visit her parents, Mr. and Mrs. John Gray, 58 Wallace Avenue.

Mr. and Mrs. A. G. Fawcett, with their little son, have taken "Oaklands," Stony Lake, for the first two weeks in September.

Miss Elva Ingram and little Miss Norma, of Pearl Avenue, have returned home after spending six weeks with friends in Bethany.

Miss Daisy Robson and Miss Louise Guilian have resumed their positions with Miss McGiverin, after spending some time in Toronto.

Misses Mitchell and Moran have returned to the city, having been in Toronto and Buffalo, in the interests of the A. W. Cressman firm.

Miss Stobie has returned from New York, and Chicago, where she has been selecting fall styles for A. W. Cressman's millinery parlours.

Miss Mabel M. Moore of this city, has gone to Collingwood to take charge of the Deaconess work in connection with the Methodist church of that town.

Miss Ethel Thornton of Winnipeg, is the guest of Mrs. A. E. Micks, 425 Stewart street, and will receive with her tomorrow (Friday) afternoon and evening.

Miss Downes of Cressman's Millinery Department, has returned from Detroit, where she has been spending the last month in the interests of the firm.

Mr. M. Giroux, of Montreal, is in the city for a holiday—his first visit in two years. Mr. Giroux, who was formerly a merchant in Peterborough, is the guest of his brother, Mr. George Giroux, Trent Canal Office.

Mrs. Adolphe Belanger and family have returned to Toronto after a month's stay with her sister, Mrs. Fontaine, Rubidge street. Miss Clara Fontaine has accompanied her aunt back to attend the Toronto fair.

Miss S. Thompson, Miss Robinson, Miss Maud Mowry, Mrs. Gibbs and Miss L. Mowry drove out to Chemong last night and spent a pleasant evening the guests of r. and Mrs. Gunsolus, who are camping at Chemong.

After an absence from Peterborough of twenty-nine years, Mrs. Geo. L. Mitchell of Winnipeg, is in the city on a visit, the guest of Mrs. Wm. Croft. Mrs. Mitchell left here in 1881 and had never been back until the present visit. She is accompanied by her son-in-law and her daughter, Mr. and Mrs. Wilson.

Another change has taken place in the G.T.R. night operators. Mr. Arthur St. John, who has held the position here for the past period, was transferred yesterday to Lornville Junction. His place was filled by Mr. Stanley Fair, of Omemee. Mr. St. John's many friends here will be sorry to lose him.

## THE GRENADIERS

**The British Band is Creating a Great Impression at the Exhibition.**

The post of conductor of the Grenadier Guards Band is the most honourable military position in the British Empire. It is the chair which is the goal of every lad who is trained in the splendid military band schools of the British War Office, the chief of which is at Chatham, England. Just as every ambitious American lad cherishes the hope that he will some day be President, so every British band student hopes one day to be conductor of the Grenadier Guards Band, the crack organization of the Household Brigade, that is to say, of the regiments in personal attendance on His Majesty the King. This post was held for a number of years by members of the famous Godfrey family of brass band musical fame. When the late Lieut. Dan Godfrey, whose name was at one time a household word, retired on account of old age, the choice of a successor fell upon Lieut. Albert Williams, then a comparatively young man, who had made a name for himself as conductor of the band of the Royal Marine Artillery. Although the latter organization was not, until Williams took hold of it, regarded as a top-notch organization, he made it so, and when Godfrey retired he was the natural successor in the premier position of the Household Brigade. His splendid musicianship is widely recognized, and his appearance with his organization at the Canadian National Exhibition, is an event of first importance.

**AN IDEAL POLISH.**

In a tent just east of the north end of the Process Building the J. A. French and Co., Limited, have an interesting display of Ruby Rub Metal Polish. This polish contains no grit or acids. It can be used with equally good results on silver or steel. The Company are manufacturing the polish on the grounds and sell through dealers everywhere.

**JOHNS GLASS BLOWERS.**

One of the most interesting and instructive shows on Midway is Johns Glass Blowers, where this fine art is exemplified by experts. For a number of years Johns Glass Blowers have been a recognized and welcome feature of the Exhibition and their old friends will be glad to see them back again.

**NEW INVENTION FOR HOUSEWIVES.**

A most interesting process is being demonstrated at the extreme south-east corner of the Process Building, where the manufacturers of "Wonder-Shine" are cleaning the most terribly tarnished silver in a few seconds by simply dipping the tarnished articles in Wonder-Shine. Every lady should obtain a package of Wonder-Shine when at the Exhibition.

**FOX AND SEAL SILVERWARE.**

One of the most artistic exhibits of silverware in the New Art Lines is that made by Fox and Seal, the new silver manufacturers of Hamilton. A specialty is made of silver baskets, flower pots and fern dishes, fruit bowls, combination sugar and cream sets, spoon holders, tea sets, etc. This firm is making a class of goods equal to any on the continent and they number among their customers many of the best jewellers. Their motto, "Better than Sterling in Artistic and Practical Design" is lived up to in every piece of goods turned out, and every jeweller should make it a point to see the exhibit of Fox & Seal in the Manufacturers Building. Full information will be gladly furnished at the exhibit or will be sent to any member of the trade upon application to Fox & Seal, Hamilton, Ont.

**GOURLAY, WINTER & LEEMING.**

As usual, the firm of Gourlay, Winter and Leeming have one of the finest exhibits of pianos ever shown in Toronto. Their exhibit is situated in the south-west corner of the Manufacturer's Building and contains a beautiful showing of the famed Gourlay Pianos and the Gourlay-Angelus Player Pianos. Gourlay Pianos continue to show, year by year, a steady advance in piano standards and are recognized by leading musicians as being of the highest possible quality in tone, style and durability. A special feature is being made this year of the new "Pipette" style of small piano, suitable to the modern small drawing room. These small "Pipette" pianos have all the richness and quality for which Gourlay Pianos are known, nothing having been sacrificed, and the quality not exceeded by the $750 Louis instrument. Only in size and simplicity of construction do they differ.

There are also several handsome styles of the Gourlay-Angelus Player Pianos being shown here, and they are attracting a great deal of favourable comment. Prospective purchasers are invited to call at the exhibit of Gourlay, Winter and Leeming, or at their handsome ware rooms, 188 Yonge street, while in Toronto.

**LADIES' TAILORING**

J. Goldberg, of the Ladies' Tailoring Establishment, 452 George St, having returned from a special trip to New York to look over Fall and Winter Styles for Ladies, is home, and is prepared to take orders for all styles of Ladies' Suits, Dresses, Coats, Wraps, Riding Suits, etc. Having been a designer for four years with Spigall Cooper of New York, he guarantees satisfaction. He has brought back ideas that will most fitly be only introduced by himself in Peterborough. Bring in your goods to be made up or select a costume from me.

**J. Goldberg**

## OBITUARY

**DUNCAN McNEVAN.**

The death occurred about 3.30 yesterday afternoon, of one of Peterborough's well known residents in the person of Mr. Duncan McNevan.

The late Mr. McNevan was born in Ottawa about 75 years ago, and came to this city about nine years ago, where he made a host of friends. He was a Presbyterian in religion and attended St. Paul's church. He has been ill for about two weeks, but only took seriously ill on Monday last, which ended in his demise. Mr. McNevan was well known throughout the city and beloved by all who knew him, and the news of his death will bring sorrow to many a home.

Mrs. McNevan, wife of the deceased, passed away about four years ago, and the only survivors now, are; two daughters, Misses Elizabeth and Catherine, who resided with their father at 274 Sherbrooke street.

The funeral will take place on Saturday at ten o'clock to the Little Lake cemetery.

## MAKES REPLY

Sporting Editor the Examiner.

Sir,—I notice in yesterday's issue of the Examiner that you state that Captain Webb was the only man who ever accomplished the feat of swimming across the English Channel. I think I am right in stating that shortly after Webb's successful swim, Cavell, the owner of some swimming baths, at Chelsea, also succeeded in doing the same thing. If memory serves me correctly, he succeeded after several ineffectual attempts.

Yours, etc.,
CONSTANT READER

## LABORER KILLS BOSS.

**Discharged Man In Alberta Kills Hit Former Employer.**

Alberta, Sept. 2.—A tragedy occurred at the G.T.P. bridge over the Red River, six miles south of the town, Hector Murray of the contracting firm of Holmes, Murray and Sharkey being fatally beaten over the head by a disgruntled laborer named Woods.

In company with E. A. Marshall, C.E., Murray had driven to the river and was conferring with sub-Contractor Stuyvesant, when Woods approached with four companions and demanded of Murray, "Didn't I work five days for you?" Murray replied, "I know nothing about it."

Woods then demanded the five days' pay, which was refused. Woods turned to his companions and asked what should he do, and was advised by one of them "get your money." Whereupon Woods threatened Murray with a quart bottle of whisky. Murray advised him to go and settle at the camp, whereupon Woods felled him with a blow of the bottle over the temple, then walking with his companions to the river and disappeared.

Murray appeared stunned, but, rising, asked where they had gone, Marshall assisted him into a buggy and started for town. When about half way Murray relapsed into semi-consciousness and rapidly became worse, dying about 1.30 yesterday morning.

It appears Woods worked five days in one of the camps, and Wednesday, going for a load of hay, upset it, whereon, without stopping to reload, he drove off and demanded his time. The foreman told him to return and get the hay and he would be paid in full.

**Eight-Year-Old Boy Drowned.**

Huntsville, Sept. 2.—After forty-eight hours of almost continuous searching, the searchers for Larry Hebner, the eight-year-old son of Hiram Hebner, were attracted to the shore of Hunters Bay where a small whip owned by the boy was found lying. Shortly after his body was recovered in six feet of water.

The little chap was first missed from his home on Monday night at six o'clock.

**Hookworm Causes Ossification.**

Richmond, Va., Sept. 2.—Physicians are greatly interested in the case of M. L. Peaden, a farmer of Pitt County, North Carolina, who is in an hospital here for special treatment to prevent a form of ossification. His condition is regarded as due to an attack of hookworm disease, which he suffered two years ago.

# Reciprocity With U. S.

**People In the Alberta Coal Fields Are Anxious to Get Reciprocity With the United States In Order That They May Send Their Coal Into Montana — Some of Premier's Party Inspects the Mines.**

Medicine Hat, Alta., Sept. 2.—In the closing hours of Sir Wilfrid Laurier's tour, the tariff question has again become paramount.

This time the City Council and coal operators of Lethbridge pointed out to the Government that reciprocity with the United States would enable the operators to find a market for their surplus supply in Montana. The United Farmers, seizing upon the Premier's presence again, stated that they were satisfied with his utterances with reference to the tariff, but claimed that Hon. Geo. P. Graham's idea of railway liability was not acceptable.

The coal industry around Lethbridge has attained a large growth, and, although the present supply is equal to the demand, new mines which are now opening will require a more widely extended market. Montana imports a considerable quantity of Lethbridge coal in the summer time, but, as the local demand increases in winter, the supply for export falls off. Several members of Sir Wilfrid's party inspected shaft No. 6 of the Alberta Railway & Irrigation Co. yesterday morning, and it was stated that people in Montana regarded the tariff against Lethbridge coal as a hardship, as being so far removed from any other source of fuel supply. Alberta coal enters that state without competition. It is estimated that $9,000,000 is invested in the coal industry around Lethbridge, and about 1,400 or 1,500 men are employed. The output of all mines cannot so closely be estimated, but the one in question has sufficient coal in sight to keep the plant busy producing 1,800 tons per day for 20 years. A farmer may drive up to the pit mouth and receive dusty diamonds for $3.85 per ton. The dealer in Lethbridge gets $4.50 per ton delivered, while Winnipeg is said to pay $8. The railways, however, are the worst sinners, and it virtually costs more to carry coal than to produce it. Local officials told the Premier plainly that exclusive railway charges were killing the industry.

Sir Wilfrid expects to be in Ottawa about the 7th or 8th.

**Crashed Into Street Car.**

Ottawa, Sept. 2.—Dashing in towards the city along Sussex street yesterday at a high rate of speed, an automobile, in which Percy Shaver, chauffeur, and Percy Harris, suddenly swerved across the car tracks to avoid running a carriage, in which Mrs. Edwards, wife of Senator Edwards, was seated, and crashed into a street car, badly damaging the latter, and also the automobile, which finally brought up at the railing of the high embankment.. None of the passengers on the street car were injured, but Mr. Harris sustained severe contusions on the right leg.

**Vivian to Teach Town Planning.**

Toronto, Sept. 2.—Town planning and town housing was the subject of a most interesting address delivered by Henry Vivian, M.P. for Birkenhead, Eng., before the Union of Canadian Municipalities at the City Hall yesterday afternoon. Mr. Vivian, who is on a three months' visit to Canada, arrived in Toronto yesterday.

Proper regulation in regard to the laying out of a city to meet future requirements he believed to be one of the most important movements in England at the present time, and to illustrate the effect of the movement he contrasted the physical condition of the school children living in the congested slum of Liverpool and those residing in Port Sunlight, a city of model homes for the working classes.

"Such a difference in conditions and surroundings," he said, "has produced almost a different creature."

On account of his interest in the movement he had come to Canada on an invitation from Earl Grey, to give some useful information in planning the opening of new streets and the housing of the people so as to meet the demands of health and beauty.

**Shot His Wife and Daughter.**

Norfolk, Va., Sept. 2.—After brooding for four hours over a family quarrel which had lasted well into the night, J. J. Smyth, a bartender, aged 32 years, yesterday shot and killed his wife and fatally wounded his 12-year-old daughter Rita, who, pleading with her father not to shoot, ran between her parents as he drew his pistol. Smyth surrendered to the police.

**New Socialistic Proposal.**

Copenhagen, Sept. 2.—The International Socialist Congress at yesterday's plenary sitting adopted a resolution demanding the establishment of a system of universal and compulsory insurance against unemployment, the cost of which is to be borne by the owners of the means of production.

**Endorsed Workmen's Compensation.**

Kansas City, Sept. 2.—Speaking to an audience composed chiefly of workingmen in this city, Col. Roosevelt yesterday heartily endorsed the passage of a federal workingmen's compensation act, which is one of the chief planks of the Kansas State platform recently adopted.

**New Steamship Line.**

London, Sept. 2.—The Danish East-Asiatic Co. is projecting a steamship line between British Columbia and South America, carrying British Columbia timber and returning Quelquebracho and Quelquebrayo railway ties.

# The Papal Legate

**Streets of Ancient Capital Are Thronged to Pay Respects to Italian Churchman and Primate Logue, the Irish Prelate—Government Represented by Hon. Mr. Brodeur and Hon. Mr. Murphy.**

Quebec, Sept. 2. Cardinal Vannutelli arrived at Quebec yesterday afternoon at 4.20 o'clock on the Government steamer Lady Grey, which had gone to meet the Empress of Ireland, on which the cardinal had journeyed from Liverpool. The welcome of the Government was tendered to the cardinal on board the Lady Grey by Hon L. P. Brodeur, Minister of Marine and Fisheries, and by Hon. Charles Murphy, who had embarked for the purpose.

The arrival of the papal legate took place on the King's Wharf, which presented one of the most brilliant scenes that Quebec has ever witnessed. The gorgeously attired bishops and high dignitaries of the church, the robed civic authorities, the array of papal zouaves, the cheering multitudes, the thronged thoroughfares, the historic basilica, packed to overflowing, all combined for a unique occasion.

Above all the pomp and brilliance of the scene, the personality of the legate will be remembered the longest.

No more striking personage has ever visited Canada. Some had wondered how a man 74 years of age would stand the fatigue of the ceremonies, but a glance at this tall, virile, resolute figure set all doubts at rest. In stature, head and shoulders above the

CARDINAL VANNUTELLI.

assembly that welcomed him, his strong, decisive, but kind features proclaimed him a veritable king of men.

Without the slightest trace of pomposity, but with the easy grace of magnanimous power, he dominated the scene, a prelate, who, to judge by the clue of physiognomy, would have a heart for any crisis and a wisdom that would never fail.

The cardinal was obviously delighted with the warmth of his reception. On the Dufferin terrace, outside the Hotel Frontenac, two throngs had been here, one for the legate and the other for Cardinal Logue.

The Irish primate contributed a welcome touch of humor to the scene by taking a pinch of snuff at an opportune moment. His action was cheered by the Irish element, who cheered at once.

On the terrace addresses of welcome were tendered by Archbishop Begin and the mayor of Quebec. Around the throne sat Bruchesi, Archbishop of Montreal, who had met the cardinal legate at Father Point, Mgr. Birgin, Mgr. Touchet, Bishop of Orleans; Mgr. Usley, Bishop of Birmingham, Mgr. Roy, auxiliary Bishop of Quebec; Mgr. Mathieu, Mgr. Northrs, Mgr. Boleau, Mgr. March, Bishop of Havre de Grace, Newfoundland; Mgr. Legal, Bishop of St. Albert, Sask.; Mgr. Tetu, Mgr. Marois, Sir Lomer Gouin, Judge Cannon and numerous other celebrated men.

The terrace was crowded to overflowing. The whole city seemed to have mustered for the welcome. Fully 20,000 people thronged the streets. The hotels were packed. Prices high and accommodation difficult to obtain, yet no one would have believed it in the the morning. The town seemed half empty, and wore its immemorial aspect of slumberous mediaevalism.

And then suddenly the calm lifted and throngs seemed to spring from unguessed sources, and the streets filled with applauding crowds and happy children and earnest votaries of the church; monks, nuns and priests without number.

Archbishop Begin in his speech dwelt eloquently on the glorious annals of the church in Canada. It was at Tadousac, which his eminence had passed, he said, that the first mass in Canada was said. He spoke of the loyalty of Quebec to the faith, and, after assuring his eminence that they considered themselves honored in Canada by being chosen as the first country in America for a Eucharistic Congress, they expressed their gratification at the visit of so distinguished a prince of the church as Cardinal Vannutelli.

The cardinal, who, on rising, was greeted with tumultuous applause, declared his delight with the magnificent and cordial welcome he had received from the first moment of setting foot in Canada. First of all he assured them that he had a mission from the holy father, which he would at once fulfill, namely, to assure them of the holy father's love and benediction. (Loud applause.)

The annals of the church in Canada showed an origin of marvelous heroism. The faith had been planted in the blood of the martyrs, and to look at the crowds in Quebec to-day was to feel that the devotion to the faith the sons of the church were not degenerate. (Applause.) They had followed in the foot-steps of their pioneer fathers.

In closing, the cardinal declared that he welcomed the manifestation as a happy augury of the future. They would all, he said, work to bring together the number of the faithful of every origin and race, to the fact of the God who dwells in our tabernacles.

In the evening a solemn service of benediction was held at the Basilica, which was filled to overflowing.

**Object to Troops Parading.**

Ottawa, Sept. 2.—Has the Roman Catholic Church the right to order out the Canadian militia to participate in processions and functions designed to honor that especial church in this land?

This question has been raised in its most acute form by the announcement that pontificial legate, Cardinal Vannutelli will, upon his arrival in Montreal on Saturday evening next, be received by a guard of honor of the Duke of York's Canadian Hussars, from the wharf to the residence of Lord Strathcona, and that the militia of Montreal generally would participate in the fetes connected with the eucharistic congress.

S. F. Jarvis, assistant deputy minister of militia, has replied to the objections that application had been made by certain militia units in Montreal for leave to turn out officially to take part in the parades of the eucharistic congress, but such application had been peremptorily refused. But intimation was made that if any individual members of a militia unit desired to turn out in uniform unofficially no objection would be taken.

It is officially stated that the troops ordered by the Government as an escort for Cardinal Vannutelli is a squadron of regular cavalry, which is to be brought from St. Johns, Que., for that purpose.

**Manufacturers at Fair.**

Toronto, Sept. 2.—Dull skies in the morning didn't promise favorable weather at the Exhibition yesterday, but in the early afternoon the sun's rays brightened up the grounds which grew more animated each hour until they took on a "second week" aspect. The attendance was about 55,000, or 5,000 ahead of last year's.

Naturally, much interest centered in the manufacturers' and process buildings. The glimpse behind the scenes industrially was so fascinating that the process building was densely thronged by three o'clock, in fact, almost impassable in places. In the manufacturers' building was a jostling, elbowing, good-natured crowd.

It was a typical manufacturers' gathering at the directors' luncheon, that event having an added interest in the presence of the members of the Chamber of Commerce of Bristol. But while it reflected prosperity and a disposition to look forward to trade expansion, a note of uneasiness was struck by R. S. Gourlay of the Board of Trade. It had its origin in the requests by sections of the western provinces for a lower tariff. Mr. Gourlay made it clear that the manufacturers are keeping a wary eye on Sir Wilfrid Laurier.

**How They Do In Germany.**

Berlin, Sept. 2.—Robbed on a Berlin suburban railway train of her ticket and then arrested and fined because she could not produce the ticket was the experience of Miss Marie Schlossberg, which the press is using as the basis for an attack on the eccentricities of German officialdom.

The Cause
of Eye Troubles is usually not disease, but defect in the structure or muscles of the Eye.
Consider the incessant work of the Eye, the instantaneous and exact adjustment demanded that sight may be always equal, single and ready to every change in position, distance and light. The nerves compel and control the mechanism in these instant adjustments. The mechanism may be defective, that is—
There may be defects in the structure, or focus of one or both Eyes;
The Muscles may be imperfectly balanced, so that both Eyes do not work in harmony;
There may be inability to focus for close work;
There may be strain through overwork, abuse, poor lights, bright reflections, etc.
An examination will tell you just what condition your Eyes are in.

# "PILLAR OF LIGHT"

By Louis Tracey, (Copyrighted)

(*Continued from Thursday*).

aped round the end of the solid pier and vanished, whereupon Lieutenant Stanhope walked slowly to the Promenade, whence he could see the diminishing speck of canvas on the shining sea until it was hidden by Clement's Island.

At last the devotees of twist and shag, resting their tired arms on the railing, were able to exchange comments.

"Brace o' fine gells, them," observed the acknowledged leader, a broken-down "captain" of a mine abandoned soon after his birth.

"Fine" agreed his nearest henchman. Then, catching the gloom of the captain's gaze after Stanhope's retreating figure, he added:

"But what does that young spark want, turning their pretty heads for them, I should like to know?"

"They didn't seem particlar stuck on 'im," ventured another.

"The ways of women is curious," pronounced the oracle. "I once knew a gell—"

But his personal reminiscences were not of value. More to the point was the garbled, but, in the main, accurate account he gave of the rescue of an unknown child by one of the keepers of the Gulf Rock Lighthouse on a June morning eighteen years earlier.

Stephen Brand was the name of the man, and there was a bit of a mystery about him, too. They all knew that a light-house keeper earned a matter of £70 to £80 a year—not enough to maintain a daughter and an adopted child in slap-up style, was it? A small villa they lived in, and a governess they had, and ponies to ride when they were big enough. The thing was ridiculous, wasn't it?

Everybody agreed that it was.

People said Brand was a swell. Well, that might or might not be true. The speaker did not think much of him. He was a quiet, unsociable chap, though Jones, a Trinity pensioner, who kept the "Pilchard and Seine" now, wouldn't hear a wrong word about him, and always called him "cap'n." A pretty sort of a captain! But then, they all knew what an old slow-coach Jones was. They did: Jones' pints were retailed on the premises for money down.

Then there was Spence, lame Jim, who lived at Marazion, he told a fine tale about a fight with a shark before Brand reached the boat in which was the blessed baby—that very girl, Enid, they had just seen. Was it true? How could he say? There was a lot about it at the time in the local papers, but just then his own mind was given to thoughts of enlisting, as a British expedition was marching across the desert to relieve Khartoum —and cause Gordon's death.

No: Brand and the two girls had not dwelt all the time at Penzance. The light-keepers went all over the kingdom, you know, but he had hit upon some sort of fog-signal fad—Brand was always a man of fads: he once told the speaker that all the Polwenna Mine wanted was work—and the Gulf Rock was the best place for trying it. At his own request the Trinity people sent him back there two years ago. Some folk had queer tastes, hadn't they? And talking so much had made him dry.

Then the conversation languished, as the only obvious remark of any importance was not forthcoming.

Meanwhile, the Daisy sped buoyantly towards the southwest. Although she was broad in beam and staunch from thwart to keel it was no light undertaking to cruise fourteen miles out and home in such a craft.

But old Ben Pollard knew what he was about. Not until the granite pillar of the distant Gulf Rock opened up beyond Carn du was it necessary to turn the boat's head seawards. Even then, by steering close to the Runnelstone, they need not, during two-thirds of the time, be more than a mile or so distant from one of the many creeks in which they could secure shelter in case of a sudden change in the weather.

Thenceforward there was nothing for it but a straight run of six miles to the rock, behind which lay the Scilly Isles, forty miles away, and well below the boat's horizon.

So, when the moment came for the final decision to be made, Pollard cast an anxious eye at a great bank of cloud mounting high in the north.

There was an ominous drop in the temperature, too. The rain he anticipated might turn to snow, and snow is own brother to fog at sea, though both are generally absent from the Cornish littoral in winter.

"Ben," cried Enid, breaking off a vivid if merciless description of a new disciple who had joined the artistic coterie at Newlyn, "what are you looking at?"

He scratched his head and gazed fixedly at the white battalions sweeping in aerial conquest over the land.

"She do look like snaw," he admitted.

"Well, what does that matter?"

Without waiting for orders Constance had eased the helm a trifle. The Daisy was now fairly headed for the rock. With this breeze she would be there in less than an hour.

"It be a bit risky," grumbled Ben.

"We will be alongside the lighthouse before there can be any serious downfall," said practical Constance. "Surely we can make the land again no matter how thick the weather may be."

Ben allowed himself to be persuaded. In after life he would never admit that they were free agents at that moment.

"It had to be," he would say. "It wur in me mind to argy wi' she, but I just couldn't. An' how often do us zee snaw in Carnwall? Not once in a blue moon." And who would dispute him? No West-country man, certainly.

At a distance of five miles one small fishing craft is as like another as two Liliputians to the eye of Gulliver. In a word, it needs acquaintance and nearness to distinguish them.

As it happened, Stephen Brand did happen to note the Daisy and the course she was shaping. But, during the short interval when his telescope might have revealed to him the identity of her occupants, he was suddenly called by telephone from the oil-room to the kitchen. When next he ran aloft in a wild hurry to signal for assistance, he found, to his despair, that the Land's End was already blotted out in a swirling snowstorm, and the great plain of blue sea had shrunk to a leaden patch, whose visible limits made the reef look large by comparison.

With the mechanical precision of habit he set the big bell in motion. Its heavy boom came fitfully through the pelting snow-flakes to the ears of the two girls and old Ben. The latter, master of the situation now, announced his intention to 'bout ship and make for Mount's Bay.

"'Ee doan' ketch me tryin' to sail close to Gulf Rock when 'ee can't zee a boat's length ahead," he said, emphatically. "I be sorry, ladies both, but 'ee knaw how the tide runs off the reef, an' 'tes easy to drive to the wrong side of the light. We'm try again to-morrow. On'y the flowers 'll spile. All the rest—"

Crash! A loud explosion burst forth from the dense heights of the storm. The Daisy, sturdy as she was, seemed to shiver. The very air trembled with the din. Pollard had his hand on the sail to swing it starboard, when Constance put the tiller over to bring the boat's head up against the wind. For an instant he hesitated. Even he, versed in the ways of the sea, was startled. Both girls positively jumped, the sudden bang of the rocket was so unexpected.

"Mister Brand must ha' zeed us," pronounced Ben. "That's a warnin' we to go back."

The words had scarce left his lips when another report smote the great silence, otherwise unbroken save by the quiet plash of the sea against the bows and the faint reverberations of the distant bell.

"That is too urgent to be intended for us," said Constance. "We were just half way when the snow commenced."

"I did not notice any vessel near the rock," cried Enid, tremulously. "Did you, Ben?"

Pollard's slow utterance was not quick enough. Before he could answer a third rocket thundered its over powering summons.

"That is the 'Help wanted' signal," cried Constance. "Ben, there is no question now of going back. We must keep our present course for twenty minutes at least, and then take to the oars. The bell will guide us."

"Oh, yes, Ben," agreed Enid. "Some thing has gone wrong on the rock itself. I am quite sure there was no ship near enough to be in trouble already."

"By gum, we'm zee what's the matter," growled Ben. "Steady it is, Miss Brand. Ef we'm in trouble I'd as soon ha' you two gells aboard as any two men in Penzance."

At another time the compliment would have earned him a torrent of sarcasm. Now it passed unheeded. The situation was bewildering, alarming. There were three keepers in the lighthouse. The signal foreboded illness, sudden and serious illness. Who could it be?

In such a crisis charity begins at home. Constance, with set face and shining eyes; Enid, flushed and on the verge of tears, feared lest their own beloved one should be the sufferer.

To each of them Stephen Brand was equally a kind and devoted father. He never allowed Enid to feel that she was dependent on his bounty. Only the other day, when she hinted at the adoption of an art career, as a future means of earning a livelihood, he approved of the necessary study but laughed at the reason.

"With your pretty face and saucy ways, Enid," he said, "I shall have trouble enough to keep you in the nest without worrying as to the manner of your leaving it. Work at your drawing, by all means. Avoid colour as the bane of true art. But where Connie and I live you shall live, until you choose to forsake us."

No wonder these girls thought there was no other man in the world like "dad." Their delightful home was idyllic in its happiness; their only sorrow that Brand should be away two months out of three on account of the pursuit in which he passed his hours of leisure during recent years.

Neither dared to look at the other. They could not trust themselves even to speak. There was relief in action, for thought was torture.

The docile Daisy steadily forged through the waves. The spasmodic clang of the bell came more clearly each minute. Pollard kneeling in the bows, peered into the gloom of the swirling snow. He listened eagerly to the bell. With right hand or left he motioned to Constance to bring the boat's head nearer to the wind or permit the sail to fill out a little more.

Enid, ready to cast the canvas loose at the first hint of danger, consulted her watch frequently. At last she cried:

"Twenty minutes, Ben."

What a relief it was to hear her own voice. The tension was becoming unbearable.

"Right y' are, missy. No need to slack off yet. Tes clearin' a bit. We'm heave to alongside the rock in less'n no time."

The fisherman was right. His trained senses perceived a distinct diminution in the volume of snow. Soon they could see fifty, a hundred, two hundred yards ahead. On the starboard quarter they caught a confused rushing noise, like the subdued murmur of a millrace. The tide had covered the rock.

"Luff et is!" roared Ben, suddenly. "Steady now."

Out of the blurred vista a ghostly column rose in front. Smooth and sheer were its granite walls, with dark little casements showing black in the weird light. The boat rushed past the Trinity mooring-buoy. She held on until they heard the sea breaking.

"Lower away!" cried Ben, and the yard fell with a sharp rattle that showed how thoroughly Enid had laid to heart Pollard's tuition.

Constance brought the Daisy round in a wide curve, and Ben got out the oars to keep her from being dashed against the reef.

Enid's eyes were turned towards the gallery beneath the lantern.

"Lighthouse ahoy!" she screamed in a voice high-pitched with emotion.

There was no answering clang of the door leading from the room on a level with the balcony. Not often had the girls visited the rock, but they knew that this was the first sign they might expect of their arrival being noted if there were no watchers pacing the "promenade."

"Help us, Ben," cried Constance, and their united shouts might be heard a mile away in the prevailing stillness. A window half way up the

## SMUGGLING IN ANDORRA.

**It Is an Honorable Profession In the Little Republic.**

Sant Julia de Loria, the rival of Andorra la Villa, is the great trade and smuggling centre. It has about 600 inhabitants only, but can boast several large shops and warehouses full of contraband commodities openly displayed. As a matter of fact, the whole nation is more or less smugglers—on principle. They have neither import nor export duties themselves, and they are fully persuaded of the benefits of free trade for everybody. France makes commodities wanted in Spain. Spain grows articles required in France, and Andorra lies between these two nations. What more natural, therefore, than that she should give aid to both her neighbors—for a consideration, of course? But smuggling in Andorra is not looked upon as a fraudulent business. On the contrary, it is considered an honorable and legitimate profession—almost an art—and one that in its higher branches requires many aptitudes—business capacity, astuteness, diplomacy, a thorough knowledge of the art of bribery and a military method for directing one's forces and commanding one's subordinates. For instance, a wealthy Andorran goes over the border into Spain and buys up cheaply thousands of sheep, which he pays for in Spanish money. They are driven home to his mountain pastures, where they are marked with his cipher. Then, in company with his headman, he strolls casually across to the French frontier—every inch of which he and his underlings know by heart—and drops into the hut of the commandant of the douaniers for a chat. Before leaving the commandant naturally offers him a petit verre, and banknotes of greater or less value are left lying on the table. Nothing definite is said; nobody's conscience or dignity is compromised. A few days later thousands of Andorran sheep are sold in the market of France and paid for in French money. How did they get across the frontier? Ah, that's just the point. The mere fact of buying with Spanish money and selling for French means from 20 to 30 per cent. profit without counting the difference in the prices of the animals. In addition to sheep, hides, tobacco, matches, olive oil, superior qualities of wines, salt, sugar and ultra-marine are the principal commodities smuggled into France. The articles that go into Spain are mostly glass and china fancy articles, bric-a-brac, paper and cutlery; also a large number of mules. The latter are bought in a wretched state for almost a song in France, turned out to grass on the splendid Andorran pastures for a few months and sold in Spain at the end of the season for a high figure.—Wide World Magazine.

### "Poor Glick."

Col. Count Gleichen, whose marriage with the Hon. Sylvia Edwardes was celebrated the other day, was, prior to taking up staff work, one of the most popular officers the Grenadier Guards ever possessed. He has seen active service in five different lands. It was in South Africa that the count had his fiercest fighting, and those who saw him bowled over at Modder River never imagined that he would get up again. "Poor Glick is dead!" cried an officer to another as he saw the count kick convulsively and then lie still. "No, I am not!" was the emphatic rejoinder from the supposed corpse, as he rolled over, disclosing a ghastly wound on the neck that exposed, but happily did not sever, the jugular vein.

### Differences in Woods.

Timber is classed as hard or soft, and the main point of difference between the trees that produce these classes is that the soft wooded tree has "needle leaves," slim, narrow and almost uniform in breadth, while the hard wood trees have broad leaves of various shapes. Again, some soft wood trees carry cones, such trees being termed conifers. Resin, too, is more characteristic of soft than of hard wood. To the class of soft woods belong the pines, spruces and firs, and the most common examples of these are yellow pine, white fir, pitch pine and spruce or red fir. In the commoner hard woods are oak, beech, mahogany, ash, walnut, plane, elm, birch and ebony.

### A Trademark.

A young man walked into the photographer's studio and said, "I want my photo taken."

"Certainly," said the knight of the camera as he posed his victim. "Would you like a carte or a cabinet?"

The young man gazed on the picture of a child playing in a cornfield, wriggled uneasily and at last said: "Well, I don't know about a cart or a cab in it, but if you could manage to put a railway truck in I should be very pleased. I am a railway porter."

### Roman Roads.

The oft quoted saying that "all roads lead to Rome" originated in the fact that it was part of the policy of the Roman empire to build excellent roads into all the countries it conquered, so that whenever a road worthy of the name was found throughout Italy and the provinces it was known to lead to Rome.

## GUARD THEIR HEALTH!

**Children Who Grow Very Fast Need Careful Watching.**

*Dr. Morse's Indian Root Pills would make her healthy and happy.*

Next to infancy, the years between ten or twelve and eighteen are the most critical in life, especially for the boys and girls who grow too fast. Rapid growth and the physical changes that are taking place render them particularly liable to weakness and disorders of the digestive system, kidneys or lungs that very frequently, when allowed to run on, condemn them to a lifetime of suffering.

It is most important that at this period of life those organs which carry off the body's waste and impurities—the bowels, the kidneys and the skin—should be kept active and vigorous.

Nothing will do this more effectively than that good old-fashioned remedy, **Dr. Morse's Indian Root Pills.** It acts directly on each of these organs, enabling them to do their work properly, and thus keeps the whole system pure and healthy.

*Dr. Morse's Indian Root Pills* are still made from precisely the same formula as when our grandparents used them, for nothing better has ever been devised.

Made by W. H. Comstock Co., Ltd., Brockville, Ont., and sold by all dealers at 25c. a box. 13

### Guarding an Actress' Jewels.

Each night Miss Fanny Ward, the famous English actress, makes her appearance on the stage at the Palace Theatre, Shaftesbury avenue, in that clever sketch, "An Unlucky Star," she wears jewels worth $2,500,000. Miss Ward employs an armed detective who takes her jewelry to her dressing-room every night, and after the show carries it back to the depository at the bank. Once, when Miss Ward returned from a tour, she left her bag containing all her jewels and $10,000 under a seat in the public dining-hall of an American hotel. Luckily it was found by a waiter and put in the safe. "But," says Miss Ward, "you can figure for yourself just how scared I was."

### The Horse's Ears.

Whether you drive a single horse or a team the principles are the same, but in driving a pair see to it that each horse does his share of the work and no more. A pair of horses, moreover, unless well driven are sure to get in the habit of wandering over the road. To drive well you must keep your eye and your mind on the horse. Watch his ears. They will be pricked forward when he is about to shy, droop when he is tired, fly back just before he "breaks" (into a gallop) and before he kicks. Before kicking, too, a horse usually tucks in his tail and hunches his back a little. When you observe any of these indications speak to him sharply and pull up his head.

### Unparalleled Generosity.

Town Councilor—Have you heard, Mr. Skinflint, that our generous townsman, Mr. Muller, is defraying the cost of a new promenade all around the town? We think a wealthy man like yourself might also do something for us.

Skinflint—Well, what do you say to my giving you a park of oak trees?

Town Councilor—Oh, you noble hearted philanthropist! Why, do you really mean to—

Skinflint—Yes, yes; I'll make the town a present of an oak forest. You have only to find the land, and I will supply you with as many acorns as you may want for seed.

### A Startling Reply.

A gentleman whose hearing is defective is the owner of a dog that is the terror of the neighborhood in which he lives. The other day he was accosted by a friend, who said: "Good morning, Mr. H. Your [illegible] made a very pleasant call on us last evening."

"I'm very sorry," came the startling reply. "I'll see that it doesn't occur again, for I'm going to chain her up in future."

### Bonus for Tobacco.

A state grant of $250 an acre is made for experiments in Irish-grown tobacco.

### Slipped His Mind.

An automobile came whizzing through a small town and bowled over a prominent resident. Among those who saw the accident and were excited by it was a young physician just beginning to practice.

"A doctor! A doctor!" he cried. "Somebody run for a physician!"

"How about yourself?" suggested an acquaintance who happened to be at the scene.

"Sure enough!" said the young practitioner. "I never thought of that."

## Fortune Telling

Does not take into consideration the one essential to woman's happiness—womanly health.

The woman who neglects her health is neglecting the very foundation of all good fortune. For without health love loses its lustre and gold is but dross.

Womanly health when lost or impaired may generally be regained by the use of Dr. Pierce's Favorite Prescription.

*This Prescription has, for over 40 years, been curing delicate, weak, pain-wrenched women, by the hundreds of thousands and this too, in the privacy of their homes without their having to submit to indelicate questionings and offensively repugnant examinations.*

Sick women are invited to consult Dr. Pierce by letter *free*. All correspondence held as sacredly confidential. Address World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.

Dr. Pierce's Great Family Doctor Book, The People's Common Sense Medical Advisor, newly revised up-to-date edition—1000 pages, answers *in Plain English* hosts of delicate questions which every woman, single or married, ought to know about. Sent *free*, in plain wrapper to any address on receipt of 21 one-cent stamps to cover mailing only, or in cloth binding for 50 stamps.

## Cookery Points

Panouchi, as Pratt students make it, calls for three tablespoonfuls of butter, a tiny pinch of soda and a cupful of milk, all heated together. Then three cupfuls of coffee and sugar are stirred in and a pinch of salt. The sirup is cooked to the soft ball stage, taken from the fire and cooled and then three-fourths of a cupful of nut meats chopped fine and a teaspoonful of vanilla are mixed with it and it is stirred until creamy. After pouring into a shallow tin the candy should be marked off in squares.

For chocolate chips as the same cooking teacher makes them the recipe wants half a cupful of butter, two eggs, two squares of chocolate, a teaspoonful of vanilla, a quarter of a teaspoonful of salt, a cupful of sugar and a cupful of flour. Bake in thin sheets for ten or twelve minutes. If the paste is too stiff to handle, more liquid or less flour should be used. In making any such batter judgment has to be used.

For "brownies" a recipe copied from a Pratt student's notebook is as follows: A third of a cupful of butter, a fourth of a cupful of molasses, a cupful of flour, a cupful of chopped walnuts, a third of a cupful of sugar, an egg and a fourth of a teaspoonful of salt. Bake in a thin sheet on buttered tins.

To make peanut cookies as the same teacher dictates, use half a cupful of butter, a cupful of sugar, two eggs, four teaspoonfuls of baking powder, a teaspoonful of lemon juice, half a teaspoonful of salt, two cupfuls of flour, half a cupful of milk and a cupful of chopped peanuts. Drop from a spoon on buttered tins and bake.

### Currant Shortcake.

Make a biscuit dough as follows: Sift together twice two cupfuls of flour, one and a half teaspoonfuls of baking powder, half a teaspoonful of salt and thoroughly mix with flour. Then rub in one rounded teaspoonful of butter or cottolene or lard and add enough milk to make a soft dough. Use a fork to stir in the milk. Mix it lightly and quickly together, making the paste a little too soft to roll. Turn it into a well greased pie tin, smooth the top with a wet knife and put it at once into a hot oven to bake for thirty minutes. When it is taken from the oven trim the edges and split the biscuit in two, using two forks so as to tear, not cut, apart. Spread each half with butter while it is still hot. Stem a box of currants. Reserve a few of the finest ones to decorate the top of the shortcake. Put the rest of the currants into a bowl, wash them, add enough sugar to sweeten to taste and let them stand an hour or more before using them. Spread the washed currants over one-half of the buttered biscuit and lay the other half on it. Sweeten with two tablespoonfuls of powdered sugar or cover the top with meringue made of the whipped whites of two eggs sweetened and decorate this with the currants as fancy prompts.

### Picnic or Luncheon Sandwiches.

Egg Sandwiches.—Boil five eggs for fifteen minutes; when cold remove the shells and pound the yolks and whites together in a mortar or basin with one heaping tablespoonful of melted butter. When smooth add salt, pepper, grate of nutmeg and dust of red pepper to taste. Spread this mixture on thin cut bread and butter, press well, trim them, cut them into neat fingers and wrap in wax paper. Slices of hard cooked eggs seasoned with a little salt and pepper introduced between slices of bread and butter also make nice egg sandwiches.

### Coffee Custard.

Put one-half cup ground coffee in a little muslin bag and drop into four cups of cold milk. Let stand twenty minutes, then put into the double boiler until it reaches the scalding point. Cook five minutes and then remove the bag and pour the hot milk over four beaten eggs and four heaping tablespoonfuls of sugar. Pour into a custard bowl and set in the pan of hot water in the oven, or, if preferred, turn back into the double boiler. Cook until thickened, strain and set aside to cool.

### Curried Fowl.

Boil a small fowl till tender, seasoning with salt and a little garlic. Stand aside to get cold, then disjoint, removing all skin. Mix together a tablespoonful curry powder, a teaspoonful dry mustard, a pinch of cayenne, a tablespoonful Worcestershire sauce, the same of olive oil and melted butter. Spread this over the pieces of fowl and broil till brown over the gas or clear fire. Serve imbedded in rice.

### Blackberry Wine.

Wash the berries and to every gallon allow three quarts of water. Cook and strain. Allow to each gallon of the mixture two and a half pounds white sugar. Let stand forty-eight hours in a large tub, stirring once a day and skimming off all the impurities that rise to the surface. Put into a cask not quite full and close. Bung and seal.

### Sleep and Noises.

Experiments show that during profound sleep a noise not sufficient to awaken the sleeper produces a perceptible rise in the temperature of the brain and the head.

# A GAEKWAR IS HEADED FOR BROADWAY

## *HE Owns the Most Famous Diamond Necklace in the World, Has Solid Gold and Silver Artillery to Guard His Palace, Holds the Power of Life and Death Over Three Million Persons and Is Training His Heir at Harvard.*

(Copyright, 1910, by the New York Herald Co. All rights reserved.)

NEW YORK, Saturday.

MAHARAJAH Sir Sayiji Rao Gaekwar Sena Khar Khei Shamsher Bahadur of Baroda is on his way to Broadway and incidentally to visit his son, the Prince Jaisingrao Gaekwar, who is a freshman at Harvard.

The young Prince, now about twenty years old, is installed in a sumptuous suite of rooms in upper Westmorely Court, one of the most exclusive outside dormitories. He is heir to an annual income of something like $12,000,000, yet he is considered extremely democratic and has a large number of friends among the Harvard men. He is especially fond of the theatre and likes the musical comedies most of all. He prepared for Harvard at the Horace Mann School, in New York.

The studies of the young Prince have been selected with a view to the responsibilities which he will assume as ruler of three million subjects. The Gaekwar of Baroda, father of the Prince, flashed upon New England in 1906 with the brilliancy of a comet. He was accompanied by his wife, the Maharanee, his brother and a large retinue of servants, and the gorgeousness of these Indian visitors has not yet been forgotten at the Hotel Somerset, where they were quartered.

The Gaekwar is one of the semi-independent Princes of the Indian Empire who are privileged to make laws, levy taxes, mint coin and maintain standing armies. He will arrive in New York during the early part of June. He is going to England by way of China, Japan and the United States, and when he returns to his native country will have completed the circle of the globe. When abroad the Gaekwar assumes the dress and follows the customs of Western civilization and indulges in all the refined luxury that is provided for the modern man of wealth. He carries with him the splendid costume of brocade silk and gold lace and the wonderful jewelled ornaments in which he will appear at court receptions in England.

### He Likes Broadway.

Encountered in Broadway in frock coat and silk hat the Gaekwar might be taken for a Cuban of the upper class. He speaks English fluently and French and German fairly well. His wife and daughter, who accompany him, are dressed in the prevailing Parisian fashion and have the manners of Americans. At home they lead almost lonely lives. There are no other women of high rank in Baroda and the wives of neighboring native potentates look at them somewhat askance on account of their liberalism and fondness for Western ways. Three or four Europeans afford the only congenial company that they can enjoy.

Two years ago the Gaekwar was frankly delighted with New York and confessed that he considered it a more progressive city than London. The bustle of Broadway, its lights, its theatres and cafés appealed to him immensely, as they naturally would to a man with an inherited love for pageantry.

The Gaekwar entered into the life of New York with the zest of a schoolboy on a vacation, but his time was not devoted entirely to pleasure by any means. He has a decidedly serious side, as was shown by the careful study he made of public institutions. The Fire Department and police force excited his admiration, but what he learned of these could not be turned to practical account in his principality.

On the other hand, Baroda has benefited by the examination her ruler made of our schools and hospitals four years ago.

When the Gaekwar ascended the throne in 1875 the State had neither one nor the other worth considering. Now there are a number of schools of various grades in which English is taught. The Post Office Department delivered last year letters and post cards on an average of four to each inhabitant. The need of hospitals was even greater than that of schools and has been equally well met. Baroda has been smitten by smallpox, scourged by cholera and decimated by plague time and again. Formerly the people coped with these dire visitations as best they might. Now the ill are well looked after in all parts of the State.

### The Maharajah.

His Highness the Knight Grand Commander of the Exalted Order of the Star of India and of the Most Eminent Order of the Indian Empire is a very important personage in his own country. A salvo of twenty-one guns signalizes his coming and going. He is escorted by a cavalcade of gaudy troopers whenever he leaves his palace. His State elephant is a beast of impressive proportions, bedecked with costly trappings. At the great durbars he occupies a place of honor near the Viceroy and yields precedence to only a few grandees, such as the Nizam of Haiderabad and the Maharajah of Kashmir.

Nevertheless, if the Gaekwar's memory is ordinarily good he can recollect the days when he was a poor village boy, living in a mud walled, grass thatched hut, playing gilli-dando among the cocoanut trees, and, like Mowgli, taking his turn at tending the water buffaloes. He could have had no dream of greater fortune than to become the village headman. But suddenly the lad's life took one of those strange turns that seem extravagant when told in fiction. One day a pompous priest, with the caste mark of Siva upon his brow, attended by gorgeously clad retainers from the Court of Baroda, came to the little hamlet, making subtle inquires regarding the descendants of one Pilaji, who had been the first Gaekwar of the State.

A Hindu family that has a genealogy to be proud of cherishes its history jealously and can generally establish its descent through centuries. This is not so remarkable where the priesthood is hereditary and where the restrictions of caste confine the scope of marriage. Moreover, generation succeeds generation in the occupation of one patch of land. At the present time ninety-six per cent of the rural population of India live and die in the district where they were born, and before the days of the railroad there was practically no movement. Thus the parents of the future Gaekwar had no difficulty in satisfying the emissary from the capital of their right to claim membership in the royal family, although the connection was through a branch distant from the reigning house. That matter settled and the occasion duly solemnized by a feast and a religious ceremony, the barefooted village boy was suitably clothed and conducted with much pomp and circumstance to Baroda.

To explain the reason for all this ado—or, as the Hindus would say, tamasha—it is necessary to hark back a few centuries, which, according to Oriental conception of time, is a mere trifle. The founder of the fortunes of the house of Baroda was a trooper in the force of the old Maratha freebooter, Khaude Rao, who flourished toward the end of the seventeenth century.

This trooper attracted the notice of his leader by performing the feat which in modern times was credited to Colonel Fred Burnaby, of "ride to Khiva" fame, that of completely severing a man's trunk with a single backhanded stroke. The Maratha who gave this wonderful exhibition of strength and dexterity was raised to the command of a paga and distinguished with the title of Shamsher Bahadur ("illustrious swordsman"), which has been borne by the Gaekwars ever since.

He finished his career as one of the prominent figures of that turbulent time and was killed in a raid upon a neighbor's territory. His nephew and understudy, Pilaji by name, stepped into his shoes. He became a highly successful leader, established an independent principality and was the first of the line of Gaekwars.

The early Maratha chieftains had many points of similarity to the robber barons of mediaeval Europe. Like them, they gained their eminence by sheer masterfulness and strength of arm. The five great branches of the Marathas are all ruled by men of obscure origin, the Bhonslas alone being of Rajput descent. The founder of the great house of Holkar was a goatherd; the first Sindhia was a slipper bearer in the household of the Peshwa.

Now, in this country if a private soldier of lowly birth should rise to high rank and great wealth the obscurity of his origin would be forgotten in two generations. Not so in India, where the Rajput warrior class boasts descent from the "children of the Sun and the Moon," and where the distinction of caste is paramount to every other. But the most blue blooded Rajput admits his inferiority to the proud Brahmin, who very often has no material possession of greater value that the greasy string which symbolizes the sacred thread of the thrice born.

The almost naked Brahmin beggar who accepts a dole from the almoner at the gate of the palace would decline with scorn an invitation to dine with the ruler of Baroda. And so the Gaekwar, with all his pride of place, lacks the distinction which Hindus respect above all others. It is just as well that he is not of high caste, for in that case he could hardly have become the man of broad sympathies and the liberal ruler that he is, and his wife and daughter, instead of frequenting the drawing rooms of New York, would have been secluded in a zenana.

Since the last Maratha war, in 1817, Baroda has been governed by a Gaekwar, with the help of a British Resident and a subsidiary force. The position of Resident at the court of one of these pseudo independent Indian potentates is always a delicate one and never without disagreeable features. It is his business to see that the Prince treats his subjects humanely, uses his revenues with discretion, avoids quarrels with his neighbors and, in short, behaves himself properly according to the British code of ethics, which is very different from that of the Hindu. Hence the trouble which almost always arises between the rajah and the Resident.

In 1870 Malhar Rao succeeded his brother as Gaekwar. Malhar seems to have been a bad lot. He was in prison at the time of his brother's death on account of an attempt to do away with the latter. Malhar Rao was no sooner seated on the gaddi than he gave rein to his vicious inclinations. He increased the general taxation and indulged in all manner of dissipation, extravagance and cruelty.

Colonel Phayre, the Resident, pointed out to the reckless ruler that he was riding for a fall. Malhar Rao resented the criticism and continued his wayward course. He then had peremptory warning that unless he mended his ways immediately the administration of affairs would be taken out of his hands. A few hours after Colonel Phayre delivered his ultimatum poison was put in his curry—too much of it, as it happened.

The Gaekwar was arrested as the instigator of this attempt on the life of the political agent. He was tried by a special commission composed of three natives and three British members, including Sir Richard Couch, Chief Justice of Bengal. Sergeant Ballantyne, with the possible exception of Sir Charles Russell the most able advocate who ever pleaded at the British Bar, went out to India to defend the royal suspect and was paid $150,000 for his services.

The trial ended in a deadlock, the three English members of the court finding the Gaekwar guilty and the three natives reaching a contrary verdict.

Nevertheless, the Indian government decided to depose the Gaekwar for the good of his people. He was deported to Madras, where he lived in luxury on a handsome pension until his death, in 1885. The authorities permitted Hindu custom to prevail in settling the question of the succession to the vacant rajaship. Jumnabai, widow of Malhar Rao's predecessor, being childless, was allowed to adopt a son and heir. Her choice fell upon the present Gaekwar, and at thirteen years of age he was invested with the title, the government being placed in the hands of a regent during his minority.

The country of Baroda is not to be traced on an ordinary map of India. It consists of a score or more of separate patches of territory, widely scattered through Gujarat and Kathiawar, two hundred miles in more than one instance dividing one from its nearest neighbor. These several territories aggregate an area equal to only two-thirds that of the State of Massachusetts. It is a fertile, well watered land, good to look upon. Most of it is under cultivation and rich fields of cotton, grain, tobacco, flax and indigo attest the prosperity of the inhabitants. Opium is also one of the products. This is a government monopoly. No man may grow a poppy without special license, and every ounce of the juice extracted must be turned over to the official collectors. The crude extract is refined in the State factory, and after a certain quantity has been set aside for domestic consumption the output is shipped to Bombay for sale in China. This traffic nets the government about $400,000 profit a year.

Only here and there does the capital betray the impress of the modern civilization that largely influences its life. In general its aspect is that of an old time Indian city. Leisurely Hindus, in pink or white drapery, pass through the bazaars in the shadows of carved balconies whose wood is worn and polished and toned to almost blackness by age. Now and then a sedate camel pads along the street, carefully threading its way among the naked children playing in the dust. But despite its apparent sleepiness Baroda is an unusually wealthy city for its size. It has a considerable trade and several important industries in textiles, silk brocades and metal work.

The palace is a hideous and pronouncedly modern structure, marred by a mixture of materials and styles. The large apartments are filled with European furniture and upholstery in garish colors. The throne room suggests the lobby of an up to date New York hotel. The Gaekwar does not maintain a harem. He has but one wife, who is as much Europeanized as himself. In the palace they dress after Western or Oriental fashion to suit the occasion, but in their drives about the city and when travelling in India always wear the native costume. The Gaekwar has great admiration for America and American institutions.

Dazzling and magnificent is the apparel of the bullocks that haul this royal artillery. Forty-five thousand dollars is said to be the cost of the trappings. On the horns of the animals are golden caps, and on their legs are anklets of gold and silver. Ornaments of gold adorn their heads, and when the royal artillery is in motion the splendor of it dazzles the eyes. The guns are guarded day and night by picked men from the royal bodyguard.

The most famous diamond necklace of the world is the property of the Maharajah. It is composed of two hundred beautiful brilliants of marvellous purity, each as large as a hazelnut. This necklace is valued at $12,000,000. Then he has a famous collarette, made of five hundred diamonds. Hanging from this circle of light is the fifth largest diamond in the world, the Star of the South. Emeralds are strung between the diamonds. In one room of the palace is a rug with a surface of four square yards made entirely of beautiful diamonds, pearls and rubies.

## THE LOST CHANNEL.

**How a Picturesque Spot in the Thousand Islands Was Named.**

Few of the visitors to the Thousand Islands realize how many historical associations this region possesses. It has always been the boundary line between nations, and every great war in the history of America has seen some large or small tragedy enacted near its waters.

In the year 1760 two armed vessels, the Onondaga and the Mohawk, with 1,000 men on board, under the command of Gen. Jeffrey (Lord Amherst), set out from Oswego, N.Y., intent on capturing Montreal.

Just as the expedition was entering the St. Lawrence a lookout on the Onondaga saw a bateau filled with soldiers putting out from an island and heading down the river. Judging at once that they were French scouts, the two invading ships gave chase, hoping to capture the bateau.

After going several miles the bateau suddenly veered, at a point where three hills extend into the river, and ran down a narrow channel between a large island and several smaller ones. It then passed out into a large bay, beyond which could be seen another and a larger channel extending among the islands. Knowing that the channels between these islands are usually very deep the Onondaga continued the pursuit. When in the middle of the channel the vessel was suddenly attacked from all sides by the Indians and French hidden on the surrounding islands. The decks were swept with musketry and arrows. The guns were trained on the islands, and the attacking party was soon forced to escape in canoes. Coxswain Terry and his crew were ordered to lower a boat and to bear a message to the captain of the Mohawk, telling him to turn back into the main channel. Another boat was then lowered to seek out a passageway and, a deep channel being found, the Onondaga dropped down stream below the thickest group of islands and awaited the return of Terry and his crew. As they did not return Ensign Barry was ordered to lower the cutter and search for them. He returned after some hours, having found no trace of the boat. He had been bewildered by the intricate channels and numerous islands and had not been able to find the channel through which the Onondaga passed. It was thought probable that Terry and his crew had boarded the Mohawk, but the officers of that vessel reported that the message had been delivered and that the boat had started to return to the Onondaga. The coxswain and his crew were never heard from, and were undoubtedly captured or killed. Ensign Barry named the scene of the fight the Lost Channel, which name it has since borne.

### A Snake In His Hair.

The hair of the Indian yogi or religious mendicant owing to long years of neglect becomes matted together in a fashion more easy to imagine than to describe and certainly not be brushed out. It is of very great length and when allowed to hang down trails on the ground. One night one of these yogis was sleeping under a tree when a snake wormed its way into his tangled coiffure, and he had quite a difficult task to get rid of it in the morning.—World Wide Magazine.

### Indulging a Genius.

Our ancestors were more indulgent and respectful to the eccentricities of men of genius than is the present generation. Byron was accepted and patiently tolerated when he chose to sit in moody silence throughout a dinner party given in his honor, scowling contemptuously at the delicious food before him, while he sipped vinegar and munched a cracker.

### Down to 27 Banks.

With the consolidation of the Union Bank of Halifax and the Royal, and the liquidation of the Sovereign Bank, the number of banks doing business in Canada is reduced to twenty-seven. Of these fourteen have their head office in Ontario, nine in Quebec, two in Nova Scotia, one in New Brunswick. Four of these have paid up capital less than a million; all the rest over that amount.

CRIPPLED WITH LAME BACK

THIS RESULT OF LONG STANDING KIDNEY DISEASE WAS OVERCOME BY

DR. CHASE'S KIDNEY-LIVER PILLS

This letter gives you some idea of the definite and certain results you obtain by using Dr. A. W. Chase's Kidney and Liver Pills for kidney disease.

This medicine is very prompt in action and very direct in effecting cure. You do not need to keep up the treatment long before you find most marked improvements.

Mrs. Richard Patterson, Haldimand, Gaspe Co., Que., writes: "I want to tell you that I was cured of kidney disease of long standing by the use of Dr. Chase's Kidney and Liver Pills. I used to suffer a great deal, not knowing just what was the cause of the trouble and got so bad that I was almost crippled with lame, sore back.

"Before I had used two boxes of these pills I found my back better and less than three boxes made the cure complete. I have never had a sore back since and believe the cure to be lasting."

Backache, headache, bodily pains, scanty, painful urination, deposits in urine after standing, fickle appetite, indigestion and irregularity of the bowels are among the symptoms which warn you of serious trouble from kidney disease.

You can be practically certain that Dr. Chase's Kidney and Liver Pills will help you and help you quickly. Make the test for yourself to-day. One pill a dose, 25 cts. a box, all dealers; or Edmanson, Bates & Co., Toronto. Write for free copy of Dr. Chase's Recipes.

## TUNIC GOWNS TO GO.

**Fashion Will Have None of Them In the Fall.**

STUNNING TUNIC GOWN.

Tunic gowns are not becoming to the average woman, so it will not be overwhelming news to state that Dame Fashion has decreed that in the fall these models will not be worn.

There is one exception in tunic effects that should be allowed to remain—the frock of silk or some sheer material veiled with tunic draperies of chiffon or material of a diaphanous texture. The costume illustrated is one of the best types of the tunic gown which is popular this summer.

### The Odd Jobs Woman.

If you have no particular bent, but many outlets, do not feel you must train yourself into a specialty for which you have no particular fitness, which, being more plainly translated, means there is room in the world for the odd jobs women.

Don't you believe it?

Hear how one girl who was suddenly thrown upon her own resources made for herself a comfortable living.

When forced to take account of stock she found she had no particular talent, but many knacks. She could not write stories, be a concert singer or player, paint miniatures or teach kindergarten, but she could write a clever note, bake delicious cake, pack a trunk that was a joy to behold when opened at a journey's end, play inspiring dance music, sing ballads blessingly and read aloud delightfully. In addition she could do fine mending, clean gloves and laces and had an artistic knack of setting a table or decorating a room.

It would take years to specialize on any of the branches, with no certainty of final success. While debating the girl heard a business friend lament that there was no one to help her out on the numerous odd jobs that overfilled the busy worker's scant time.

"I'll be an odd jobs woman," said the girl.

She would go into a woman's kitchen and bake a cake, would set her table and decorate her drawing room for company, would stay in the pantry and attend to careful service and would later go into the drawing room to play for dancing or sing a few songs.

The friend who hated to pack a trunk knew where she could find a good packer in an emergency. The packer would also come early and get clothes in good condition, run ribbons, mend, darn or clean gloves and laces.

The society woman who could not afford a secretary and was swamped by her correspondence could have clever, well written notes sent out from mere jottings of information. She could also trust her for calling lists to be carefully revised and invitations written, directed and sent.

Where eyes were bad or one was convalescing from a long illness there would go the girl with clever literature adapted to the taste of the hearer. Better yet, these stories were read in a pleasing voice, with perfect enunciation.

### Summer Reading.

Summer gives more time for reading, even to the busy woman, than does any other season. This may be because it is too warm for social duties and exercise, but the pleasant fact remains to the book lover.

Systematic reading is always of more advantage than desultory, therefore for part of the time you allow yourself each day to read along given lines.

If you expect to take your vacation later get all the books bearing on the history, fiora and fiction of that part of the country. There are comparatively few parts even of unhistoric America that have not been written up, while for a trip abroad the difficulty is to choose.

A summer reading club for workers is delightful.

### Shoe Laces.

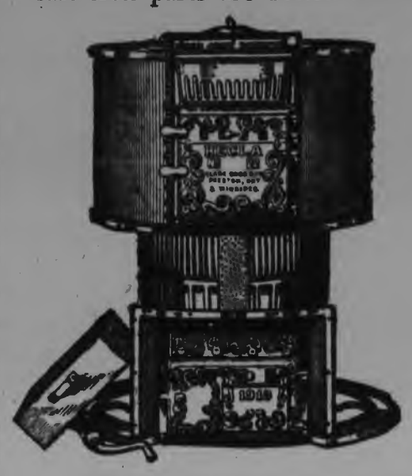
When the tips come off shoe laces melt a little sealing wax and dip in the ends of the laces, rolling them between the fingers till they are shaped.

HECLA FURNACE

And The Most Vital Improvements Made In Warm Air Heating In 30 Years

The first vital improvement is the FUSED JOINTS.

The objection to the ordinary warm air furnace is, that where the steel and cast iron parts are bolted and cemented, the joints do not remain air-tight. The iron and steel of the furnace expand and contract under the influence of heat and cold. Bolts work loose, cement drops out and gas, dust and smoke escape into the house through these openings.



To overcome this, we perfected FUSED JOINTS. Instead of bolting and cementing iron and steel together, we fuse them at white heat until they become one solid piece of metal.

FUSED JOINTS make the combustion chamber absolutely air-tight. They are permanent joints and insure the warm, heated air being always fresh, healthful, invigorating and untainted.

HECLA FIREPOTS are reinforced by 97 steel ribs fused into the outer surface. This makes them the stiffest, strongest and most durable firepots that can be made.

The steel ribs increase the radiating surface of the firepot by 300%. This increase in the radiating surface of the firepot, increases the radiating power of your furnace and enables you to get more heat out of the fuel that you burn.

In fact, actual tests has shown a saving of at least one ton of coal in seven, through the heating efficiency of the "Hecla" Steel Ribbed Firepot.

These are vital improvements—"Hecla" improvements—that are found only in "Hecla" Furnaces. There are others, described and illustrated in our book. Write for free copy. Send us a rough plan of your house and we shall be pleased to make up free estimate of the cost of installing the proper "Hecla" Furnace. 99

## DEVIL GOT THERE FIRST.

**Outcome of Hobo Poet's Bargain For a Night's Lodging.**

A lonely and half starved tramp was looking out for some place in which he could possibly get a night's lodging and something to eat when he saw not far away a man standing in front of a large house near the road. Approaching him, he said, "Can I get a place to stay all night and get a bite for supper and breakfast?"

"Have you any money?"

"No, sir. But I am weary and tired. Please take me in."

"No; it takes money here."

"Well," said the tramp, "I have no money, but I am somewhat of a poet, and if you will take me in, give me my supper, bed and breakfast, I'll write you an epitaph."

"An epitaph! What's that?"

"Oh, it's a few lines to be placed on your tombstone, describing your good deeds, etc., in life."

"Well, say, I don't know you. Maybe if I were to see some of the lines you talk about I wouldn't keep you till after supper."

"Well, I'll write the first verse before supper, provided if it suits I am to have my bed and breakfast before completing the second and last verse."

"Good 'nuff."

"Well, now, what is your name?"

"Keesle."

"All right, Mr. Keesle. These lines before supper:

"There was a man who died of late,
For whom the angels did expectant wait
With outstretched arms and wings of love
To waft him to the realms above."

"Yes, yes; come to the house."

Next morning after breakfast:

"Say, mister, you just finish that verse before you leave."

"All right; here goes:

"But while the angels waited for the prize
Still hovering round the lower skies,
In slipped the devil, like a weasel,
And down he pulled old Keesle."

—National Monthly.

### Lightning Losses.

Lightning causes on an average of 550 deaths and a property loss of more than $3,000,000 annually. In the same length of time it injures 800 persons and kills 4,500 head of live stock in the fields.

### Cheese in Switzerland.

It is not easy to get good cheese in Switzerland, the best being exported.

### A Forbidden Air.

In India military bands are forbidden to play "Home, Sweet Home," because of its pathos having so potent an effect on the English people who may hear it.

### Emery and Corundum.

With the exception of the diamond, emery and corundum are the best natural abrasives known. Corundum is pure aluminium oxide, and its hardness is next to that of the diamond. Emery so far as composition goes may be considered a mixture of corundum with more or less magnetite or hema-

328 George St. HARRY HAMILTON

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS.

ANY PERSON who is the sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts, a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

W. W. CORY.

Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Buildings, Waterloo, Ont.," will be received at this office until 4.00 p.m., on Wednesday, September 14, 1910, for the work mentioned.

Plans, specifications and form of contract can be seen and forms of tender obtained on application at the office of Mr. Thomas A. Hastings, Clerk of Works, Postal Station F, Yonge Street, Toronto, at the Post Office, Waterloo, Ont., and at this Department.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
E. C. DESBARATS,
Secretary.

Department of Public Works,
Ottawa, August 25, 1910.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

# An Ideal System

**New York Engineers Submit Plans for a Complete Equipment and Also a Scheme For a Beginning—Would Have the City Build It and Then Let a Private Corporation Operate Both the Railways.**

Toronto, Sept. 2.—To provide Toronto with "an ideal system" of underground railways will cose $23,000,000.

To provide for a temporary system, north and south, will provide a good beginning, will cost $9,375,000.

These are the estimates announced in the $5,000 report of Forgie, Jacobs & Davies, the New York engineers, as handed yesterday to Mayor Geary by Mr. Forgie. The report is quite bulky, and is accompanied by a large number of maps, plans and sketches.

In submitting the report recommending the "shallow" type of subway, it is emphasized that, in their opinion, a tube system of railways cannot be made a financial success unless run in conjunction with the surface street car and radial systems. It also advises in favor of municipal construction of the railway, but against municipal management, declaring that better results are obtainable under *private management*, and recommending that the Toronto Street Railway Co. be given an opportunity to extend its franchise and take over the subways under an equitable arrangement.

The engineers, while favoring the idea of two main diagonal thoroughfares, with subway lines underneath, says also: "The primary object of subway construction is to afford freedom for expansion and relief to congestion, and it is generally false economy to avoid the busiest thoroughfares with a view to reducing first cost, and thus hamper the usefulness of the subway for all time. It is our belief that any subway projected should not attempt to avoid the main streets, but should follow the main arteries."

The engineers weer asked to report on "the necessary arrangements for handling street railway traffic, having in mind the present system and the city's rights to construct tubes in the central part, and surface lines in the outlying districts," and their views "in regard to the likelihood of such an undertaking being self-sustaining," making estimates of cost of construction, equipment and maintenance, and expressing views as to the most feasible location for tubes and surface railways.

### New Subways for New York.

New York, Sept. 2.—Preparatory to relieving the daily increasing congestion on present transit lines in Greater New York, bids for new subways with forty-one miles of trackage, were advertised for yesterday by the public service commission. The entire work will cost approximately $125,000,000, and will include new underground connections in Manhattan, Brooklyn and the Bronx, grouped under the general title of the tri-borough subway.

The advertisement specifies two plans of construction; one entirely by private capital, and the other with the city money. If the latter is adopted, the work will be done piecemeal, as only $60,000,000 in municipal funds is available.

### Fears For the Crops.

Brandon, Sept. 2.—Heavy rains give rise to fears of damage to the wheat crop. A period of wet weather is promised, and the grain is in danger of bleaching. Fall plowing will be materially helped, however, if the weather clears up in a reasonable time. Reports show that three hundred men are needed for harvesting operations in this district. The shortage is due largely to lack of information regarding the needs of farmers. Circulars distributed on excursion trains stated that only fourteen men were needed here, and consequently the workers have gone west. The same scarcity of workers is reported in the building trade.

### Surveyor Drowned.

Edmonton, Alta., Sept. 2.—A telegram received from Athabasca Landing stated that W. H. Selby, Dominion land surveyor, was drowned in the Athabasca River at Grand Rapids ten days ago. He was walking along the river and fell in. It is thought that he had an attack of heart failure. The deceased's wife resides in Toronto.

### Attempted to Dynamite Building.

Seattle, Wash., Sept. 2.—An attempt to dynamite a new six-storey building under process of construction at Third avenue and James street Wednesday night shattered all the windows within the radius of a block, and led to the report that an attempt had been made to rob the Canadian Bank of Commerce, adjoining.

### Did the King Pepper Him?

London, Sept. 2.—King George, known as the best hunting shot in England, is believed to be the one who accidentally shot Lord Kilmarnock during a hunt Wednesday at Ballater, near Balmoral Castle.

It turned out, however, that the wounds were slight, and, aside from possible scars, his lordship will be none the worse for his experience.

### A Plucky Boy.

Toronto, Sept. 2.—Walker Rockwood, a small boy from the Mimico Industrial School, fell at noon at the model playground at the Exhibition grounds and broke both forearms. Dr. H. B. Smith of Detroit and Dr. Follett fixed him at the emergency hospital on the grounds, and shortly after one o'clock he was out on the grounds again, enjoying himself.

### Jury Blames Officials.

Newark, Ohio, Sept. 2.—In a final report made yesterday the Licking County grand jury places the responsibility for the lynching of "Dry" Detective Carl Etherington on July 8, on the then mayor of Newark, sheriff of Licking County and chief of police of Newark, all of whom have since resigned or been deposed.

## TELEGRAPHIC BRIEFS.

Georgia Democrats have nominated Hoke Smith for governor.

The upsetting of a mud scow has closed navigation in the Rideau Canal.

Hon. W. S. Fielding sailed from Bristol on the Royal Edward yesterday.

The grand stand and racing stables at Delorimier Park, Montreal, were burned yesterday.

The U. S. Government has purchased several hundred Maxim silencers for use in the army.

Glenn Curtiss in his aeroplane raced a mail train along the shore of Lake Erie near Cleveland yesterday.

The Spanish Government has declared the city of Bilbao in a state of siege as a result of clashes between strikers and authorities.

The stowaway who was taken from the hold of the steamer Mount Temple at Montreal died from starvation, after being twelve days without food.

The young man Edge, charged with incendiarism in connection with a consignment of silk on his premises in St. Rochs, Que., has been judged insane.

Fire broke out yesterday in the upper storey of the east wing of St. Joseph De La Deliverance, Levis. There are nearly 700 inmates, aged men and women, in the hospital.

Greater New York has a population of 4,766,883 under the thirteenth decennial census. This makes New York the second largest city in the world, and as large as any two foreign cities except London.

While in a small boat fishing near Nuns' Island, Montreal, John Bennett, an employe of the Grand Trunk was shot and killed by the accidental discharge of a gun, which was in the bottom of the boat.

### Complain of Custom Duties.

London, Sept. 2.—It is believed that arrangements will be made for the Queen's Own to march through the city. The desire for this is being more widely expressed every day. The messing arrangements at Rushmoor were on the lines of the rifle brigade. The junior army and navy stores have taken over Government rations, and have furnished cooks, carvers, mess tins, and table equipments, which are on a better scale than those of the regulars. Sergt. Ellingsworth has gone to Edinburgh to visit his old regiment, the 93rd.

Hon. W. S. Fielding, William Laidlaw, K.C., and Miss Laidlaw, visited the camp yesterday. Gen. Lomas dined with the officers at the Queen Hotel Wednesday night.

Complaint is still being made of the ungraciousness of the officials in connection with the customs duties. Sir Henry Pellatt has also been compelled to take out a license for his auto. The Ordnance Department is charging for blank ammunition, but it is hoped and believed that when Mr. Haldane's attention is directed to the matter it will be righted.

### Slates Montreal's Mayor.

Montreal, Sept. 2.—Le Devoir, Henri Bourassa's paper, takes Mayor Guerin to task for taking part in the laying of the corner-stone of the First Presbyterian Church on Saturday last. That paper claims that the act of the mayor was reprehensible, because Catholics should not take part in a non-Catholic worship.

"It is not without a sentiment of goodness," adds Le Devoir, "that we protest against the conduct of the Mayor of Montreal. He has given so many proofs of his devotion to the church in the organization of the eucharistic congress, and, we also say with pleasure, that he had refused to distribute the prizes to the Lycee des Jeunnes Filles, an institution presided over by a Freemason."

### May Jeopardize Civic Plant.

Winnipeg, Sept. 2.—The city authorities are seriously alarmed at the permission granted the Minnesota Power & Canal Co. to divert 600 cubic feet per second from Birch Lake basin at Rainy River watershed into the St. Louis River. This diversion may seriously jeopardize the Winnipeg civic power plant on the Winnipeg River. The board of control has instructed its secretary to forward to the International Waterways Commission a request that the U. S. Secretary of War permit be held until the effect of the diversion can be estimated.

### Deaths Now Number Nine.

Durand, Mich., Sept. 2.—Clinton A. Davis of Montreal, who was scalded in the Grand Trunk wreck near here last Wednesday night, died here yesterday. This brings the known deaths up to nine. Davis' mother, Mrs. Alma Ward, and the latter's nurse were killed. He was 26 years old.

### Mexican Asphalt.

Pure liquid asphalt seeps from the earth in a number of places in the Mexican state of Tamaulipas, but so far from existing methods of transportation that no efforts have been made to exploit it.

### Fake Curls.

In preparing human hair for sale it is first assorted, combed and washed in boiling water to which a weak solution of soda or ammonia is added, then assorted as to colors. The short hairs are wound around little glass bats placed in a coke heated kiln five or six days, when they are ready for sale as "curls."

## THE MARKETS.

### New York Dairy Market.

NEW YORK, Sept. 1.—Butter—Steady; unchanged; receipts 4442.

Cheese—Unsettled; unchanged. Receipts 3382

Eggs—Firmer; receipts 11,900. State, Penna. and nearby hennery white, 28c to 33c; do., gathered white, 28c to 30c; do., hennery brown, 28c to 30c; do., gathered brown, 25c to 28c; fresh gathered, extra first, 24½c to 25½c; first, 22½c to 23½c; seconds, 21c to 22c.

## CATTLE MARKETS.

**Hogs 25c to 35c Lower at Buffalo—Steady at New York.**

NEW YORK, Sept. 1.—London and Liverpool cables quote American cattle lower, at 12¼c to 13c per pound, dressed weight; refrigerator beef steady, at 10½c to 11¼c per pound.

### Toronto Live Stock.

TORONTO, Sept. 1.—The railways reported 102 carloads at the City Market, consisting of 1190 cattle, 1552 hogs, 2731 sheep and lambs, and 426 calves.

### Exporters.

There were no export steers reported other than these same cattle bought by McCurdy. A few export bulls were reported at $4 to $5.25.

### Butchers.

Butchers' cattle were firm and sold at higher prices than at any time during the week. Picked lots, $5.75 to $6.10; good, $5.50 to $5.75; medium, $5.20 to $5.50; common, $4.75 to $5.15; cows, $3 to $5.15; canners, $1.50 to $2.50.

### Stockers and Feeders.

Harry Murby reports many prospective buyers, who are going to wait, rather than pay present prices, believing they will not have to pay more later on. Mr. Murby bought 2 loads only, weighing 700 to 900 at $4.60 to $5.25 per cwt.

### Milkers and Springers.

As will be seen by sales given below, the market was, if anything, stronger for milkers and springers. Prices ranged from $45 to $85 each. Any cows sold under these prices were scarcely worth reporting, altho there were some as low as $25.

### Veal Calves.

Veal calves sold at $3 to $8, and a few choice at $8.50.

### Sheep and Lambs.

Sheep were firmer, and lambs easier in price. Sheep, ewes, sold at $4 to $4.75; rams, $3 to $3.50; lambs, $5.75 to $6.25, and one selected lot sold at $6.35 per cwt.

### Hogs.

Receipts were moderate and prices firm at $9 for selects, fed and watered, and $8.60 and $8.65 to drovers, for hogs, f.o.b., cars at country points.

### East Buffalo Cattle Market.

EAST BUFFALO, Sept. 1.—Cattle—Receipts 150 head; steady; prices unchanged.

Veals—Receipts 100 head; active; 25c higher; $7 to $10.75.

Hogs—Receipts 3300 head; fairly active; 25c to 35c lower; heavy, $9.30 to $9.50; mixed, $9.30 to $9.; yorkers, $9.25 to $10.05; pigs, $9.25 to $10.05; roughs, $8.25 to $8.60; stags, $6.50 to $7; dairies, $9.25 to $9.50.

Sheep and lambs—Receipts 2400 head; active and steady; lambs, $5 to $7.50; yearlings, $5.25 to $5.75; sheep mixed, $2 to $4.75.

### New York Live Stock.

NEW YORK, Sept. 1.—Beeves—Receipts 2121. No trade. Steady feeling. Dressed beef steady at 8½c to 12½c for native sides; Texas, 7½c to 9c.

Calves—Receipts 461; veals and western calves steady, buttermilk firm. All sold. Veals, $8 to $11; culls, $6 to $7; common western, $5; buttermilks, $5.50 to $6. Dressed calves, steady; city dressed veals, 14½c to 17c; country dressed, 10c to 15c.

Sheep and lambs—Receipts 6640; market steady. Sheep, $3 to $4.75; lambs, $7 to $8; one car, $8.60; culls, $5 to $5.90.

Hogs—Receipts 993. About steady. State hogs, $9.75 to $9.90.

### Chicago Live Stock.

CHICAGO, Sept. 1.—Cattle—Receipts, 8000; market steady; beeves, $4.90 to $8.40; Texas steers, $3.75 to $6; western steers, $4.40 to $7.25; stockers and feeders, $4.10 to $6.25; cows and heifers, $2.50 to $7.60; calves, $7 to $9.25.

Hogs—Receipts, 14,000; steady for light; others, weak and 5c lower; light, $9.30 to $9.70; mixed, $9.05 to $9.55; heavy, $8.50 to $9.35; rough, $8.50 to $8.75; good to choice, heavy, $8.50 to $9.40; pigs, $8.90 to $9.60; bulk of sales, $9.00 to $9.35.

Sheep—Receipts, 25,000; strong; native, $2.65 to $4.85; western, $3 to $4.70; yearlings, $4.75 to $7.75; lambs, native, $5 to $7.10; western, $5 to $7.

### Earthenware.

A fine, shell-like surface is given to earthenware by exposing it when freshly made to direct contact with flames from a fire fed with salt.

### Fish in Japan.

The Japanese eat more fish than any other people in the world. With them meat eating is a foreign innovation, confined to the rich, or rather to those rich people who prefer it to the national dish.

# PLUCKY ENGINEER HAS A DESPERATE FIGHT WITH TRAIN ROBBER, FINALLY KILLING HIM

**Three Bandits Make Attempt to Hold Up Train—Engineer Fells One With a Rock and Captures His Revolver, Then Shoots Him.**

## OTHERS ESCAPED

Special Wire to The Examiner.

COLORADO SPRINGS, COL., Sept. 2.—After a desperate struggle, Engineer Frank Stewart of the Colorado Midland Railway, seized a revolver from one of a trio of bandits who attempted to hold up the train and shot the bandit dead, near Leadville, at midnight.

There was a special consignment of several thousand dollars in the express car, and this was what the robbers were after. The train was flagged and the engineer saw a huge boulder rolled on to the track. While two bandits, one on either side of the train, stayed on guard to prevent interference from the passengers and the crew, the other one called on Stewart to tell the express messenger to open the door. Stewart awaited his opportunity, then picked up a rock, and with a sudden movement knocked the assailant down with it. Then there was a fearful struggle for life. The engineer finally secured the gun, with which he shot the bandit dead. Meantime the awaking passengers had frightened the other bandits, who fled to the mountains, followed by a Sheriff's posse.

## FINDS UNITY

**Sir Robert Baden-Powell Gives His Impressions of Canada**

TORONTO, AUG. 31. — Sir Robert Baden-Powell in an address at the opening of the Toronto Exhibition in referring to his trip through the west said he could not help being impressed by what Sir Wilfrid Laurier preaches everywhere he goes, that is, unity and progress.

"It has struck me forcibly," he said, "that your people are thoroughly imbued with these principles. Wherever I go there is unity of feeling and progress in every direction, and it is really a healthy sign.

MRS. (REV.) ALEX. TORRIE

**Who will assist her husband in special services at the Gilmour Memorial Church**

## FAILED IN HIS ATTEMPT

DOVER, ENG., SEPT. 2.—Ted Heaton failed in the attempt to swim the English channel, after being in the water sixteen hours and reaching within four miles of the French shore. He was pulled out exhausted.

## MAY CROSS LAKE ONTARIO

ROCHESTER, N.Y., SEPT. 2.—If John J. Frisbie, the aeronaut now here, finds the air currents to his liking, he will undertake his much talked of flight across Lake Ontario. He stated this yesterday and may head for Toronto any day, considering the "if".

## AGE OF THE MAPLE LEAF

LONDON, ENG., AUG. 31.—Stewart Paterson, senior chaplain in Red River expedition, writes to the press that the maple leaf was recognized as the emblem of Canada long before the year 1830, the date claimed for its first recognition, on the initiative of the late Doctor Richardson, Toronto. He was secretary of a patriotic association at Peterborough in 1858, and had a badge whereon is a wreath of maple leaves, and he wrote verses mentioning the maple leaf as ranking with the rose, shamrock, and thistle.

## OREGON SENATOR'S WARM PRAISE FOR SIR WILFRID

CRANBROOK, B.C., AUG. 31. — "Laurier has demonstrated that he stands in the vanguard of a new world statesmanship," was the statement of Senator Chamberlain, of Oregon, in speaking of the Premier's policy of Asiatic immigration.

"Japan has reached a position as a world's power, in which she can not be treated with contempt. Your Premier had a larger and wider conception of statecraft; he realized the situation and was cognizant of the future significance of the national action taken. He won his point for Canada by diplomatic sagacity and foresight.

He made thereby a most effective bid for the trade of the Orient, the big thing of the immediate future, for which the United States and European countries are already suing.

He won his point, and more, he created a sentiment in the Orient which will mean much to Canada from a material and commercial standpoint."

## THE BOY SCOUTS MAY BE FEATURE AT LOCAL FAIR

**The Peterborough Patrols Will be on Hand to Give a Demonstration of Their Drill---Effort is Being Made to Have Cobourg Scouts Here With Their Wireless Apparatus.**

The papers just now have been full of the Boy Scouts. You have no doubt heard a lot about the movement; may perhaps have seen the Peterborough Patrols when they returned from Toronto Exhibition the other night.

You are likely, however, to have a better opportunity of seeing the work and drill of the boys, as arrangements are being made to have the Peterboorough Scouts, who covered themselves with glory before General Sir Robert Baden Powell in Toronto, appear at the Peterborough Industrial on Sept. 16 and 17, and give a demonstration of what they are being taught to do. Not only will the Peterborough Scouts be on hand but an effort will be made to have the Cobourg Boy Scouts with their bicycle corps and wireless telegraph apparatus here to assist the local boys in giving an exhibition of their work.

## MANY PETERBOROUGH PEOPLE AT THE TORONTO EXHIBITION

Many Peterboorough people are in attendance at the Canadian National Exhibition this week and many more are planning to go. The reason is plain, as the Canadian National this year is bigger and greater than ever, offering more novel and entertaining features than ever before. Never has there been such an attractive list to offer patrons of the big fair.

To most of the spectators, doubtless the most fascinating number is the musical cotillon by the Royal aCnadian Dragoons. Thirty-two men and horses present the musical ride, with torches alight, in a manner that evidences most careful drill, and a positive interest in the doing of it, the chargers themselves entering into the spirit of the performance and acquitting themselves with equal credit to the riders.

The British army quadrilles and the tattoo are numbers that always evoke outbursts of applause and kindle the patriotic ardour of the crowds, the several national airs drawing forth the enthusiastic cheers of the respective sympathizers. The seven military bands are conducted by Lieut. Albert Williams, Mus. Doc. (Oxon.), of the Grenadier Guards Band, admittedly the finest band conductor in the British Empire.

### NERO, THE TRICK HORSE

Of all the shows on Midway there is none with a wider appeal than "Nero, the Trick Horse." The peculiarity about him is that he was born without a tail.

Little Nero is the whole show in himself. For 25 minutes he keeps a crowded tent in roars of laughter. He does everything but talk, and he nearly does that. At any rate, he answers all questions which his trainer asks him. He goes to church and prays there, and is not ashamed to say so. He does a startling teeter act, and rolls around in barrels, and generally has a good time, in addition to giving other people the same. This is one of the best shows of the Fair.

If Peterborough people will take in the attraction, they will see a number of familiar faces in charge.

### CALIFORNIA FRANK'S WILD WEST.

California Frank and his Wild West Show, which created a furore here last year, has returned to Midway with all his old favourites, as well as a score of new artists. In the principal cities and hippodromes of the United States, in the interval, he proved to be a banner attraction.

### JOHNS GLASS BLOWERS

One of the most popular shows on Midway this year is Johns Glass Blowers, where the art of glass blowing is fully shown. Thousands of people have seen this splendid show year after year, and all are delighted. Each visitor is presented with a handsome souvenir of glass articles. Don't miss it.

### LIGHTENS HOUSEHOLD LABOUR

There is probably no one exhibit in the Process Building that is attracting so much attention as the demonstration of Wonder-Shine, being given by the Household Convenience Company, Limited, Toronto. Wonder-Shine cleans silver and gold ware without rubbing.

## ALL QUEBEC TURNED OUT TO WELCOME THE CARDINAL

Special Wire to the Examiner.

QUEBEC, SEPT. 2.—All the ancient city turned out this morning to get a glimpse of Cardinal Vannutelli, the Pope's emissary, as with a distinguished suite he sped along in an auto on his way to the Shrine of St. Anne de Beaupre. Chiming Church bells and thousands of Papal flags and tricolours of France, as well as British ensigns, hung along the line of route. The party returned about noon and this afternoon left on the Government steamer, Lady Grey, for Montreal.

## GRANT OF $500 MADE TO THE 57th REGIMENT BAND

At a meeting of the Finance committee of the City Council held last night a considerable amount of business was transacted.

A grant of $500 was made to the 57th Regimental Band to be paid to the treasurer, subject to the usual conditions.

It was also decided that when the city solicitor draws up on instruction of the Council agreements for the benefit of parties that they be charged for the same, the money to be paid to the city treasurer for the benefit of the city.

### DIED

LIVICK.—At Peterborough on Thursday, the 1st September, 1910, Jane Livick, widow of the late John Livick, aged 88 years.

Funeral from the residence of Mr. J. W. Anderson, 129 Hazlitt Street, to the Little Lake Cemetery, on Saturday, 3rd September, at 2 p.m.

## FIRE CHIEF BACK HOME

**Chief Howard Has Returned From the Fire Engineers' Convention at Syracuse, N.Y.—Meeting Was Successful and Interesting.**

### SOME EXPERIENCES

Fire Chief Howard returned last night from attending the convention of the Fire Engineers of America, which met in Syracuse, N.Y., last week. Mrs. Howard, who accompanied the chief on the trip, has also returned greatly benefitted in health as a result of the outing.

Chief and Mrs. Howard, after attending the convention, had a very enjoyable visit in New York, Boston and other eastern cities.

To an Examiner reporter who saw him this morning Chief Howard stated that the convention was most successful. There was a very large attendance of fire chiefs, mayors, aldermen and other municipal representatives, including thirty-one from Canada. The Canadian delegates were given a hearty reception, in fact all the visitors were royally entertained by the people of Syracuse.

Many helpful papers were read during the convention. The feature, according to Peterborough's chief, was the feeling generally expressed by experts that the days of the steam fire engine are numbered and that gasoline engines will soon take its place all over the continent. Many departments have done away with steam engines altogether, and the manufacturers state that they are going to

FIRE CHIEF HOWARD

**Who has returned from the Convention at Syracuse, N. Y.**

stop making them, so great has been the falling off in the demand.

Chief Howard picked up some useful pointers. He was a member of the committee on apparatus and had to assist in the demonstration of the apparatus so that he was in a position to get a line on everything. The Westinghouse people of Hamilton made the best showing of any of the firms. The chief brought back with him some decidedly useful little inventions, including a "hose patch," which can be instantaneously adjusted to a break in the hose and which will be the means of saving many feet of hose.

## THIS MAN LOST $500

BUFFALO, Aug. 31.—Joseph Leoni, of 231 West Genesee Street, is the latest victim of the handkerchief game. Yesterday he handed over $500 to two strangers at Court and Niagara Streets, receiving in return what he supposed to be a roll of bills amounting to $3,000 closely bound in a handkerchief. When he reached his home he found the supposed roll of bills to be tissue paper. He complained to the police and search is being made for the men who got his money.

## NARROW ESCAPES

Examiner Special.

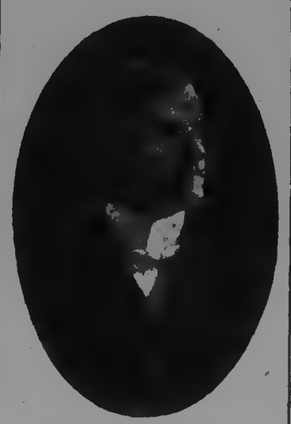
BOSTON, MASS., SEPT. 2.—H. B. and Mrs. Wilklunk, of Toronto, E. E. McGregor, of Montreal, and other Canadians were among the guests who had narrow escapes in the destruction by fire of the historic American House, Bunker Hill, at 1 a.m. this morning.

**HEALING POWER A MARVEL**

So remarkable is the healing power of Dr. Chase's Ointment that the results of a single application are often a marvel to persons who witness them for the first time. Mrs. C. Hopkins, St. George, Ont., tells how her son was cured of blood poisoning which got started in a wound received at a threshing. Relief was prompt and cure effected by three boxes.

# OTONABEE CLAIMS TWO VICTIMS THIS MORNING

**Mrs. Wm. E. Laing and Daughter Hazel, Seven Years of Age, Lose Their Lives as Result of Collision Between Gasoline Launch and Steamer "Otonabee"---Rudder Became Unmanageable and Little Craft Steered Directly Into the Big Steamer.**



REV. ALEX. TORRIE

**Who will conduct special services in the Gilmour Memorial Church**

## AFRAID OF SMALLPOX

Examiner Special.

QUEBEC Que., SEPT. 2.—Fearing the fishermen's hamlets along the Gulf of St. Lawrence are being swept by smallpox, the provincial authorities are rushing medical assistance and supplies to the district where thirteen deaths are reported within a few days of reported measels.

## ARE GOING AFTER CUPS

Examiner Special.

OTTAWA, SEPT. 2.—It was definitely decided to-day that the Montreal Nationals will proceed to the Coast Tuesday evening to meet New Westminster in a contest for the Minto Cup on September 17th and 24th.

## SOLEMN TRIDUUM

**Ordered by Ecclesiastical Authorities at Montreal**

Special Wire to the Examiner.

MONTREAL, QUE., SEPT. 2.—In all the Roman Catholic churches of this city and provance there began last night three days of solemn triduum which were ordered by ecclesiastical authorities for the reception of the high dignitaries to the Eucharist Congress. The blessing of the Sacrament and hours of prayer were the features of the ceremonies this morning. No troops have been ordered out to receive them, but all who desire to parade in uniform were given permission to do so.

## THE RECEPTION

**Montreal People Will Wear Dark Clothes For Eucharistic Conference**

Special Wire to The Examiner.

MONTREAL, SEPT. 2.—Dark clothes and a sober condition will admit any citizen to the civic reception to be tendered to Cardinal Vannutelli, the Pope's representative to the Eucharistic Congress. No cards, gloves or etiquette will be required.

## EARL GREY THERE

Special Wire to the Examiner.

INDIAN HARBOUR, LAB., SEPT. 2.—Governor-General Earl Grey has arrived here after an adventurous trip down the mouth of Hudson River and through Hudson Bay.

## FABRE DEAD

Special Wire to the Examiner.

PARIS, FRANCE, SEPT. 2.—Hector Fabre, C.M.G., Canadian Commissioner to France since 1883, died here this morning. He was born in Montreal in 1834, was educated at various Quebec colleges and was a lawyer and journalist. He was elected to Commons in 1873 and became a senator in 1875. His widow survives.

## NO BLAME IS ATTACHED TO CREW OF THE BOAT

The wife of Mr. William E. Laing, a machinist of the Peter Hamilton Company, residing at 588 Sherbrooke street, and his seven year old daughter Hazel were drowned in the Otonabee river near the Stewart settlement at 9.30 o'clock this morning through a collision between the gasoline launch, in which they were, and the steamer "Otonabee," of the Otonabee Navigation Company's fleet. The terrible accident was caused by an unmanageable rudder, which suddenly went wrong and was set at such an angle that the little eighteen foot open launch all at once veered from her course and steered straight into the Otonabee and steered straight into striking the big steamer amidships and turning turtle, throwing the six occupants, consisting of Mr. and Mrs. Laing and four children, into the water. Mr. Laing, by herculean efforts managed to save three of his children and pulled out his wife too late to save her life, but little Hazel went down before she could be rescued.

To-day was the annual outing of the Peter Hamilton Company's employees and they were being taken to Jubilee Point on the Otonabee. Mr. Laing and his family decided to spend the day in their launch instead of taking in the excursion and had only gotten as far as Stewart's when the fatality occurred.

### No Blame on Crew.

No blame can be attached to the crew of the Otonabee for the disaster as it was solely due to the rudder becoming unmanageable and causing the little craft to collide with the steamer.

The crew of the Otonabee did everything in their power to avert the unexpected tragedy. As soon as the accident occurred they did their best to rescue the unfortunate occupants of the launch. They remained for some time trying to find the body of the little girl and then brought the excursionists back to the city. Mr. Pinchen, the general manager of the company, instructed the Otonabee's crew to return at once to the scene of the fatality and to help in the search for the body, and accordingly the steamer went down again immediately after dinner.

### Mr. Laing's Story.

Mr. Laing the father of the family, was seen by the Examiner at the street railway wharf this afternoon and told the story of the accident.

"You know to-day is a holiday at the Peter Hamilton Company" he said, "and we decided instead of going down with the excursionists on the "Otonabee" that we would have a little picnic of our own in our launch. We had been camping at Crawford's Grove and thought we would go down about the first bridge. There were with me in the boat, my wife and four children, Everett, aged fifteen, Douglas, thirteen, Helen nine, and Hazel, the little girl who was drowned, who was seven. I was steering and one of the boys was running the engine. Everything went all right until we got to Stewart's. The Otonabee was coming along behind us, and I was keeping as close to the weed bed on the east side of the river as possible. The steamer came down the middle of the channel and I steered close to the buoy to give her plenty of room to get past. Just as we were even with her the rudder refused to work. It may have got clogged with weeds or something, but it went wrong and the launch turned in towards the steamer in spite of all my efforts to stop it. I tried to steer it by pulling on the ropes, but I could not turn the rudder and we went straight into the "Otonabee." I don't know whether I told my boy to stop the engine or not. Anyway, we struck the steamer about the middle and in a second our boat had turned over. We were all on the boat when it rolled over, but it turned for the second time and sent us off again. I managed to get hold of Helen my second daughter and place her in a skiff that we had been towing behind. Then the boys called and I got them in. One said "there's mother," and I got hold of my wife and pulled her head above water and got her in but she was dead. I tried to get hold of my little girl, but she had gone down. The steamer crew were not to blame."

Canoes were lowered from the Otonabee and picked up the survivors.

### Capt. White's Account.

"The accident was unavoidable, as far as we were concerned," said Capt. White, of the Otonabee," when asked for a statement by the Examiner. "We were going down the middle of the channel. I saw the launch, which was close to the buoy, at the side. As we drew up, even with them, I noticed it veer in towards us, but I did not think much of it then, believing that they would turn out again in a second. Then I saw that they were still coming and while I lost sight of the launch I reversed my engines quickly, so that we were reversed when she struck us." I think the motor kept on running after the collision, which, no doubt accounts for the launch turning over twice."

"People are very careless in the handling of launches when bigger boats are near," said Mr. W. H. Robertson, president of the Otonabee Navigation Company, to the Examiner, in speaking of the sad accident. "Often our boats have to slow down to prevent a collision. I think, too, that launches should carry life preservers, which might have prevented loss of life in this morning's accident.

The Laing family have been lifelong residents of this city, and are well known and highly esteemed by all who knew them. The family consisted of four boys and two girls. The boys are, Reuben, of the G. T. R., Roy, of the C. G. E., Douglas and Everett, residing at home. The girls were Hazel, and little Helen, who was drowned.

## LADDER BROKE AND MAN WAS SEVERELY INJURED

**Court Scobell, of Fraserville, Victim of a Painful Accident at Millbrook, and is Now in the Hospital Here---Was Hurt Internally by the Fall.**

A very serious accident occurred in Millbrook yesterday, when Mr. Court Scobell, of Fraserville, was painting in that town. It appears that while Mr. Scobell was going up the ladder it broke, allowing him to drop quite a distance to the ground, with the result that he was severely injured internally.

Dr. Russell of Bailieboro, was called and, after examining the injured man, he deemed it necessary to have him removed to the hospital. He was brought here yesterday, and is now lying in the hospital in a precarious condition.

## One Hundred And Fifty Entries For Labour Day---Some Of The Best

The entry list for the big Labor Day meet has now reached the 150 mark. A batch of entries arrived from Montreal this morning.

In a message over the phone from Toronto Physical Director Thompson was informed that the Toronto crowd were coming down by special train, and a large crowd of rooters are being brought along.

Great rivalry exists between the two associations. The Centrals' slogan is "Central's Penman." The West End replies, "Not so fast Central."

The half mile has 14 entries.
The quarter mile has 15 entries.
The mile run has 12 entries.
Broad jump, 14 entries.
220 yard run, 10 entries.
100 yard run, 11 entries.

All the other events are well filled. A full list of entries will be published to-morrow.

Seats on sale at Y.M.C.A. and Madill's drug store.

With fine weather, no better meet will be held in Canada this year than that proposed for Labour Day.

### SOMETHING HAS BEEN DONE.

Sir James Whitney's triumpettings in regard to the imminent collapse of the British Empire unless "something is done," are endorsed by the Mail and Empire. Mr. Whitney evidently wishes to convey the idea that unless Great Britain adopts the fiscal policy of protection the Empire is doomed—unless favoured classes are created to enjoy the forced contributions to the prosperity of the masses of the people the fall must come. Patriotism that can be reduced to dollars and cents as the dominant factors, or patriotism, whose reality and intensity are gauged by party advantages, is not unknown to a certain class of Conservatives. It was the same organ that endorses Sir James Whitney's prophetic hysterics that met the suggestion that the "National Policy" would imperil British connection, with the reply—"So much the worse for British connection."

Sir James says that unless something is done the empire will tumble in pieces. Something has been done and the British Empire was never in a higher condition of consolidation, unity and rapprochement than at the present time. Never was the promise of hanging together hereafter more definite and emphatic. Never before was the sentiment of important unity stronger, or more in evidence. The real bond of Empire is not material. A man works for the maintenance and comfort of his family. Bread and butter are not the family bond of unity; it is the *material affection of its members*. The chords of imperial unity are the intangible, but infrangible ties of sentiment. Touch this chord in part of the Empire and the whole body thrills. Sir Robert Baden-Powell touched this chord in a little speech to the Boy Scouts in Toronto; before half the earth's revolution there was a thrill of response in every section of the Empire. A Canadian cabinet minister, ethnically representing a conquered race, which the genius of British liberty has incorporated into the family of the Empire, is in South Africa to assist in the marvellous transformation act that changes recent enemies into brothers and members of the imperial family. Sir Wilfrid Laurier's voluntary gift to Great Britain of the British preference—as a mark of Canadian affection—as an expression of the sentiment of affection, which constitutes the real bond of empire, did more to consolidate the Empire than all that fiscal manœuvring would accomplish in many decades. Trade is, of course the material bond of empire, and the fewer the trade shackles the fewer kinks in the tie. Will the proposal of the bread and butter school of patriots to tax the bread of the British poor strengthen the bond that joins the British people together?

### EDITORIAL NOTES.

(From the Winnipeg Telegram)

Ottawa is arranging to remove the poles which disfigure the city's streets. They are to be replaced with conduits. Telegraph, telephone and lighting wires will be buried. Ottawa credits itself with some eighty-five thousand inhabitants. It can also credit itself with a spirit of progressiveness in this direction which could profitably be emulated by some other Dominion cities of vastly larger population.

## MAGNIFICENT DISPLAY OF BRITAIN'S SEA POWER

The great review of the British navy held by King George at Torquay on July 26 was an exhibition well calculated to restore confidence to nervous Britons whose sleep has been disturbed by the efforts of invasion alarmists. The huge fighting force assembled in close order covered five square miles of the bay. It presented thirty-six first-class battleships, led by the famous Dreadnought; twenty-three armoured cruisers, many of them as formidable fighting machines as the battleships; six protected cruisers; forty-eight destroyers, with their parent ships and scouts; submarines of the latest type and fleet auxiliaries. And there were no "has-beens" for mere filling purposes. Every vessel was a perfect one of its type; every one up to date. Ships and guns were the latest and best that war demanded. Every vessel was ready for service coal and ammunition up to the war standard; perfectly trained crews. Every man at his post.

And all this immense naval array was presented without withdrawing a single ship from the various foreign stations. The eight divisions were each accompanied by its fleet of colliers, and every vessel was in wireless communication with every other and with the Admiralty Office in London. Seated at his desk in his flagship the commander-in-chief could control every movement of the great flotilla. It was a peaceful demonstration of the great sea power Britain holds in reserve.

Any who may have been deceived by the alarmist stories of unsuccessful politicians into thinking that Great Britain has been falling behind in naval construction will find the statement presented by Mr. McKenna, First Lord of the Admiralty, a few days ago, informing and interesting. He gave the following figures showing the tonnage of the effective fighting ships of the navies of Great Britain, Germany and the United States *at different periods*:

| | Gt. Britain. | Germany. | U.S. |
|---|---|---|---|
| 1890. . . | 664,388 | 145,500 | Not known |
| 1899. . . | 1,119,005 | 165,064 | 120,425 |
| 1900. . . | 1,889,614 | 293,461 | 209,300 |
| 1906. . . | 1,891,307 | 441,656 | 476,276 |
| 1907. . . | 1,885,966 | 447,820 | 547,222 |
| 1908. . . | 1,934,368 | 538,714 | 629,747 |
| 1909. . . | 2,046,126 | 544,073 | 706,107 |

From 1906 onward, second and third class battleships, coast defence ships and sloops, gunboats and subsidiary vessels have been omitted as not being effective fighting ships in the British list. Had they been included the British showing would have been much better.

Answering a question as to the cost of construction, armament, equipment and maintenance, Mr. McKenna gave the following information:

Indomitable—Total cost of construction, £1,982,940; total cost of armament, £90,000; annual cost of maintenance and amunition, £53,200; annual cost of maintenance and pay of officers and men, £70,700.

Inflexible—Construction, £1,030,740, armament, £90,000; maintenance, £58,200; officers and men, £70,200.

Invincible — Construction, £1,676,-250; armament, £90,000; maintenance, £58,200; officers and men, £70,950.

St. Vincent—Construction, £1,581,-735; armament, £142,400; maintenance, £58,100; officers and men, £68,-460.

Collingwood—Construction, £1,539,-355; armament, £142,400; maintenance, £58,100; officers and men, £67,-960.

Vanguard — Construction, £1,462,-270; armament, £142,400; maintenance £58,100; officers and men, £67,950.

This great display of British naval strength will probably not be without its educational value. The people of the United Kingdom are peacefully inclined, but they are determined to be in a position to maintain the dignity of the Empire, either at home or abroad, at no matter what cost. And the cost is, indeed, fearful. Some day, it is to be hoped, the progress of civilization will render unnecessary the waste of effort on armaments which now makes the world sweat and groan.

## LABOUR CONDITIONS IN CITY ARE TOUCHED UPON

**Correspondent of the Labour Gazette Refers to What is Going On in the Labour World Here.**

### NEW ADDITIONS

Mr. J. Arthur Sharp, correspondent to the Labour Gazette for Peterborough and district, reported as follows for July:

**General Condition of the Labour Market.**

The labour market was very active throughout July, all branches of industry working full time, with complete staffs. There was marked activity in the building trades. Peterborough, like other places on the Grand Trunk System, was affected by the strike of conductors and brakemen, but the firms mostly affected expect to keep going for some time yet. Messrs. Adam Hall & Sons are advertising for tenders, and will erect a brick foundry and machine shop, and will employ about fifty hands. B. F. Ackerman & Company are building an $8,000 addition to their factory, and will employ from fifty to seventy-five additional hands; they will be given a fixed assessment of $15,000 for ten years. The George Matthews Company is increasing the capital stock from the sum of $500,000 to the sum of $1,000,000. The increased capital will be used in extensions to the Company's branches. At the last fortnightly meeting of the Cheese Board, 3,763 cheese were boarded, but three factories refused to sell owing to the inconvenience in shipping through the strike of the Grand Trunk Railway. They were offered 10 7-8 cents, but refused to sell. The season so far, has been a very successful one. The contract for the construction of sewers in the city was awarded, and will be built by day labour.

**Condition of Local Industries.**

The farmers are very busy. The wheat crop in the best section of Peterborough county will average from 35 to 40 bushels per acre. The farmers expect to have a good year, and the crops generally will be excellent. Haying is now about completed, and although in some instances the crop is light, it is on the whole, a fair average. Tomatoes and potatoes are coming along nicely, and there should be a plentiful supply.

Manufacturing. — Industrial establishments were all busy.

Railroad construction.—The construction work on the Canadian Northern Railway is progressing rapidly. The road is finished with rails laid and fences up from the Grand Trunk Railway Whitby branch to the Oshawa viaduct.

**Condition of Particular Trades.**

Bricklayers and masons, carpenters and joiners, lathers and plasterers, were very busy. Painters have all they can do. Plumbers are busy. They held a meeting on the 26th of the month to consider the raising of prices to take place on the 1st of August. Activity prevailed in the metal trades. Woodworkers were well employed. Painters were active. Tailors had a good month. Bakers and confectioners, butchers and meat cutters were well employed. Leather workers were busy. There was a good demand for unskilled labour.

## SPREAD OF THE FLYING CRAZE IN BRITAIN

LONDON, Aug. 25.—The casualties of Bournemouth week: Rolls killed; Rawlinson and Boyle seriously injured; Loraine barely escaping death—have not in the slightest degree cooled off the Englishman's enthusiasm for flying. They realize that huge prizes are to be won by the man who is willing to risk his neck to provide thrills for a paying crowd, and they are taking to the sport in such a way that a roaring trade is being done here in aeroplanes.

All sorts and conditions of people, who have money enough, are buying flying machines, and the French makers are reaping large profits. Louis Bleriot has opened an office in Regent Street, and the catalogue of the Aeroplane Supply Company of Piccadilly, which offers all makes of machines, comes with the morning mail as regularly as the lists of dry goods stores' bargains.

Armstrong Drexel, a wealthy young Philadelphian, has established a school of aviation at Beaulieu, Hampshire, where for $1,000, the purchase of a machine and an undertaking to pay all the costs of smashes (a considerable item) he guarantees to turn out an accomplished aviator—that is, presuming the man has the genius of flight in him, for flying is largely an instinct.

The good flying man is born not made. if the possession of the faculty known as "hands" is essential to the making of a good horseman, it is much more essential to the making of a good aviator.

An aeroplane in flight is as delicate as a Sevres vase. A false touch, a jerk, the pulling of a lever with too great force, and all is over. Every one agrees that possession of this delicate touch, a perfect *understanding and sympathy between him* and his machine saved Loraine when he was blown out to sea in the midst of a furious rainstorm. It was luck that brought him safely to land, but it was the inherent genius of flight that saved him when the slightest false move meant swift death.

The great meeting at Rheims last year first revealed to the world the strides that had been made by the science. Not one English aviator competed at the meeting. And Glenn H. Curtiss, an American, was the only man able to beat the Frenchmen at their own game. Nor was there an English competitor at the meetings at Doncaster and Blackpool.

In the winter a few Englishmen went to the French aviation schools at Pau, Mourmolons-le-grand, and Chalons. Two of them, Anthony Rawlinson, a famous polo player and racing automobilist, and Captain Dickson, an officer of the Royal Artillery, took part in the meeting at Nice last April and won a considerable amount in prize money. This put Englishmen on their mettle and there was a hurried exodus from here to the aviation schools abroad.

Then Claude Graham-White appeared out of the unknown as the rival of Louis Paulhan in the race for the Daily Mail's $50,000 prize for a flight between London and Manchester. His spectacular performances touched the English imagination. Nwsomkubln ataot-s-b, ;|6-vfic tion. Now men talk about aviation almost as much as they do about horse racing and the competitive merits of well known flying men are the commonest topics of dinner table discussion. All this has come about in less than six months.

The value of the prizes to be picked up undoubtedly *is the greatest* incentive to the young men who are taking up the sport. Morane, the Frenchman, who carried off the best prizes at Bournemouth, made $17,000 by six days' flights. Grahame-White in the same time cleared $7,000 and then was engaged to give a series of exhibition flights at Blackpool for $10,000.

Bleriot, Paulhan, and Henri Farman having made large sums, have almost given up exhibition flights. They are rich enough now to place them beyond the necessity of risking their lives and are devoting themselves to selling machines.

## YOU TAKE NO RISK

**Our Reputation and Money is Back of This Offer.**

We pay for all the medicine used during the trial, if our remedy fails to completely relieve you of constipation. We take all the risk. You are not obligated to us in any way whatever, if you accept our offer. Could anything be more fair to you? Is there any reason why you should hesitate to put our claims to a practical test?

The most scientific, common-sense treatment is Rexall Orderlies, which are eaten like candy. They are very pronounced, gentle and pleasant in action, and particularly agreeable in every way. They do not cause diarrhoea, nausea, flatulence, griping or any inconvenience whatever. Rexall Orderlies are particularly good for children, aged and delicate persons.

We urge you to try Rexall Orderlies at our risk. Two sizes, 10c. and 25c. Remember, you can get Rexall Remedies in this community only at our store,—The Rexall Store, McDermid and Jury, corner George and Charlotte streets.

## PERSONAL ITEMS FROM WARSAW

WARSAW, AUG. 31.—Miss Dora Payne, was the guest of Miss Julia Choate at Stony Lake Wednesday and Thursday of last week.

Miss Hazel Tighe, Peterborough, is spending a few days with her father, Mr. Dawson Tighe.

Master Willie Parsons, Peterborough, is visiting his cousin, Miss Helen Dunford.

Mrs. W. T. Abbott, Mission City, B.C., is the guest of Mrs. M. Payne for a few weeks.

Miss Olga Miller returned last week from Peterborough, where she has been visiting friends.

Mr. John Campbell, of the D. and D. Institute, Belleville, who has been visiting his mother, Mrs. T. Campbell, returned home last week.

Miss M. Middleton spent a few days in Peterborough last week.

Mr. R. Tedford returned on Saturday from a business trip to Montreal.

Mr. Clarence Snider, Peterborough, visited Sunday with his parents, Mr. and Mrs. E. Snider.

Mrs. Forsythe, Peterborough, is visiting Mrs. N. Middleton.

Mrs. McNealy, Havelock, is the guest of her mother, Mrs. R. Tedford.

Mrs. Ritchie, Belleville, visited Mrs. Thos. Clements on Saturday.

Master Clarence Matthews, Lakefield, spent Saturday with his uncle, Mr. E. Matthews.

Mrs. N. E. Bell and children, of Toronto, who have been visiting Mr. and Mrs. A. F. Choate, returned home on Saturday.

Mrs. F. E. Kline, of Lakefield, who has been visiting Mrs. S. R. Payne, returned home on Sunday.

Mr. Chas. Nicholson, Lakefield, is spending a few days in town.

Mrs. Colborne, Tgronto, is the the guest of Mrs. J. A. Crowe.

Miss A. Gow, of Peterborough, is the guest [illegible] Mrs. E. R. Hamblin.

**Your Opportunity**

Phone 126 — A. BROWN & CO. — 396 Water Street

Lot on the north side of McGill Street 40x120 feet to a lane, $165. Be quick if you want this.

A large house on Gilmour Street near Park Street, furnace, bath and electric light, large lot on the north side, $2800.

A new house on the south side of Gilmour Street just finished, having four bedrooms, bathroom and attic, parlour and reception hall with mantel, breakfast room and kitchen. A 50 ft. lot. See us about this.

A house in East City, large lot $500, no reasonable terms will be refused for this. We can furnish you with anything in the Real Estate line. Come in and talk your wants over with us.

# DRINK HABIT

***The Gatlin Treatment Cures Liquor Drinking in THREE DAYS Under Contract—No Hypodermic Injections or Other Disagreeable Features.***

The Gatlin Institute was established eleven years ago. More than **eleven thousand** men and women have been cured of liquor drinking by the Gatlin treatment there has been failure to cure in no case.

No hypodermic injections, no bad after effects, no poisonous drugs, no substitutive stimulants—a treatment so harmless that any child could take it.

Each patient is accepted for treatment under legal contract to cure in THREE DAYS—the cure to be entirely satisfactory in every particular or the fee paid is refunded when the patient is leaving the Institute and treatment costs nothing.

The Gatlin Home treatment is just as effective as Institute treatment if plain, simple directions are followed.

Call or write for books of particulars, copies of contracts to cure and other information.

## C. G. E. Champions Play In Toronto To-morrow

The Canadian General Electric Football Club, champions of the Midland Football League, go to Toronto tomorrow to take part in the games for the possession of the People's Shield, emblematic of the championship of Canada. The local team finished its training last night with a lively workout and is in the best of shape for the big battle to-morrow when they will be called upon to clash with the Toronto Thistles the strongest Toronto soccer aggregation and one of the best teams in the country. The competition is attracting wide-spread attention and the nine best teams in Canada will fight it out for the trophy. The C. G. E. players are in the best of shape and are confident of giving a good account of themselves. Here's hoping that they carry off first place. It would certainly be a great advertisement for Peterborough. Manager Bill Millburn's team will line up as follows to-morrow

Goal—Charlton.
Backs—Evans, Forrett.
Halves—Allan, Padgett (capt). Sparrow.
Forwards—Miller, French, Hitchens, Bbird, Williams.
Reserves—T. Evans W. Elliott.

## LONGBOAT AND SHRUBB TO MEET AT MONTREAL ON LABOUR DAY

MONTREAL, AUG. 30.—Tom Longboat, the Indian Marathon runner, is planning a schedule of exhibition runs, which he expects will keep him busy for about three months abroad. On Labour Day Longboat is scheduled to meet Alfred Shrubb, the English distance runner, here, and following the contest he will leave for England. Longboat says he expects to tour Ireland and Scotland. The pair have met several times at distances from 10 miles up to the full Marathon route within the last two years. Shrubb has beaten Longboat at 15 miles, while the Indian has turned the tables on the Englishman at the Marathon distance. Longboat has been in training for some time and he is sure that he will defeat Shrubb at the latter's favourite distance. At present Shrubb is ruling favourite, the experts figuring that if Shrubb could beat the Indian when the latter was at his best he could easily repeat it, as it has been some time since the Indian competed in any event.

## WARKWORTH CRICKET TEAM HERE ON HOLIDAY MORNING

The Warkworth Cricket Club will play a game with the Peterborough Club at Nicholls Oval on Monday next, Labour Day. The game promises to be an interesting contest, and is billed to start at 10.30 o'clock. The Peterborough team will be as follows: J. Arthurs, W. J. Coleman, J. Coleman, G. R. Coleman, E. Edney, C. Tarte, C. Downes, W. Richardson, C. Greene, J. Galbraith, W. Howard.

## HALL DEFEATED KERR IN CITY SINGLES CONTEST

In a semi-final game in the City Tennis Singles yesterday, Sandford Hall, of the Y.M.C.A., defeated F. D. Kerr, of the Golf Club, in a close and exciting game, and now goes into the finals with W. Landry, which means that two Y. M. C. A. players will fight it out for the honours, and that the Y. M. C. A. will hold both singles and club championship for the season, a good showing, indeed, for the triangle. Hall won the first set yesterday by six games to three, but lost the second by the same score. In the third and deciding game Hall won by 6 to 4. Mr. R. J. Devey was referee.

## BEING MADE BY CORBETT

NEW YORK, SEPT. 1.—James J. Corbett, former heavy-weight champion of the world, replied to the article by Robert Edgren severely criticising Corbett's conduct in connection with the Johnson-Jeffries fight at Reno, July 4. Edgren's article has created something of a sensation in the sporting world. Corbett said:

"Edgren brands as nonsense my saying that Jeffries sat up in a window all night before the scrap, shivering in his nightie and worrying himself sick. Mrs. Jeffries is my authority for that statement, and she told the same thing to Billy Muldoon. There was a case of terrible nervousness on Jeff's part, another indication of which is to be found in the fact, told me by Jeff's brother Jack, that Jim vomited and purged himself while doing good work for several days before the fight.

"As to Farmer Burns standing at Jeff's side while in his dressing room before the fight and sobbing as he thought that Jim had broken down, Jeff's own Coach, physical director of the Los Angeles A. C., and one of his trainers, will verify what I have said. Farmer Burns was the man to whom, I admit, that Reno fight was due, and naturally in Jeff's mind he had Jeffries in such a condition that he thought he could not lose. But it was a physical condition that had been produced without the knowledge of Jeffries himself. I was away from Jeff and deserted him when I saw he was beaten. My conduct at the ringside was exactly what had been planned between Jeff and me. I was to talk to Johnson and try to 'get his goat.'

"I want to urge Edgren to inform the public now if he knows anything, as he insinuates, he should not hold anything back if he has any inside information on why Jeffries lost."

## BASEBALL

(Lindsay Warder)

Manager Oldham, of the Peterborough West End Nine, who played in Lindsay on Saturday, 'phoned the Lindsay manager last evening asking for a return game in the Electric City on Labour Day morning. The local players have not decided what they will do, but it is likely that they will accept the invitation. With the return of "Dick" Grey to town, the local team will be strengthened considerably.

## Dr. de Van's French Female Pills—The Wife's Friend

A reliable regulator; never fails. While these pills are exceedingly powerful in regulating the generative organs of the female system, they are entirely safe to use. Beware all cheap imitations. Dr. de Van's are sold at $5 a box, or three for $10. Mailed to any address. The Scobell Drug Co., St. Catharines, Ont.

## BASEBALL YESTERDAY.

| Philadelphia | 82 | 37 | .689 |
| Boston | 73 | 48 | .603 |
| New York | 69 | 51 | .575 |
| Detroit | 67 | 54 | .554 |
| Washington | 56 | 67 | .455 |
| Cleveland | 51 | 68 | .429 |
| Chicago | 47 | 72 | .395 |
| St. Louis | 36 | 82 | .305 |

No games Thursday.

Games to-day: Chicago at Detroit, St Louis at Cleveland, Boston at New York, Philadelphia at Washington.

### Intellectual Charity.

Those who have felt the helping hand of college and of university should go out into the world with the fullest possible measure of intellectual charity. The human mind has a myriad of facets, and it rarely reflects experience and observation in more than one of them. It takes the sum total of many individual pictures to tell the whole story of what actually happens. There is always room for the other point of view, and the occasions are rare indeed when there is not something to be said on the other side of any question.—President Butler's Address to Columbia Graduates.

### The Prizefight Not a Race Test.

The Jeffries-Johnson fight cannot stand as a proof of the general physical superiority of the negro, and it could not stand even if Jeffries' evident deterioration had not apparently been such a prominent element in bringing about his defeat. It would be unprofitable to speculate upon the probable outcome of the encounter if Jeffries had preserved or regained his former dash, for such contests between individuals cannot be accepted as settling any such question as that of the physical superiority of one race to another.—New York Medical Journal.

### Mathematics in the Garden.

A Manchester scientist lately received a note from a friend which ended with the question, "How is your garden doing this year?" The postcard sent in reply was worthy of a man of mathematical training. It was a simple equation:

$$\frac{500 \text{ asters} + 500 \text{ stocks}}{} = 0$$

### Indigestion.

Old friendships are destroyed by toasted cheese or Welsh rabbit. Hard salted meat has led to suicide. Unpleasant feelings of the body produce corresponding sensations in the mind, and a great scene of wretchedness is sketched out by a morsel of misguided and indigestible food.

## WINTER IN THE NORTH.

### Whalers In Hudson Bay Rely Upon the Eskimos.

A season spent in the far north has an attractive sound to many adventurous spirits and explorers or Hudson Bay whalers have no trouble in getting a crew. There is a certain amount of romance in the frozen north which will never die out. A vessel staying a year at Hudson Bay goes into winter quarters in September and is not released until the following July, thus leaving two months in which to cruise for whales. The ten months in winter are well occupied. At the outset there is fresh water to get, the vessel has to be banked with snow and ice to keep the crew warm during the times when the mercury goes far down the tube and then there is the work of lightening the vessel several times during the winter. Lightening does not mean taking out the cargo, but owing to the accumulation of ice and snow on the vessel she gradually settles until it become necessary to cut the ice from her and relieve the pressure or else she would be sunk. Cutting ice six feet thick and sometimes over is no easy job.

In the spring before the ice breaks the crew is engaged in floe whaling and this is the hardest kind of work, because the whale boats have to be dragged over the ice sometimes a considerable distance to clear water. The boats have crude runners on them and the work is made lighter with dogs and sometimes sails when the wind is favorable, but the ice is not always frozen evenly, and hummocks and ridges have to be surmounted, making the approach to the districts for floe whaling a difficult one.

The Hudson Bay natives are very friendly with the whalemen and many of them, from the yearly visits of the Scotch and American crews, have learned to speak pretty fair English. At one time the Eskimos of both sexes dressed somewhat alike, but with the approach of civilization the feminine desire for the fashionable spoke out as strongly in the frozen north as anywhere and the women have recently adopted the dress skirt.

The mind of the Hudson Bay woman runs to beads, and the sailor who carries a goodly supply of the cheapest glass trinkets in his chest is sure to meet with a welcome reception. With the beads the native women decorate everything. The belle of the tribe is the one who can sew the greatest number of beads on her clothing. Some of them, if the tales of the sailors can be relied upon, wear dresses on which 15 or 20 pounds of beads are embroidered in all sorts of fanciful designs. A pocketful of trinkets relieves "Jack" of much of a seaman's life of housekeeping drudgery, for the Eskimo women will sew and mend for him.

The Ivilick tribe of Eskimos are well known to most parties of Arctic whalers. They do all the hunting for the white men and in the winter they build their snow houses close by the wintering ships so that communication between the ship and the tribe will be easy in the very cold weather. Nau-Shi-Nok, or "Shoo Fly" as she is called by the whalemen, is the belle of the Ivilick tribe. She has the most beads, the best clothes, and is the only Eskimo in the Hudson Bay country that can write English.

### The Real Winners of Lawsuits.

Peter McKenzie, the last of the old Hudson Bay factors, had always a great hatred and fear of lawsuits. "I dined with Mr. McKenzie in Montreal not long ago," said a mining engineer of New York, "and he reiterated his dread of lawsuits, driving home his point with a story.

"He said that a certain Smith won a case in the lower courts, the higher courts, and the supreme Court. Smith was thus finally awarded, after seven years of litigation, $500,000.

"When Smith heard the glad news he sped to his lawyers.

"'Hurrah!' he said. 'Gimme my $500,000.'

"'Yes, $500,000 was the award,' said the lawyer, and at the same time he handed Smith a dollar bill.

"'But—what's this for?' Smith gasped.

"'That's all that left, Mr. Smith,' exclaimed the lawyer, 'after the deduction of my fee, the cost of the various appeals and other expenses which will be duly rendered you in an itemized account.'

"Poor Smith studied the bill in his hand.

"'Say, what's the matter with this?' he demanded. 'Is it bad?'"

### Trade With U. S. Grows.

Canada's trade with the United States continues to grow in greater proportion than Canada's trade with Great Britain, in spite of the preferential tariff, yet Great Britain is a better purchaser of Canadian products than is the United States.

Trade statistics are now complete for the first two months of the present fiscal year, and they throw a curious light on the policy of Canadian importers. Thus, while Great Britain bought $15,670,681 of Canadian goods, the United Kingdom sold almost an equal amount to Canada, $15,784,650. The United States bought from Canada $14,104,681 worth, or more than a million less than Britain did, while Canada purchased from the United States $44,372,681 worth, or more than $29,000,000 in excess of purchases from the United Kingdom. The purchases from the United States are $13,000,000 more than during the same period last year.

### Railway Bonuses.

Canadians have bonused the construction of railways in the past 34 years to the extent of $189,000,000 in cash, besides large land grants. This includes all government and municipal bonuses. In the same period of time there have been built and put in operation 19,000 miles of railway lines.

### Not What He Expected.

"Oratory is a gift, not an acquirement," said the proud politician as he sat down after an hour's harangue.

"I understand," said the matter of fact chairman. "We're not blamin' you. You done the best you could."

### He Watched the Cow.

When Sir Stafford Northcote, afterward the Earl of Iddesleigh, was an officer in a yeomanry regiment in Devonshire one of the men who were leading a small force across the country was taking a rather circuitous instead of a straight course.

"Why don't you keep your eye on a given point?" asked his officer.

"I do, sir."

"Well, what point?"

"That old cow, sir," replied the man.

The carl was often known to use this anecdote when political leaders did not go straight.—Illustrated Bits.

### Precocious Barretier.

Barretier at the age of nine was master of five languages. In his eleventh year he achieved a translation from the Hebrew into French, with notes of a character that might have come from an aged savant.

### Appearances.

Magistrate—If I remember rightly, this is not your first appearance in court, Prisoner—No, your honor, but I hope you don't judge by appearances.

## A PUZZLING LETTER.

### The Story They Tell About Blythe's Fearful Typewriting.

One has often heard of famous examples of noted gedluses whose handwriting has been as enigmatic as a rebus, but it has remained for Samuel G. Blythe, the well known political correspondent at Washington, to establish a similar reputation for typewriting. The following amusing incident is quoted from an article about him which appears in the American Magazine:

"Apart from his achievements in literature, Samuel Blythe is famed throughout the land as one whose typewriting is worse than his penmanship. The machine he uses had its genesis in Buffalo seventeen years ago when he was learning to pot small game on the Buffalo Express. No living man has ever solved his method of producing copy, but from a page of his manuscript it is safe to conclude that he adjusts a sheet of foolscap in his typewriter, climbs to a position on the top of his desk and then falls in the machine. His office is in the Home Life building, not far from the treasury, but he can be heard writing as far away as the insane asylum across the Potomac. There is nothing impressionistic about his copy. He writes with a firm touch. When William Loeb, Jr., was bossing the White House during Roosevelt's term he received from Mr. Blythe a letter which he was quite unable to read. Loeb took it over to the experts in the patent office, where all hands passed it up. Next it was set before the correspondents in the senate press gallery. They quit to a man. Loeb then offered $100 to anybody who could decipher the epistle, Sam's immediate family and the editor of the Saturday Evening Post being barred from the contest. Nothing happened in the way of a solution. Then the family was invited to get in, after which the gates were let down to the editor of the Saturday Evening Post. The mystery remained a mystery still. Eureka! Ask Sam to read it. Sam tried. Don't laugh. It was placed on exhibition in the White House. Wu Ting Fang declared it to be a fragment from the odes of a Chinese poet who lived prior to Confucius."

### A Lesson For the Professor.

Many tales are told of the kaiser's school days, and one of them at least is illuminating. A professor, it is said, wishing to curry favor with his royal pupil, informed him overnight of the chapter in Xenophon that was to be made the subject of the next day's lesson. The young prince did what many boys would not have done. He entered the class room directly it was opened and wrote conspicuously on the blackboard the information that had been given him. One may say unkindly that a boy capable of such action had the root of a fine character in him. Such a boy possesses that chivalrous sense of fair play which is the nearest thing to religion that may be looked for at that age, hates meanness and favoritism and, wherever possible, exposes them. There is in him a fundamental bent toward whatever is clean, manly and aboveboard.—Sydney Brooks in McClure's.

### Deceiving the Eye.

It is curious that when a problem is reduced from the historical, abstract and critical plane to one of eyesight human opinion still maintains its cussedness of variation. Professor Lowell sees markings on mars which suggest to him nothing but canals. Other observers cannot see the markings or cannot see them as lines or, seeing them as lines, are prepared to explain them as their own mistake. R skin and a famous geologist once spent a long time examining a piece of rock, until Ruskin exclaimed in a despair that widened to all human perception, "If you look for lines you see lines, and if you look for dots you see dots."—John O'London in T. P.'s Weekly.

## Weak Stomach

Few diseases inflict upon their victims greater suffering than do dyspepsia, indigestion and stomach trouble. If you have dyspepsia or indigestion in any form do not ruin your stomach with drugs, but use **Duffy's Pure Malt Whiskey**

When taken at mealtime it stimulates the mucous surfaces and little glands of the stomach to a healthy action, thereby improving the digestion and assimilation of the food and giving to the system its full proportion of nourishment. This action upon the digestive process is of great importance, as it brings to all the tissues and organs of the body the nutriment necessary to their sustenance and indirectly to the whole system strength and vigor.

We have thousands of grateful patients who write us they have been cured after they were given up by the doctors. Mr. James B. Foote of Walton, N. Y., writes, "For years I suffered from dyspepsia, and all the pains and aches of which a bad stomach is the cause. I began to think I was too old to get well, when I took Duffy's Pure Malt Whiskey; now I am happy to say I have not been so well in years."

If you wish to keep young, strong and vigorous and enjoy perfect health, take Duffy's Pure Malt Whiskey regularly, according to directions. It is recognized as a family medicine everywhere and is invaluable for overworked men, delicate women and sickly children. It is a promoter of health and longevity.

All druggists, grocers and dealers, or direct, $1.25 a large bottle. Refuse substitutes and imitations; they are impure & dangerous. Send for free medical booklet and doctor's advice.

**"Do not fail to visit our Booth when at the Canadian National Exhibition. All are Welcome."**

The Duffy Malt Whiskey Co., Rochester, N.Y.

### Brothers' Strange Meeting.

The long arm of coincidence was never more in evidence than in the case of a Leicester man, who has just returned to England from Australia, after twenty years' residence there. On the same vessel was a man of the same surname, but, as the two traveled in different classes, it was not till confusion in the delivery of letters at a port of call brought them face to face that they found they were brothers. The second brother had been in Australia thirty-one years, and they had not met nor communicated with each other for that period.

# THE EVENING CHIT-CHAT

By Ruth Cameron'

The end of my space yesterday interrupted me in saying what I'd tell a hypothetical daughter before I let her go on a long journey alone, so I promised to finish it to-day.

So far I have warned her to dress quietly, to be very careful not to laugh or speak loudly, to ask directions of none but officials, to avoid the use of cabs or hacks in unfamiliar cities, if she *stopped at a hotel alone,* to arive early in the day and engage a room in advance.

In addition to these directions I should, of course, emphasize the dangers on a five days' journey with the strict instructions to speak to no one, man or woman, except officials. I don't think I'd quite have the heart to do that. Seems to me I'd just have a plain heart to heart talk with her on the dangers that beset a young girl, warn her under no conditions to accept any invitation from a stranger, man or woman, and to limit any acquaintanceship to casual and very dignified conversation.

That she should never drink any kind of liquor, either alone or with anyone, while travelling. I should expect her common sense and previous training to tell her for me, but should probably take the precaution to emphasize.

I should try to select any hotel that she was to stop at, but should warn her that if for any reason she had to spend the night in some city whose hotels she did not know, she should consult either the Traveller's Aid or the Young Women's Christian Association, for properaccommodations.

If she should not get into touch with either of these, I would tell her to do what a young woman I knew did recently in such a situation. Unforeseen circumstances brought her into a city with which she was entirely unfamiliar at six o'clock one evening. She inquired for the Travellers' Aid. There was none. She asked where the Y. W. C. A. had its headquarters. It had none. The conductor on the train recommended a certain hotel. She went to it, but found it most unprepossessing. So instead of taking a room there she inquired the home of the minister of her own denomination, hunted him up, told him her situation and asked his advice. He recommeded a desirable litle inn and she afterwards found thta the hotel she had at first been sent to was decidedly shady.

And lastly—and here I suppose I shall go against the grain of many of my readers—I should present the traveller with a little steel chaperone a good revolver.

I think I should have it loaded with blank cartridges. That would preclude any danger to herself, and yet would be quite sufficient to frighten away anyone in the unlikely case that such necessity should ever arise.

"You would be more afraid of the revolver than anything else?"

Well, if you insist upon feeling that wew there's no use arguing.

It's just a suggestion anyway, you know

Ruth Cameron

# SOLDIER WAS CAUGHT AFTER LONG CHASE

**Private McGee, Who Killed Comrade, Is Captured After Running Fight With the Civil Authorities.**

**FATALLY WOUNDED**

Special to The Examiner.

UTICA, SEPT. 1.—Private Perry McGee of Troop L, Tenth United States Cavalry, who shot and killed Private Turner of Company B, 24th Regiment, and Corporal ones of Company C of the 24th, all negroes, at Watertown last night, was captured at Boonville this morning, and in a running fight with civil officers before he gave up, was probably fatally shot.

Boonville received word to look out for the fugitive from the military authorities at Pine Camp early this morning and when the 8 o'clock train drew in Deputy Sheriff Wetmore and Constable Studor spied McGee on the bumpers. The soldier started up the tracks on a run, the officers following.

Two residents of the village tried to stop him, but McGee drew his big cavalry pistol and stood them off. Others joined in the chase and McGee was cornered between the canal and a *knitting mill after running* several hundred yards.

Pressed closely by the crowd he jumped into the water and standing waist deep turned the gun on his pursuers. Studor told him to surrender. McGee shot at him. Studor returned the fire and then Walter Rinkle came up with a rifle. Both Rinkle and Studor fired at the same time and the negro dropped with two bullet holes in his back. Physicians say he cannot live.

# PICKPOCKET GETS AWAY WITH $550 ON A STREET CAR

Special to The Examiner.

BUFFALO, SEPT. 1.—While riding on a Main Street car from Carnival Court, Rudolph Zoellner, a member of the Akademischer Gesangverein, the famous singing organization now in Buffalo, was robbed of over $150 in American money and $400 in Austrian money which he carried in a wallet. The singer was with a party of friends, members of the same company. The party had been to Carnival Court. Zoellner was standing because the scarcity of seats.

Three young men boarded the car and stood *near the singer.* The car stopped suddenly and one of them was thrown against Zoellner. Just before the car reached Court Street Zoellner felt for his wallet in his hip pocket. It was gone. He immediately reported the matter to the police.

This morning a young man walked into the German-American Bank at Court Street and said he wished to exchange $400 in Austrian money into American currency. The sum was so large the bank officials grew suspicious and tried to detain the fellow, meanwhile telephoning to the police.

The man became frightened and ran out of the door, leaving the $400 *in Austrian money* behind. The police have a complete description of him. The bank officials returned the money to Zoellner but the $150 in American money is gone.

## RECEIPTS INCREASE

The receipts at the Peterborough Customs House for the month just closed show a great increase over the corresponding month last year; in fact the amount is almost double. The figures indicate the increase in the volume of trade being done in Peterborough and shows in no uncertain manner that *progress* is being made. The statistics are as follows:

Receipts for August 1910. $44,964.27
Receipts for August 1909. 24,789.87
Increase.. .. .. .. .. 20,174.40

## ARRANGE OUTING

**C. G. E. Foremen Will Have an Excursion to Gore's Landing**

The foremen of the Canadian General Electric Company held a meeting at the Y.M.C.A. on Wednesday, for the purpose of forming a committee to regulate an outing proposed by the foreman. The meeting was well attended.

It was proposed to hold an outing on Sept. 17th, to go to Gore's Landing. The motion was seconded and adopted and the following committee was elected, to take charge of the proceedings:

Mr. J. B. Wilson, secretary.
Mr. W. S. Robinson, chairman.
R. F. Pier, R. S. Cotton, R. Cottrell and R. E. Harding.

The outing will be a private affair, and invitations will be issued for outsiders. The committee are a very capable lot and it is anticipated that the trip will be a very enjoyable one.

# WHOLE TRAIN BUILT FOR ONE ROYAL TRIP

LONDON, Aug. 27.—For the first time since railroads came into existence an entire special train is to be built to order for a single pilgrimage on the part of the travellers who are to occupy them. Not even the Czar ever has indulged in such a luxury. The occasion is the forthcoming South African tour of the Duke and Duchess of Connaught. It is to involve a large amount of travelling, the present programme calling for an itinerary of 4,000 miles. For the comfort and convenience of the royal visitors a special train is now under construction by the Central South African Railway. The cars are being built at Pretoria. The fitting up and upholstering of the royal saloons is under way in England. Sir Richard Solomon, the High Commissioner for South Africa came to London to supervise the preparations.

The royal train will be composed of ten magnificent *corridor parlor,* sleeping and dining cars in the following order, starting from the engine: 1, Kitchen staff and luggage; 2, private coach; 3, Duchess of Connaught's saloon; 4, Duke of Connaught's saloon; 5, royal dining car; 6, observation car; 7, first-class coach for suite; 8, dining car for suite; 9, second-class car; 10, kitchen staff and luggage. In the case of a head-on or rear-end smash the cooks and the trunks will serve as buffers.

The Duchess's saloon is a creation in blue, with velvet and satin upholstered furniture. The car will have a double roof to keep out the heat. The side walls will be South African walnut and Rhodesia teak. The carpet and curtains are of velvet. The solid parts of the tables, writing desk, chairs and sofa are of walnut or teak. The bed chamber, which takes up the front half of the car, is in white, except the carpet, which is blue. A bathroom with a nickel tub adjoins the Duchess's bedroom and next to the bathroom is an apartment for the maid. The Duke's car is also divided into bedroom and day saloon. The general scheme of color treatment is in green *silk and morocco.* The furniture consists of couches at the front and back and divan chairs in the corners. Along the sides of the car a large writing table has been fixed and by its side a small writing desk, while in the centre of the saloon is a table.

# Brothers Fight Over A Dog And One Is Dying

Special to The Examiner.

NEW YORK, Aug. 31.—"I own the *front half of the dog!"*

"No you don't either, the front half belongs to me, the back half is yours."

"I won't have the back half. I want the front half!"

This childish quarrel between two brothers, Jerome Castenck, eleven years old, and William Castenck, sixteen, resulted in William being so seriously injured that his death is expected hourly.

The boys' home is at No. 69 Bergen Avenue, the Bronx. They quarrelled over their pet dog yesterday afternoon. The angry words soon led to blows, and Jerome hit William in the left side below the belt. The blow was so severe that William was knocked out.

He was rushed to Lebanon Hospital by his father and mother, where Dr. Goldblatt diagnosed the injury as a ruptured spleen.

Jerome was arrested and locked up in the Bronx Detective Bureau, awaiting the outcome of his brother's injuries.

# Bear Was No Match For A Flying Automobile

BANGOR, Me., Aug. 31.—A quartet of New Yorkers on an automobile trip through Maine rode into this town to-day in a partially wrecked car, with a remarkable story of a collision with a big brown bear on the public highway near La Grange, twenty-eight miles from here.

The bear, according to the automobilists, arose on his hind legs to give battle to their car, which was approaching at the rate of forty miles an hour. Bruin, when struck, fell on the hood of the machine and was carried thirty yards before he slipped off and fell by the roadside.

The New Yorkers in the adventure were Mr. and Mrs. Edward L. Hopkins, John P. Fussett, and Miss Marian A. Gordon.

They were driving along a narrow, level road shortly after daylight today, when, after rounding a curve, they came upon an enormous brown bear right in their path.

The car could not be turned to avoid a collision. The bear might have escaped by running to the side of the road, but instead he stood up and, in the attitude of a boxer, waited for the approaching strange monster to come on. The radiator of the big car struck the bear amidships.

Mrs. Hopkins, on the front seat with her husband, screamed. So did Miss Gordon.

Mr. Hopkins, with his new passenger clawing at the hood, realized he must keep up speed, so he shot the car along.

A rut in the road jarred the car and the bear fell off Bruin fortunately clearing the wheels. About ten yards farther on Mr. Hopkins, turning to look back, accidentally steered the car into a mudhole at the side of the road, where the car came to a stop.

Putting over the reverse, Mr. Hopkins started to back the car out. The roar of the exhaust from the open cut-out sounded like the explosion of guns in the forest. Mr. Bear, picking himself up, gave a look at the sputtering thing that had collided with him and fled into the woods.

## CAME BACK

**John Seeney Has Returned After an Excursion Through the Land of Nod**

John Seeney, who yesterday paid two dollars to Magistrate Dumble for being drunk near the Canadian Pacific railway tracks, was back again this morning on the same charge. Seeney, who claims he lives in Havelock, arrived in the city several days ago with about thirty dollars and started out on a "jamboree." As a natural result the policeman rounded up the Johnnie, and it cost him two dollars and last evening's outing cost him four, which leaves twenty-two for him to get out of town with.

**HOW TO KEEP YOUNG**

Keep in the sunshine. Avoid excesses of all kinds. Eat moderately at regular intervals. Cultivate a spirit of contentment, and keep the bowels regular and liver active by using Dr. Chase's Kidney and Liver Pills. No treatment is so definite and so satisfactory for this purpose. None so trustworthy and economical.

# AWARDS IN FIELD CROP COMPETITION IN OTONABEE CORRECTED AT LAST

**Winners Are Announced—Budget of Interesting Items From Keene—Many Visitors at the Otonabee Capital.**

### NEWS PARAGRAPHS

The following statistics of the principal field crops of Ontario for 1910 show the acreage as compiled from individual returns made by farmers to the Ontario Bureau of Industries and the yields as estimated by a large and experienced staff of correspondents, who give probable yields according to conditions on August 15th, 1910:

Fall Wheat.—743,473 acres will produce 19,705,837 bush., or 26.5 per acre as against 663,375 acres 15,907,653 bush and 24.1 in 1909. The annual average for 28 years was 20.8.

Spring Wheat.—129,319 acres 2,433,456 bush., or 18.8 per acre as against 135,161 acres 2,223,567 bush. and 16.5 in 1909. Average 15.9.

Barley.—626,144 acres 18,214,183 bush. or 29.1 per acre as against 695,202 acres 18,776,777 bush. and 27.0 in 1909. Average 27.7.

Oats.—2,757,933 acres 100,004,428 bush or 36.3 per acre as against 2,695,585 acres 90,235,579 bush. and 33.5 in 1909. Average 35.6.

Rye.—95,397 acres 1,608,352 bush. or 16.9 per acre as against 94,661 acres 1,573,921 bush. and 16.6 in 1909. Average 16.4.

Peas.—403,414 acres 6,718,989 bush. or 16.7 per acre as against 381,609 acres 7,613,656 bush. and 20.0 in 1909. Average 19.4.

Beans.—49,778 acres 909,936 bush. or 18.3 per acre as against 45,029 acres 826,344 bush. and 18.4 in 1909. Average 17.2.

Hay and Clover.—3,204,021 acres 5,476,420 tons or 1.71 per acre as against 3,228,445 acres 3,285,145 tons or 1.71 per acre ..[mk2 gadA9. 9h and 1.20 in 1909. Average 1.45.

The acreages in other crops for which no estimates as to yield have been made are as follows: Buckwheat 194,918, corn for husking 320,519; corn for silo 326,027; potatoes 168,454; mangel-wurzels 68,972; sugar beets 26,879; carrots 3,551; turnips 108,360; mixed grains 497,936.

There are 3,159,712 acres of cleared lands devoted to pasture, 254,038 in summer fallow, 208,347 in orchard, 24,384 in small fruits, 11,390 in vineyards, 57,982 in farm gardens, 41,052 in rape, 12,021 in flax, 6,394 in tobacco.

STATISTICS OF LIVE STOCK.

The numbers of Live Stock on hand on July 1st, 1910, were as follows:

Horses—724,384 against 728,308 in 1909.

Milch Cows—1,052,796 against 1,075,496 last year.

Other Cattle 1,514,332 against 1,593,088 last year.

Sheep and Lambs — 1,085,101 against 1,130,667 last year.

Swine—1,561,042 against 1,551,187 1,551,,5 6 thrdlu mfwyp taoin hrdm last year.

Poultry—Turkeys 629,313; geese 347,705; ducks 378,969; other fowls 11,104,800; a total of 12,460,787 against 12,086,580 in 1909.

The numbers of live stock sold or slaughtered in the year ending June 30th, 1910, were as follows:

Horses—97,900 against 76,461 in 1909.

Cattle—817,230 against 800,228 last year.

Sheep—512,909 against 533,141 last year.

Swine—1,843,405 against 1,986,432 last year.

Poultry—4,164,715 against 4,218,475 last year.

The wool clip was 594,529 fleeces or 4,040,300 pounds.

# EIGHTEEN-YEAR-OLD BOY SUICIDES FOR LOVE

**Ends His Life With Gas After Leaving a Letter and Will Bequeathing Watch to the Girl.**

### PHILADELPHIA TRAGEDY

Special to The Examiner.

PHILADELPHIA, AUG. 31—Having written a modest will, combined with a tender farewell message to his sweetheart, 18-year-old George C. Frazier, committed suicide by inhaling gas early yesterday morning, at the lodging house of Mrs. Carrie Wolf, No. 2836 Ridge avenue. What his reason was for ending his life has not been definitely ascertained, but it is believed to have been due to unresponsiveness on the part of the girl with whom he was in love—a certain Bessie—whose full name and address is as yet unknown to the police.

Frazier's message, which was found in his room by Henry Lippincott, who lodges in the same house, was as follows:

Forgive me for what I have done. The wages of sin is death. I give to the only little girl I ever loved my mother's gold watch, which is now at Ridge avenue and Oxford street. I bequeath $10 of my next week's wages due to be given her also, with which she can buy some piece of jewelry to remember me until we meet in paradise. Harry can get my scale and calipers and he can have my sword stickpin to wear and my collar buttons in his tie. Harry can choose my pallbearers. May I be laid out in my home church? Mr. McVickers can do his duty. Mrs. Lippincott I want to lay me out, for which she will receive $10 out of my funeral expenses. Good-bye to all. A thousand kisses to dear Bessie.

With this letter was an order on the Baldwin Locomotive Works for wages due.

Little is known of Frazier, except that he first became acquainted with Harry Lippincott at Baldwin's about four months ago. Working together in the shop, the two young men became so strongly attached to each other that Frazier made his home in Mrs. Wolf's lodging house, where Harry and his mother and sister lived. On Sunday night the young man had passed a part of the evening with his friends, and seemed to be in a contented mood. He left them, however, soon after 7 o'clock, and was not seen again that night.

About 4 o'clock yesterday morning when a lodger went to the bathroom he found the door locked and noticed an odour of gas. Failing to receive any reply to his knocks, the man called young Lippincott, who procured a ladder and entered the room through a window. There he found his chum sitting with a pillow slip over his head and a rubber tube passing from a jet to a small opening that had been cut in the pillow case. Policeman Eisenberg, of the Twenty-eighth district, had Frazier taken to the Women's Homeopathic Hospital, where he was pronounced dead.

It is said that the young man is the son of George Frazier, of Diamond Springs, Va., a well-to-do man, with whom the police are trying to communicate.

GRAND OPERA HOUSE

J. J. Turner & Sons, Owners & Mgrs.

**Thursday**—Cronk's Band Concert
**Friday**—Beginner's night.
**Saturday**—Band

# A SCORE ANSWERED "UGLY" CASHIER AD.

ST. LOUIS, MO., AUG. 29. Three of the prettiest of twenty-five applicants in answer to an advertisement for an "ugly cashier" were selected by Vince J. Gorly, of a firm of florists. One of the three finally will be chosen for this job.

Mr. Gorly said that some of the applicants were "frights," others were beautiful and nearly all declared they had overlooked the word "ugly" in the advertisement.

"We didn't want a 250 pound cashier," said Mr. Gorly, "and we really didn't care for one with all her teeth gone. We had several applicants who will fill both descriptions.

"My idea in advertising for an ugly cashier was to get one who did not have such great personal charms that she would be proposed to by the first unmarried customer who happened to spy her.

"How did I get by with the impossible ones? That was easy. One must have weighed 250 pounds. I asked her if she was sure she could qualify in the "ugly" class.

"She declared she had not noticed the word 'ugly' in the advertisement, and I assured her she was entirely goodlooking. That was why she went out with a smile on her face. Finding it worked in the one case I used it right along."

The florists say that within the last year they have had five pretty cashiers all of whom quit to marry.

# FOOLISHNESS OF BEING AFRAID OF LIGHTNING

Many people who are brave under most other circumstances are terribly afraid of thunder and lightning. Yet, in reality, the risks we run of death bylightning are not so great as those which incur every day in carrying on our occupations. For example, in one year more people are killed from falling building material, and more die from fright, than there are victims of lightning.

But neither explanation nor argument will relieve the fear of lightning which is instinctive. Lightning fear goes deeper than intelligence. A large percentage of all the animals, birds and fish are also deadly afraid of lightning and its noisy companion, thunder.

Discussing this subject, Professor D. Shafer says:

"Let us forget our inborn fears—a relic, perhaps, of prehistoric days—and analyze this thunderstorm which makes the heart to quake and the nerves to tingle. Look out and you will see the raindrops dashing to earth in a pleasing, life-giving Summer shower. Watch and you will see come tearing out of the depths of a cloud, as black as night, a bolt of electricity which dashes to the ground and disappears. If the pent-up waters of the upper air were dammed back by some invisible force until the increased pressure forced an opening, and then descended to earth in one mighty stream, it would mean certain destruction to everything it struck.

"Imagine a column of water, like a gigantic waterspout, striking a building, a village or a city; the result would be as destructive as lightning, if not more so. The particles of moisture accumulating in the upper air are free to drop to earth as soon as they condense and unite until they are too heavy to float. The particles of electricity gathered in the upper air, which is moist enough to be a good conductor, are effectively insulated from the ground by layers of more or less dry air, which is the best non-conductor of electricity in the world. This electricity is 'dammed back' until it reaches a pressure sufficient to break down this resistance and dash to earth in a single gigantic spark or flash."

It is the gaseous particles composing the atmosphere, heated to incandescence by the electrical energy breaking down this resistance, which we see, and not the electricity itself. Electricity can not be seen. Lightning travelling from one cloud to another, or from a cloud to the earth, has no special direction any more than it takes the easiest path. As the atmosphere, especially in a storm is full of whirls, eddies and waves like the water, but, unlike water, being of different degrees of dryness and conductivity, the lightning travels in a rather zig-zag path.

A large number of people run and put down all the windows and close the doors as soon as a thunder-storm approaches. A great many people actually believe that lightning can be blown into a house with a strong draught. With the terrific speed of lightning—186,000 miles a second—there is no danger of its being blown aside from its course, only that the wind might, and probably does, change the direction of the air currents, but not to such a degree as greatly to affect the direction of the discharge and carry it into a building.

There is, according to Prof. Shafer, absolutely no record where a discharge of lightning from the sky struck the side of the house and came into an open window or an open door. Houses are struck, but they are always struck on the roof first, and nearly always on the very highest point of the roof at that, unless the current leaps off a telephone or electric-light wire.

This is because, with the enormous voltage or pressure of lightning, dry wood is almost as good a conductor as copper wire is to a weaker current, and lightning travelling always in the easiest paths, quickly leaves the air, which is a non-conductor, to run down the wooden timbers of a building.

But even the electrical engineer must admit that a lightning-scared person who seeks the comforting folds of the family feathered-bed whenever the lightning flashes shows good judgment. Dry feathers are excellent insulating material, and while they would not stop a bolt of lightning if it actually hit the person, yet they would prevent a dangerous discharge from passing through the bed in case another portion of the house was struck.

**A Canadian Achievement.**

It is satisfactory to know that Clark's Pork and Beans—a Canadian product—surpass imported ones both in quality and preparation. In Clark's the duty saved goes into the quality. Wm. Clark, M'f'r., Montreal.

# SPECIAL SERVICES

**Are to be Held in the Gilmour Memorial Baptist Church**

Rev. Alex. Torrie, B.A., will conduct special services in the Gilmour Memorial Baptist church, beginning Sunday, Sept. 4th.

Mrs. Alex. Torrie will assist in the service of song. Rev. and Mrs. Torrie have had abundant success in this work. Mrs. Torrie has won many hearts by her sweet singing.

The public are cordially invited to these services.

## WEDDING BELLS

**JOYES—HUTCHISON.**

A very pretty wedding was solemnized last night at the residence of Mr. George Hutchison, when his sister, Caroline Alice Hutchison, was married to Mr. Chas. Joyes. Rev. Dr. Langfeldt, rector of St. Luke's church, officiated. After the ceremony the guests sat down to a sumptuous wedding breakfast. The young couple will reside at 376 Burnham street.

**LIVINGSTONE—OLIVER.**

A quiet, but pretty, wedding was solemnized at the Knox Church manse last evening at 8 o'clock by Rev. H. J. Keith, when Mr. Bruce Livingstone, formerly of Norwood, and Miss Noble Oliver, of Gordon Ave., were united in the holy bonds of matrimony.

The bride, who was attired in a pretty white silk waist, covered with cream net, with blue voile skirt, was attended by Miss Sylva Livingstone, while Mr. Wilbert Kilnbeck assisted the groom. The bride carried a beautiful bouquet of white carnations, while the bridesmaid carried a bouquet of pink carnations.

The happy young couple were the recipients of a number of costly presents, and their many friends join in wishing them a happy and prosperous future.

They will reside on Gordon avenue.

## OBITUARY

**LAURA HATCHER.**

The death occurred this morning of little Laura Hatcher, the month old daughter of Mr. and Mrs. James Hatcher, 139 Stewart street. The child had been ailing for about two weeks from a severe attack of the whooping cough. Death resulted from heart failure.

The funeral took place this afternoon to the Little Lake cemetery.

**ALFRED WILLIAM ASTON.**

The death occurred at an early hour this morning of Alfred William, the eight months' old son of Mr. Alfred Aston, McGill street. The little fellow had been ailing for some time, which ended in his death.

**JANE R. LIVICK.**

The death occurred last night, at 129 Hazlitt street, of Jane R. Livick, at the age of eighty-eight. Deceased was the last of a large family, her husband died about 10 years ago, and the last of her sisters passed away about 3 months ago.

The late Mrs. Livick was a native of Ireland, and before coming to Peterborough, she lived on a farm in Otonabee. She has no relatives in this country.

The funeral will take place to-morrow afternoon from above residence. Other arrangements have not yet been made.

## AN EXCURSION

The Steamer Rainbow and barge brought up a merry bunch of excursionists to-day. The Rosenath brass band arrived at the Street Railway wharf about 12.30, where the pleasure seekers landed and came to the city on the street cars. The barge was left at the street railway wharf until the return trip.

There were about sixty-five in all. On the way up music was supplied for dancing and this sport was indulged in quite freely.

The excursionists viewed the sights of the city until about three o'clock, and then boarded the cars for the wharf, where the Rainbow was in waiting. They left about 3.30.

## VETERANS' MEETING

The quarterly meeting of the veterans, was held last night, Col. Miller, president, took the chair. The annual meeting took place in June and the semi-annual in December.

The ordinary routine of business was carried on, after which old stories were told that happened years ago and old remembrances were recalled and a sociable evening was passed. The number of veterans has now dwindled down to twenty-two, a comparatively small number.

# A HERO AT THROTTLE

**Engineer Stuck at His Post Until Flesh Boiled, When a Steam Pipe Burst in His Cab**

**FIREMAN PRAYED**

Special to The Examiner.

PITTSBURG, AUG. 31—The giant blue-overalled guardian of the throttle on Chicago train No. 8, of the Pennsylvania Railroad, will always be remembered as Israel Brandt, hero, by the hundreds of passengers whose lives the brave trainman saved by a remarkable display of heroism in courageously offering his own life as a sacrifice that many might survive at the Fort Wayne station, North Side, early this morning.

Never flinching, nor even thinking of escape until his duty was performed and the hundreds entrusted to his care were safe, this robust engineer stuck to his post while scalding steam boiled the flesh from his body. Only when the great locomotive was at a standstill instead of running wild with its grain train of human freight and a terrible accident had been averted, did he think of himself.

Just as the big locomotive with its in-bound train of 11 coaches and sleepers started to slow down for the Fort Wayne station at 6.15 o'clock the accident so nearly responsible for a terrible catastrophe occurred. The cap on the left check controlling the steam broke. Immediately the big locomotive and its crew were hidden from fellow-workmen and passengers waiting for the train.

Suddenly the top of the cab, blown away by the tremendous force of the escaping steam, shot in the air. Spectators stood aghast and dumbfounded, and women screamed.

All this occurred in less than two seconds, which seemed hours to the spectators, frightened into silence by the spectacle. All were awakened by hearing a commanding voice rising even above the escaping steam that hid the speaker as a white sheet drapes the dead, shouting: "Jump, Van! Jump!"

Again and again these words were repeated. Then a body came shooting through the air, landing at the feet of the spectators, while the locomotive, still pouring forth great volumes of escaping steam, swept past the platform.

"It's going wild!" This shout came almost simultaneously from the lips of trainmen.

Before any could take steps to warn employees on the other side that a train was heading towards the Union Station without engineer or fireman, as the employees were under the impression that Brandt had also jumped to save himself, the train slowly came to a stop.

When his engine became motionless, then, and not until then, did the big 200-pound knight of the rail seek to evade his terrible plight. Pushing his bulk through the cab window, he reached down and grabbed the brass guard-rail of the engine with his seared hands. His tremendous weight was too much for his wounded hands, and Brandt fell upon the sharp ballast of the track, unconscious.

Thomas Vanarsdale, the fireman, and the engineer, were hurried to the hospital. Brandt was at first thought to have been fatally scalded, there being few places on his body where the live steam did not strike, but to-night the hospital authorities say he has a chance for life. The fireman was also scalded, but not seriously.

The bad steam pipe on the engine first began to make trouble at Sewickley, some miles west of Pittsburg, and Brandt crowded the speed. When within a mile of the Allegheny station, where it would be safer to stop, as the tracks were congested with trains, the leak became bad, and Brandt said to the fireman: "Pray for the station stopping place—pray, pray, pray! Think of the hundreds back of us!"

As the station rounded into sight the explosion came, and had Brandt not stuck to his post the express would surely have been wrecked, running wild, with the railroad bridge over the Allegheny River and the Union Station beyond a hundred switches and danger spots ahead.

## THE AETNA LIFE

**Insurance Company Occupies a High Place in Confidence of Public**

The Aetna Life Insurance Company, which began business in Canada away back in 1850, has pursued for 60 years a steady, conservative course in business and a method of fair dealing with the public that has won for it a very high place in the confidence of the insuring public. One of the weaknesses in the method of life insurance contract has been the fact that persons becoming entirely incapacitated through paralysis, blindness or other causes, or through accident, have found themselves with their earning power gone and unable to pay premiums on their life insurance, while the premiums to be paid became a burden. The Aetna Life, after spending a considerable time investigating this feature, began issuing some two or three years ago a policy contract containing a Disability Clause, and under this provision a policy stands upon the Life Plan, becomes immediately payable as an Instalment Endowment in case of Disability. The Insurance Law of Canada at the time did not permit of this policy being issued, but it is permissible under the New Insurance law, which went into force on May 4th last. This introduces a new feature into Canadian Life Insurance and one that no doubt will be copied in time by the Companies generally. Mr. H. P. Lindsay is the General Agent for the Peterborough District, and with splendid old Company and this splendid new feature in policy contracts, he is certain to secure a satisfactory business for "The Old Aetna."

## FIRST MILITARY BAND ORGAN WILL BE OPERATED TO-NIGHT

Manager J. Meharry is constantly introducing new novelties into the Roller Rink for the purpose of pleasing the young people of this city, but this time he has gone a step farther than before, and has placed an instrument in the rink, the first of the kind to be installed in the City of Peterborough, and which is installed in only a few cities in Canada. It is a military band organ, which plays music from the various bands of the United States and Canada. The instrument, which is operated by electricity, and is equivalent to the most up-to-date bands, having band pieces similar to the drums, trombones, clarionets, cornets, etc., of the ordinary band, may be heard playing all popular tunes.

This wonderful organ, which is so widely known throughout the continent, will be put into operation this evening for the first time. It should prove of great interest to the people, who are cordially invited to attend.

Mr. George H. Milliman, who has been installing the organ and the extensive apparatus, has come directly from the North Tonawanda Musical Instrumental Works of North Tonawanda, N.Y., U.S.A., where the military band organs are manufactured.

## NEWS NOTES FROM VILLAGE OF KEENE

KEENE, AUG. 30.—Mr. and Mrs. David Brackenridge, of Westwood, were in the village Saturday.

The Orange Lodge are going to run an excursion to Peterborough and over the Lift Lock on Thursday, Sept. 1st. The steamer "Rainbow" will carry the excursion and will leave Keene wharf at eight o'clock sharp.

Mrs. George Bell is the guest of her sister, Mrs. A. D. Anderson.

Miss Elsie Kirk is visiting Mrs. John Smith.

Mr. and Mrs. Fred Watley spent Sunday in Keene.

Miss M. O'Boyle is a guest at the Victoria House.

Miss Leona Mathers of Toronto, who has been visiting relatives in Otonabee, returned home last week.

Mr. Hambly is the guest of Rev. W. Johnson.

Mr. and Mrs. R. S. Skinner are visiting Mrs. Skinner's sister, Mrs. McCartney, at Bethany.

We are pleased to state that Mr. Norman Gardiner, who was injured by a kick from a horse while working on Mr. Andrew Nelson's farm, was not as severely injured as was at first supposed and is rapidly recovering.

The secretary of the Agricultural Society, has finally received the proper scores of the contestants in the society's field crop competition. The expert judge, Mr. Casselman, through some mistake, sent the names of the prize winners in the proper order, but credited three of the contestants with the same score, which was incorrect. Following are the correct scores:

Ralph E. Drummond, Keene, 95 points, winning fifteen dollars.

W. W. Shearer, Lang, 91 points, winning twelve dollars.

Robert Weir, Lang, 90 points, winning ten dollars.

F. A. Eason, Keene, 88 1-2 points, winning five dollars.

John A. Drummond, Keene, 86 points.

John Starke, Lang, 82 1-2 points.

The last two receive no prize money.

Mr. and Mrs. Robert Humphries visited relatives in Asphodel Monday.

Mrs. Walter Bryce of Toronto, the guest of Miss Margaret Bryce.

Miss Jean Lang is visiting friends in Cavan.

Long public school has not yet been opened on account of the inability of the trustees to engage a teacher.

Mrs. Kerr, who has been the guest of Mrs. Marshall Weir, returned to her home in Detroit last week.

Mr. Vernon Lord has returned home to Fenelon after a two weeks' visit at the home of Mr. William Campbell.

The Hastings party, who have been camping at Sandy Point, broke up camp and returned to Hastings Wednesday.

On account of the change in the game laws made by the Legislature last session, the duck-shooting does not commence this year till September 15th, instead of, as formerly, on the 1st. The season opening on the first gave only one morning's shooting, as after the first morning the few birds that are on the lake are frightened and keep pretty well out of range. Then there is usually no good shooting till the weather gets colder. Extending the close season till the 15th should make the shooting on the first days a great deal better. This new arrangement will also be somewhat better for the sportsmen, who come from a distance as they scarcely found it worth while to come far for an early morning's shooting on the first day.

## FELL INTO THE TRAP.

**Trick by Which a Russian Official Lost His Position.**

The czar recently accepted the resignation of M. Veritelnikoff, governor of Kostroma. The event excited some surprise, as the governor was a thorough paced reactionary and noted for his zeal in crushing out any manifestations of progressive life in the government over which he ruled.

No reason for his resignation could be adduced, and it remained a mystery. The riddle is now solved. It appears that M. Veritelnikoff was so occupied that he often signed documents brought to him by his subordinates without troubling to read them. Taking advantage of this, one of his enemies secured his signature to a letter, which was dispatched to the ministry of the interior and caused such astonishment that a telegram was sent to Kostroma ordering the governor to come immediately to St. Petersburg.

When M. Veritelnikoff arrived the letter was handed to him. To his utter surprise it contained his resignation. He read with amazement such passages as "I am absolutely no use and incapable of ruling the government confided to me," followed by a confession of failure and the statement "I have made a mass of blunders." But he could not dispute that the signature at the end of the letter was his.

He owned that he often signed papers without knowing their contents and had sufficient sense of humor to tender his resignation on the spot. Under the circumstances M. Stolypin could do nothing but advise the czar to accept it.—London News.

## NEAL BALL'S TRIPLE PLAY.

**One of the Most Sensational Feats in the National Game.**

On the afternoon of July 19 of last year in the second inning of a baseball game between the nines representing Cleveland and Boston, played on the grounds of the former team, Wagner, the first batter for the visiting team, reached first base on an error. Stahl, the second batsman, bunted safely, advancing Wagner to second base. The next player "up" was McConnell. With two strikes and three balls listed against him and with the 20,000 spectators tingling with excitement, the Boston captain gave the "hit and run" signal. The next ball pitched was met by McConnell's bat with tremendous force and was driven over second base in a manner that boded ill for the home team. Neal Ball of the latter nine was playing second. The moment the leather sphere left McConnell's bat the former jumped back of the base, leaped into the air, caught the drive with one hand, regained his feet and touched second base, stepped quickly to one side and touched Stahl with the ball and thus made the most thrilling and spectacular unassisted triple play chronicled in the annals of baseball. Ball's feat was the second of its kind ever recorded in the history of the major leagues, the first having been to the credit of Paul Hines of the Providence (R. I.) team, who had performed a similar exploit, unassisted, against a Boston team thirty one years before.—George Jean Nathan in Harper's Weekly.

**Waking Persia.**

Persia, like Turkey, is awakening from her sleep of centuries and aspires to resume the position she once occupied in the affairs of the great world. She has a constitution and some other modern improvements, but she hasn't caught up with the times enough to provide herself with a real transportation system. Horses and donkeys still constitute the passenger and freight carrying resources of the empire which once dominated the east. Still, Persia has one railroad. It is ten miles long and runs from Teheran, the capital, to the shrine of a defunct shah. The general manager of this road hasn't much trouble in figuring his ton miles costs. Strikes do not disturb his slumbers. The finance committee does not bother itself with dividend policies or bond issues, nor does it lie awake nights wondering if rate regulating bills are going to pass the Persian parliament.—Moody's Magazine.

**Some Growing.**

A wager was made between two Niagara County farmers as to how much a stalk of corn will grow in a single day. One of them said that a healthy stalk of corn, about waist high, would grow one inch, while the other wagered that it would grow two inches. Accordingly a stake was driven in the ground so that its top came even with the highest blade of the stalk. At the same hour the following day an examination was made, and it was discovered that the stalk of corn had grown four inches. Newmarket Express-Herald.

## "THE PILLAR OF LIGHT"

By Louis Tracey, (Copyrighted)

(Continued from Friday)

tower was opened. A man's head and shoulders appeared.

It was Stephen Brand.

"Thank God!" murmured Constance.

Enid, on whose sensitive soul the storm, the signal, the hissing rush of the boat through the waves, had cast a spell of indefinite terror, bit her lip to restrain her tears.

Brand gave a glance of amazement at the three uplifted faces. But this was no time for surprise or question.

"I am coming down," he shouted. "Providence must have sent you at this moment."

He vanished.

"What can it be?" said Constance, outwardly calm now in the assurance that her father was safe.

"Must ha' bin a accident," said Ben. "That signal means 'Bring a doctor.' An' there ain't a blessed tug in harbour, nor won't be till the tide makes."

"That will mean delay," cried Enid. "Five or six hours at least, missy."

The main door at the head of the iron ladder clamped to the stones swung back, and Brand leaned out. He had no greeting for them, nor words of astonishment.

"When will the tug reach here, Ben?" he asked.

The fisherman told him the opinion he had formed.

"Then you girls must come and help me. Jackson scalded his hands and arms in the kitchen, and Bates was hurrying to the store-room for oil and whitening when he slipped on the stairs and broke his leg. We must get them both ashore. Ben, you can take them?"

"Ay ay, sir."

"Now, Constance, you first. Hold tight and stand in the skip. Your boat cannot come near the rock."

He swung the derrick into place, and began to work the windlass. Constance, cool as her father, whispered to the excited Enid:

"Let us divide the parcels and take half each."

"Oh, I should have forgotten all about them," said Enid, stooping to empty the lockers.

Constance, without flickering an eyelid, stepped into the strong basket with its iron hoops, and, having arranged some of the plethoric paper bags at her feet, told her father to "hoist away."

She arrived safely. Enid followed her, with equal sangfroid, though a lift of forty odd feet whilst standing in a skip and clinging to a rope is not an every-day experience.

"Dang me," said Ben, as Enid, too, was swung into the lighthouse, "but they're two plucked 'uns."

The great bell tolled away, though the snow had changed to sleet, and the heights beyond the Land's End were dimly visible, so its warning note was no longer needed. The sky above was clearing. A luminous haze spreading over the waters heralded the return of the sun. But the wind was bitterly cold; the fisherman watching the open door, with one eye on the sea lest an adventurous wave should sweep the Daisy against the rock, murmured to himself:

"'Tes a good job the wind 's i' the norrard. This sort o' thing's a weather-breeder, or my name ain't Ben Pollard."

And that was how Enid came back to the Gulf Rock to enter upon the second great epoch of her life.

Once before had the reef taken her to its rough heart and fended her from peril. Would it shield her again—rescue her from the graver danger whose shadow even now loomed out of the deep. What was the saying in its wistful monotony?

Enid neither knew nor cared. Just then she had other things to think about.

### CHAPTER IV.

### THE VOICE OF THE REEF.

There comes a time in the life of every thinking man or woman when the argosy of existence, floating placidly on a smooth and lazy stream, gathers unto itself speed, rushes swiftly onward past familiar landmarks of custom and convention, boils furiously over resisting rocks, and ultimately if not submerged in an unknown sea, finds itself again meandering through new plains of wider horizon.

Such a perilous passage can never be foreseen. The rapids may begin where the trees are highest and the meadows most luxuriant. No warning is given. The increased pace of events is pleasant and exhilarating. Even the last wild plunge over the cascade is neither resented nor feared. Some frail craft are shattered in transit, some wholly sunken, some emerge with riven sails and tarnished embellishments. A few not only survive the ordeal, but thereby fit themselves for more daring exploits, more soul-stirring adventures.

When the two girls stood with Stephen Brand in the narrow entrance to the lighthouse, the gravity of their bright young faces was due to the fact that their father had announced the serious accidents which had befallen his assistants. No secret monitor whispered that fate, in her bold and merciless dramatic action, had roughly removed two characters from the stage to clear it for more striking events.

Not once in twenty years has it happened that two out of the three keepers maintained on a rock station within signaling distance of the shore have become incapacitated for duty on the same day. The thing was so bewilderingly sudden, the arrival of Constance and Enid on the scene so timely and unexpected, that Brand a philosopher of ready decision in most affairs of life, was at a loss what to do for the best now that help of a sort undreamed of, was at hand.

The case of Jackson, who was scalded, was simple enough. The Board of Trade medicine chest supplied to each lighthouse is a facsimile of that carried by every sea-going steamship. It contained the ordinary remedies for such an injury, and there would be little difficulty or danger in lowering the sufferer to the boat.

But Bates' affair was different. He lay almost where he had fallen. Brand had only lifted him into the store-room from the foot of the stairs, placing a pillow beneath his head, and appealing both to him and to Jackson to endure their torture unmoved whilst he went to signal for assistance.

The problem that confronted him now was one of judgment. Was it better to await the coming of the doctor or endeavour to transfer Bates to the boat?

He consulted Ben Pollard again: the girls were already climbing the steep stairs to sympathize with and tend to the injured men.

"Do you think it will blow harder, Ben, when the tide turns?" he asked.

The old fellow seemed to regard the question as most interesting and novel. Indeed, to him, some such query and its consideration provided the chief problem of each day. Therefore he surveyed land, sea and sky most carefully before he replied:

"It may be a'most anything afore night, Misser Brand."

At another time Brand would have smiled. To-day he was nervous, distraught, wrenched out of the worn rut of things.

"I fancy there is some chance of the doctor being unable to land when he reaches the rock. Do you agree with me?"

His voice rang sharply. Ben caught its note and dropped his weather-wise ambiguity.

"It'll blow harder, an' mebbe snaw agin," he said.

"I shall need some help here in that case, so I will retain the young ladies. Of course you can manage the boat easily enough without them?"

Pollard grinned reassuringly.

"We'um run straight in wi' thiccy wind," he said.

So they settled it that way, all so simply.

A man sets up two slim masts a thousand miles apart and flashes comprehensible messages across the void. The multitude gape at first but soon accepts the thing as reasonable. "Wireless telegraphy" is the term, as one says "by mail."

A whole drama was flowing over a curve of the earth at that moment, but the Marconi station was invisible. There was no expert in telepathic sensation present to tell Brand and the fisherman that their commonplace words covered a magic code.

Jackson, white and mute, was lowered first. The brave fellow would not content himself with nursing his agony amidst the cushions aft. When Bates, given some light strength by a stiff dose of brandy, was carried, with infinite care, down three flights of steep and narrow stairs, and slung to the crane in an iron cot to be lowered in his turn, Jackson stood up. Heedless of remonstrances, he helped to steady the cot and adjust it amidships clear of the sail.

"Well done, Artie," said Brand's clear voice.

"Oh, brave!" murmured Enid.

"We will visit you every day at the hospital," sang out Constance.

Jackson smiled, yes, smiled, though his bandaged arms quivered and the seared nerves of his hands throbbed excruciatingly. Speak aloud he could not. Yet he bent over his more helpless mate and whispered hoarsely:

"Cheer up, old man. Your case is worse'n mine. An' ye did it for me."

Pollard, with a soul gnarled as his body, yet had a glimpse of higher things when he muttered:

"D'ye think ye can hold her, mate, whiles I hoist the cloth?"

Jackson nodded. The request was a compliment, a recognition. He sat down and hooked the tiller between arm and ribs. Ben hauled with a will; the Daisy, as if she were glad to escape the cascades of green water swirling over the rock, sprang into instant animation. The watchers from the lighthouse saw Ben relieve the steersman and tenderly arrange the cushions behind his back. Then Brand closed the iron doors and the three were left in dim obscurity.

They climbed nearly a hundred feet of stairways and emerged on to the cornice balcony after Brand had stopped the clockwork which controlled the hammer of the bell.

What a difference up here! The sea, widened immeasurably, had changed its colour. Now it was a sullen blue gray. The land was nearer and higher. The Daisy had shrunk to a splash of dull brown on the tremendous ocean prairie. How fierce and keen the wind! How disconsolate the murmur of the reef!

Brand, adjusting his binoculars, scrutinized the boat.

"All right aboard," he said. "I think we have adopted the wiser course. They will reach Penzance by half-past two."

His next glance was towards the Land's End signal station. A line of flags fluttered out to the right of the staff.

"Signal noted and forwarded," he read aloud. "That is all right; but the wind has changed."

Enid popped inside the lantern for shelter. It was bitterly cold.

"Better follow her example, Constie," said Brand, to his daughter. "I will draw the entire curtains. We can see just as well and be comfortable."

Indeed, the protection of the stout plate glass, so thick and tough that sea-birds on a stormy night dashed themselves to painless death against it, was very welcome. Moreover, though neither of the girls would admit it, there was a sense of security here which was strangely absent when they looked into the abyss beneath the stone gallery. Constance balancing a telescope, Enid peering through the field-glasses, followed the progress of the Daisy in silence, but Brand's eyes wandered uneasily from the barometer, which had fallen rapidly during the past two hours, to the cyclonic number spreading its dark mass beyond the Seven Stones Lightship. The sun had vanished, seemingly for the day, and the indicator attached to the base of the wind vane overhead pointed now sou'west by west. It would not require much further variation to bring about a strong blow from the true southwest, a quarter responsible for most of the fierce gales that sweep the English Channel.

Nevertheless, this quick darting about of the fickle breeze did not usually betoken lasting bad weather. At the worst, the girls might be compelled to pass the night on the rock. He knew that the tug with the two relief men would make a valiant effort to reach the lighthouse at the earliest possible moment. When the men joined him the girls could embark. As it was, the affair was spiced with adventure. Were it not for the mishap to the assistant-keepers the young people would have enjoyed themselves thoroughly. The new airt of the wind, too, would send the Daisy speedily back to port. This, in itself, justified the course he had taken. On the whole, a doubtful situation was greatly relieved. His face brightened. With a grave humour not altogether artificial, he cried:

"Now, Constance, I did not take you aboard as a visitor. Between us we ought to muster a good appetite. Come with me to the store-room. I will get you anything you want and leave you in charge of the kitchen."

"And poor me!" chimed in Enid.

"Oh, you, miss, are appointed upper house-maid. And mind you, no followers."

"Mercy! I nearly lost my situation before I got it."

"How?"

"We met Jack Stanhope and asked him to come with us."

"You asked him, you mean," said Constance.

"And you met him, I meant," said Enid.

"I don't care a pin how you treated Stanhope, so long as you didn't bring him," said Brand, "though, indeed, he would have been useful as it turned out."

When lunch was ready they summoned him by the electric bells he had put up throughout the building. It gave him great joy to discover in the living room a code of signals which covered a variety of messages. They rang him downstairs by the correct call for "Meal served."

It was a hasty repast, as Brand could not remain long away from the glass-covered observatory, but they all enjoyed it immensely. He left them, as he said, "to gobble up the remains," but soon he shouted down the stairs to tell them that the Daisy had rounded Carn du. He could not tell them, not knowing it, that at that present moment old Ben Pollard was frantically signalling to Lieutenant Stanhope to change the course of the small steam yacht he had commandeered as soon as the murmur ran through the town that the Gulf Rock was flying the "Help wanted" signal.

The officials did not know that Brand was compelled by the snowstorm to use rockets. All the information they possessed was the message from Land's End and its time of dispatch.

Jack Stanhope's easy-going face became very strenuus, indeed, when he heard the news.

The hour stated was precisely the time the Daisy was due at the rock

**The Cause**

of Eye Troubles is usually not disease, but defect in the structure or muscles of the Eye.

Consider the incessant work of the Eye, the instantaneous and exact adjustment demanded that sight may be always equal, single and ready to every change in position, distance and light. The nerves compel and control the mechanism in these instant adjustments. The mechanism may be defective, that is—

There may be defects in the structure, or focus of one or both Eyes;

The Muscles may be imperfectly balanced, so that both Eyes do not work in harmony;

There may be inability to focus for close work;

There may be strain through overwork, abuse, poor lights, bright reflections, etc.

*An examination will tell you just what condition your Eyes are in.*

# Her Place

He Takes It and Wins Musical Honors.

By T. W. WINDHAM.

Copyright, 1910, by American Press Association.

Margaret Trentham, a fair Bostonian, stood in a room in a German pension. She was speaking to a young man, like herself a musician.

"You don't realize what it means to me, Mr. Tolstoy. This is my last turn here and the concert tomorrow my only opportunity of playing publicly in the Conservatoire."

"But the circumstances are exceptional," he urged. "It happens that Professor Meyerhaus is in Leipzig recruiting violinists for his American tour, and it occurred to me that perhaps he would include me in his orchestra as solo pianist"—

"By engaging me Meyerhaus would save the huge fees demanded by musicians who have made a name, and for me"—a pause gave additional weight to his words—"it means possibly the opening of a career. I should come before the public at once and without expense instead of returning to America to drudge at teaching, because I do not possess the means to make an imposing debut."

"But you forget," she added in self vindication, "I have rehearsed with the orchestra throughout the term, and the conductor will not approve of a change at the last moment."

"I have already obtained his permission"— he began.

"Then if he is willing for you to play why does he allow the decision to rest with me?" she broke in.

The tension of a momentary silence tried him beyond endurance. Rising, he walked to the door, pausing at the threshold.

"Forgive the intrusion. Unfortunately I misled myself with the belief that you would willingly cede a chance to a professional, being yourself an amateur and independent. I can only hope that your triumph tomorrow"—he lingered on the word in conscious irony—"will atone for the vexation of my visit."

A large cosmopolitan audience filled the Conservatoire hall for the final concert of the season.

An attendant opened the piano in readiness for the concerto as the pianist came forward, escorted by the master under whom she had studied.

She seated herself at the instrument, and a little ripple of applause broke from the audience. Glancing upward in shy acknowledgment, she met the steadfast gaze of a man seated immediately facing her, who vouchsafed but the merest glance of recognition and resumed the study of a music score lying on his knees.

The players lowered their bow hands for several bars' rest. In the lull preceding the excerpt for the solo instrument the sound of a sharp indrawn breath struck downward through the silence.

The baton beat on steadily—three—four—

"One!"

No answering chord from the pianist. The conductor glared at her aghast, the orchestra in undisguised surprise. She started slightly, and the color flamed into her cheeks.

The baton swooped down again.

"One, fraulein!" The conductor leaned forward, half frantic. "Have you forgotten?" he hissed.

A soft, level voice prompted suddenly from the balcony, "The allegro movement, key A flat minor, extended chord."

She glanced swiftly forward with a little impulsive gesture and rose in her seat, faced the conductor, flashed a glance of swift defiance and passed with head erect through rows of thunderstruck musicians to the platform exit.

Bewildered comments were exchanged throughout the hall, and the notability in the stalls adjusted its spectacles rather irritably and awaited developments.

"These Americans! These Americans!" chafed the conductor, beside himself with rage; then he hurled an order at the doorkeeper, pointing to the balcony.

"Herr Tolstoy! Fetch him immediately!"

The man at the end had already disappeared, and in the passage connecting the platform with the cloakrooms he encountered the retiring pianist.

"Quick!" she whispered. "The conductor called for you."

His face glowed with trembling, exultant gratitude. He seized her hand and started backward conscience stricken as a tear fell glistening on her sleeve.

She rushed past him disconcerted, paced the step or two down the passage and turned abruptly to avenge her momentary loss of self control in an outbreak of reproach.

"Why don't you go? My failure gives you your opportunity. Pray don't hesitate to avail yourself."

"I'm sorry, so sorry"— he began.

"Do go!" she reiterated less harshly. "They will continue the program. It will be too late in another moment."

Though his hope of the future depended on that moment, he still stood irresolute, gazing in sheer fascination at the tear stained, imperious face.

"Do go! Do please go! It won't have been any good if you don't,—and I shall never forgive myself"—

"Herr Tolstoy!"

The stentorian voice of the doorkeeper rang down the passage, and she darted through a doorway.

Her companion followed, stopped a second, and his lips seared her cheeks.

In the next the platform door closed behind him.

An echo reached her of the allegro—rippling, lightening, swirling across the keys, subdued at intervals to the tumult of orchestral accompaniment, then ringing again, triumphant, quivering at the last with the rapt, exalted passion of a love song, followed by the silence that is greater than applause.

The pianist himself broke the spell, rising from his seat. The hall shook with a burst of enthusiasm. He passed unheeded through the platform exit.

The white haired notability removed his glasses with a sigh of satisfied enjoyment and turned to his colleague, his rugged Teutonic features softening into a smile.

"Your American young ladies—do they often take stage fright? But her compatriot! He is magnificent! To play that most difficult concerto without notes, without rehearsal—touch, technique perfect! Consider also his youth"—

The director broke in with adroit explanation and suggestion. The professor beamed with delighted recollection.

"It is the same, then, who offered his services? You are right, my friend, that I should change my mind, that the world should hear of him. He shall go with me on tour."

Twilight in the park, the sharp, gray twilight of late autumn. A smart electric runabout, with a lady at the lever and a chauffeur at her side, joined the stream of vehicles entering the park at the Plaza. Her features were only partially visible through her automobile veil, but an involuntary exclamation broke from a man pacing aimlessly along the walk.

"Miss Trentham!"

"Mr. Tolstoy!"

With the answering cry of recognition she drew up close to the walk, heedless of the rules of the road.

Half hesitating, Tolstoy went forward.

"So you are back in America, Mr. Tolstoy?"

"Yes." He muttered the monosyllable without raising his eyes.

"And I see from the papers that your European tour was a great success."

He blurted out a second affirmative.

For the moment she was slightly nonplused; then with infinite tact she once more took the initiative.

"You are soon appearing in New York?"

"Tomorrow at Carnegie hall," he replied shortly.

Boardmen were parading Broadway with notices of the professor's concert. It humbled him that she had not noticed the large type at the foot of the boards "Solo pianoforte, Mr. Alfred Tolstoy."

"A matinee?"

He nodded stiffly.

"Of course I shall go. It will be a great pleasure to me to be present at your debut," she continued.

"It happens to be the last concert of the series," he said icily.

"I had no idea," she began in a tone of eager explanation. "But, then, I have been traveling abroad a good deal with my parents since I saw you last. We only returned from Switzerland a couple of days ago."

The fact accounted for her apparent indifference, and his expression softened, but he stared moodily before him to avoid her eyes, and the handsome turnout in which she was seated with her liveried chauffeur somehow forced on him a sense of social disparity. When she spoke again her voice had a shy, hesitating ring.

"I need scarcely ask if you are successful?"

He produced a memorandum and read out some details—no trace of pleasure or enthusiasm in his tone, only a cynical sort of triumph in the sense of achievement.

"Tomorrow is my final appearance in New York with Professor Meyernaus for the present. I am booked subsequently for various musical receptions; also the principal concert agents have made me very flattering offers."

"Shall I congratulate you?" she asked slowly.

"If you had congratulated me that night at the Conservatoire," he broke out resentfully, "and given me the opportunity to thank you"—

"You could not expect me to wait, to face every one after my failure. Besides"—she turned away her eyes to hide a sudden confusion—"you—you had already thanked me."

"It was not only to thank you— He was confused now, struggling with an increasing desire to make his hopeless avowal.

"I owe my subsequent success to you," he continued pedantically.

"No, indeed!" she broke in eagerly. "But—I am glad—more than I can say—that you have realized your ambition."

"I suppose I have."

His tone gave the lie to the acknowledgment.

He had fallen so pitifully short of realization. Could she but know!

Despair overwhelmed the remnant of his pride and self control. He raised his eyes, aflame with his secret.

"I am still striving," he said haltingly, "for the unattainable."

The grim white face strained toward her through the dusk, and conviction rushed swift upon her.

She bent impulsively, with a radiant, triumphant smile. Her voice swayed with a little tremor of delight.

"I think I understand. But you are mistaken. For all you know the unattainable may be within reach."

### Killing a Bull Without a Weapon.

Cayetano, a famous Spanish toreador, once was strolling across a meadow with a couple of friends when his attention was attracted by an old and infuriated bull which was galloping toward them with lowered head and erect tail. Cayetano had no weapon, not even a cane, but he seized a dust coat which one of his friends was carrying over his arm. As soon as the bull got close to them Cayetano bade his companions make their escape while he engaged the animal's attention. Using the coat as a capa, he drove the bull crazy with fury, stepping aside with the daftest agility at each of the animal's charges. In this manner he caused the bull to turn sharply in the midst of its onward rushes until finally an ominous crack was heard, and the bull fell in a heap, with its backbone broken by the sudden wrench given by the animal's abrupt swerve.

### A Lincoln Anecdote.

Jaspar Alban Conant tells the following anecdote of Lincoln in the Metropolitan Magazine:

"One of the comical characters in Washington during the war was jolly old Isaac Newton, the Philadelphia Quaker whom Lincoln appointed commissioner of agriculture—a new office just created by congress. Newton, who tried and at the same time amused the president, had made his reputation on a dairy farm. Beyond this he knew little of agriculture.

"Hearing which, I could not refrain from asking Lincoln why he had appointed such an ignorant man to the office.

"'Because I think he's competent enough to attend to all the agriculture we will have till the war is ended,' was the answer."

### The Long Silence.

"Yes, we are pretty comfortably fixed here," admitted a veteran employee in the reading room of the Congressional library when a visitor envied him his soft berth and comfortable surroundings. "But there's one thing we long for—yes, thirst for with a burning thirst. That's noise—a real, nerve racking, ear splitting noise. The long hours of soft silence, the dead stillness of everything about, grows so oppressive that at times we could shriek out. We get into a sort of sick-room tiptoe and a low tone of voice that finally degenerates into a whisper even at the telephone. Give us an occasional battery of artillery or a roaring lion or a steam calliope. Even a squalling baby would help some."—Washington Star.

### Just a Blunder.

Sir Uptree Monliess (who has got old Coldkash in a corner at the club)—Mr. Coldkash, your daughter is the idol of my life, the one hope and aim of my existence. Might I dare hope that some day I may be permitted to call her wife?

Mr. Coldkash (astounded)—But, my dear sir, I have no daughter.

Sir Uptree M.—Oh, pardon me! Somebody told me that you had. Let's have a drink.—London Scraps.

### The Decoy.

"I notice," said the man to the parson, "that, although I am in the front pew, there is always a five dollar bill on the collection plate when it comes to me. Is that the contribution of the man who takes up the collection?"

"Not at all," replied the parson, who believed in business methods. "That's our decoy."—Detroit Free Press.

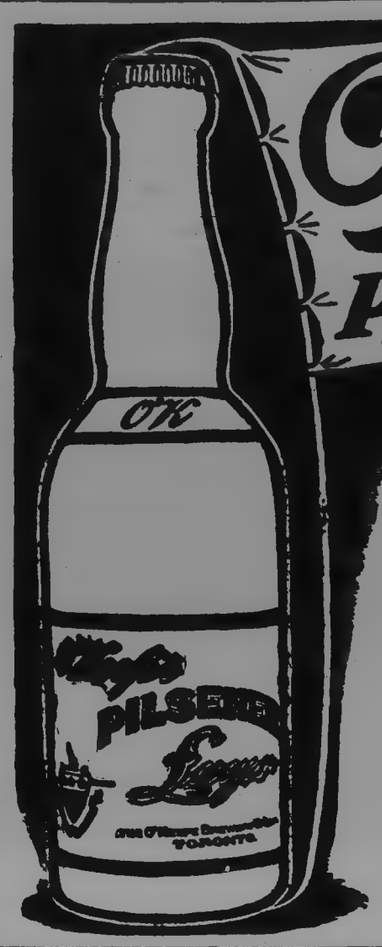
Stops Headache

Mr. E. F. Tomkins, Ex-Mayor of Coaticook says so.
"Your tablets are a safe and effective remedy for headache."

Mr Geo. Legge, Editor of Granby Leader, Mail says so.
"Your Zutoo tablets deserve to be widely known as a cure that will cure."

Major A. C. Hanson, B.A., B.C.L. says so.
"I use Zutoo tablets and find them a very satisfactory cure for headache."
So says every mother's son who has tried

Zutoo



O'Keefe's
PILSENER LAGER

The Light Beer in the Light Bottle

Canadians laugh at any talk of the superiority of "imported lagers".

They know that O'Keefe's "Pilsener" Lager is a purer, better beer than anything imported into Canada.

They know that O'Keefe's "Pilsener" is brewed only of the choicest hops and malt—which cannot be said of any American lager.

# THIRD OPERATION PREVENTED

## By Lydia E. Pinkham's Vegetable Compound

Chicago, Ill. — "I want to tell you what Lydia E. Pinkham's Vegetable Compound did for me. I was so sick that two of the best doctors in Chicago said I would die if I did not have an operation. I had already had two operations, and they wanted me to go through a third one. I suffered day and night from inflammation and a small tumor, and never thought of seeing a well day again. A friend told me how Lydia E. Pinkham's Vegetable Compound had helped her, and I tried it, and after the third bottle was cured."—MRS. ALVENA SPERLING, 11 Langdon Street, Chicago, Ill.

If you are ill do not drag along at home or in your place of employment until an operation is necessary, but build up the feminine system, and remove the cause of those distressing aches and pains by taking Lydia E. Pinkham's Vegetable Compound, made from roots and herbs.

For thirty years it has been the standard remedy for female ills, and has positively restored the health of thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency indigestion, dizziness, or nervous prostration. Why don't you try it?

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS.

ANY PERSON who is the sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts, a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

# Woman's World

Wife and Daughter of Indian Prince, Maharajah of Baroda.

TWO OF INDIA'S LOVELIEST WOMEN.

The maharajah of Baroda and his wife and daughter have recently been in America. This great Maharatta chief holds sway over 2,000,000 subjects, and it is to him that India owes most of her progressive ideas and economic advancement.

The gaekwar is said to possess the finest collection of pearls in the world, to say nothing of the "Star of the South," that marvelous diamond once the delight of Napoleon.

Her highness the maharanee of Baroda is a very progressive woman and ably assists her distinguished husband in looking out for the welfare of his subjects.

When asked whether she believed in suffrage for women a dignified shake of the head and a quizzical smile was the answer to the question. She glanced toward her daughter, the Princess Indira, the most beautiful princess in India, who is the first girl of her rank to pass the entrance examination to the University of Baroda, where she will enter this fall as a student.

"I enjoy my studies so much," enthusiastically cooed the princess. "I shall graduate from the university and be as bookish as my brothers, one of whom is in Harvard and the youngest, a darling of fourteen, in an English preparatory school.

The wife and daughter of the gaekwar dress in native costume. When walking they seem to glide, and there is no necessity of asking the maharanee if she believes that girls should wear stays. Dark flashing eyes and perfect teeth are the only jewels with which the young Princess Indira is adorned, but her mother is a blaze of marvelous gems.

The royal oriental party are on their way round the world, having left India last spring for the journey.

### Suggestions For the Housewife.

One tablespoonful of extract will flavor one quart of mixture to be frozen.

To keep a washboiler from rusting after using it on washday, wipe dry, then take a piece of cloth and saturate with kerosene and wipe the boiler inside and out.

A plain cloth dipped in hot water and then in a saucer of bran will clean white paint and not injure it. The bran acts like soap on the paint.

If a loaf of bread has become stale hold it under water for a second, then place in a brisk oven for a quarter of an hour. It will taste like new bread.

When you are ironing any dark material do not put a linen cloth under-

# CHARMS

Of Skin, Hands and Hair Preserved by

# CUTICURA

For preserving and purifying the skin, scalp, hair and hands; for allaying minor irritations of the skin and scalp and imparting a velvety softness; for sanative, antiseptic cleansing and, in short, for every use in promoting skin health and bodily purity, Cuticura Soap and Cuticura Ointment are unsurpassed.

Sold throughout the world. Depots: London, 27 Charterhouse Sq.; Paris, 10, Rue de la Chaussee d'Antin; Australia, R. Towns & Co., Sydney; India, B. K. Paul, Calcutta; China, Hong Kong Drug Co.; Japan, Maruya, Ltd., Tokio; So. Africa, Lennon, Ltd., Cape Town, etc. U. S. A., Potter Drug & Chem. Corp., Sole Props., 138 Columbus Ave., Boston.

32-page Cuticura Book, describing in plain terms the Best Care and Treatment of the Skin, Scalp, Hair and Hands, sent free on application.

health, for the lint will come off on the stuff and you will have great difficulty in brushing it off again.

Chinaware that has been burned or darkened through use may be brightened in this way: Take a teaspoonful of soda, moisten with water and scour till the spots are removed.

To mend an umbrella take a small piece of black sticking plaster and soak it in water until quite soft. Place this carefully under the hole inside and let dry. This will be found to be better than darning, as it closes the hole neatly without stitches.

### A Wife's Influence.

Lookers-on often see the wonderful influence a wife can exert for the good or failure of her husband. By a gracious, genial manner she may win hosts of friends for him. In nearly every walk of life where he has to look to the generous public for a livelihood, she can help him make the yoke easier and the burden lighter. A powerful factor in the world of business today is found in the influence of woman.

### Out, D— Spot.

To remove grease from garments dissolve a tablespoonful of salt in four tablespoonfuls of alcohol, shake it well and apply with a sponge.

### Mythical Horses.

Pegasus ("born near the source of the ocean") was the winged horse of Apollo and the Muses. Bellerophon rode this animal when he charged the Chimera.

Skelpnir ("the black horse of Odin") had eight legs and could carry his master on sea as well as land. This animal is believed to typify the wind, which blows from eight different points.

Al Borak ("the lightning") was the horse commissioned by Gabriel to carry Mohammed to the seventh heaven. He had a human face and the wings of an eagle. Every step he took was equal to the farthest range of human vision.

According to Thessalian legend, the first horse was miraculously brought forth by Neptune striking a rock with his trident.

### A Japanese Anthem.

The majority of national anthems are not conspicuous for beauty, either of words or music. The only one composed by a musician of the very first rank is the Austrian anthem, for which Haydn is responsible. And in no country has the composition of a really great poet been adopted except in Norway, where Bjornson's stirring lines beginning "Yes, we love this country," serve as the national anthem. The Japanese have a daintily worded anthem which Captain Brinkley translates as follows:

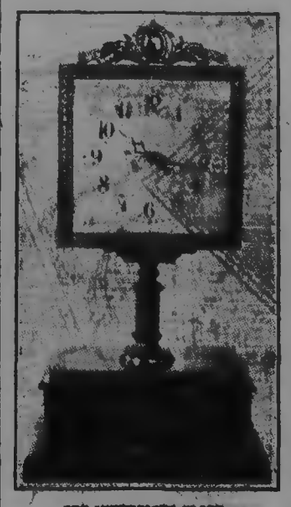
Until this grain of sand,
Tossed by each wavelet's freak,
Grows to a cloud girt peak,
Towering above the land;
Until the dewy flake
Binding this blossom's gold
Swell to a mighty lake—
Age upon age untold,
Joy to joy manifold
Add for our sovereign's sake.

### A Plea.

She laid the still white form beside those which had gone before. No sob, no sigh, forced its way from her heart, throbbing as though it would burst. Suddenly a cry broke the stillness of the place, one single heartbreaking shriek; then silence, another cry, more silence, then all silent but for a guttural murmur which seemed to well up from her very soul. She left the place. She would lay another egg tomorrow.—Philadelphia Press.

## A BOUDOIR TIMEPIECE.

Something New and Odd in Clocks.



THE MYSTERIOUS CLOCK.

There is a perfect fad among smart women for boudoir novelties. The very latest device of this sort is the mysterious clock, which is designed especially for milady's dressing room or sitting room.

This clock has no visible connection between its hands and its works, for the dial is of clear glass and the hands and numbers are of gilt.

### A Triumph For Women.

The election recently of Mrs. Ella Flagg Young to the presidency of the National Educational association is one of the most notable victories that have come to women in recent years.

This, together with the fact that the presidency of the national conference of charities and corrections was awarded to Jane Addams last year, would seem to justify the oft repeated utterance that this is the woman's age.

And yet after all there is nothing remarkable about the fact that a woman should be made president of this great educational association. Almost more remarkable is the fact that this honor has come so tardily to a woman.

Broadly speaking, the teachers of the country are women. Teaching is generally recognized as a woman's profession.

This is true in every branch save the university and collegiate departments. The total number of representatives from those departments is so much smaller than from the primary and secondary schools that the large majority of men in the advanced branches has little effect upon the total percentage of men and women.

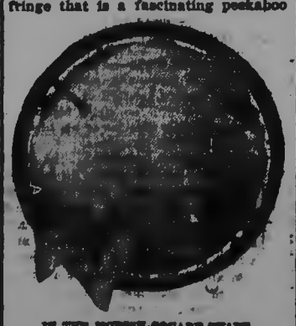
But the principal reason for satisfaction at this election is not the fact that the president is a woman, but that a woman who was in every way qualified by her past service to the cause of education to hold this position of honor should be eligible to the presidency and, being eligible, should have been elected.

For once it is possible to witness the spectacle of the opposing candidates going down to ignominious defeat without a pang of remorse.

There were six of them—six brawny men—all fighting against one woman, and the woman won. One admits a grim sort of satisfaction at the spectacle.

### Parasol Days.

Parasols this season have both lovely; every woman will concede this sartorial point. Perhaps the most fashionable shape has been the square sunshade trimmed with deep drooping fringe that is a fascinating peekaboo



IN THE MODISH SQUARE SHAPE.

screen for coquettish eyes. Indeed, a pretty girl can do a lot of damage with such a parapulla.

Batiste, too, has been a favorite material for the summer sunshade, and the model pictured is of tan batiste with a fringe of beautifully blended colorings of the kindergarten material. A girl who is familiar with the use of raffia could easily construct a parasol for herself at small cost.

### It Saved Time.

Pillowcase tubing is used by one mother for petticoats for the little children of the family. All that is needed is a belt and a frill, with any trimming that may be wanted, and the skirt is done.

### Sussex Superstitions.

Sneeze on Monday, sneeze for danger;
Sneeze on Tuesday, kiss a stranger;
Sneeze on Wednesday, hear a letter;
Sneeze on Thursday, something better;
Sneeze on Friday, expect sorrow;
Sneeze on Saturday, see tomorrow;
Sneeze on Sunday, on Monday catch her;
Sneeze on Sunday morning fasting,
Your love will love you everlasting.

### Couldn't Risk It.

### A Mohammedan Festival.

Taboots is an Indian festival in connection with the celebration of the month of Moharrain, which begins the year of the true Mohammedan. This festival commemorates the death of Prince Hossein, the grandson of Mohammed, who met his death in battle after ten days' fighting against King Omar. The word taboot, from which the festival takes its name, means literally a tomb, and it is always built in front of the homes of some rich and important Mohammedans and under a temporary shed built for this purpose. The taboots are made from thin bamboo strips covered with highly colored paper, and it is always decorated with isinglass, gold and silver paper, glass balls and much red and green paint. On the ninth day of the festival of Taboots the taboots are carried in a possession through the streets of the various cities in India. On the tenth day all the taboots are thrown into some river, and thus ends the Mohammedan festival of Taboots.—Boston Herald.

### Primitive Fire Fighters.

As late as the end of the sixteenth century in London the sole method of extinguishing fires was by means of contrivances known as "hand squirts." These were usually made of brass, with a carrying capacity ranging from two to four quarts of water. The two quart "squirts" were two and a half feet in length, one and a half inches in diameter at their largest part and but half an inch at the nozzle. On each side were handles, and three men were required to manipulate a "squirt." One man on each side grasped the handle in one hand and the nozzle in the other, while the third man worked the piston or plunger, drawing it out while the nozzle was immersed in a supply of water which filled the cylinder. The bearers then elevated the nozzle, when the other pushed in the plunger, the skill of the former being employed in directing the stream of water upon the fire. Such primitive contrivances are said to have been used during the great fire of 1666.

### Reversed.

An East Boston doctor told of the experience of a druggist the other day who sold some alcohol to a new customer. After the man had signed the book as required he said: "Now, don't get that name twisted. It is Michael Sullivan and not Sullivan Michael, same as they turned it around in the directory."—Boston Journal.

### A Light Retort.

"How did the trouble in the family start?"

"The wife, it seems, got tired of her husband's heavy wit."

"Why didn't she simply make a light retort?"

"She did. She threw the lamp at him."—Exchange.

### A Puzzle.

Mother (reprovingly to little girl just ready to go for a walk)—Dolly, that hole wasn't in your glove this morning. Dolly (promptly)—Wasn't was it, mamma?

### Sir Walter's Knack.

"Ruff on the cloak," remarked Sir Walter Raleigh as he spread down his velvet garment before Queen Elizabeth. He could not resist giving her this little wrap.

### Just the Contrary.

"I suppose you're one of those idiots that touch wet paint to see if it's dry."

"No, I'm not. I touch it to see if it's wet."—London Punch.

A straight line is shortest in morals as well as in geometry.—Rabbi.

# MILLIONS IN GOLD, SUNKEN IN THE SEA, MAY SOON REWARD SEARCH

## SEEK TREASURE OF SPANISH ARMADA

### Search Is Vigorously Prosecuted Off Highland Summer Resort on Isle of Mull.

### $37,500,000 IS UNDER SEA

### Elaborate Diving Operations Off Tobermory Undertaken by Submarine Engineer and Inventor of London.

(Special Dispatch.)
London, Saturday.

TOBERMORY, the popular Highland summer resort up on the Island of Mull, is having the time of its life. The transient population, which is almost boosting the roofs off the hotels and boarding houses, has its attention centred on the diving operations which have for their object the fishing up of bullion estimated to be of a gross value of £7,500,000 and supposed to have gone down in the Spanish Armada treasure ship Florencia, known in historical records as the "high gallery decked Tuscany galleon," which went down in a terrific storm in Tobermory Bay just 323 years ago. Mr. William Fitzgerald, submarine engineer and inventor, of London, and Lieutenant Colonel M. K. Foss, also of London, who is superintending the quest on behalf of the "Pieces of Eight Syndicate," are the magicians after the ideal of the sightseeing visitors.

Scattered by the shot, the fire ships and the merciless tactics of Drake and Hawkins and their men in the Dover Straits, the Florencia was one of the 150 Spanish warsmen that were driven to the "inhospitable and insolent North." Then, caught in that hurricane which Philip of Spain called the "contention of God," the galleon, with all her wealth of guns, treasure and humanity, went to the bottom of Tobermory Bay. Periodical attempts, more or less successful, have been made to locate the treasure ship, and the local relators of history and prophets of past days have conspired to invest the sunken galleon with fabulous wealth, while all the Sandys and Maes within a radius of many miles have constantly staked their reputations that there was "something in it all."

NO WANT OF SYSTEM.

But if Mr. Fitzgerald, assisted by a daring diver of the name of Daniel Mackenzie, doesn't bring up the loot this time it will not be for want of method. As a matter of fact, by the time that the six months at his disposal for the search have expired the area within which the 1,000-ton galleon of the Armada must be resting will be a honeycomb of perforations to a depth of eighteen feet in the bed of the bay. And should the results be nil, then the pronouncement will be made that the popularly supposed location of the ship is wrong.

Diver Mackenzie has been right on the job from the moment he donned the submarine helmet and [illegible] below the surface of the briny within a hundred feet of the steamboat pier. A series of preliminary dives yielded this harvest:

First Dive—Small sword, much corroded, in wooden scabbard; several iron articles.

Second Dive—Very old caulking tool; pieces of oak.

Third Dive—Stock of one of a ship's anchors.

While similar interesting relics, including powder horns and hawse pipes and encrusted sword blades, have been dragged ashore daily with which to feast the eyes of natives and visitors alike, wild stories have fluttered about. Rumor had it one day that "Mac" had fished in the gold chest of the unfortunate Marquis of Sidonia; instead of which it was only a porcelain ointment pot encased in metal. Then it got noised abroad that an admiral's sword, flashing with rubies and diamonds, had been brough' to the surface. Great race by the populace, transient and native, to the shore front. "Mac's" find was but an ordinary bayonet encased in a wooden sheath.

WAITING FOR THE GOLD.

So Tobermory still is waiting for a glimpse of the lockers of Spanish gold

"Clever proposition," comments some of the visiting doubters, "to have this show on just during the summer vacation period, when summer hotels need filling."

"That's a downright libel!" contends the wrathful native, who believes that the Spanish treasure is certainly due to be uncovered by this methodical search.

Apropos of the search, the Law Journal points out that treasure seekers might turn their attention with profit to the more than £5,469,000 which repose in the hands of the British government as unclaimed funds. Of this awesome total there is something like £1,182,124 belonging to English suitors standing to their credit in the books of the Pay Office of the Supreme Court. Since the passing of the Chancery Funds act of 1872 and the Supreme Court Judiciary act of 1883 all the securities of money paid into court to the credit of any cause or any matter in any division of the High Court have been placed to the account of the Paymaster General, and if not claimed within a certain period go to the benefit of the Consolidated Fund. A large part of the sum mentioned will, in default of successful petition, ultimately go to the reduction of the national debt.

The bankruptcy offices have been erected out of part of the funds held by the Treasury, in respect of unclaimed dividends and the cost of providing accommodation for officers performing duties under the Bankruptcy act of 1883, the total liability in respect of bankrupts' estates in England and Ireland being £1,167,317. In respect of government stocks and dividends, a total of £1,964,630 now stands in the names of the National Debt Commissioners on account of unclaimed funds from those sources.

## *Exodus of Americans from London Society Circles, Some Returning, Others Shooting Grouse in North*

### London at Last Empty and Drawn Blinds Meet One Everywhere.

### WESTBOUND SHIPS HAVE FULL CABINS

(Special Dispatch.)
London, Saturday.

MORE and more difficult every day it becomes to follow the threads of social movements as people move further and further afield. London has at last emptied itself in real earnest. Even those who put off their departure till the last have now closed their houses for the holidays, and drawn blinds meet one at every turn in the West End.

Some Americans who come year after year to London for the ever dwindling season are, in more cases than a Britisher with all his insular pride would think possible, glad with a really heartfelt joy to return once more to their favorite late summer centre, Newport. One well known American woman who has just left on her way to America expressed concisely the contrast between the two countries after a couple of seasons in London.

"As different as night is from day," she said, leaving it more or less to the imagination to guess which country was blessed with original and which with reflected illumination, until she added, "but I always find the English people themselves [illegible] it can well be understood that those Americans who have no special reason for remaining have left or will leave as soon as they can find accommodation on board the crowded westward bound ships.

Mrs. Adair is making arrangements to leave for America later in the year. She has benefited much by her rest and cure at Evian-les-Bains, and is now in Ireland at her place, Glenveagh Castle, until the end of the month at least. Then her plans may bring her back to London for a short time before leaving for the States. For the later season she has let Glenveagh to Mr. Gildred Hartley.

Mr. Hamilton McCormick, who returned recently from America, and Mrs. McCormick have gone to Ostend, where they are to be joined by their sons, who have been at Etretat.

Most Americans of any note, however, have gone North, where grouse shooting is now in full swing. Colonel and Mrs. Stewart Mackenzie are passing the autumn at their own place, Brahan Castle, in Ross-shire, where they are to give a succession of parties. Others entertaining include Mrs. W. K. Vanderbilt and the Marquess de Ganay, at Beaufort Castle, which seems to be a popular centre with Americans, as it was occupied for several seasons by Mr. Phipps, of Pittsburg, who was very keen on the first rate fishing to be obtained there. This year Mr. Phipps has some grouse shooting not far off, at Glenquoich, where King Edward frequently stopped with the late Lord Burton. M. C. W. Ogden, too, has the lease of a place in Ross-shire, belonging to the Marquis of Normanton, while another American host this season is Mr. Percy Chubb, who has the shooting over the Auchlecks grouse moors, and Glenesk, which is admittedly one of the finest grouse glens in Scotland, is under lease to Mr. Cadwalader.

Mrs. Ogden Mills is to be entertaining this autumn in Ireland, where her husband has taken over Oriel Temple from Lord Messerene.

Later on there seems every prospect of a reaction in London when the autumn season in the North and on the Continent is on the wane. Many well known hostesses have fixed on the beginning of October for their return, and a programme of small dances and dinners for disappointed débutantes will be the order of the day. One of the earliest returns is likely to be that of the Duchess of Marlborough, who next winter will, it is expected, do a good deal of entertaining at Sunderland House.

## FIND LOST TRIBES IN BRITISH RACE

### Queen Mary and Others of the Royal Family Share Belief in Descent from King David.

(Special Dispatch.)
London, Saturday.

QUEEN MARY is said to be a believer in the theory that the British race are the ten lost tribes of Israel At any rate, Mr. W. T. Stead, in the current number of the Review of Reviews, asserts that Her Majesty was trained by her mother, the Duchess of Teck, in that belief, and that the royal house is directly descended from the house of David through the daughter of Zedekiah.

"The Duchess of Teck," writes Mr. Stead, "revelled in the splendor of the visions which, according to the school of interpreters which she favored, seemed to promise to the British and American peoples all the blessings which were the heritage of Israel. According to this school, which still numbers among its adherents many persons of the highest rank, and some who have rendered the State great service in the army, the navy and the law, the British people are the lineal descendants of the lost ten tribes; the King of England is the heir in the direct line of King David, the son of Jesse; and the future universal triumph of the English speaking peoples is believed to be positively predicted in hundreds of texts in the Old Testament Scripture.

"The Duchess of Teck was by no means the only member of the royal family to whom the idea of being of the house and lineage of David has made a subtle appeal. Edward VII. was not exactly a Beream learned in the Scriptures, but he is reported to have read with interest, although probably not without a smile, the elaborate genealogical table which traced his ancestry through David's royal house up to his remote progenitors—Abraham, Isaac and Jacob. And even Queen Victoria is said to have been sufficiently fascinated by the theory as to have had something to do with the addition to the other Christian names of the Prince of Wales of the ancestral name of David.

"Whether Queen Mary has or has not discarded the belief in the Israelitish origin of the British people," adds Mr. Stead, "she was bred up in that somewhat inspiring faith. Many suggestions [illegible]

## *AMERICAN "HUSTLING" IDEA NOT CONDUCIVE TO WORK*

### *Mr. Joseph Lyons Declares That It Wastes a Vast Amount of Nervous Power and Energy, Leading to Lack of Efficiency.*

(Special Dispatch.)
London, Saturday.

"I do not believe in what Americans call 'hustling.' The American hustler, in my opinion, does not represent the highest type of human efficiency. He wastes a lot of nervous power and energy instead of accomplishing the greatest possible amount of work for the force expended."

Mr. E. Lisle Snell, a man well known in literary circles in England, and who during the many years he was engaged in newspaper work in America learned something about "hustling," says he felt perfectly staggered when Mr. Joseph Lyons, the great restaurateur, painter, novelist, librettist, dramatist, one of the greatest "hustlers" England has ever known, expressed to him "this heterodox view of that most striking product of American civilization, the hustler. For the commonly accepted opinion seems to be that the lesson of which Englishmen stand most in need is to learn how to hustle in the American fashion."

Sir Thomas Lipton once said that he believed the best training a man could receive for a successful business career in England was to be sent to America when young to master the art of hustling. Then return and start hustling.

"Hustling," says Mr. Snell, "is a subject on which Mr. Lyons is quite as competent to speak with authority as Sir Thomas Lipton, for, judging him by what he does and has done, most Americans would regard him as a hustler himself of the most advanced type, entitled to rank with the foremost of their own exponents of the strenuous business life."

So Mr. Snell asked Mr. Lyons to explain.

"Judging the American hustler from my observations of him in his own country, I should say that the American hustler shows a lack of adaptation of means to ends, because he puts more mental, physical and nervous energy into his work at all times than his work at all times demands. Regarded as a machine, he is not an economical one. He breaks down too often and has to be laid up for repairs too often. He tries to do everything [illegible] too fast; he plays havoc with his nerves by trying to work too fast. I hold that a man pays much more for his success than his success is worth no matter how many millions it represents when it demands of him the expenditure of all his powers and leaves him no time, inclination or energy for the exercise of his faculties or talents in other directions.

"The typical American, the hustling American, never seems to be satisfied, as most Englishmen are, with what might be called moderate success. The typical Englishman who is doing fairly well in business looks forward, not to accumulating a huge fortune, but to retiring from business altogether when he has accumulated enough to keep him in comfort the rest of his days. Generally, he aims at ultimately buying an estate in the country, where he can take life easy and devote himself to some pet hobby. The American cultivates no hobby."

Asked how he made his practice square with his precepts, Mr. Lyons said:—"By organizing myself to run smoothly as well as my business; by schooling myself to keep cool and do what I have to do without expending any more nervous energy on the task than is necessary; by avoiding all needless friction. In consequence, when I finish my day's work I feel nearly as fresh as when I started."

## CAESAR NOW OUSTS THE TEDDY BEAR

(Special Dispatch.)
London, Saturday.

TEDDY BEAR, who has enjoyed such a long run of popularity as a pet in the nursery, and indeed by grown up women as well, has at last found a rival who threatens him with dethronement. Caesar, the favorite wire haired terrier of the late King Edward, is taking his place. A life size model of Caesar has been made by the Bloomsditch toymaker, and Teddy Bear and all other toy animals are quite out of the running.

As every dog has his day, Caesar is having his now. Not only are models being bought for children, but many grown ups are purchasing them to keep as permanent [illegible]

## STAGE ERROR DUE TO HOBBLE SKIRT

### Actress Appears in Scenes Supposed To Be Two Years Apart Wearing Same Design.

(Special Dispatch.)
London, Saturday.

THE "hobble skirt," which fashion inflicted upon women this summer and which Parisian dressmakers have sought to disown as an "American horror," has been responsible for provoking a controversy that has been to the detriment of the redoubtable Sherlock Holmes. Liverpool started the wrangle when Sir A. Conan Doyle's latest thriller, "The Speckled Band," was played there a Shakespeare Theatre.

In the first scene one of the actresses appeared in a skirt of the style at present fashionable. Two years then are supposed to elapse, but the same member of the cast appeared in the ensuing act in another skirt of exactly similar design. That was sufficient for Liverpool's discerning feminine students of fashion. They promptly averred that the "hobble skirt" was not in vogue two years ago, and that, moreover, fashions never last for two consecutive years. Despite his famous eye for detail Sherlock Holmes is held to have a big explanation imposed upon him for the benefit of his friend Watson.

## LONDON BEGGARS REAP A HARVEST

(Special Dispatch.)
London, Saturday.

IT has been remarked frequently by American visitors to London that in no city which they have visited during their European tour have they seen so many beggars in the streets as in the British metropolis. In the generosity of their hearts they hand out money to those starved looking creatures, and wonder all the time why the country, or the government, cannot make better provision for its poor.

But are these deserving poor who whine about the streets at nights? These beggars, halt, blind, maimed, come for the most part, from the "Beggars' Colony," the most [illegible]

## DEPLORE AMERICAN LACK OF REVERENCE

### Tourists Attend Services to See Shakespeare's Tomb and Write Postal Cards in Church.

(Special Dispatch.)
London, Saturday.

THIS is London's annual "silly season." But so wholly is the public generally devoting itself to holiday affairs that the usual "crazy quilt" discussions which are wont to rage in the columns of the metropolitan newspapers on problems of such peculiar import as to give the period its name have been utterly lacking. Politics went to sleep weeks ago. Even before Parliament adjourned politicians merely talked in their sleep; now they wander, instead. Law is dead. Conferences of importance await until the future. So, in this condition of affairs, the American tourist has had to serve as a convenient subject for verbal dissection.

From Stratford on Avon has come the complaint of the "irreverent behavior of a certain class of American visitors who attend the services in the parish church with the object of visiting Shakespeare's tomb in the chancel and not for the purpose of divine worship." This practice, it is alleged, has become so general as to account for the placing of a card immediately after each Sunday service across the west end of the choir, which reads:—"Shakespeare's tomb is not shown on Sundays, and on other days a small charge is made, the proceeds being expended upon the church and its service and the care of the churchyard."

A still further and more serious complaint against "a section of Americans" is recorded in that "they have been seen to go through their purchases of pictorial postcards and actually to address them during the time of divine service." So vigorously have the church wardens and the vicar taken steps to put a stop, as they characterise it, "to the practice which is the outcome very largely of the modern laxity in proper observance of the Lord's Day" that the London Globe has released itself of the following comment:—

"We could wish that that 'certain class' of American tourists who go to Stratford on Avon to visit Shakespeare's tomb and forget to behave with at least superficial reverence in the church during divine service would make a rather more careful study of the works of Shakespeare before they pay their respects to his grave. Shakespeare, we feel sure, reveals in his poetry a spirit contrary to that which inspires one to go into a small local church in a strange town, and under the eye of the vicar temper public devotions with the task of addressing a large stock of picture postcards to the old folks at home. Shakespeare created some conscienceless men and women, but none who did this particular thing.

"So obviously did these visitors come to see the tomb of the poet rather than to take part in the services that the vicar and church wardens have made certain restrictions as to the public's opportunity of viewing the tomb. It is not shown on Sundays, and a small charge for church purposes is made on the other days. This state of affairs, no doubt a necessary one, affords us regrets, regret that a 'certain class' small as it may be, has prejudiced the position of those Americans who have escaped from the defects which mark the souvenir hunter and hustler of the old fashioned type, and regret that Shakespeare's tomb is not one of those national sights which are to be seen by all people at all times, free of charge."

## U. S. A. STANDS FOR UNITED STATES

(Special Dispatch.)
London, Saturday.

THE "U. S. A." still stand where they did, notwithstanding the efforts of some would-be busybodies to shift them. Since the federation of the South African States some people have taken it upon themselves to send their letters to South African towns addressed "U. S. A." Many of these, no doubt, are the persons who, a while ago, tried to raise an agitation against America's using the title of "U. S." when these British colonies had, they considered, as much right to be called "U. S. A." for short. The result was unpleasant for them, because their letters naturally, in sorting at the Post Office, found their way into the American mail bags and went wandering all over the "U. S. A." looking for their destination.

The Post Office has now issued an official warning. There is only one Simon Pure "U. S. A.," and that is America. The Post Office notice says that "U. S. A." cannot be used as a contraction for the Union of South Africa, which comprises the provinces of the Cape of Good Hope, Natal, the Orange Free State and the Transvaal. As the initials "U. S. A." are customarily used as a contraction for the United States of America their use as a contraction for "Union of South Africa," can only lead to confusion, for which the General Post Office can take no responsibility.

## DECRY COMMERCIAL SIDE OF BOXING

(Special Dispatch.)
London, Saturday.

ENGLISH sportsmen are hanging out what are intended to be warning signals to those boxing promoters who may head this way with the object of organizing contests on the "American plan." It is the so-called latter scheme that has stirred up the talk, for they contend that it is based solely on commercialism and must give boxing, as a sport, a bad jolt from which it might not recover in the British metropolis. The favorite reference to the boxing clubs in New York and other American cities is to classify them somewhat vaguely as "take money shows."

## JAPAN STIRRED BY AMERICAN ACTIVITY

### Military Object Is Seen in Secretary of War's Visit to the Orient.

### TO FORTIFY PHILIPPINES

### Mr. Dickinson's Trip Is Said To Be for Inspection of Batteries and Forts in Archipelago.

(Special Dispatch.)
Tokio, Saturday.

JAPAN'S persistence in seeing dire military foreboding in every move made by the United States is well illustrated in newspaper comment concerning the recent visit of Secretary of War Dickinson.

The Nichi Nichi, owned by Japan's Ambassador to London, Baron Kato, expresses the conviction that the only purpose of the Secretary's visit to the Philippines is to inspect the preparations being made to fortify Manila and other strategic points. The Nichi Nichi says:—

"Although the object of his trip is not known, it may safely be conjectured that it is in connection with the perfecting of the forts and batteries of the Philippines and also for the completion of the necessary naval equipment for the accommodation of the fleet of twenty battle ships which it is proposed to send out. The possibility of despatching a large number of ships was well illustrated by the recent cruise of the Atlantic fleet, and from this fact the intentions of Washington may be inferred.

"America's determination to retain the Philippines was also clearly illustrated by the remark which Mr. Taft made at Vladivostock when as Secretary of War he made his trip round the world, viz.:—'The Philippines are too good to sell.' Now that Mr. Taft has succeeded Mr. Roosevelt as President, he sends his Secretary of War to the Orient. This shows what importance America attaches to the Far East. We surmise that when Mr. Dickinson is back again in Washington the fortifications of the archipelago will undergo further improvement and that America's policy of securing the premier place in a commercial sense in the Far East will receive another impetus."

The Yorodzu contrasts the reception by the Japanese to Mr. Taft with that of Mr. Dickinson, pointing out that whereas the former was distinguished by a rare cordiality the latter was extremely cold The paper traces the cause to the unpopularity of the Taft administration among the Japanese and not to any growing coldness in the relations of the two countries.

## JAPANESE WOMAN LONDON DENTIST

### In Daintily Furnished Rooms Misery Is Transformed Into Happiness of Lotus Land.

(Special Dispatch.)
London, Saturday.

AN attempt has been made lately to stir up an agitation against the alleged unqualified dentist, the public being warned to beware of the man who has not the "L. D. S." to his name. But there has been quite another variety of agitation in the case of Madame Laporte, a little woman dentist from Japan, who has come to London and established herself in Conduit street, which is right in the heart of Mayfair. She is no "Licentiate of Dental Surgery" of the United Kingdom But she is evidently catching on, nevertheless, for there, in her daintily furnished and artistically decorated "studio," the misery of the dental chair," as one who has been there describes it, "is transformed into the gentle happiness of Lotus Land."

There is no horrid crimson plush-necked chair in the Japanese "studio." When you ring the bell the door is opened by a smiling little woman in a pale blue kimono, whose beady eyes soothe all pain at once. A fan is half hidden in her glossy black hair. Her feet are shod in sandals. There is no sign of forceps or a nerve prodder anywhere. Pale blue dragons are on the wall paper, with views of Fujiyama and soft cushioned seats to soothe the weariest. This is the anteroom; the studio is through a blue portico.

Here, reclining in rose water, are indeed those wriggly pointed things that seek out the tenderest parts of a hollow tooth. Here, too, are forceps, but as the little woman in the kimono takes them in her tiny hands they are no longer instruments of pain. She handles them as gayly as a Geisha flutters her fan.

You are dazzled by their brightness, and just as you are saying, "Ah's 'e ba' too!" and admiring the embroidered chrysanthemum on the hanging sleeve in front of you the bad tooth has gone from your mouth, and there is left a flavor of rose water and lily instead.

"I am very gentle," said Mme. Laporte to her patient. "I give no pain."

### ASIATIC PLANTS FOR AMERICA.

(Special Dispatch.)
Tokio, Saturday.

IT is reported that the United States government has invited Kamakimo Minakata, a Japanese botanist of Tanabe, to take charge of the transplanting of Asiatic plants and herbs in America, and also of the Oriental archives of the Congressional Library.

# THE FORMULA OF "FRUIT-A-TIVES"

## Is On The Outside Of Every Box For All The World To See

Every user of "Fruit-a-tives" knows exactly what is being taken. The formula of this famous fruit medicine is printed plainly on the outside of every box. We have stated many times—and now state clearly—that "Fruit-a-tives" is made of the juices of apples, oranges, figs and prunes, with valuable heart and nerve tonics and antiseptics.

Everyone knows that fruit juice is healthful—but perhaps some do not understand why this is true.

Fruit juice consists of about 91% water, 8% of sweet principle, and 1% of a bitter substance. It is the quantity of bitter principle in fruit that gives the fruit value as a medicine. An eminent physician of Ottawa, after years of experimenting, found a method of increasing the bitter principle in fruit juice, thus increasing the medicinal or curative qualities.

The juices are first extracted from fresh, ripe oranges, apples, figs and prunes. By a secret process, some of the sweet atoms are replaced by the bitter principle. Then tonics and antiseptics are added, and the whole made into tablets, now known far and wide as "Fruit-a-tives."

"Fruit-a-tives" is the only medicine in the world that is made of fruit juices, and is one of the few remedies that have let their composition be known from their introduction to the public.

"Fruit-a-tives" is nature's stimulant for the liver, bowels, kidneys and skin. In cases of obstinate Constipation, Liver Trouble, Indigestion, Backache, Rheumatism, Headaches and Impure Blood, this wonderful fruit medicine cures when everything else fails.

"Fruit-a-tives" is sold everywhere at 50c. a box, 6 for $2.50, or trial box, 25c., or will be sent, postpaid, on receipt of price by Fruit-a-tives Limited, Ottawa.

SPECIAL SALE OF

## Electric Irons $4.60

71 ONLY of the latest Collier Electric Irons have been thrown on our bargain counter, all on account of a little mistake in the plating department. They did not leave one corner as sharp as we specified. In every other detail the irons are perfect. They have all the latest improvements. All nickelled.

GUARANTEE—Every iron carries a written guarantee for one year, as to the element.

**PRICE—Only $4.60 Each**

For 40c extra we will supply Automatic Switch, 'the current-saver'. BE QUICK—This lot of 71 only, will be sold before Sept. 1. Order at once. Deposit the price $4.60. Try the iron a week. Your money back if you want it.

PROVE for yourself our claim that "The Collier Electric Iron saves you actually 10c on every ironing: that you actually lose 10c every time you iron with fuel. Then why delay purchase?

# THE FAMILY HEARTH

### MAKE SOME ONE HAPPY

For God's sake make *some one* happy for ten minutes if for no longer a time.

A young woman bound on such a mission, what might she not accomplish? Oh, there are thousands of these manufacturers of sunshine! They are King's Daughters, whether inside or outside of that delightful organization. They do more good before they are twenty years of age than *selfish women who live ninety*, and they are so happy just because they make others happy. Compare such a young woman who feels she has such a mission with one who lives a round of vanities, card-case in hand, calling on people for whom she does not care, except for some social advantage, and insufferably bored when the call is returned, and trying to look young after she is old, and *living a life of insincerity* and hollowness and dramatization and show.

• • •

### THROW IT AWAY

Stand up, little kid, with your cigarette burned clean up to your profane lips. Do you know that the poison you are so eager to infuse into every inch of your youthful hide may, before a hundred years have rolled over your head, make you not only color blind, but blind as a bat as well. "Naw," you didn't. Well that is the next affliction we are threatened with. The Scientific American says so, and we have grown in the habit of relying upon that staunch sheet. In London, tobacco blindness has become quite prevalent, and instances are cropping out on our own side of the pond, too. Throw away your cigar and wait at least until you have a hundred and eighty pounds of sound avoirdupois to carry around before you begin to stuff your skin with nicotine poison. Then maybe it will take you the rest of your natural lifetime to get enough of the weed to put out your eyes and plant a malignant cancer on the root of your saucy little tongue. "Your grandfather smoked till he was eighty did he, and chewed, too." Yes and that is the reason you should let it alone, at least until you are twenty-five. You were born with enough poison in your blood without beginning to stuff more down your throat before you are out of the nursery. Throw it away. Nobody expects *babies* to help pay the *national* debt.

• • •

### A GREAT CURSE

One of the greatest curses of this intellectual age is the great lack of a proper education of our girls in the practical affairs of every day life. They all want to be "school marms," governesses or the wives of rich men. Housework, which should form the basic principle of our economic life, is *shunned by them as something degrading*. A young woman will stand behind a dry goods counter fourteen hours a day for a mere pittance—*not* enough to clothe her—lose her health, become anaemic and unfitted for the performance of her natural duties, rather than accept a position as a domestic where she would have a comfortable home, good health, and become properly fitted for the duties of a wife *and mother*.

The spiritual advance made by man is seen chiefly in this, that so much of the money he earns goes to the ministry of refinement, education, embellishment, to the wife and children he loves. But the woman sees no money for her toil. Her sufficient, her ample reward is in a husband, content, happy, growing in grace; in children, bounding to gracious maturity.

There is just as much reason that a man should work within the house as there is that a woman should work outside the house. He is just as well qualified to work indoors as she is to work outdoors. It is just as much his duty to do the one as it is her duty to do the other. But it seldom or never occurs to his wife to ask him to do it, or to think that he *ought* to do it.

• • •

Dandies and fops are like a body without a soul, powder without ball, lightning without thunderbolt. It is a dress on a doll, paint on sand. There is much of this in the world. We see it in respect to everything considered valuable. The counterfeiter gives the show of gold to his base coin, and show the value to his lying bank note. The thief hangs out the show of honesty on his face, and the liar is thunderstruck if any one suspects him of equivocation. The bankrupt carries about him the insignia of wealth. The fop puts on the masquerade of dignity and importance and the poor belle, whose mother washes to buy her plumes, outshines the peeress of the court.

• • •

### WHERE DID YOU GET THAT RING?

With what an elaborate argument, perhaps spiced with some temper, the youngling tries to reverse the opinion of the oldling. The sprinkle of gray on the maternal forehead is rather an indication to the recent graduate of the female seminary that the circumstances of to-day or to-night are fully appreciated. What a wise boarding school that would be if the mothers were the pupils and the daughters the teachers! How well the teens would chaperon the fifties! Then mothers do not amount to much anyhow. They are in the way and are always asking questions about postage marks of letters and asking, "Who is that Mary D?" and "Where did you get that ring, Flora?" and "Where did you get that ring, Myra?" For mothers have such unprecedented means of knowing everything. They say "it was a bird in the air" that told them. Alas, for that bird in the air! Will not someone lift his gun and shoot it? It would take whole libraries to hold the wisdom which the daughter knows more than her mother. "Why cannot I have this?" "Why cannot I do that?"

• • •

For marking linen, organdie and other wash goods from a pattern, use a little metal stiletto. Punch *through the perforation in paper pattern*, and by the time your tucks, seams, etc., are made the holes will have disappeared. One can mark both sides at once quickly and exactly.

Take a solution of sulphate of iron (green copperas) and wash the wood over with it two or three times. Let it dry and apply two or three coats of a strong solution of logwood. Wipe the wood *when* dry with a sponge and water and polish with linseed oil.

There is nothing better for darning from the corset, heaviest goods to the sheerest, finest lawns than ravellings of the same. After darning and pressing it can be done to be almost imperceptible, and nothing is better for hemming veils or very thin muslins. Where there is not *much strain on the hem*, use *short* needlefuls, and for darning table cloths and napkins save the threads when preparing to hem or hemstitch.

An old aunt gave me two handwoven sheets; how ancient I do not know. I took them, split them in the centre, knitted broad edging and hung them as drapery curtains in a bedroom. Looped back with ribbons they gave a *handsome* effect and wore for years.

Put four tin coffee cans in the bottom of a wash boiler and lay a couple of sticks across and fill the boiler with water three inches from the bottom. Place the pillow on the sticks, cover boiler and let steam for an hour. Hang up where they will get the wind and sun to dry. They will be as light and fresh smelling as when new.

When one has something in the oven, and wishes to go about other work, just set the alarm clock and wind it a little, so it will ring at the time you want to look in the oven. In this way you will have no care and are sure of not spoiling the food.

When you place irons on the stove to heat, put a brick over the fire. The brick is used as an iron stand. It will save many trips to the stove and back; being hot it keeps the irons warm much longer than a common stand. As each fresh iron is placed on the brick, it renews its heat.

Feather pillows without geese can be made by saving the feathers when you dress your chickens. When you have enough to make your pillow, put in a cloth flour sack, place in water and boil thoroughly; take out *and rinse until* the water is left clear. When these feathers are dry they are as nice as goose feathers.

Heat a small piece of butter until melted. Drop into the ear from medicine dropper. It will give quick relief from earache, and is always at hand.

In case of sudden croup, heat a little vinegar in a plate, wring out a piece of flannel in it and bind quickly around the throat. The smell and heat seem to penetrate at once.

On the back of the pantry door keep a blank book and a lead pencil suspended. Here one can *jot* down items for the shopping list or easily forgotten small duties, and it will save much time and worry. Also keep a blank recipe book and a small box in the pantry for copying recipes or holding those cut from the daily papers.

Water receptacle for ice chest: Make of galvanized iron to set under chest protruding at one end about six inches, which is covered with a tin cover hinged at end to open from chest. When water reaches box it will lift cover to show that water should be removed, otherwise it would run over.

To make spring medicine: Take three tablespoons of powdered sulphur, one tablespoon of cream of tartar, then add molasses and stir it until a thin syrup. For three mornings take a tablespoonful, then leave off three mornings, for nine days.

*To make silk* that has been washed look like new, put a teaspoon of ing water and iron while damp.

## SERMON FROM SHAKESPEARE

SERMON FROM SHAKESPEARE
(Copr. 1909 by Bradley-Garretson Co. Ltd.)

*Keep thy pen from lender's books.*
—*King Lear, Act III., Sc.* D.

Since Shakespeare's time business has become so complicated that it is almost impossible for men of enterprise to keep their pens from lenders' books. But for the banks and the loan companies business and industry would be greatly retarded. However, in a general way, the advice is as sound as it was in the early part of th seventeenth century. The man of business who can build his own factory, extend it and buy his goods for cash, has an immense advantage over one who is continually dependent on *borrowed capital*. The latter is usually little more than the employee of a moneyed institution. He struggles and toils, and wonders why he does not get ahead. His business is successful; he turns out fine goods and finds a ready market; a fair profit is made, but instead of going into his own pocket, the bulk of it goes to the money-lenders.

Shakespeare was not however thinking of business loans when he caused Edgar in King Lear to say, "Keep they pen from lenders' books." He had in mind the ordinary borrower who borrows for immediate personal needs. This style of borrowing is dangerous. The habit grows. It is particularly prevalent among people of imagination. Micawbers still abound. They do not like work and are blest with imaginations that lead them to believe that Fortune will soon smile on them. They borrow to supply their wants, confident, although past experience teaches them otherwise, that they will be able to meet their obligations. Fortune, with rare exceptions, smiles only on industry, and the borrower is usually not industrious. As Polonius said to his son Laertes, "Borrowing dulls the edge of husbandry."

The worst feature about borrowing is that the borrowers usually select their friends as victims. The lender is in a difficult position. If he refuse to make the loan he may lose his friend; if he *make it*, the same fate may await him. A debtor usually avoids his creditor, and it is not in human nature to feel kindly towards a man who deliberately accepts a favor and puts forth no effort to repay it. It is only too true that, "Loan oft loses both itself and friend."

Debt is a serious matter. It is truly spoken of as a load, a burden. The deliberate borrower is continually adding to his load. He is not a free man. By incurring debt he places himself in the power of another. Sir Edward Coke, who was a contemporary of Shakespeare, said, "A man's house is his castle." This is not true if the man is a debtor. Gates and doors can be forced open by the creditor. If he be unable to meet his indebtedness when it is due a man cannot call even his house his own.

The warning against borrowing is a very old one, much older than Shakespeare's time. Shakespeare has *merely presented* it in a new and striking form. In the Book of Proverbs it is given in no uncertain manner: "The rich ruleth over the poor, and the borrower is servant to the lender." There was a time, and of comparatively recent date, when the borrowers in many cases actually became the slaves of the lenders.

Habitual borrowers are usually most unreliable individuals. They are lacking in honor. They seek to live off the fruits of the labor of others. Through the generosity of kindly-disposed friends they manage to keep their purses replenished, but the money has come to them without effort and it goes just as easily. The habit of borrowing frequently breeds the habit of *squandering*. Old Sir John Falstaff was a typical borrower and an inveterate squanderer. A man of his stamp could "get no remedy against this consumption of the purse; borrowing, only lingers and lingers it out, but the disease is incurable." Incurable to men of the Falstaff stamp, parasites on society; curable to men who put forth effort. Work and thrift will cure "consumption of the purse" and "keep thy pen from lenders' books."

Shakespeare builded better than he knew when he wrote the "Merchant of Venice." Without intending to do so, he has, in that familiar drama, discoursed wisely on the evils of borrowing. Whatever tragedy there is in it is due to easy-going, selfish Bassanio, who got the name of his friend Antonio on Shylock's books. Even to oblige a friend it is dangerous to mortgage the future.

Borrowing often leads to greater evils. At first the borrower may conscientiously intend to pay back, but as he gets deeper and deeper into debt he continues to borrow when he sees no reasonable possibility of ever meeting his obligations. His borrowing is then practically theft. He obtains money from friends under false pretences, thus adding to the sin of theft that of lying. The footpad who holds up the traveller on the highway is, if not an honester man, a nobler one. He is guilty of theft, but, to accomplish his purpose, he runs the risk of life or liberty. The borrower risks little or nothing, by the practice of borrowing undermines his worst character.

That tired feeling will disappear and you will be able to eat well and sleep well by using Miller's Compound Iron Pills. Wm. Madill druggist.

## When You Feel Played Out

There comes a time when your grip on things weakens. Your nerves are unstrung, the vital forces low, the stomach is weak and the blood impoverished. You feel old age creeping over you. Be careful of yourself. Take

**BEECHAM'S PILLS**

at once; there is no time to renew the life forces. Weak nerves, wearied brain, sick stomach, feeble blood, torpid liver, sluggish bowels—all feel the quickening effects of Beecham's Pills. Their use makes all the difference. The tonic action of these pills upon the vital organs is immediate, thorough and lasting. They are Nature's own remedy

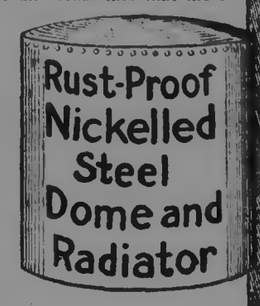
*For Run-down Conditions*

Prepared only by Thomas Beecham, St. Helens, Lancashire, England. Sold by all Druggists in Canada and U. S. America. In boxes 25 cents.

## How does your furnace stand the summer?

**That's the real test for durability**

When your furnace is not in use, the cool, damp air in the cellar, coming into contact with the steel or iron dome and radiator, causes the metal to "sweat." This "sweat," or moisture, attacks the metal and quickly makes it rust. It's an actual fact that most furnaces would give TWICE as many years of service if they did not have their long summer vacations but were in use continually.



However, the Sunshine furnace is now equipped with a Nickelled Steel Dome and Radiator. Nickelled Steel is an exclusive McClary invention. It has been subjected to the most severe tests and has demonstrated it is absolutely rust-proof. It does not gather rust during the "idle" summer. The Sunshine is built to give you lasting service.

You pay no more for the durable Sunhine than for an ordinary furnace. Besides, the Sunshine is *guaranteed* by us. Phone or call on our agent in your locality and get further interesting information. 68

*ForSale by Adamson & Dobbin.*

## Helps for the Afflicted.

Largest, oldest and most reliable manufacturers in Canada.

Specialists in manufacturing 21 different kinds of Trusses, suitable from Baby to Aged Person. Care taken to suit conditions as well as retain the rupture, etc.

The largest stock of Crutches and Rubber Ends in Canada.

Makers Elastic Stockings and Abdominal Supports.

Deformity apparatus of all kinds for correcting Bow-Leg, Knock-Knee, Weak-Ankles, Hip and Spinal troubles.

*Nearly 50 years practical experience as manufacturers and fitters has made us efficient in our line.*

**AUTHORS & COX,** 135 Church Street, Toronto.

## MOIR'S

Every discerning young lady prefers *Moir's Chocolates*. Their tempting freshness—alluringly toothsome centres—rich, satiny coatings—make them quite the finest bonbons you could present to your "sweetheart," mother, wife or sister.

MOIR'S, Limited

# Peerless Peninsular

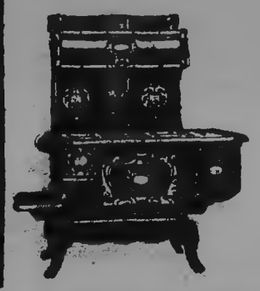
## Is Honest All Through— In Little Things As Well As Big

For example, let us take the OVEN.

The oven bottom of all sizes is 20 inches deep. This is the actual depth of the oven floor, the part of the oven that is of the most value to you. We do not include an inch or two in the bottom of the oven door.

Measure the oven bottom of other ranges—especially those with swing doors—and see if the ovens come up to this specification

"Peerless Peninsular" is a big, honestly built range—full size—with all the new conveniences of the most expensive steel ranges—and with the durability of cast-iron which is superior to steel in lasting qualities.



"HARMONY", "CONSTANT" and "ADANAC" have the same quality, workmanship and construction as the "Peerless", the difference is only in the outer appearance.

Let us show you all four styles—or write for illustrated booklet. 111

CLARE BROS. & CO., LIMITED, - PRESTON, Ont.

ADAM HALL & SON, Peterborough, Ont.—Agents.

# MR. WICKLUM IS VERY STRIKING EXAMPLE OF A SELF-MADE MAN

From Farm and Dairy.

In New Ontario there are many successful men. Perhaps a more striking example of a self-made man, who has persevered through hardships, sometimes privation, cannot be found in the province than Mr. Ed. Wicklum. At present Mr. Wicklum is farming near Charlton and has a beautiful farm with good buildings and stock.

Something over six feet in height and upwards of 200 lbs. in weight with square shoulders and flat shoulder blades, he is the picture of health and strength. Behind these, even the casual observer, can read courage, energy and perseverance as the prominent characteristics of a pleasant optimistic disposition.

Mr. Wicklum's career in New Ontario is remarkable in so much that when he came to the country he had not a cent and now after a residence of eight years is worth 10 or 12 thousand dollars. However that fact in itself is not enough. We must know that he made every cent of it in hard work. That he did not go into mining and "strike it rich" as the people of the north say, like many, perhaps most of the wealthy men in Northern Ontario.

I had always followed the bush for a living," Mr. Wicklum began, after we had done justice to a meal, such as only farmer's good wives ever learn to prepare. "In the winter of 1901 I was laid up for some time with a bad foot and in the spring decided to start out in search of something better. At the time I had just $175 in the world and of that I left my wife $100 and took $75. When I left my home in Centre Simcoe I did not know where I was going but was satisfied that I would find something better or not return.

"I took the boat at the foot of Lake Temiskaming. There were several others on board going into New Ontario in search of a home. As it was early in the spring the ice was still in the Lake above the Old Mission, about 20 miles from New Liskeard. The boat could go no farther and we had to go back or walk the 20 miles to the head of the lake. I was the only one to leave the boat. The rest returned to the foot of the Lake. With my pack on my shoulder and only a small lunch and whatever animals I could shoot to live on, I tramped through the bush for six days, finally arriving at New Liskeard.

Sleeping outside so early in the spring brought back the rheumatism and I was again laid up for a few days. The accommodation was bad and the cost great. I spent a short time in looking around and then located a place north-east of the town but found out soon after that it was of no value and had it cancelled. I then followed the road to Milberta and came on through the bush to this place, 30 miles from New Liskeard.

WITHOUT A CENT

"By this time I had not a cent left. I could not buy a postage stamp and when my stuff came later I had to borrow $1.50 to pay the freight. I got work on the road. I would work on my house in the morning before seven and in the evening after six. By the time my wife came a month later the house was ready. We had no bedding as our 900 lbs. of goods had not arrived so I paid 85 cents for a flake of hay and a good neighbor loaned us a quilt. For three weeks we had only the hay and one quilt for a bed.

"Our first house was in Milberta but at odd times I would come in here and chop on my own place. At that time and until two years later there was only a trail through the bush and I had to carry my living on my back 18 miles.

"In October of that year I took the typhoid fever and for six weeks lay on the broad of my back. However, we got through the winter. In the spring I purchased a team. I could only afford to pay $25 down but paid the balance in instalments. With the team I worked clearing the townsite of Milberta.

A HARD STRUGGLE

"We continued this way for two years, living, but never knowing for how long. Starvation dogged our every footstep, but we were all neighbors and those who had gave of their living to those who had not. In 1904 we moved to our farm. All around here for miles and miles was a dense forest. There were no roads just trails through the bush. The road from Milberta could be travelled with a horse in winter but usually there were paths or merely a blaze on the trees.

"The first few nights we spent in an old shack on the road. Our bed we made from our potatoes that had been brought in during the winter. But as the snow melted, the water rose in the shack, forcing us to move. We had started work on our house but it was without a roof. However we slept in it before the chinks were filled or there was a single board as a roof In a few days we got the house in better shape and in the summer finished it.

THE END OF HARDSHIP

Here an expressive smile spread across Mr. Wicklum's face and his wife sitting near also smiled. Evidently the thought of finishing that house brings to them pleasant memories of a life of hardship and privation finished, for Mr. Wicklum continued: "With the finishing of that house our hardship was practically at an end.

"From then on we have suffered no real hardship of any kind. Of course we have worked hard but work is never a hardship. Little by little we became better off. First our buildings were small but as we got more land under cultivation the revenue became larger. In order to make ends meet I was compelled to work on the road and at other jobs but put as much time as possible on my farm."

THE FRUITS OF MUCH LABOR

To-day Mr. Wicklum is reaping the fruits of his labor. His log house was replaced last year by a new and modern one. It is well equipped, has telephone connection to Englehart, is large and comfortable. He put up a new barn a year ago, 40 x 60 feet with 20 foot posts. Two years ago he erected a sawmill at a cost of $2,245 and when seen by Farm and Dairy had 450,000 feet of lumber awaiting shipment, all of which was taken off his own 160 acres.

At the present he has 20 acres under crop and 70 chopped and burned which he expects to have logged this year and under grain next. He grows no hay—oats, wheat and peas, with an acre of vegetables constitute his crop. This year he put out 20 fruit trees.

A WEALTHY MAN TO-DAY

He has five horses, 18 head of cattle and nine pigs, besides poultry. Five of his cattle are pure bred Herefords which he purchased at the Toronto Exhibition in 1908 from the late John Govenlock, of Forest.

The success that Mr. Wicklum has made of farming in the Great Clay Belt stands out a striking example of what courage and a determination to win can do in Temiskaming. "To-day I am the richest that I have ever been and also the poorest because when I make a dollar I put it back on my place. But I feel satisfied that I could sell out and show in cash a sum considerably over $1,000 for every year I have been in this country."

Eight years ago not able to post a letter and to-day worth $10,000 or more is in short the story of Mr. Wicklum's life in New Ontario. He has triumphed over difficulties and discouragements and has made of himself a farmer that not only Temiskaming but the whole of Canada may well feel proud.—COLIN W. LEES.

DIARRHOEA, DYSENTERY, COLIC, STOMACH CRAMPS, CHOLERA MORBUS, CHOLERA INFANTUM, SEASICKNESS, SUMMER COMPLAINT, and all LOOSENESS OF THE BOWELS

MAY BE RAPIDLY AND EFFECTUALLY CURED BY THE USE OF

DR. FOWLER'S EXTRACT OF WILD STRAWBERRY

The medicine with a record of thirty attending over 60 years. You don't experiment when you buy it.

Mr. J. Chapelle, Glenboro, Alta, writes:—"While living in England I suffered with acute stomach trouble, colic, diarrhoea, etc., I took various medicines and had a doctor attend me for several weeks but found no relief. I suffered terrible pain and was gradually getting weaker. In 1903 I came to Canada and suffered with Summer Complaint. I was recommended to take Dr. Fowler's Extract Of Wild Strawberry so I bought a bottle (not had no faith in it) and it completely cured me. I have used it constantly in the house and can speedily always cure me."

PRICE - - 35 CENTS

Manufactured only by The T. MILBURN CO., Limited, Toronto, Ont.

# A QUESTION ANSWERED

From Farm and Dairy.

What size silo would one require on a farm of 200 acres, one large one, or two small ones, when pasture fails in dry summers and corn can be grown successfully? What number of cows could be kept? Would some one who has had experience please reply.—C. H. M., Norfolk Co., Ont.

On a 200 acre farm where it was desired to carry as many dairy cows as possible but at the same time buy no meal or at most but small quantity of meal or grain a five year rotation would probably give best results. In case such a rotation were adopted there might be grown as much as 35 acres of corn and roots each year. To store such a crop would require two good large silos. One should be about 24 feet in diameter and 30 feet high; the other about 18 feet in diameter and the same height. The large one would be for winter use; the smaller for summer.

Provided fair soil and good drainage are the rule on the farm in question there should be no difficulty in keeping from 75 to 100 head of cattle on such a farm the year round. With good farming this number might be readily increased to 125 or thereabouts.—J.H.G.

# CULTIVATION OF THE RASPBERRY PATCH

From Farm and Dairy.

*S. E. Neville, Hants Co., N. S.*

By the time fall comes round, the raspberry patch will be quite bushy and in need of careful cultivation and pruning. To do this we first plow between the rows which cuts out all suckers and then cultivate with a one horse cultivator. All of the old canes which will not bear fruit again are carefully removed and burned. The whole plot is then given an application of barn yard manure. We prefer applying the manure in the fall, as it is then in condition to be used by the bushes the following spring.

Some growers prefer to mulch the whole plantation heavily with straw both on the rows and between the bushes. A plantation treated in this manner never receives any cultivation whatever. As suckers grow up between the rows, they are cut off with a sharp hoe. Every two or three years more straw will be added to the old mulch. Blackberries, thimbleberries and gooseberries can be treated in exactly the same manner. This method eliminates all the labor of cultivation and conserves the soil moisture to a greater extent than does the earth mulch. It is the best method where straw can be had very cheaply.

PHOSPHONOL THE Electric Restorer for Men

Restores every nerve in the body to its proper tension; restores vim and vitality. Premature decay and all sexual weakness averted at once. Phosphonol will make you a new man. Price $3.00 a box, or two for $5.00. Mailed to any address on receipt of price. The Scobell Drug Co., St. Catharines, Ont.

# SELECTING APPLE TREES

From Farm and Dairy.

*A. McNeill, Chief, Fruit Division, Ottawa.*

Much more care is exercised now than formerly in selecting varieties of apple trees, and fewer varieties are being planted. In those sections of Ontario suitable for winter apples, the Spy is perhaps the favorite. The Baldwin is again coming into fashion. The Greening is always in favor. The Ben Davis is being planted in many places where it should not be grown. Russets are not planted as much as formerly, but they are still being planted. The King is a favorite with some orchardists; the Blenheim Orange is growing in favor, and has been planted quite freely.

Southern Ontario is planting early apples very largely, and is gradually going out of the winter varieties. The change, of course, is taking place slowly, but, while the older orchards were nearly all largely of winter varieties with only a small orchard on each farm, the newer orchards of early apple trees are being planted in large numbers, and almost to the exclusion of the winter varieties.

Electric Restorer for Men restores every nerve in the body to its proper tension; restores vim and vitality. Premature decay and all sexual weakness averted at once. PHOSPHONOL will make you a new man. Price $3.00 a box, or two for $5.00. Mailed to any address. The Scobell Drug Co., St. Catharines, Ont.

# CRATE-FATTENING OF FOWLS

From Farm and Dairy.

*N. McMurchy, York Co., Ont.*

The first essential to success in crate fattening of fowls is to have well-bred birds of the utility type. A shaded spot out of doors is the ideal place to put the feeding crate during the warm weather. When put in the crates the cockerels should weigh two and a half to three pounds or over.

For the first three or four days feed very light until they get thoroughly accustomed to their rations and surroundings. Then gradually increase the amount of feed. Feed them all they will eat twice a day. If any feed is left in the troughs at night remove it. Give plenty of water and grit.

The feed which I have found best is finely ground oats. They are better with the hulls sifted out. Mix the oats with sour milk or buttermilk until thin enough to slide readily off a spoon. Meat of some kind or ground green bone should be given during the last week. The birds should be fed regularly and by the same person every time.

Cockerels of a good vigorous breed carefully fed in this way should double their weight in 21 days. That is as long as it is profitable to feed them. If the crates are located indoors, the room must be airy and well ventilated and have no drafts.

The most important point of all is to kill the lice on the birds at the start. They will not thrive when infested wth lice. Insect powder and sulphur, well rubbed in, is an effectual remedy. They should have a second dose about the tenth day.

# SUNDAY SCHOOL LESSON QUESTIONS

Sept. 4th, 1910.

(Copyright, 1910, by Rev. T. S. Linscott, D.D.)

Two Parables of Judgment, Matt. xxi., 23-46.

Golden Text—Therefore say I unto you, The kingdom of God shall be taken from you. Matt. xxi., 43.

Verse 33—Whom does the "householder" represent in this parable? Whom do the husbandmen represent?

What had God committed to the Jews, as a people, and what special things had he done for them?

What special responsibilities has God given to our nation? and to us as individuals? (This question might be answered in writing by members of the class.)

Verse 34—Can you give any case of God expecting, or demanding, fruit when He has not furnished the garden and the fruit trees?

What sort of fruit does God expect of us having regard to our responsibilities, and to what he has given us in the nature of seed?

From the suggestions of this parable, what kind of fruit did God expect of the Jewish nation?

Verses 35-36—What is the evidence that the Jews ever did anything to God's servants, corresponding to the statement in these two verses?

When God sent his prophets to the Jews, did he plan for them to be received or to be rejected?

Verses 37-39—What did God desire, and expect, of the Jews, when He sent Jesus to them with a message of love, in which were potential, political, and spiritual freedom?

What did the chief priests expect to accomplish when they caused Jesus to be crucified?

Verses 40-41—When God saw they had crucified Jesus was He pleased because his plans were carried out, or angry at them for thwarting His best plans? Give your reasons.

What is the evidence that God destroyed the Jews, their city, and their temple, because they rejected and slew His son?

In what way was the statement in the parable, "and will let out his vineyard unto other husbandmen," fulfilled?

If the Jews had accepted Jesus what would have been the probable result to them, and to the kingdom of God on the earth?

Verses 42-43—Here Jesus changes the figure from a vineyard to a building, what is the question, and where did Jesus quote from, concerning the stone which the builders rejected? (See Ps. 118, 22-23.)

According to the thought of Jesus, whom did the stone stand for which the builders rejected, and who were the builders?

Why did the builders reject this stone?

What is to-day the chief thought in theology, the chief inspiration in Christian poetry, the chief theme of the pulpit, the chief influence in character building, and the dominating influence in the church and the world?

Verse 44—What is the never failing result to individuals and nations who oppose Jesus Christ?

Verses 45-46—When the wickedness of the confirmed wicked is revealed to them by the faithful preacher, how do they generally feel toward him?

Lesson for Sunday, Sept. 11th, 1910—The King's Marriage Feast. Matt. xxii., 1-14.

OUR NEW ENGLISH CAR

Always buy a Toronto Gendron Canada

This dainty English car is just as perfect as the genius of the carriage industry can make it. It is practically trouble-proof and built to endure—built right here in Canada. The upholstering is Leatherette throughout and the body is adjustable to a bed or sitting position and finished in GENDRON Tan. There are lots of reasons why you should buy a Canadian-built Gendron—ask your dealer.

Sold by most first-class dealers. Write to us if your dealer doesn't carry them.

# Sore, Chafed Aching Feet

Made Well and Comfortable by the Soothing Effects of DR. CHASE'S OINTMENT.

What misery many endure from sore, chafed and aching feet.

Tightly imprisoned in the modern shoe the feet perspire and the skin is chafed and irritated until it is in anything but a healthful condition. Possibly you never thought of Dr. Chase's Ointment in this connection, but it brings wonderful relief and comfort almost instantly.

Powders are often worse than useless, because they clog the pores of the skin and prevent healthful action.

Dr. Chase's Ointment is so healing and soothing that it takes out the itching, burning, stinging sensations, and makes walking a pleasure.

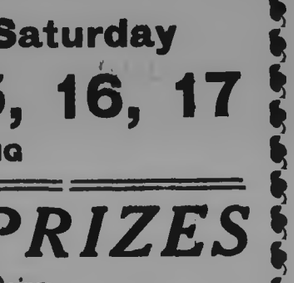
It keeps the skin soft and pliable and prevents the formation of corns and bunions.

The better you become acquainted with Dr. Chase's Ointment the more you will marvel at the scores of ways in which it can be used wherever there is itching of the skin or a sore or wound that refuses to heal.

For chafing, skin irritation, ivy poison, stings of insects, barbers' itch, chilblains, eczema, and itching piles, Dr. Chase's Ointment is the standard cure.

Try it when occasion arises and you will wonder how you ever got along without this great skin treatment. It brings relief quickly and is almost magical, as a healer of raw, inflamed skin.

Do not be satisfied with a substitute. If your dealer does not keep Dr. Chase's Ointment, write for a free sample box to Edmanson, Bates & Co., Toronto.



Manual labour taxes the strength of the human machine. The man who works appreciates to the fullest extent the recuperative qualities and purity of

## DANISH FARMERS ARE GREAT EXPORTERS

From Farm and Dairy.

Twenty-five years ago the Danish farmers were threatened with extinction by the producers of wheat in the United States, Russia and the Argentine Republic. At that juncture finding a good market in England for dairy products, they turned their attention to that industry, and to-day they export to Great Britain, $1,000,000 worth of butter a week, or $52,000,000 a year. The farmers in Denmark have also taken to hog raising, and are now the greatest exporters of bacon in Europe. They are also heavy shippers of eggs to the English market.

Mr. Morrison Davidson of England says:—"The soil of Denmark is naturally arid as compared with the rich meadowlands of England and the more fertile straths of Scotland. Moreover, the climate is inconstant and the winters are by no means short. But the Danes—they number some 2,500,000—are of an excellent breed, and their education as farmers is the best yet evolved in any country. The total number of farms is 250,000, with a cultivated area of over 10,000,000 acres. The land is thus divided:—

| Size of Farms. | Number of farms. | Acreage. |
|---|---|---|
| Less than 1¼ acres | 58,000 | 25,000 |
| From 1¼ to 13¾ acres | 55,000 | 450,000 |
| From 13¾ to 40 acres | 46,000 | 1,150,000 |
| From 40 to 150 acres | 61,000 | 5,900,000 |
| From 150 acres to 650 acres | 8,000 | 2,100,000 |
| More than 650 acres | 822 | 1,150,000 |

"Quite 89 per cent. of the cultivators own their holdings, and these in consequence control the State machine with an outlook on life almost exclusively agricultural. The Minister of Agriculture was a roof-thatcher, and four of the other Ministers were small farmers. Municipal Copenhagen, which is purely Socialist, looks grimly askance at the doings of the Parliament of Peasant Proprietors but must grin and bear it."

The Danes are great cooperative traders. The farmer does his own buying at wholesale. Through the purchasing societies he buys food for his cattle. Almost everything he consumes comes to him at cost. It is purchased by central agencies. The goods are then distributed to the stores, one of which is to be found in every village. Thus he gets his agricultural implements. Thus he buys his food and all his supplies. He saves the profits of the jobber and the retail dealer for himself.

## NEGLECT OF ONTARIO APPLE GROWERS

From Farm and Dairy.

Ontario apple growers are neglecting to meet the demands of their own home markets. During the second week of August, three car loads of Colorado apples were brought into Toronto and sold. This fruit was of best quality and was packed in boxes.

Apples, as good and better than can be grown elsewhere on the American continent, can be and are grown in Ontario. Why then should these foreign apples come in? Consumers will have what they want and because Ontario apples are not placed on the market in an attractive manner dealers find it profitable to bring in the quick-selling boxed apples. The best class of trade whether local, northwestern, or European know the box package to be the favorite with the consumer. They accordingly go after the boxed fruit.

British Columbia fruit growers owe the success of their apples in the western market largely to the attractive appearance of the fruit they have marketed there, well packed in bushel boxes. Buyers from the Old Country go all the way to the Western States in order that they may get a fancy grade of box packed apples. This fancy trade is worth while securing, and since fancy apples are grown in Ontario, why do the growers not pack more of them in boxes and capture their share of this trade?

## IMPROVEMENT IN CLASS OF STOCK IS VERY SLOW

From Farm and Dairy.

With the procession of years, there has come about an improvement in the class of stock kept on farms throughout this country. This improvement, however, has been most wastefully slow. With the exception of a very few individuals in certain localities, the service of some milestone away back must needs be engaged if one would note any real general progress that has been made.

Breeding societies have proved of much advantage in bringing about improvement in stock in various countries of the old land. Much might be gained through the organization of such societies in this country. But while waiting for outside assistance, the individual has it within his reach to bring about great progress so far as his own herds and flocks are concerned.

Individuals while at the larger shows have a grand opportunity of talking with breeders, learning of the merits of the various breeds and of deciding upon which will best suit home conditions. Decisions in a matter of this kind should not be made in a hurry. Once chosen, however, a breed should be carried through to the end unless some very special reason crops up to warrant a change.

Breeders go to the exhibitions not alone to show their stock. They are there to sell it or to sell their stock which is at home. Advantage should be taken of the privilege of meeting with these men, discussing questions concerning the business, and, perchance, securing stock, which will lay the foundation of a herd or improve the stock at home.

## HAS A SPLENDID DOG

From Farm and Dairy.

*E. Terrill, Northumberland Co., Ont*

My father would not have a dog around the farm; his prejudice in regard to dogs was due to the simple reason that he did not know the value of a good dog and had not been educated to the possibilities of a good working dog.

The dog that I now have, a photo of which is reproduced herewith, will go right to the pasture for the cows. He will never go ahead of them and as soon as the cows see him come into the field, they walk out promptly without any special hurry or worry. I am right with those who want a dog for their cows, especially when it comes to getting them out of the pasture on a wet morning.

My dog, as herewith shown, is made up of halves. He is a cross between a collie bitch and a hound. A dog of such a cross is doubly useful. He cannot be beaten in the north woods for the work of running deer and the hound blood does not seem to be any detriment to him for his usefulness on the farm. If anything, the hound nature enhances his value as a farm dog since he is constantly after woodchucks and squirrels.

The dog of hound-collie cross far outstrips the hound of pure breeding for hunting in the bush. The cross-bred will not take as long runs and will not use himself up and get footsore as will a pure bred hound. The cross-bred will be back to his master in the course of an hour; hence one can get three or four runs out of the dog each day. With the pure-bred hound, on the other hand, he never lets up, but goes on from lake to lake for days after his quarry. When the hunter finally gets such a dog back, it takes some days of nursing of the dog's feet to get him ready to run again.

# THE PILLAR OF LIGHT

Continued from Page 1.

if she made a good trip. Without allowing for any possible contingency, save disaster to the two girls and their escort, he rushed to the mooring-place of the 10-ton steam yacht, Lapwing, impounded a couple of lounging sailors, fired up, stoked, and steered the craft himself, and was off across the Bay in a quarter of the time that the owner of the Lapwing could have achieved the same result.

His amazement was complete when he encountered the redoubtable Daisy bowling home before a seventeen-knot breeze. He instantly came round and ranged up to speaking distance. When he learned what had occurred he readily agreed to return to Penzance in order to pick up the relief lighthouse-keepers, and thus save time in transferring them to the rock.

In a word, as Enid Trevillion was safe, he was delighted at the prospect of bringing her back that evening, when the real skipper of the Lapwing would probably have charge of his own boat. There was no hurry at all now.

If they left the harbour at three o'clock, there would still be plenty of light to reach the Gulf Rock. Ben Pollard, glancing over his shoulder as the Daisy raced towards Penzance side by side with the Lapwing, was not so sure of this. But the arrangement he had suggested was the best possible one, and he was only an old fishgerman who knew the coast, whereas Master Stanhope pinned his faith to the Nautical Almanac and the Rules.

The people most concerned knew nothing of these proceedings.

When Constance and Enid had solemnly decided on the menu for dinner, when they had inspected the kitchen and commended the cleanliness of the cook, Jackson, when they had washed the dishes and discovered the whereabouts of the "tea-things," they suddenly determined that it was much nicer aloft in the sky parlour than in these dim little rooms.

"I don't see why they don't have decent windows," said Enid. "Of course it blows hard here in a gale, but just look at that tiny ventilator, no bigger than a ship's port hole, with a double storm-shutter to secure it if you please, for all the world as if the sea rose so high!"

Constance took thought for a while. "I suppose the sea never does reach this height," she said.

Enid, in order to look out, had to thrust her head and shoulders through an aperture two feet square and three feet in depth. They were in the living-room at that moment—full seventy feet above the spring tide high-water mark. Sixty feet higher, the cornice of the gallery was given its graceful outer slope to shoot the climbing wave-crests of an Atlantic gale away from the lantern. The girls could not realize this stupendous fact. Brand had never told them. He wished them to sleep peacefully on stormy nights when he was away from home. They laughed now at the fanciful notion that the sea could ever so much as toss its spray at the window of the living-room.

They passed into the narrow stairway. Their voices and footsteps sounded hollow. It was to the floor beneath that Bates had fallen.

"I don't think I like living in a lighthouse," cried Enid. "It gives one the creeps."

"Surely, there are neither ghosts nor ghouls here," said Constance. "It is modern, scientific, utilitarian in every atom of its solid granite."

But Enid was silent as they climbed the deep stairs. Once she stopped and peeped into her father's bedroom.

"That is where they brought me when I first came to the rock," she whispered. "It used to be Mr. Jones' room. I remember dad saying so."

Constance, on whose shoulders the reassuring cloak of science hung somewhat loosely, placed her arm around her sister's waist in a sudden access of tenderness.

"You have improved in appearance since then, Enid," she said.

"What a wizened little chip I must have looked. I wonder who I am."

"I know who you soon will be if you don't take care."

Enid blushed prettily. She glanced at herself in a small mirror on the wall. Trust a woman to find a mirror in any apartment.

"I suppose Jack will ask me to marry him," she mused.

"And what will you reply?"

The girl's lips parted. Her eyes shone for an instant. Then she buried her face against her sister's bosom.

"O, Connie," she wailed, "I shall hate to leave you and dad. Why hasn't Jack got a brother as nice as himself."

Whereupon Constance laughed loud and long.

The relief was grateful to both. Enid's idea of a happy solution of the domestic difficulty appealed to their easily stirred sense of humour.

"Never mind, dear," gasped Constance at last. "You shall marry your Jack and invite all the nice men to dinner. Good gracious! I will have the pick of the navy. Perhaps the Admiral may be a widower."

With flushed faces they reached the region of light. Brand was writing at a small desk in the service-room.

"Something seems to have amused you," he said. "I have heard weird peals ascending from the depths."

"Connie is going to splice the admiral," explained Enid.

"What admiral?"

"Any old admiral."

"Indeed, I will not take any old admiral," protested the elder.

"Then you had better take him when he is a lieutenant," said Brand.

This offered too good an opening to be refused.

"Enid has already secured the lieutenant," she murmured, with a swift glance at the other.

Brand looked up quizzically.

"Dear me," he cried, "if my congratulations are not belated—"

Enid was blushing again. She threw her arms about his neck.

"Don't believe her, dad," she said. "She's jealous."

Constance saw a book lying on the table: "Regulations for the Lighthouse Service." She opened it. Brand stroked Enid's hair gently, and resumed the writing of his daily journal.

"The Elder Brethren!" whispered Constance. "Do they wear long, white beards?"

"And carry wands?" added the recovered Enid.

"And dress in velvet cloaks and buckled shoes"

"And—"

"And say 'Boo' to naughty little girls who won't let me complete my diary," shouted Brand. "Be off, both of you. Keep a lookout for the next ten minutes. If you see any signals from the mainland, or catch sight of the Lancelot, call me."

They climbed to the trimming stage of the lantern, which was level with the external gallery. Obedient to instructions, they searched the Land's End and the wide reach of Mount's Bay beyond Carn du. Save a scudding sail or two beating in from the Lizard and a couple of big steamers hurrying from the East—one a Transatlantic Transport liner from London—there was nothing visible. In the far distance the sea looked smooth enough, though they needed no explantation of the reality when they saw the irregular white patches glistening against the hull of a Penzance fishing-smack.

"O, Connie, the reef!" said Enid, suddenly, in a low voice.

They glanced at the turbid retreat of the tide over the submerged rocks. The sea was heavier, the noise louder, now that they listened to it, than when they arrived in the Daisy, little more than an hour earlier. Some giant force seemed to be wrestling there, raging against its bonds, striving feverishly to tear, rend, utterly destroy its invisible fetters. Sometimes, after an unusually impetuous surge, a dark shape, trailing witch-tresses of weed, showed for an instant in the pit of the cauldron. Then a mad whirl of water would pounce on it with a fearsome spring, and the fang of rock would be smothered ten feet deep.

For some reason they did not talk. They were fascinated by the power, the grandeur, the untamed energy of the spectacle. The voice of the reef held them spell-bound. They listened mutely.

Beneath, Brand wrote, with scholarly ease:

"Therefore I decided that it would best serve the interests of the Board if I sent Bates and Jackson to Penzance in the boat in which my daughters—" he paused an instant and added an "s" to the word—"fortunately happened to visit me. As I would be alone on the rock, and the two girls might be helpful until the relief came, I retained them."

He glanced at the weather-glass in front of him and made a note:

"Barometer falling. Temperature higher."

In another book he entered the exact records. A column headed "Wind direction and force," caused him to look up at the wind vane. He whistled softly.

"S. W." he wrote ,and after a second's thought inserted the figure 6. The sailor's scale, ye landsmen, differs from yours. What you term a gale at sea he joyfully hails as a fresh breeze. No. 6 is a point above this limit, when a well-conditioned clipper ship can carry signal reef and top-gallant sails, in chase full and by.

No. 12 is a hurricane. "Bare poles" says the scale.

Slowly mounting the iron ladder, he stood beside the silent watchers. The Bay was nearly deserted. No sturdy tug-boat was pouring smoke from her funnel and staggering towards the rock. Northwest and west the darkness was spreading and lowering.

He did not trouble to examine the reef. Its signs and tokens were too familiar to him. Its definite bellow or muttered threat was part of the prevailing influence of the hour or day. He had heard its voice too often to find an omen in it now.

"This time I must congratulate both of you," he said quietly.

"On what?" they cried in unison, shrill with unacknowledged excitement.

"Ladies seldom, if ever, pass a night on a rock lighthouse. You will have that rare privilege."

Enid clapped her hands.

"I am delighted," she exclaimed.

"Will there be a storm, father?" asked Constance.

"I think so. At any rate, only a miracle will enable the tug to reach us before to-morrow, and miracles are not frequent occurrences at sea."

"I know of one," was Enid's comment, with great seriousness for her. He read her thought.

"I was younger then," he smiled. "Now I am fifty, and the world has faded."

### CHAPTER V.

### THE HURRICANE.

They descended into the service-room.

"Let's see," said Enid; "it will be nineteen years on the 22nd of next June, since you found me floating serenely towards the Gulf Rock in a deserted boat?"

"Yes, if you insist on accuracy as to the date. I might cavil at your serenity."

"And I was 'estimated' as a year old then. Isn't it a weird thing that a year-old baby should be sent adrift on the Atlantic in an open boat and never a word of enquiry made subsequently as to her fate? I fear I could not have been of much account in those days."

"My dear child, I have always told you that the boat had been in collision during the fog which had prevailed for several days previously. Those who were caring for you were probably knocked overboard and drowned."

"Lost alone! Utterly alone! That is the strangeness of it. I must be an American. Americans start out to hustle for themselves early in life, don't they?"

"Certainly, in that respect you might claim the record."

Brand had not told her all the facts of that memorable June morning. Why should he? They were not pleasant memories to him. Why number her also with them? For the rest, he had drawn up and read to her, long ago, a carefully compiled account of her rescue and the steps taken to discover her identity.

"I entered on an active and useful career with no such halo of glory" broke in Constance. "I am just plain English, born in Brighton, of parents not poor but respectable. Mother died a year after my birth, didn't she dad?"

"You were thirteen months old when we lost her" he answered, bending over the clock-work attachment of the fog bell to wipe off an invisible speck of dust. Since his first term of service on the rock the light had changed from an occulting to a fixed one.

"She is buried there, isn't she," the girl went on. "How strange that, amidst our many journeyings, we have never visited Brighton."

"If I were able to take you to her grave-side, I would not do it," said Brand. "I do not encourage morbid sentiments, even of that perfectly natural kind. Your mother, to you, Constance, is like Enid's to her, a dear but visionary legend. In a degree, it is always so between loved ones lost and those who are left. Truth, honour, work, these are the highest ideals of the individual. They satisfy increasingly. Happy as I am in your companionship, you must not be vexed when I tell you that the most truly joyful moment of my life was conferred when my little friend here first responded accurately to external influences."

He laid his hand on an object resting on a table by itself. It looked like an aneroid barometer, but the others knew it was the marine auriscope to which he had devoted so many patient hours.

"Is it in working order now?" asked Constance instantly, and Enid came nearer. Together they examined the small dial. It was equipped with an arrow-headed pointer, and marked with the divisions of the compass but without the distinguishing letters.

These three understood each other exactly. By inadvertence, the conversation had touched on a topic concerning which Brand was always either vague or silent. Both girls were quick-witted enough to know that Constance's mother was never willingly alluded to either by the light-house Keeper or by the elderly Mrs. Sheppard, who looked after them in infancy, and was now the housekeeper of Laburnum Cottage.

Constance was annoyed. How could she have been so thoughtless as to cause her father a moment's suffering by bringing up painful reminiscences. But he helped her, being master of self.

He adjusted a switch in the instrument.

"I had no difficulty in constructing a diaphragm which would intercept all sounds," he said. "The struggle came when I wanted an agent, which would distinguish and register a particular set of sounds, no matter what additional din might be prevalent at the same time. My hopes were wrecked so often that I began to despair, until I chanced one day to read how the high-tension induction coil might be tuned to disregard electrical influences other than those issued at the same pitch. My anxiety, until I had procured and experimented with a properly constructed coil, was very trying, I assure you."

"I remember wondering what on earth it was," volunteered Enid. "It sounded like a mathematical snake."

"And I am sorry to say that even yet I am profoundly ignorant as to its true inwardness," smiled Constance.

"Yet, you girls delight in poets who bid you hearken to the music of the spheres. I suppose you will admit that the ear of, say, Ben Pollard, is not tuned to such a celestial harmony. However, I will explain my auriscope in a sentence. It only listens to and indicates the direction of foghorns, sirens, and ship's bells. A shrill steam whistle excites it, but the breaking of the seas aboard ship, the loud flapping of a propeller, the noise of the engines, of a gale, or all these in combination, leave it unmoved."

"I remember once, when we were going from Falmouth to Porthalla, in a fog, how dreadfully difficult it was to discover the whereabouts of another steamer we passed en route," said his daughter.

## TWENTY-ONE-YEAR FRANCHISE FOR THE MACHINE TELEPHONE COMPANY WILL IMPROVE THE SERVICE HERE

**Committee of Whole Council Unanimous in Granting Request---"Completion Has Been Good Thing for City," the Way the Aldermen Looked Upon It---Rural Lines Are to be Constructed Immediately.**

### COMPANY TO SPEND A LARGE AMOUNT HERE

The Canadian Machine Telephone Company was granted a twenty-one years' franchise to transact business in Peterborough by the unanimous vote of the committee of the whole council at a special sessio nlast night.

The company is to spend a very considerable amount of money at once in this city and in the surrounding country, extending its lines throughout the city and giving rural connections throughout the county. Great improvements will be made to the local service which as was announced in the Examiner some nights ago be placed at once upon a paying basis with the best possible service that the company can provide. One of the conditions of the agreement upon which the company secures the franchise is that free connections will be given between the city and all points within a ten mile radius.

Another—and this is most important condition is that after three years the city may at any time acquire the business from the company at the actual cost of the plant plus a suitable amount for the franchise or good will if the franchise has not run ten years. If however the company has had the franchise for more than ten years the city can purchase the business at actual cost on thirty days notice, without paying anything whatever for the franchise.

Mr. F. D. McKay waited upon the council last night in the interests of the Canadian Machine Telephone Company and asked that they be given a twenty-one year franchise, the same as had been granted them in Brantford. The old franchise given the company in 1904 expired in about three and one half years and in order to make the conditions for investment sure it was necessary to have a long franchise so that they could guarantee that they would not be interfered with. Mr. McKay pointed out that in Brantford they had been most successful in their operations and had eight or nine hundred telephones in use in the city itself with a large amount of rural line and connections with towns and villages of the district. They proposed to carry on operations on the same large scale in Peterborough and district and to spend a large sum of money here in improving the service. He pointed out the great growth there had been in independent lines and touched upon the benefits derived from competition. There would be a little change in the rates to be charged here. The company proposed to place in operation a tariff calling for $25 for business telephones ,$15 for residence phones and $6 for extensions. The only difference that the company asked between the agreement that the company asked for here and that carried in Brantford was that in the case of Brantford that free connections were given to all parts of the county. The conditions were different. Brant county is small and compact and Brantford is almost in the centre so that it was a simple matter to carry out the agreemen. Peterborough county on the other hand was much larger and to give free connections to the northern end of the county fifty miles abay would be impracticable.

Mr. McKay stated however, that his company would be willing to give free connections within a ten mile radius of the city and also stated that the company would avoid as much as possible the placing of poles upon the streets.

Ald. Bradburn remarked that there was no doubt as to the benefit of competition as had been proven by the entrance of the Machine Telephone Company into Peterborough. "We have had a better service than we ever had before or ever would have had," he remarked, "the Machine Company had not started business here."

Ald. Hicks agreed with this opinion that the improved service was coincident with the entrance of competition into the telephone business here and other aldermen advanced the same view.

City Solicitor Hall stated that he had read over the Lindsay and Brantford agreements and that they were satisfactory.

It was moved by Ald. Turned, seconded by Ald. Hicks that the City Solicitor be instructed to draft an agreement giving the Canadian Machine Telephone Company a twenty-one year franchise on the condition that they spend $10,000 in improving their service and give free connections with points within a ten mile radius of the city. The motion was carried unanimously.

## Reaching Out For Apples Woman Loses Balance And Falls 175 Feet

Examiner Special.

BUFFALO, Sept. 2.—While reaching out over the edge of the river bank after thorn apples at the rear of her home, 693 St. Paul Street, early last night, Mrs Marie Diamond, 29 years old, and a bride of but three months, lost her footing or her hold on the branches of the tree and plunged to instant death on the rocks in the river bed nearly 175 feet below.

Mrs. Diamond and her husband had finished supper at 7 o'clock and were seated on the rear doorstep of their home when the woman noticed the apples hanging out over the gorge, and said she wanted some. She climbed over a fence that separates the yard from the brink of the gorge and reached out after the fruit. She succeeded in gathering a quantity, and her husband went into the house to get a pan to put them in, when he heard her cry out

When the husband came out, not seeing her, he at first thought she had gone around the house or climbed back over the fence. As he approached the edge of the bank, he heard a boy in a boat on the river below calling to him that a woman had fallen from the bank. He notified the authorities, and an ambulance and patrol wagon were hurried to the scene.

When the members of the rescue party reached the bed of the river, they found the woman's mangled and lifeless body. The body was removed to the morgue, pending an investigation by Coroner Kleindienst.

## Y. M. C. A. Arranging A Membership Campaign

With just a little over two weeks in which to prepare for the big Membership campaign, the members of the Y M C A. are quite enthusiastic. There is a determination on the part of those who are leading in this movement to do what they have set out to do. Lists are being prepared of all the young men and boys in the city, and every one of these will be given an opportunity to become a member of the Y M C A. during the ten days following September 20th. There will be a membership banquet on the evening of the 20th, and there will be addresses of an inspirational nature, to give the men a good start off.

There was a meeting of the leaders last evening in the parlours of the Association, and the general plan of the campaign was outlined and the men agreed that there is no chance of failure.

The Peterborough Y.M.C.A. was never in better shape to take care of a large body of new members than it is at the present time. A visit to the building and a talk to one of the officers will convince the most skeptical of the truth of that statement.

**HE WAS PARALYZED**

Mr. William Brennag, Western Hill, St. Catharines, Ont., tells what it feels like to paralyzed. He lost power of speech, face was drawn out of shape, lost flesh, could not sleep. Five doctors failed to help him. Electricity proved ineffective. He used Dr. A. W. Chase's Nerve Food, until his former good health was restored. Face was restored to shape, power of speech returned, and he gained in weight. Says he would not return to former condition for all the gold in the country.

## DOINGS ON THE HOLIDAY

**Penman Games at Riverside Park Will Be the Big Local Feature —57th Regiment Goes to Omemee**

### EXCURSION TO LAKES

The chief feature of the holiday in Peterborough will be the Penman games, at Riverside Park. The big Y. M. C. A. meet will undoubtedly attract a very large crowd, as the best field of athletes ever seen here will take part.

The Toronto Y. M. C. A. men are coming in a special train. The meet is the only event of importance in the city on the holiday, as far as the general public is concerned. The Warkworth Cricket Club will visit Peterborough on Monday and will play a match game with the Peterborough Club at Nicholls' Oval, commencing at 10.30 a.m.

The 57th Regiment will spend the day at Omemee on the rifle ranges, a match having been arranged. The "Red Coats" will be accompanied by both bugle and brass bands.

Toronto Exhibition will, as usual, attract a very large crowd of Peterborough people, the exodus commencing to-night.

The Tecumseh-Toronto lacrosse game helps to swell the Toronto contingent.

The excursion up the lakes, under the auspices of the Sacred Heart T. A. S. will undoubtedly take a large number out o fthe city for the day.

## PLAN A BIG REVOLUTION

**To Overthrow British Rule in India —London Disturbed by a Despatch From Paris—Seditious Literature.**

### GUERILLA WARFARE

Examiner Special.

LONDON, ENG., SEPT. 3—Official circles are stirred over this morning's despatch from Paris telling of the discovery by detectives there of a widespread revolutionary plot to overthrow British dynasty in India. It seems that under the name "Madame Canna," bureaus in Paris, Geneva and Berlin have been operating for months sending out seditious literature and quietly circulating among Hindoos. "Let us fill ourselves with haughty spirit of our ancestors" says this revolutionary call," "and defend Dharma to death. Khali (British rule) shall die, and there shall be a new era for Hindustan."

The programme is to start a revolution by simultaneous guerilla warfare all over India to stop railways, cut telegraph wires and harass the British till they are glad to get out. With sixty million of Hindoos to help, says literature, the end should soon come.

## THE LAMP EXPLODED

**Prompt Arrival of Captain Thomas, of Fire Department, Averted a Conflagration When Children Upset Lamp.**

### BADLY FRIGHTENED

A fire was averted last night—one that might have proved serious had it not been extinguished in time, at the home of Mr. Lucas, Aylmer street. A coal oil lamp was accidentally knocked off a table by one of the children, which exploded. Captain Sam Thomas of the Fire Department happened to be passing by, noticed a blaze in the house and heard a baby crying. On investigation he found Mrs. Lucas, along with the children in the house. Immediately he set to work to extinguish the flames, which was soon done, causing but little damage to the floor. Mrs. Lucas received a bad fright.

### LEG AMPUTATED

Special Wire to The Examiner.

FREDERICTON, N.B. SEPT. 3. — Edward Logan of Gibson, Ont., had a leg amputated and may die as the result of the Toronto construction camps locomotive on the Transcontinental jumping the track near Mirimichi.

## HANDKERCHIEF WAS THE CAUSE OF YESTERDAY'S DOUBLE DROWNING BECAME CAUGHT IN A PULLEY

**Reason Why Rudder on Launch Refused to Work and Boat Went Into "Otonabee," Drowning Two People, Was Explained When the Launch Was Examined Yesterday After the Accident.**

### BODY OF LITTLE HAZEL LAING RECOVERED

A handkerchief was the cause of yesterday's tragedy.

A common, everyday handkerchief was responsible for the loss of the two lives.

The reason for the terrible disaster in which Mrs. Wm. E. Laing and her daughter Hazel were drowned was discovered yesterday afternoon when the launch in which they had been passengers was examined. A short investigation revealed the fact that a handkerchief had become wrapped up in a small pulley upon which the steering rope revolved, so that the rudder could not be turned. No further search was necessary. The failure of the steering gear to act was apparent. One of the party had evidently dropped the handkerchief and the action of the wheel had pulled it into the pulley, rendering the rudder useless.

The body of little Hazel Lang was recovered about 4 o'clock yesterday afternoon by her brother Roy and Wallace Armstrong. It was found close to the spot where the accident had occurred. The remains were brought to the city on the steamer "Otonabee," which had returned to the spot after bringing her passengers back to the city. A large number were engaged in the search for the body, some going down in launches, while the "Otonabee" in her return trip carried many searchers.

## WILL COST MORE THAN WAS THOUGHT

**It Wi lTake a Little Over $2,500 More Than Was Provided to Finish the Smith Street Bridge, and Council Are Embarrassed**

### HOW TO GET THE MONEY

The Board of Works of the City Council found themselves in an embarrassing position last night, when a report was read from City Engineer Hay to the effect that there would be an over-draft of $2,509.54 in the cost of completing the Smith street bridge. The appropriation for the whole work was $32,500, last night the Board was informed that the work was going to cost $35,009.54. The question was: "Where was the money to come from?

City Engineer Hay's report was as follows:

I beg to report that Messrs. E. and F. Conroy have completed their contract on Smith Street bridge, with the exception of the asphalt paint on top of the arches, which they are now putting on ,and the removal of the false work under the arches. According to instructions this false work wil not be removed until September 30th, which date will be sixty days after the last of the concrete was in place. The amount payable to the contractors will exceed the estimated amount of the contract by $1,876.32.

This is due to the increase in the amount of concrete in the foundation of the piers and abutments. In order to insure a good foundation the bottom was cleared of all loose material, down to the rock under the east abutment and two channel piers as well the east wing walls. The rock was found at a deeper level than anticipated, hence requiring a much greater amount of concrete, all of which is provided for in the schedule contract.

As arranged all work outside of the contract and to be done by the city, consisted of the old bridge, stone packing and gravel filling in the new bridge, hand rail, lamps, sidewalks, to complete the structure.

It was found necessary to remove the old bridge earlier than anticipated, and by arrangement with the contractors, they removed it in sections, as required, the total cost being $171.94.

There was also stone packing, which, by arrangement with contractors, was done by them, at a cost of $429.80.

Their amounts are reasonable and could not have been done less by the city.

I have now two carpenters setting up the hand rail, the balusters for which are already made, and a small gang filling in the West approach, to give access for material to be used in completion.

I submit a statement showing all charges and payments on account of bridge up to 37 report;

| | |
|---|---|
| Preliminary expenses (Legal | |
| Ad. Printing Co.) . . . . . | $ 806.86 |
| Paid contractors on acct. . . | 24266.66 |
| Wages for labour, inspection and testing cement . . . | 1016.94 |
| Supplies, hardware . . . . . | 100.66 |
| Outstanding accts., estim'd. | 50.00 |
| | $26,241.14 |

## To Go On Oiling Streets Although The Citizens Kick

**Rubidge Street Residents Complain of the Innovation but Aldermen Are Confident it Is a Good Thing and Refuse to Stop.**

### GEORGE STREET IS NEXT

At last night's meeting of the Board of Works a petition and letter was presented from Mr. E. B. Fowler and other ratepayers, complaining about the oiling of Rubidge street. The Board, however, took no action. They are unanimous in the opinion that the oiled street is the proper thoroughfare, and will go ahead with the work.

In fact, permission was given the Street Commissioner last night to oil George street if he thought fit and as he recommended the oiling of that section he will in all probability go right ahead with the work.

The letter in question was as follows:

Aug. 23rd, 1910.

Mr. R. Hicks, Chairman Board of Works, City--

Dear Sir,—I enclose herewith a petition against oil being used on Rubidge street between Charlotte and Sherbrooke streets., same being signed by every householder in the section above mentioned, with the exception of Mr. Keith and Mr. Watt, who are not at home, although a day or so ago these gentlemen expressed themselves to me personally as being very much opposed to this oil being used.

I need not add anything further, as the ground is fully covered in the petition and I trust that your committee will recognize same.

Thanking you on behalf of these ratepayers, I am,

Yours truly,
E. B. FOWLER.

A petition was enclosed.

### NOTHING IN IT

Examiner Special.

OTTAWA, SEPT. 3.—In an interview this morning Dr. Rutherford, of the Department of Agriculture, poohpoohed the idea of Buffalo and Rochester syndicates trying to corner all productions of cream in central and western Ontario. He said the Ontario farmers had the remedy in their own hands to build more factories and produce more cheese. However he thought the United States was the best customer for butter that Canad had.

## MONTREAL'S RECEPTION TO CARDINAL VANNUTELLI

Examiner Special.

MONTREAL, SEPT. 3.—Even more impressive than the reception at Quebec was that given to Cardinal Vannutelli, the Ambassador of the Pope and his distinguished retinue here this afternoon when his Eminence landed from the government steamer Lady Grey. After the ceremonies on landing a procession was formed and the high dignitaries of the church wended their way through lanes formed by crowds of cheering, though respectful people., After the address of welcome presented by Mayor Guerin, his Eminence replied, expressing gratitude for the enthusiastic welcome from all sides. Then the procession started up Beaver Hill and along Dorchester street to the residence of Archbishop Bruchesi, and all the while the bell of Notre Dame and all the hundreds of smaller bells chimed a welcome.

While the procession lost some of its brilliancy by the unexpected absence of military, the mounted police made up a strong escort, and it was noticed that many of the soldiers prohibited from parading, mingled in the crowd.

## Much Evidence Was Heard In Watch Stealing Case--Adjourned Till Tuesday

A case, which drew a large audience at the police court this morning was that of Joseph Reynolds, who is accused of stealing a gold watch from John Kelly of Hastings on Aug. 18th. Owing to the absence of a witness the case was adjourned until Tuesday, after a great deal of evidence was heard.

The first one to give evidence was the loser of the watch and he stated in part:

"I was drinking that night, and some one met me at the Montgomery House and I went away with him, where I could obtain a bed. I cannot say that the prisoner is the man. We walked to a barn and slept there, but in the morning my supposed friend had flown and my watch was missing. I can't tell you where the stable is."

To Mr. Gordon he gave minute details of his watch.

James Ward, one of the bartenders of the Montgomery House, gave evidence of the incident which took place at the hotel door. He said as follows:

"Kelly came to the door and William Montgomery told him that we had no room. As we were talking to him a man came along and offered to get Kelly a room. I know that the prisoner is the man. He wore a blue felt hat but the night was very dark."

William Montgomery and James Kimble both recognized the prisoner as the man seen with Kelly that night—the former thought he was the man, while the latter saw him through a window.

P. C. Newhall, who arrested Reynolds, testified to the following evidence made up of speeches, spoken by Reynolds in the presence of P. C's. McGinty and Newhall:

"I arrested Reynolds and he asked me why I did it. I told him I would tell him when he arrived at the police station. When told of the charge he replied: "I never had a watch." I asked him what he did with the watch he was showing on the English Church grounds?" and he said: "I lost it." When asked where the fob was he said: "It's at the house." He afterwards said: "I didn't have a watch since last winter." Concerning the fob, he said his girl gave it to him. Questioning him further, he said: "I am not going to answer any more for you." He jumped from his chair and made for the door of the office; I grabbed him and put him in the cell."

Cross examined by Mr. Gordon, the officer said:

"Policeman McGinty was present during the conversation, also when I grabbed him. I haven't spoken concerning the event to the Constable since it happened."

Fred Worboy, the last witness examined, told of having seen a watch on Reynolds. It was an open-faced one.

This concluded the case till Tuesday.

## The "Beehive" To Embark In The Millinery Business

With splendid equipped apartments a most capable milliner in charge, and one of the best stocks ever brought into Peterborough, the "Bee-Hive" store will embark into the millinery business, throwing open the apartment to the public on September 16th and 17th. Mr. T. C. Elliott the proprietor, has been successful in securing the services as head milliner of Miss Noble, one of the highe t priced, best known and successful milliners in the country. She brings with her to the "Bee-Hive" all her old staff so that her work will not be interfered with in the least through the handicap of new assistants. Miss Noble has been away for a month spending two weeks in New York and two weeks in Toronto and other Canadian centres, picking up all the latest ideas and securing a magnificent stock for her store. The result of her journey will be a revelation to feminine Peterborough when the opening takes place. The millinery parlours are situated on the second floor of the store and have been fitted out with no regard for cost but every consideration for good taste. As the establishment is fitted with a fine elevator of the plunger type—one that cannot possibly fall—shopping on the second or third floor is a scomfortable as on the ground floor.

The same shrewd and capable management which Mr. Elliott has devoted to the other departments of his business will be observed in the millinery branch and that it is assured of success seems certain. The date of the opening of thushrdalus that of the Peterborough Industrial Exhibition.

### EARLY NEXT WEEK.

The Horticultural Society seems to think, that summer is going to last all winter, judging by the deliberation they are exercising in bringing on the judging of lawns. But its indecise appears to have ended with the end of summer. It is understood that the judging will be done early next week by an expert horticulturalist brought from Toronto.

### LABOUR DAY.

Monday, Sept. 5th, the first Monday in the month, is Labour Day; a day set apart by the Parliament of the Dominion in honour of Labour. It is as easy, as it would be trite, to write of the nobility and dignity of labour; that is a truth, recognized by all who have sense enough to think. There is a common error in defining "labour." In many minds the labouring man is only associated with, manual toil, coarse, hard, bone-wearing work. But it is still the fact that no matter what a man's or woman's occupation, if its duties are met and its duties faithfully performed, it becomes work and hard work at that. A man sitting all day at a desk and wielding a tool no heavier than a pen, may go home at the end of the day as tired as any man who has toiled his ten hours in a trench. And more fatigued to—both in mind and body. The man of the trench goes home and going to be drops into dreamless restful sleep. The man of the desk, with his responsibility resting upon him often takes his work home with him, and, tossing upon a sleepless bed — the most wearying work of all— goes over the work of the day, with possible fear of some error made that will give him additional trouble on the morrow. The man of the trench leaves his responsibility in his trench; he has done his work and there being little chance for mistakes, he has nothing to trouble his slumbers. Truly, we all work, no matter what our calling, and we all have our share in Labour Day.

And Labour has never been in a better condition than now to consistently claim a holiday. For the past fifteen or twenty years Labour has had its innings and piled up a big score Work has been plentiful and wages good; and the thrifty working men in any sphere of labour has had a good harvest. Year after year, organized labour has asserted and obtained its claims to higher remuneration, till there has been an all round increase of wages. That this has been necessarily accomplished by advance in the price of living, there is no doubt, and there is no doubt that the standard of comfortable living has been raised. At no period in the history of Canada has labour been more plentiful and profitably employed, than at the present, and immediate past. Peterborough has had its share and perhaps no city in Canada can appropriate with better warrant the title, "the city of homes" than Peterborough. A very large proportion of our workingmen own their homes and are, in this respect, independent and happy.

### THE MIGHTY FALLEN.

The Party of Loyalty, par excellence is certainly deteriorating. In a recent issue its journalistic mouthpiece jeremiads the Governor-General and suggests that his retention is a useless expense and his existence in Canada a relic of the barbaric days of Toryism. The same article asserts that geographical destiny indicates the disintegration of the empire, the first step to be the absorption of Canada by the United States. On reading this Sir James Whitney, who has constituted himself the Atlas to sustain the empire on his broad shoulders, or take the empire under his wing, or any other figurative thing to indicate his condescension and patronage of a trifling thing like the British Empire, would squirm, as if his official chair were studded with pins, or maybe, he wouldn't squirm, being at the time out of the focus of the spot light. What is the party of loyalty coming to when, through its recognized mouthpiece it counsels disloyalty and commits lese majesty of our cherished British institutions. How are the mighty fallen!

### PERMANENT PAVEMENTS.

The informal visit of a few of our aldermen to Lindsay gave them new light upon the question of permanent pavement. They learned two things that may give us pause in the work of permanent pavement in Peterborough. The cost, in the present condition of our finances unless the citizens undertake to assume a considerable share of individual responsibility seems very like being prohibitory. About ten cents per square foot of street service, eats up money pretty rapidly, though it must be admitted that, the game played in Lindsay is well worth the candle. The permanent pavements laid and in process of laying there, seem to be satisfactory. A splendid and asserted durable driving surface is secured with perfect surface—drainage, whose lack in Peterborough on most of our streets has a disgracefully deteriorating effect.

Apart from the question of cost, Peterborough streets are in a state of unreadiness for permanent pavement. It is stated that George street car line is to be double tracked. That would obviously have to be done before even the idea of permanent pavement could be entertained. Then all sewer and water works service connections should be made to the line of building bench marks should be made, so that bench makrs should be made, so that if it should become necessary to disturb the pavement for underground work as to service repairs, the exact spot could be hit upon. The absence of reliable bench marks in some parts of the city in connection with the sewers has necessitated as excessive and discussive digging as a search for buried treasure.

Then the poles. In Lindsay, in the permanent pavement area under exploitation, the pole does not intervene. The poles are generally placed inside the sidewalk and out of the way, so far as street paving is concerned. It is obvious folly to contemplate permanently paving George and Charlotte streets while the pole nuisance remains. Yet in face of this the City Council last night gave an open (21 years) franchise to a telephone company to place poles in tl streets. The Examiner does not desire to place any obstruction in the way of the Machine Telephone Company. Nor does it wish to have the company place any surface obstructions on our streets. The company deserves the credit of establishing a precedent for undergrounding wires in the business section and it certainly would not have been unwise, in view of the nuisance street poles of all kinds constitute, to have provided that the central area of underground wiring should be somewhat extended, at any rate.

It will therefore be seen that several little adjustments are required before we can consistently enter upon the work of placing permanent pavement.

## STOMACH DISTRESS AND DYSPEPSIA GO

**Makes Your Out-of-Order Stomach Feel Fine in Five Minutes**

As there is often some one in your family who suffers an attack of Indigestion, why don't you keep some Diapepsin in the house handy?

This harmless blessing will digest anything you can eat without the slightest discomfort, and overcome a sour ,gassy Stomach five minutes after.

Tell your pharmacist to let you read the formula, plainly printed on these 50-cent cases of Pape's Diapepsin, then you will readily see why it makes Indigestion, Sour Stomach, Heartburn and other distress go in five minutes, and relieves at once such miseries as Belching of Gas, Eructations of sour, undigested food, Nausea, Headaches, Dizziness, Constipation and other Stomach disorders.

Some folks have tried so long to find relief from Indigestion and Dyspepsia or an out-of-order stomach with the common, every-day cures advertised that they have about made up their minds that they have something else wrong, or believe theirs is a case of Nervousness, Gastritis, Catarrh of the Stomach or Cancer.

This, no doubt, is a serious mistake. Your real trouble is, what you eat does not digest; instead, it ferments and sours, turns to acid, Gas and Stomach poison, which putrefy in the digestive tract and intestines, and, besides, poison the breath with nauseous odours.

A hearty appetite, with thorough digestion, and without the slightest discomfort or misery of the Stomach, is waiting for you as soon as you decide to try Pape's Diapepsin.

## BOY SCOUTS

The Boy Scouts paraded last night and patrol leaders were appointed. Three full patrols wer formed,

On Monday the Scouts are going out for the day—a march out. In the next issue of the Examiner a full account of the proceedings will be given.

### TIRED, ACHING FEET

How annoying to have the feet tired and aching, sore and chafed about the time you want to take a good long walk. You can get a world of comfort by using Dr. Chase's Ointment when the feet give you trouble. It heals and soothes the skin, makes it soft and natural and prevents corns and bunions.

## CITY FATHERS INSPECT THE LINDSAY PAVEMENT

**Hastily Arranged Auto Party Made Journey Yesterday and Saw the Work That Has Been Done---How It is Laid, What it Costs, etc.**

What the city fathers don't know about permanent paving should now make a volume of very small dimensions. They have made frequent excursions abroad to inspect asphalt and other forms of permanent pavement, now laid or in process of laying. Yesterday another excursion was made to Lindsay, which is showing considerable enterprise and courage in entering upon the work of supplying the town with permanent pavement.

The expedition of yesterday afternoon was hastily improvised. About 9.30 or 10 o'clock somebody suggested a semi-official trip to Lindsay to spy out the conditions of street-making now in process there. Three auto cars were placed at the disposal of the expeditionists. Mr. Alderman Gillespie was the avant courier of the party embarking in the city in his 20-horse-power Ford auto, driven by himself, and carrying besides himself Messrs R. Fair, W. E. Conway and a representative of the Examiner. Mr. Gillespie's personally conducted expedition was a fair type of the experience of the three parties. Leaving the city shortly before eleven o'clock, Mr. Gillespie made as good an auto run as he does an aldermanic run. The trip from Peterborough to Lindsay was a swift one. Mr. Gillespie reeled off the 28 miles of the journey in an hour and fifteen minutes over pretty bumpy roadways, leaving Peterborough and entering Lindsay, and over fairly good country roads as to surface but embracing a good many steep hills. The drive took the party through a splendid farming country in Smith and Emily townships, giving evidence of splendid crops having been reaped, and promise of a fruitful aftermath of clover now in its second bloom.

The next car to join the procession was that of Mayor Morrow, which was administered by himself, and contained besides himself, City Clerk Armstrong, Mr. W. H. Meredith and Mr. C. H. Clementi, city editor of the "Morgen Blatter."

The chariot of Alderman Hicks, under his personal direction, was the last to leave the city and naturally the last to arrive in the Sengog settlement. Besides Alderman Hicks, the quartette was composed of Alderman Bradben, Alderman Metheral and Mr. R. A. Morrow. The failure of this equipment to keep up with the procession bas due to a pair of wrecks—a tire retiring from active service on both the outward bound and homeward bound trips and taking time for readjustment.

ON THE GROUND

At Lindsay, the party was welcomed by Lindsay town officials and Mr. Bangham, representative of the Ontario Asphalt Block Paving Company, of Windsor, Ont., which is laying several blocks of pavement on William Street. The work was in such a condition as to afford the visitors an excellent idea of the process, one block being practically completed and ready for traffic, and another read: for the asphalt block, another receiving its concrete foundation, and another with the street excavated and crowned ready to receive the concrete.

HOW IT IS LAID

On this prepared surface excavated a suitable depth is placed a foundation of mild concrete—six parts of sand to one of cement. After this has set a coating half an inch thick is spread of stronger cement, one part cement to one and one-half of fine sand. This is very slightly damped so that it is in a sort of pulverized condition. On this the asphalt blocks are laid and water being applied the concrete sets and the blocks become practically continuous with the foundation the surface is later brushed in with concrete so as to fill interstices between the blocks as the work is finish-l.

It is to be explained that each side of the pavement is provided with a substantial concrete cribbing, flanged on the inner face by a cement water table or gutter, against which the asphalt blocks are snugly laid, permitting of perfect surface drainage conditions.

HOW IT LOOKS

The completed pavement presents a handsome appearance. The curbing permits of a handsome boulevard of either clear gravel in the business section or sward in the residence section.

The asphalt blocks are about 6 by 10 inches in area and 2½ inches thick They are composed of asphalt and a binding substance and a sort of sand composed of the tailings of a copper stamp mill these being claimed to be a large percentage of copper in the substance. The blocks rest firmly upon the concrete foundation and make an apparently ideal driving surface . They are not very hard, but are said to be durable and comparatively noiseless. It is claimed that in case of a block or any considerable area of blocks being injured or worn, they can be raised and replaced by a workman of ordinary skill, and the road restored to good condition, the foundation being practically everlasting.

The pavement laid in Lindsay or in process of laying is guaranteed by the contracting company for ten years, but it is asserted that its life is much longer.

HOW IT COSTS

On William Street the width of pavement between curbs is thirty-six feet and in the residence portion twenty-four feet. The cost of the pavement is $2.40 per square yard, which is equivalent in a pavement of 36 feet to $9.60 per running foot; add to this $1.04 the cost of the curbing and grading on two sides at 52 cents per lineal foot, we have a total cost of $10.64 per running foot of $56,179.20 per mile for a pavement having a roadway 36 feet wide. The total cost per running foot of the 24 foot pavement, similarly calculated, is $7.44 per running foot or $39,283.20 per mile. The cost, of course, increases in proportion to the increased width of the roadway or driving surface.

HOW IT IS PAID FOR

The pavement is paid for on the basis of a 50 per cent. division of cost—50 per cent. general tax and 50 per cent. local tax, debentures having a currency of twenty years.

HOW IT SUITS LINDSAY

The city council seems to be well pleased with its experiment, and it is said to be probable that other streets will petition to be placed in the permanent pavement area. The cost is rather stiff, but Alderman Kylie asserts that the permanent pavement with asphalt blocks will be the cheapest in the end. He claims that the foundation will never have to be renewed and that the blocks will give excellent service for a good many years and can be replaced at a very slight advance on the cost of the blocks themselves, which is a comparatively small part of the original total cost of the pavements.

## Acomia

**Many Men Have It and Most of Them Worry About It.**

ACOMIA it's a magic word what does it mean? Simply absence of hair.

A baldheaded man has ACOMIA—absence of hair.

A million more men will have ACOMIA a year from now if they do not get rid of disgusting dandruff.

Dandruff is caused by a germ. This germ is a persistent sort of germ. He works while you sleep and when you awake. He breakfasts, dines and sups on the vitality stored in the hair roots, and the longer you tolerate his presence the surer you are of displaying a shiney headpiece later on.

Kill the dandruff germ; that's the only way to keep from growing bald. Any capable doctor will tell you so.

How can you be sure that your are killing the dandruff germs? Simply by using daily for two weeks Parisian Sage, the most pleasant tonic for the hair the world has ever known.

Parisian Sage is the most pleasant and invigorating hair dressing in the world. It is not sticky or greasy. It wil make women's hair soft, silky and luxuriant in a few days. The girl with the auburn hair is on every bottle. Fifty cents a large bottle at druggists everywhere and at Wm. Medill's, who guarantees it. Mail orders filled, all charges prepaid, by the Canadian makers, Giroux Mfg. Co., Fort Erie, Ont.

## WORK BEING PUSHED

The Stewart, B.C., correspondent of the Grand Trunk Pacific Passenger Department reports that work at all the mines in the vicinity of Stewart is being vigorously pushed, and new strikes are being made in many of the properties. The Red Cliff Mine have let the contract for a large water power plant to supply power for their compressor, electric light and other objects. Lumber has been ordered for large ore bunkers to build as soon as possible. A new strike has been made on the Waterloo claim of the Red Cliff group, and from present indications it promises to be equally as large as their present wonderful showing. Values are of a higher character.

Portland Canal Mining Company have their aerial tram in operation, the concentrator as practically completed, and this mine will very shortly be shipping ore.

The Mann interests are being extensively developed and very rich ore bodies have been opened up on several of their bonded properties. This practically assures us that many of their obligations respecting bonds on mining properties will be taken up.

Business in general in the town of Stewart is exceptionally good. Building operations are going ahead at a very rapid rate, and two large additions to one of the leading hotels are being rushed to completion to supply the demand for accommodation.

The Portland Canal Lumber Co., Ltd., a subsidiary company of the Fraser River Mills, Vancouver, B.C., have started the erection of a large sawmill on the townsite of Stewart which will have a capacity of 50,000 feet per day.

**NORMAL SCHOOL BOARDING HOUSES**

**Householders who can furnish rooms and board for students should send their names and addresses to the Principal of the Normal School at as early a date as possible. The School re-opens Tuesday, 20th September.**

# An Old Ocean Mystery That Defies Solution

BANGOR, Me., Sept. 2.—The mystery of what became of the master and crew of the British barque Inverness-shire, which sailed from Hamburg on March 2 for Santa Rosalia, Cal., and was found at anchor and abandoned off the Falkland Islands, recalls vividly to nautical minds the late brig Mary Celeste, of New York, for nearly forty years the prize riddle of the sea. The Mary Celeste sailed from New York for Genoa with a cargo of petroleum and alcohol. She was [illegible]ed by Captain Benjamin S. Briggs, of Marion, Mass., with Albert G. Richardson, of Stockton, Me., as second mate and Edward William Head, New York; Volkert Lorenzer, Arien Harbens, B. Lorenzer, and Gottlieb Goodshood, all of Germany, as the crew. The captain's wife and small child were also on board her.

The brig was in first rate condition, well manned and well equipped in every way, and when she sailed from New York on November 7, 1872, the whole ship's company was happy and contented. Yet none of them was ever again seen, dead or alive. The brig was found on December 5 off the Azores, drifting aimlessly about in light winds, with her head sails set and all her other canvas down. There was nothing to show why she had been abandoned or what had become of her people. She was thus found by the brig Dei Gratia, from New York for the Mediterranean, and after a careful examination Captain Moorehouse, of the Dei Gratia put a prize crew on board and sent her into Gibraltar, where she arrived on December 13, 1872, and was turned over to the Admiralty Court. Her owners refused to pay the heavy salvage demanded and let the salvors take her.

Among the officers' effects which were sent home was the mate's dog, and this, with other articles, was returned to the father of the lost sailor, the late Theodore M. Richardson, of Stockton. One significant passage, the last written, appeared in the log: "Fanny, my dear wife."

Whether those words were written by the mate merely as an expression of affection while thinking of home, or in a moment of panic and despair when about to abandon the vessel, can only be conjectured. There was nothing else about the vessel to indicate the state of mind prevailing on board when she was abandoned. The date of this last entry in the mate's log was November 24. When ten days later she was boarded by men from the Dei Gratia, her stern boat was gone, and it appeared that some food, probably canned goods, had been taken from the locker.

Otherwise everything was in such ship shape that, but for the date of the last entry in the log, the Dei Gratia's men could have sworn that the vessel had been abandoned within an hour. Her running rigging was all properly made fast and the slack coiled neatly on deck or over the pins. The companionways were open, half turned music lay upon the rack of the little cabinet organ in the cabin, and children's toys were scattered upon the floor. In the captain's stateroom his gold watch hung at the head of his berth, and in his wife's room the impress of a child's head was distinct upon the pillow.

In the cook's galley the coppers were on the stove, and meat in process of preparation was on the table. In the forecastle the men had not disturbed their chests, no clothing was missing, and even money had been left behind. It was plain that the crew had left her very suddenly. That the boat was lowered away in a hurry and with some confusion was indicated by a broken davit.

In the thirty-eight years that have elapsed since the Mary Celeste was abandoned countless stories, all more or less fanciful, have been written about her, and numerous theories have been advanced in explanation of this greatest of sea riddles. Mutiny, disease and piracy have been suggested. In 1877 a story was circulated to the effect that Mate Richardson had been seen hiding in the West Indies, and that he and members of the crew had murdered the captain and stolen many thousands of dollars that the vessel was carrying. As a matter of fact, the Mary Celeste carried no money of any account.

As late as 1897 another yarn was published to the effect that a sailor, who claimed to have been the mate of the Dei Gratia, had made a death-bed confession in Iquique, saying that when he boarded the Mary Celeste he found that all hands, except Captain Briggs, his wife and the cook, had died of smallpox, and that he, Jacob Howell, the confessor, had thrown all three of the survivors overboard, taken $8,000 in gold that Mate Richardson had been carrying for the purpose of "going into business in Africa," and then had returned to the Dei Gratia with the report that the Mary Celeste had been found completely abandoned. This absurd story was first published in San Francisco and later found its way to Maine. It was on its face a pure invention, like the story of the murder of the captain by the mate and crew.

The only reasonable explanation is that her master and crew became alarmed by the rumbling of the cargo, and, fearing that her decks would be blown off by the accumulation of confined gas from the petroleum and alcohol, got out of her in a hurry. It is well known that oil cargo confined under tightly battened hatches will generate gases, especially when the vessel is pitching and rolling in heavy weather, and that these gases thus confined, will cause a loud rumbling noise like distant thunder. The log of the Mary Celeste contains numerous allusions to rumblings below decks, and indicates a fear among her officers and crew that an explosion would take place. Evidently, if this theory holds, Captain Briggs did not know that the danger might have been averted by removing the hatches and allowing the gases to escape, as is often done.

Assuming that the Mary Celeste's people left her in a great hurry, alarmed at the danger of an explosion, the question arises, "What became of them?" The theory generally accepted by seafaring men is that they tried to make a landing on the Azores, and that the boat was capsized in the heavy surf, although there is no record of either the boat or any of the bodies ever having been found.

# A Novel Tax System In An Alberta Town

Edmonton, Sept. 2.—Edmonton is trying a new system of taxation. In essentials it is a single tax system, since it levies on the cash value of land and does not tax improvements directly. There are three other regular schedules, however, covering business, income and special franchises, so Edmonton's is not strictly a single tax system, though there is much of the spirit of the single tax idea in it.

The fact is that the man who drew up the plan, William Short, King's Counsellor, did not know who Henry George was and had never heard the term "single tax" when he framed his taxation scheme.

In brief, this is his taxation scheme: Levies are made on the actual cash values of land. In estimating the value of vacant lots the value of nearby improved property is taken into consideration. Thus a vacant lot is listed at its value as a site for a building like the average building of the neighborhood, not as a prospective site, but as an actual site.

The tax on business is reckoned by the square foot of floor space, and the rate for each different business is determined by a table, corrected each year. Thus a florist is taxed the minimum, 2 cents per square foot, while a banker is taxed the maximum, $7.50 per square foot.

Fifty different businesses are classified and there is a fifty-first class to serve as a catch-all for odd vocations.

No attention is paid to the non-essentials, to the character of the building or furnishings. A bank built of Carrara marble is taxed at the same rate per square foot as is the bank built of boards.

Here are a few sample assessments per sq. are foot for 1909: Millinery store, $2; undertakers' parlors, $2.50; ice cream parlors, $2; boarding houses, 50 cents; drug stores, $4; printing offices, $2.50; lawyers' offices, $4.

The income tax is levied at a fixed rate on each thousand dollars over the first thousand, which is exempt from taxation. During 1908 the rate was $1.54 per $100.

The tax on special franchises does not worry the Edmontonites, since the city owns all the special franchises at present, and all are exempt from taxation.

The system works. During 1908 there were less than half a dozen appeals to the Council, as provided for in cases of alleged unfair valuation, and only one second appeal to the courts.

The notable effect of the system is that which it has on the improvement of property. Since the system puts a premium on improvement and a penalty on non-improvement, vacant lots in the downtown section of Edmonton are rare. The town is growing rapidly, but not raggedly. There is no inducement to buy land to hold for a rise, so Edmonton is being built up completely.

One feature of this season, borrowed from the English system, is especially novel to the American. This is the basing of suffrage on ownership of property. All men, unmarried women and widows over twenty-one who are assessed as being worth $200 or over are on the voting list.

Furthermore, the English idea is used in the matter of referendum on the issuing of bonds. Then dollars talk, literally, for the voters are not only people but "burgesses," too—meaning any bank or other corporation assessed on the last revised assessment roll as a freeholder or lessee of real property, which, if held or leased by an individual, would entitle him to a vote." And in certain financial matters wealthy voters are entitled to more than one vote, property up to $2,000 carrying one vote, thence up to $5,000 two, thence up to $8,000 three, &c.

# THE HUMOROUS SIDE OF KEEPING BEES

BY A. ELLSTON FAWKES

"If this paper is right", observed the retired merchant, laying aside a copy of a farm journal, there must be money in bee keeping. It tells of a man whose health broke down while he was in business. The man then moved to the suburbs and went into the bee business, and is now clearing $5,000 a year."

He must be an awful chump if he will stay in the business for a pittance like that, "said the hotel keeper." He ought to clear $1,000,000 a year. There is money in the bee business all right enough, but successful beekeepers are like poets; they are born, not made. If a man is so constituted that he doesn't feel like crawling into a hole in the ground when he sees a bee headed for him, its a good business for him. I have had a good deal of experience with bees, and I never got so hardened that I could hear them buzzing without wanting to run and hide. A bee, please let me inform you, is a good deal like a mule."

"It has a strong family resemblance to a herd of elephants, I am told," said the retired merchant.

"Don't try to be funny, and above all don't interrupt your superiors when they are enriching your mind with generous slices of wisdom, garnished in the field of experience," returned the hotelkeeper, severely. "A bee, I repeat, is a good deal like a mule. The latter animal is a great judge of human nature. It can size up a man quicker than a phrenologist or a mind reader can."

"If a mule sees that you are not afraid of it and would rather enjoy a rough house it is the most docile creature in the world, but if the mule sees you approach it in fear and trembling it just waits for a suitable opportunity, and then kicks you in five different places, and the surgeon has the time of his life sorting out the fragments and soldering them together again. You can't fool or bluff a mule. If you are afraid of it the beast knows it, although you may whistle and caper around, trying to show what a reckless sport you are."

Its the same with a bee. If you really are not afraid of a bee it will forget that it has a stinging attachment and buss around your head and build its nest in your whiskers and become a regular pet. I have seen men walk in among a lot of bee hives and fuss with the bees and brush them out of the way and take all kinds of liberties with them, and they seem to consider it as a joke. Then those dog-gone bees hunt up some innocent bystander, who hadn't bothered them in any way, and sting him up so that he looked like a tattooed man. There are so many safe and pleasant ways of earning a living that a man's a fool to monkey with bees unless he has a sole-leather hide.

"Everything I suggest as a pleasant and profitable employment for an idle man with money meets with your disapproval", complained the retired merchant. "I was almost ready to try bee farming and now you've put me out of the notion. What do you say to a suburban place where a man could raise berries and such things?"

"Berries are worse than bees," assented the hotelkeeper. "I've tried all varieties of suburban life and market garden graft and the chicken business and I found each one worse than the other."

"Take strawberries for instance. The blamed things don't grow on trees so that you can go around in a plug hat and a dress suit and gather them without soiling your dress front. The measly things grow on the ground, and they are always covered with leaves and vines, so that you have to hunt for them, and you have to get down on your narrow bones, and claw around with your hands, getting your fingers full of sand burs, and big red ants crawl all over you and bite you, and there's always

"You should take the Chautauqua circuit as the champion wet blanket," said the retired merchant, in discouraged tones.

# ANOTHER INNOVATION IN RAILWAY TRAVEL

If it is the growing time for Canada it is also the growing time for the Grand Trunk Railway System. The popularity of the International Limited, the finest and fastest train in Canada, has made larger cars an absolute necessity in order to provide room for the growing traffic. The result of this is a much heavier train and, in order to handle this train larger and swifter locomotives have been especially designed and built. But before this was done the 80 pound rail was replaced with 100 pound steel. After all that is the foundation—the roadbed.

The cafe parlour cars, which have done service since the establishment of this splendid train, are now replaced by new diners which are pioneers in their way. The new cars are 70 feet, 7 inches long, 10½ feet wide, 14½ feet high. They are equipped with six-wheeled trucks and have steel platforms. They are heated with steam from the locomotive and equipped with electric lights, electric fans, etc. The dining room is finished in African mahogany, the chairs are made of Mexican mahogany, upholstered with black leather. These cars were made in the Montreal shops of the Grand Trunk Railway.

New parlour cars similar in excellence to the dining cars are operated on the International Limited.

# Meaning Of The Methodist General Conference Session

The Methodist Conference of 1910 will be remembered in the annals of a great church as a notable gathering. It has been almost revolutionary in its legislation, but its important acts were achieved without tumult, heart-burning, or wild, whirling eloquence. All spectators are agreed that the conference just closed was characterised by able debate and Christian composure. As to the decisions arrived at, it is difficult to speak with confidence, but we believe that Methodists throughout the Dominion will accept them with enthusiasm. The elimination of the dancing foot-note may be greeted with criticism by the older people, who were brought up to believe that the card player, the dancer and the drunkard were true yoke fellows of the devil, but the easier and more charitable church member of to-day has come to the conclusion that it is as much a sin to be mean as to get drunk, does not regard whist as an invention of the evil one, nor dancing as a Davidical amusement which is as hurtful to the soul as Solomonic polygamy. The younger Methodist church-member will henceforth be able to enjoy a parlour dance in her home without feeling that she has broken the vows and an ever present sense of guilt will not keep her from attending class meetings.

Another very important act of the conference has been the institution of a tribunal for the trial of heretical teachers of theology. We believe that it would have been a great misfortune if the conference had attempted to pronounce upon Rev. Professor Jackson's orthodoxy. He may be a heretic, but we are inclined to think that a large number of the delegates to the conference were not competent to judge the various doctrinal points at issue. Theology to-day is a complicated science, and when the average layman gets down into the depths of the historical criticism of the Bible, sometimes erroneously called higher criticism, he can find no rest for the soles of his feet or the crown of his head. It is the easiest thing in the world for a man to take sides, but to decide as to the truth of things is a matter so difficult that the most profound scholar needs to walk warily. The appointment of experts to deal with higher critics and logic-choppers is, therefore, extremely necessary. We hope that the tribunal will not be overworked, but if any teacher in the Methodist colleges of Canada is found to have lost his faith in the deity of the great Head of the church, we believe that if he is not asked to resign, or forced to resign, the church will be recreant to its mission.

"Jesus or Christ—which?" This was the title of an article in an English review, which recently created a great sensation in the mother land. Many theological experts to-day are losing their faith in Christ, and are yet exalting Jesus as the perfect flower of humanity. But if Jesus is not only man-God, but God-man, or Christ, the Messiah, we might as well cease calling the church Christian and close the New Testament. Any college of any church, whose professors do not hold to the deity of Jesus is not Christian, and has no business, to pretend to be training ministers for "the Christian ministry." The Methodists of Canada can afford to be liberal with regard to the authority of Genesis or Isaiah, or anything else in the Bible, but they must insist that their professors are not Jews, but Christians. The Toronto Daily Star deprecates heresy-stunts, and declares that the minister of to-day will be "tested by his courage and self-sacrifice, not by his opinions." This is all very well, but if a man loses the opinion that Jesus was Christ, what will happen to the church which is founded upon this doctrine, and where will be the inspiration for courage and self-sacrifice?

A third vote of the conference was perhaps the most important of all. It favour of organic church union with was the overwhelming decision in the Presbyterians and Congregationalists of Canada. This step makes the long-talked-of project an absolute certainty. In spite of all doubting Thomases and knife-blade sectarians, the negotiations have proceeded with deliberate success. When the question descends from priests to people, it will be indorsed with no uncertain voice. We speak much in praise of common-sense. Union is a common sense proposal, and the common sense of the people will go solidly for it, for the average Christian today has little knowledge of the differences which rent an earlier Protestantism into fragments, and he sees very keenly how nonsensical it is for three starving churches to exist in a village where there should be only one enthusiastic group of Christians.

In future years many of the delegates to the Methodist conference of 1910 will probably boast of their wisdom to their grandchildren, will tell how they voted for the larger fellowship, and their descendants will scarcely believe that there ever were such divisions in the bigoted days of yore.

# Sam Hunter's Story Of The Tourist And The Bear

Here is another capital Sam Hunter story of Stony Lake happenings, taken from the Millbrook and Omemee Mirror:

There are days here when the young man or woman without other resource than that of canneing or sailing finds it hard to put in the time. They have as little interest in a ramble through the woods as an illiterate has in a well stocked library, and for the same reason. Such days come when white caps make hosting a menace to all save the experienced—or the foolish. Also at such times as "the rain it raineth every day." Then it is that "Alyss thumps the upright," otherwise the hotel or pavilion piano, and the other members of the party resolve themselves into a human crescent behind her and demand the chorus, "Has anybody here seen Kelly?" or plaintively wail about their old Kentucky Home. But there is a limit to even this, and then genius steps in and suggests a diversion. They all tote around kodaks these young people from the cities. They are also keen for the picturesque and for "local color"—and they have films "to burn." So blessings on the youth who one day last week, when the rain suddenly let up, suggested that they kidnap one of Mr. Picken's stuffed bears, carry it up to the edge of the woods and kodak some "thrillers" for the folks at home. It was enthusiastically received. "Let's." Engaging the hotel proprietor's attention elsewhere, four of the more stalwart of the Percys and Reginalds lifted one of those glass-eyed varmints from its pedestal in the hotel hall and laboriously bore him up the hill to the cedars by the roadside. The remainder of the story I cannot vouch for. It was told me by a round-eyed young man who said he "worked for Littlesos," and was "purty near goin' t' the North West this fall." "When I turned th' corner of th' road up to th' spring I seen a lot of girls an' young fellas near th' cedars with little fortograft instruments all aimin' them at some blame thing under th' trees, an' laughin' t' beat th' band. Why, blamed if it ain't a tame bear, I says, when I got near enough t' see what was goin' on. 'An' I thought it was a live bear at first till I got a closer look. They had it raised up on its hind legs with th' front paws onto a log, an' a lad with white linen pants an' a red hat was grabbin' it b' th' throat an' holdin up a carvin' knife, like he was goin' t' sell his life dear; his face turns round at th' same time so they wouldn't miss gettin' a good fortograft of him. 'Now it's my turn.' 'Me next,' th' other lads was hollerin' when th' was suddenly a screetch from th' girls that'd raise your hair. One of Hamilton's cows with a young calf that was comin' up th' road suddenly smelt th' bear, an' lettin' a heller outa her, charged head down straight into th' bunch. She throwed that dummy bear clean over th' rail fence into th' next field. The lad with th' linen pants was half through th' fence an' wedged, an' yellin', 'Take 'er off' an' 'Fire.' There was fortograft boxes thick as huckleberries in a Burleigh ma'sh scattered down th' road clean t' th' landin'. But in less'n six seconds there wasn't anythin' else there. You could hear 'em screechin' in all directions. I hed to coax old Spot off with a rail before I could rescue th' lad in th' fence. Him an' me took th' bear back. It was mussed up considerable, an' one eye was broke. You can't get stuffed bears like them for nothin'.

"An' if it was Mr. Pickens I'd make them Jaspers pay for it."

S. H.

Stony Lake, Aug. 29, 1910.

# SAID FAREWELL TO TWO WELCOMED NEW HEAD

**Employees of the C. G. E. Test Department Had a Most Enjoyable Banquet — Messrs. Ray, Miller and Wilson Honoured.**

## A FESTIVE OCCASION

About forty-five young men of the test department of the C. G. E. held a banquet at the Oriental last night from 9.30 to 12 o'clock, and a very enjoyable time was experienced. The event was in honour of the graduation of Messrs. Bertram Miller and Charles J. Ray, and to welcome the new test department foreman, Mr. G. B. Wilson.

The committee men were Messrs. Allister, T. McLean and Will F. McLean, and they are to be congratulated on the successful result of their management.

The menu was as follows:

**Engineering Notice.**
Full Load Run

Caviare on Toast

Tomato Gumbo
Celery Olives

Fillet Rice Lake Lunge, a la Tank House
(Pommes Oriental)

Tenderloin of Jumbo Beef, 500 Volts
Boiled Potatoes French Peas

Roast Spring Chicken, H. P. Dressing, 2500 Volts 1 Minute
Mashed Potatoes Cauliflower in Cream

Beet Salad, a la Short Circuit

Fresh Peach Shortcake, Whipped Cream, 80 p.c. P.F.
Carbon Tartlets, a la Filme Brush
Assorted Cakes
Water Cooled, Lemon Ice

Roquefort Cheese, Nuts, Bolts, Fruit
(1-10-150) High Starting Torque

Coffee a-T-b

Run till constant temp

The following were the toasts, with C. P. Joy, of the production department, as toastmaster:

"Our Guests," proposed by J. Lowes responded to by Messrs. G. B. Wilson, Betram Miller and Chas. Ray.

"C.G.E.," proposed by Mr Thornton, responded to by Jack Caster, esq.

"Test," proposed by H. B. Whyte, responded to by H. Gooding, esq.

"The Ladies," proposed by Mr. D. Jackson, responded to by Mr. Wm. Landry, esq.

"Next Merry Meeting," proposed by Allan McLean, responded to by W. J. McKnight.

A recitation, "The Habitant," was then given by H. Desautel, and the pleasant gathering of young men sang the national anthem and dispersed.

Both Mr. Miller and Mr. Ray are young men of sterling qualities and ability and were favourites among their fellow employees. They spent four years in the test department, and during that time have made a host of friends, who, although regretting to lose them, wish them every success in the future.

# POLICE DEFIED BY INDIAN DESPERADO

**Examiner Special.**

PRINCE ALBERT, SEPT. 2.—Joseph Black Hand, an Indian, who has been pursued for several weeks by the mounted police, lies in the Victoria hospital here suffering from a severe bullet wound in the left arm, and closely guarded day and night by constables from the barracks. He has already made one get away from custody, and was only retaken after an exciting encounter with police officers at Duck Lake last Sunday morning. Black Hand was within a few yards of his rifle when brought to earth by a shot from one of the pursuing policemen. Had he reached the place where he had the rifle hidden serious results would undoubtedly have followed, as he is one of the crack shots of the Indians in this section. He had called himself "Almighty Voice" and claimed that he would never be taken alive.

**Broke Away at Station.**

About two weeks ago Black Hand was sentenced to a year in jail by the Duck Lake court for horse-stealing. While waiting for the train to take him to Prince Albert jail, Constable Dorion and special Constable Laviolette took him to the guardroom. The Indian asked to go to the lavatory, and permission was granted, the special constable following him. Near the lavatory was a fence, and jumping to one side, Black Hand scaled it and was away. From then on the police were looking for him. It was discovered last Saturday by Sergeant Reeves that he was on the reserve near Duck Lake.

**Captured at Reserve.**

Sergeant Reeves, Constable Dorion, and special constable Laviolette proceeded to the reserve at 2 o'clock Sunday morning. When they lifted up a blanket to see if Black Hand was under it, the Indian rolled under the canvas of the tent and was away again. Dorion shouted twice on him to stop, but he kept on. He then fired twice in the air, and still Black Hand ran. The third time Dorion shot to hit, and the bullet entered the left arm. Black Hand stumbled and fell, but was up again and away. He fell twice again, but becoming weaker, the next time he fell on his left arm and could not get up. His capture followed.

**Was After His Rifle.**

Black Hand is reported to have threatened that he would make it interesting for the police, and when running he was on his way to where he had hidden his rifle, his knife and his revolver. He is a Sioux and is one of the descendants of the Indians who fled after the Custer massacre in Montana. He speaks English and French fluently, and is regarded as a dangerous character. After the capture, he was brought to the Prince Albert hospital, by Sergeant Reeves, and is now on his way to recovery, which will take several weeks, as the bone of the arm has been badly splintered.

**GRAND TRUNK SPECIAL MONDAY NIGHT FOR TORONTO**

**A special train will leave the G.T.R. Station on Monday night (Labour Day) at 10:15, for Toronto, for the convenience of visitors and others who wish to spend the holiday in Peterboro'.**

**HOW ONE WOMAN REGAINED HEALTH**

**Utterly Helpless and Friends Did Not Expect Her to Get Better.**

The great fame of Dr. Williams' Pink Pills is due to the fact that they have restored to active health and strength hundreds of people when all other treatment had failed to cure, and who had come to believe themselves hopeless, chronic invalids. The case of Mrs. Henry Britton, 1284 Alexander Avenue, Winnipeg, Man., adds another striking proof to the truth of this assertion. Mr. Britton writes as follows concerning his wife's long illness and ultimate cure through the use of Dr. Williams' Pink Pills. "It is a simple thing to recommend Dr. Williams' Pink Pills, and yet it is difficult to express fully one's heartfelt gratitude for such a marvellous remedy, as they have restored my wife to health and strength after the best efforts of the medical fraternity had failed. For years prior to our coming to Canada, and since that time up to about three years ago, my wife had been subject to severe illnesses from what the doctors said was chronic anaemia. She was utterly and entirely helpless, and so weak that she had to be lifted in and out of bed for weeks at a stretch. The trouble was aggravated by recurrent rheumatism and heart trouble. She had no appetite or strength for anything. I employed the best medical attendance and nurses procurable. The doctor gave her tonics and ordered beef tea and wine. The tonics and medicine would relieve her for a time and then she would slip back once more into the old state — but worse, if anything. Then we began giving her advertised remedies, but all seemed of no avail. One evening while reading a newspaper I happened to see an advertisement of Dr. Williams' Pink Pills. It told the case of a young woman who had been a great sufferer from anaemia, and who testified to having been cured through the use of the Pills. The case seemed to describe very closely the symptoms of my wife, and although I had pretty nearly lost all hope of her ever being well again, I decided to get a supply of the Pills and urged her to use them. My wife was thoroughly disheartened, and said she expected it was only another case of money thrown away. However, she began taking the Pills, and I thank God she did, for after she had used them for a time, she felt they were helping her. From that time on her appetite came back, her colour began to return, and she who had been looked upon as a helpless invalid began to take a new interest in life. She continued taking the Pills and through them her health continued to improve, until at last we were able to heartily congratulate her upon her complete restoration to health. Some three years have since passed, and in that time she has never been bothered in the slightest degree with the old trouble. Her cure has astonished everyone who knew how ill she had been, and we acknowledge with heartfelt thanks our gratitude to Dr. Williams' Pink Pills which literally brought her back to health from the brink of the grave."

Dr. Williams' Pink Pills cure such cases as this in just one way—they actually make new blood, which fills the depleted veins and brings new strength to every nerve and every organ in the body. Nearly all the everyday ailments of life come from poor or watery blood, and it is because Dr. Williams' Pink Pills make new blood that they cure anaemia, indigestion, headaches, sideaches and backaches, rheumatism, neuralgia, general weakness and the ailments that growing girls and women do not like to talk about, even to their doctors. If you are weak, sick or ailing, no other medicine will cure you so quickly as Dr Williams' Pink Pills. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

# WOMAN'S BODY WAS FOUND IN THE RIVER

**Huge Stone and Hand Bag Containing Jewellery Tied to Victim Picked Up in Delaware, Near Philadelphia ---No Clue to Her Identity.**

PHILADELPHIA, Sept. 2. The body of a middle-aged woman was found in the Delaware river off the Bake House wharf, Tacony, with a 75-pound stone lashed to her waist, and a satchel containing a number of smaller stones and various articles of jewellery tied to her neck. No clue as to her identity or the means whereby she came to such an unusual death has been found.

Shortly after 3 p.m. Policeman Seamire of the Tacony station walked to the end of the wharf to watch the small flotilla of rowboats and light motor craft which filled the stream opposite that point.

His gaze was attracted by a piece of dark cloth floating on the water. He looked at the object carefully, and discerned what he thought was the body of a woman lying partly concealed in the shallow and muddy edge of the river.

**FOUND BODY OF WOMAN**

Seamire clambered down the slippery front of the pier piling and waded out to the object, which upon closer investigation proved to be the body of a woman fully dressed in clothing of more than ordinary value.

The body was half submerged in three feet of water, and was held down by a huge stone tied to the waist with a piece of stout rope. About the neck was a small handbag, jammed to the very clasp with small stones. The woman's face was turned toward the bottom.

The policeman was scarcely able to lift the combined weight of the stones and the body and was compelled to call for assistance before the latter could be dragged to the wharf. The woman was found to be about 45 years old and of good face and figure, with dark hair. She was dressed in a dark velvet skirt, a black waist of silk, a green sweater and a black raincoat. A black hat was found on the bank of the stream nearby.

The bag which had been tied about the neck was found to contain, in addition to the stones, various articles of personal jewellery, comprising a gold hunting-case watch, two small gold neck chains, a pearl-handled penknife and one gold hand ring.

There were also one silver snake ring and one small silver ring, a gold breastpin and five plated waist pins. A transfer of the Allegheny Avenue division of the Philadelphia Rapid Transit Company, dated Aug. 27 and punched at the afternoon hour of 5 o'clock, and a $5 note were found.

**STONE TIED ABOUT WAIST**

The stone tied about the waist was found to have been fastened to the body from the front, a double knot, showing that the woman or her assailant had evidently taken every precaution to make death certain.

***First Showing of the New English Tapestry and Velvet Rugs.***

*Our first showing of English Seamless Tapestry and Velvet Rugs, always excites keen interest among housekeepers. Our stock for this season were selected under the most favorable conditions, we bought direct from the mills saving all middle costs. This saving we pass on to you in lowered costs.*

*We might try and paint a word picture of the beauty and richness of these designs, the harmony of shades, etc., but nothing we can say can convince you better of the beauty and desirability of these rugs than for you to make a personal inspection.*

*There are colourings and designs suitable for any colour scheme or room you have in mind. Inspect these new rugs, at your earliest convenience.*

## Curtains from Across the Waters

### Direct Import of Nottingham and Cluny Lace Curtains in New Designs.

¶ These last two weeks have seen case upon case of new imported Nottingham and Cluny Lace Curtains opened up and put in stock. The finest range that has ever been shown in this growing department. We have seen the decided tendency toward the better goods and have bought accordingly—bigger variety—better grades are here for the fall trade. Within a few days there will be hundreds of people commencing to hunt for their window trims; Curtains, Shades, Draperies, etc., and we only wish to intimate that to do themselves justice they should see our immense stock.

# THE CANADIAN NAVY--SOME CONSIDERATIONS

By C. Frederick Hamilton.

(Copyrighted.)

Canada has embarked upon a very big, a very expensive and a very protracted piece of work in attempting to organize a naval force of her own. It is important that she should have clear ideas as to what she wants; that she should set about her work in accordance with a sound plan; and that she should do nothing at the outset which will at a later stage work mischief.

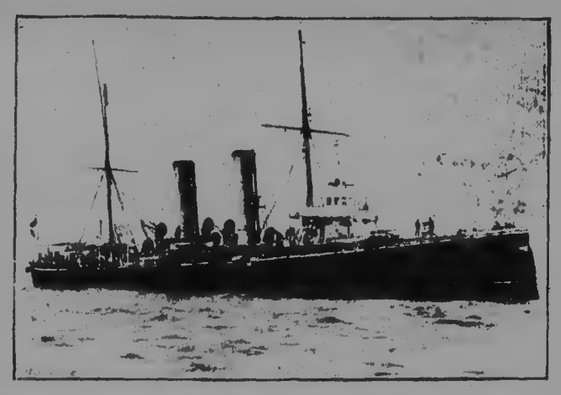
First, with regard to our object. We are *building our navy to be useful in Imperial wars.* An Imperial war is likely to spread itself over a very large *proportion of the earth's* surface, and so large a theatre of operations, will divide itself into primary and secondary fields of action; into regions where the big fighting is done, and into regions where less important fighting is done. In an Imperial war Canada might be the scene of the big fighting, but she is rather more likely to be a secondary sphere of operations; that is, that while the great fleets will contend on the other side of one or other of the oceans which touch her shores, she may be in danger of annoyance by casual raidings from detached naval forces of the enemy. Thus there two distinct sorts of work a Canadian Naval Service may contemplate. It may aim at defending the country against secondary attacks, leaving it to the Royal Navy to look after the big fighting; and it may aim higher, and desire further to bear a hand in the big fighting. Of course, the former is the earliest duty to which we must address ourselves. The Canadian coastline, Canadian Coastal waters, Canadian *ends of ocean trade routes* must be protected. When that is done we may help in the main *operations.*

I am wholly in favor of going further, of taking part in the main operations of any Imperial war, and of organizing our service from the outset with this in view. For us to do nothing but attend to our local defence, leaving the care of the main war to Great Britain, or rather to the rest of the Empire, would be like a man undertaking to keep the grass cut on his lawn, but leaving his father and brothers to pay the rent of the house. So long as the main fighting is on the other side of the ocean, very slight forces usually will suffice for strictly local defence. The cruisers which an enemy would spare for the purpose of harassing a secondary sphere of operations, such as the Canadian coast would be, if the main fighting were in the North Sea, or off the coast of Australia, as a rule, would be few and weak, and could be driven away by a few ships of no great strength. The real fighting on our behalf would be done by the big British fleet far away; and if that fleet were beaten, the enemy would soon place upon our coasts a force with which no local defence squadron could cope. Our plight would be like that of the man already mentioned if the family were to be ruined while he was contenting himself with keeping his lawn tidy. He would be turned out of the house, no matter how closely he had kept the grass trimmed. A few armoured cruisers would make short work of a *force amply strong enough for secondary* local defence. Thus, to take part in our own real defence we *must help in the main battle.*

It does not follow that we must build only the biggest and most powerful ships if we are to help in the main fighting. The very large ships are needed, of course, and soonor or later we should provide them. But all sorts of ships are needed in a fleet, not merely the Dreadnoughts and Indomitables, but also cruisers and destroyers, and all sorts of cruisers at that. Here is the real problem. In every Imperial war the intensity of the local dangers, the need for strength in the central fleet, will vary. In one war there will be very little danger from riding cruisers; in another war there will be greater danger. Suppose Canada has half a dozen moderate-sized cruisers *and a score of* destroyers on the coast nearest the scene of hostilities. In a war of the first type a couple of *cruisers and* half a dozen destroyers might be ample for local defence, in a war of the second type the whole of her force might be needed. In the first case it surely would be better business to pack off our surplus ships to some other place on the ocean where they would be helping the British cause, perhaps with the main fleet. If we refused to do so, our people would loaf while our fellow Britons fought.

Thus I maintain that we should organize our Canadian Naval Service from the start with the idea that it shall be ready to go anywhere and do any sort of British fighting-work that the *ships* can do. The Canadian officer, the Canadian sailor, must not go about his business with the idea that he is to be tied by the leg to the Canadian coast-line, never to leave it. He must hold himself in readiness to do coastal work on our own shores; to patrol trade routes that may be distinct from Canada;; to serve in fleets at the other side of this ocean or that ocean. Whatever he does he will be serving Canada if he is serving the Empire.

I leave to one side the question of the sort of ships we should buy or build. The important thing is the men we train, and the spihit in which we train them. Good officers, good men, well educated, well trained, well disciplined, skilful and brave, are far more necessary than good ships. If the Japanese and Russians had changed ships before Tse-Shima the result would have been the same. In most British naval victories the enemy had the better ships. I am infinitely more concerned in the men we train, than in the ships we provide for them.



Canadian Cruiser, "RAINBOW"

1 The Canadian public must recognize that its ships must act sometimes on the Canadian coast-line and sometimes away from it; that its ships will be doing it service even when across the ocean. It must be willing to see its ships sent hither and thither as the situation demands.

2. The Canadian seamen must be trained in the idea that they must serve anywhere in the world. They must not be taken by surprise at an order to cross the Atlantic and report to the Admiral in command of such and such a fleet.

When I lay down this latter condition, I demand a great deal. It will not do for our men merely to be willing. They must also be skilful. The *business of handling ships* is skilled work in the very highest sense. It is one thing for a captain to command a *single ship and make her efficient* for solitary service; it is another thing for him to command a ship which is one of a squadron. *To illustrate this* point, I shall make two quotations; one from Kipling's "Fleet in Being", the other from "Rusplata", the melancholy book in which the Russian naval officer Semenoff tells of the courage of Rojestvensky's fleet from Liban to Tsushima. First Kipling:—

"But when he stands on the bridge at midnight and essays to keep the proper distance in front of the next steel ram dreamily muttering through the water, ten knots an hour, two hundred yards behind him—why then the Sub sweats big drops till he gets used to it. Let us suppose he is third in a line of four, that the hour is near midnight, and that he has been on watch since eight. So far, we have kept our distance beautifully, we have even sneered at the next line a mile away to the right, where they have once or twice been "all over the *shop.*" *In* twenty minutes there will come relief, a bowl of hot cocoa, three pulls at a pie, and blessed bed. The Sub watches *the speed-lights* of the next ahead, for as those lanterns change so must he adjust his pace. But the next ahead *is using up* all the basest coal she can find, and the wind blows not less than two million samples of it into his straining eyes. He has—he had—the distance absolutely correct; he would swear to it. The Quarter Master by the tiny wheel heaves up one big shoulder. Till that moment he has given no sign of life. The Sub's heel taps impatiently on the planking; his mouth hovers over the engine-room voice tube; his lips open to speak to the Quarter master in case—in case it should be necessary to steer out of line; for something has gone wrong with the next ahead. She has badly overrun her station, and steers to the left of our leading ship. The Sub wipes the cinders out of his left eye and says something.

"Now begins the fun. The leading ship has slowed a certain number of revolutions — say, from ten knots to nine and a half; but she has not changed her speed lights in time. We slide out to the right of our next ahead, swiftly and quietly. And now we must all mark time, as it were, till our leader straightens herself. That which was a line has suddenly become a town on the waters; representing roughly three-quarters of a million sterling in value, ten thousand tons weight, and eight hundred lives. Our next ahead lies on our port bow, and—oh horror! our next astern is alongside of us. Heaven send that the captain may not choose this hour to wake. The Sub has slowed her *down to eighty five, but engines are* only engines after all, and they cannot obey on the instant. Meantime we can see *into the chart room of her* that she should have lain behind us. A Navigating Lieutenant sprawled half over the table, cap tilted over forehead to keep out the glare of the lamp, is poring on a chart; we can hear the officer of the watch on her bridge speaking to his Quartermaster, and there comes over to us a whiff of Navy tobacco. She is slowing—she has slowed with a vengeance, and when slow too much they lose steerage-way, and what is far worse, they wake the Captain. This strikes the Sub with buried clearness; but the impetus of the recent ten knots is on us all, and we are all going much faster than we think. Again his foot taps the deck.

"Are they never going to slow in the *engine-room?* The pointer on the dial before the Quartermaster moves through some minute arc, and our *head falls off to the left.* It is excessively lonely on this high and lofty bridge, and the spindle shaped hull beneath looks very unmanageable. Our next ahead draws away slowly from our port bow, and we continue at a blow and we continue at a safe dissafe distance to starboard of her. The line is less of a lump and more diagonal than it was. Our next astern is sliding back to where she belongs. Now, two revolutions at a time, the Sub lets out till he sees our erring sister ahead return to her place, and joyfully slinks in behind her. The Sub mops his heated brow, thanking heaven that the Captain didn't wake up, and the tangle was straightened before the end of the watch.

"But the Captain was awake all the *time.* The change of speed roused him, and he lay watching the tell-tale compass overhead, his mouth at the *bridge voice tube; one eye* cocked through the open port, and one leg over the edge of the bunk—in case. The Sub must learn his *business for* himself—must find confidence in isolation as the Captain did a quarter of a century ago. It is not good for him to know that he is being watched.

That is a picture of the training of a small cruiser in company with the fleet. To see what such training does, let us turn to the Russian's testimony. It will be remembered that Rojesvensky's fleet while passing over the Dogger Bank fired by mistake on some British fishing vessels, and greatly exasperated the British nation.

The fleet went to Vigo, and on leaving that anchorage a British Cruiser Squadron shadowed it to its next stopping place. Listen to Commander Semenoff, who was on the Russian flagship:

"*At 10 p.m. a man of war* two mast, three tunnels – steamed up on our starboard beam at good speed. She looked like the *English cruiser Lancaster*, which had come into Vigo during our stay. After having proceeded a short distance ahead of us, she turned round, steamed down our port side and disappeared. Soon afterwards we sighted, several miles astern, the lights of five vessels, which were apparently following us. From the way the lights were placed, it was clear that they were men-of-war. They remained astern of us the whole night but they did not steer a steady course; they moved about, sometimes on the port, changing formation, dividing into two sections, etc.

"At daylight, we could see, that we were, in fact, *being convoyed by* a division of English Cruisers.

At 9 a.m. the *Orel's* machinery broke down. The squadron stopped engines.

The constructor and the torpedo officer on the staff were sent to her. The Britishers, who had up to then followed in our wake, now became very busy; first they formed a line of lookouts on the horizon, then they re-formed. One cruiser then went off to the *south-east at top speed*, probably with a report; the others divided into two pairs, which scouted to the north and to *the south of us*, 5 to 7 miles off. All their movements were so regular, all manoeuvres were carried out at such speed and with so much precision, that they did not look as if they were due to unexpected orders, but as if a well-rehearsed play were being enacted before our eyes, in which neither the stage manager nor the prompter could be noticed.

"Do you admire this?"

"I turned round. Behind me stood the Admiral, who could not take his eyes off the English Cruisers.

"Do you admire this?" he repeated. "That is something like. Those are seamen, oh, if only we——" and he ran down the ladder, without completing his sentence.

"In his voice there was suppressed anguish: an *expression of so much* suffering passed over his face, that I suddenly understood——"

It was because of constant practice, such as described in the Kipling passage, that these British Cruisers exhibited the brilliant efficiency which so aroused poor Rojestvensky's envy as he thought of the wretched condition of his own fleet, which had not been trained, and which in consequence was continually in disorder.

It is only by working and training in big fleets that this training can be acquired. Now, for many years our naval forces will be very large. Opportunities for working them in fleets will be lacking if we make a separate navy of it—if we organize the naval forces of the Empire in watertight compartments. We conceivably might have a number of vessels efficient enough on detached service, in single ship work; but if on the outbreak of a war we were to offer service of them to the Admiralty, they would be useless for work in a fleet until they had had months of training. The American battleship fleet which sailed round the world reported that when the ships which had been stationed on the Pacific Coast joined those which had made the long voyage round Cape Horn in company, they were for some time quite unable to manoeuvre. The two needs of the situation thus expand. I add to the list:—

3. Our Canadian forces must constantly practise in peace time with the big fleets of the Royal Navy. They cannot play by themselves in their own little corner and then expect when war comes to be able to play in the Big game.

I leave that aspect of the case and pass to another. Ours is bound to be a small force. Any small force is bound to suffer from slowness of promotion. If we have only a dozen or so ships, the commands, posts, billets, etc., will be very few. Our first batch of officers will rise very rapidly, will reach the top ranks at very early ages, and then will stay there till grey-headed; *and meanwhile the men* of the second and third batches will be kept down. Thus after a while we shall have small cruisers commanded by men of sixty, and have lieutenants of fifty and more. That is very bad in many ways, but chiefly in this, that men often are at their best for certain commands at early ages. Kipling's Sub probably was only twenty-one. Torpedo craft are put into the hands of very young men; King George commanded Torpedo boat No. 79 when 24 years old, and did a very

ADMIRAL KINGSMILL

*pretty piece of seamanship in* her; commanded the Thrush, a gunboat of some size when 25. In the British *Royal Navy great efforts are made to* ensure youth in officers who are given commands, and on the whole with greater success than in most navies. Again, a force should hold a fair number of high prizes towards which men may aspire. The Royal Navy has 94 flag officers on the active list, and there are other prizes. How many such posts could a small Canadian Navy afford?

A Canadian boy entering it would be fortunate to rise to be admiral, and really would have little hope of becoming anything higher than a captain. I need not enlarge on the subject; it presents many aspects of *great importance.*

This set of considerations is driven home by the fact that it is part of the whole problem of Standardisation, of Interchangeability. It is all right to have one part of the great imperial fleet owned by Great Britain, a second part owned by Canada, a third part owned by Australia, and so on. But it is absolutely necessary to have all these parts trained to the same standard. The Canadian admirals must be animated by the same strategical principles as British Admirals. The staff and intelligence systems must be identical. The ships must be of the same types. The guns must *use the same ammunition.* The systems and standards of gunnery and signalling must be the same. If the *British interests are to be entrusted* to the protection of Canadian ships and Canadian interests to the protection of British ships, the officer of each must feel they can rely on the officers of the other, and so they must knew each other intimately.

Mr. Wm. Robinson, yardmaster of the Texas and Pacific Railway at Toyah, Texas, and Mrs. Robinson, who have been spending the summer months with the former's aunt, Mrs. James Cunningham, Fraserville, spent this week the guests of Mr. Robt. Dale, city.

On Thursday the steamer Lintenia took Mr. Robinson and a party of friends up the lakes to Burleigh Falls. The members of the party consisted of the following: Mr. and Mrs. Robinson, Mrs. James Cunningham, Fraserville; Mrs. L. Thompson and children, city; Miss Lily Cunningham, and Mr. Robt. Dale.

Mr. Robinson has spent the most of his time on this side of the line, visiting the prominent Ontario summer resorts. He spent some time down on the St. Lawrence at the Thousand Islands and a number of other places of interest. Thursday's trip was his first up to the Stony Lake resorts, and he was greatly impressed with the pleasant sail and the beautiful scenery. He stated to the Examiner yesterday that he could not possibly understand why the people of this part of Ontario should go down to the Thousand Islands and other prominent resorts and leave—practically walk away from—one of the most beautiful summer resorts in the province and practically one of the most beautiful in Canada. He said it appears rather strange to an outsider to see the estimation in which the Peterborough people hold the "Lake resorts." "They do not realize what they have got," he said. "They do not patronize them as they should.

He has visited nearly every summer resort on this side of the line as well as the American resorts. He visited California's and many others famous the world over, and then took a trip up to Burleigh Falls, and delivered a verdict that it is the finest trip and summer resort he has yet visited. When we hear it from a man "who has been there," we know it must be true. When we hear such a statement from a man who has visited some of the world's greatest resorts, we begin to realize that we are living in a part of the country which deserves to be upheld and patronized.

Mr. Robinson also spoke of the beautiful camping grounds of the Otonabee, and stated that every chance he got to spend a few months in the summer he would make Peterborough his headquarters. If a man would come all the way from Texas to spend the summer months in the vicinity of this city, it surely is a good enough recommend for its beauty and attractiveness as a summer resort.

Mr. Robinson also gave the Examiner some very interesting descriptions and facts of the peculiarities in the country where he came from. In *comparing* the state of Texas to Canada, he said it was very much like the Canadian West, but not *nearly so fertile or so healthy* a country to live in. The state as a whole is very variable in climate, soil, and manners and *customs* of the people. In the vicinity of Austin and a few hundred miles west the country is becoming settled, mostly by people from the northern states very few, practically no Britishers at all. The cowboys in Texas have disappeared—they are a thing of the past. The land is being homesteaded the same as in Western Canada and irrigation is manifesting its value in many parts of the country. The class of people are also improving. The "old timers" who wore the belt and pistol are dropping out steadily and the rest are reformed. Strikes are very rare. Mr. Robinson can not recall any strike in Texas. He states that the railway employees are paid a wage equal to that here, and are working in perfect harmony with their employers. They get more money some places, but this is balanced by the higher cost of living.

Local option has also progressed. "One might travel three hundred miles on the Texas and Pacific Railway and never touch a place where liquor is sold," said Mr. Thompson. The local option laws are being very strictly enforced.

When asked by the Examiner regarding the old game of bull-fighting, Mr. Thompson stated that that also had been banished. The law does not allow this game to go on now at all. But across the line in Mexico it is still a feature at big days or at shows. He gave a very vivid description of one of these fights which he witnessed at one of the Mexican border fairs a few years ago. He said that a large round plot was dug *out with a low railing* around the outside on the bank, and in the pit, which would be probably fifty yards in diameter a series of little walls were erected. The bull fighters, armed with long spears, rode in on their horses and took their places behind these walls, and then the animals were driven in one at a time. The animals were then beaten with the spears until they became raging angry and then the fight began. The rider would spear the bull with his long pike pole-like-spear and then dodge behind the little wall, and so on until the animal was killed. In such fights the men are often killed and nearly always the horses are killed. In order to decide a victory either the man or bull must be killed. When one looks at the brutality of such a game, it is little wonder that the law banished it.

Next Wednesday morning Mr. Robinson will bid farewell to Canada. He intends visiting friends in Buffalo and Niagara, before he finally de-

Moles, Birthmarks, removed permanently by Electrolysis, without pain or scar (positively no return.) Established Toronto, Hamilton and Guelph. Days in Peterborough. Satisfaction where others fail. References. Write for particulars. Miss A. Graduate, Box 269, Brampton, Ont. Wanted: Ladies to learn.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Extension to Breakwater at Wiarton, Ont.," will be received at this office until 4.00 p.m., on Tuesday, September 13, 1910, for the construction of an extension to the breakwater in Colpoy's Bay, at Wiarton, Bruce Co., Ont.

Plans, Specifications and forms of contract can be seen and forms of tender obtained at this Department, and at the offices of J. G. Sing, Esq., District Engineer, Confederation Life Building, Toronto, Ont.; R. J. Lamb, Esq., District Engineer, London, Ont., and on application to the postmaster at Wiarton, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Honourable the Minister of Public Works, for the sum of two thousand two hundred ($2,200.00) dollars, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary.

# New Park For City If Septic Tank Is Built

## Board of Works Takes Up the Agreement With the Dickson Company at Busy Session Last Night.

### OTHER BUSINESS

The Board of Works committee of the City Council had a protracted and busy session last night, commencing at 7.45 o'clock and lasting till midnight with a short intermission to give the committee of the Whole a chance to meet. A number of important matters came up, including the Smith street bridge, the opening of tenders for the south city sewer accommodation construction, the septic tank on the Dickson property and the oiling of the streets. Reports of some of these things will be found in other columns, the balance of the business is reported below:

There were present Ald. Hicks, chairman; Ald. Gillespie, Duncan, Phelan, Graham, Metheral, the Mayor and City Engineer Hay.

**East City Pavements.**

Mr. Sidney Crowe was present and on motion was heard. His request was that the sidewalk on Douro and Rogers street be placed outside the tree line.

"Would you be satisfied with the Engineer's recommendation?" asked Ald. Hicks.

"It will never be a business street" returned Mr. Crowe.

City Engineer Hay explained that the walk on the other side of the street was on the inside. He said that he would recommend the walk on the inside of the tree.

Chairman Hicks pointed out that it was hard for the committee to go against the recommendation of the City Engineer.

"There are other streets in town with the sidewalk on the outside," remarked Mr. Crowe.

Street Commissioner Evans explained that the other pavements on Douro street are on the inside of the trees.

Ald. Duncan moved, seconded by Ald. Metheral, that the engineer be requested to report upon the matter before any work be done on the work in question.—Carried.

**The Septic Tank.**

Mr. J. C. Shook was present to address the Board and was heard on motion of Ald. Duncan and Graham.

Mr. Shook brought up the question of the septic tank at Dublin and Waterford street. He said that the Dickson Company felt that something must be done there. They had met the chairman of the Board of Works and Property committee, and it had been agreed that if the Company gave the city three lots for park purposes the tank would be constructed there.

Ald. Hicks explained that the only difference between the original proposition and the present one was only eight feet. The city had offered to give the company ten feet of the lots and the company wanted eighteen feet. He felt that the Dickson Company's request should be acceded to.

Mr. Shook stated that he had an estimate of $1200 as to the cost of the tank from the Cameron Septic Tank Company.

City Engineer Hay said that his estimate of the cost of the work was $1200.

Ald. Duncan thought the offer was a fair one. The lots would make a nice park, with splendid bathing facilities. The question was, however, can the city afford another park there?

Ald. Hicks felt that the city could not afford to let a breathing space by the river get away from them. He favoured the idea of a park there.

Mayor Morrow thought the only course was to recommend that the offer be accepted and that the amount be placed in the estimates for the year. That was all that could be done this year. He suggested that Mr. Chipman and the engineer be asked to put in estimates as to the cost of the work.

Ald. Duncan moved, seconded by Ald. Hicks, that the city accept the property offered by the Dickson Company and build a septic tank as requested, provided the Engineer report that the cost would not be more than $1200.

The Mayor said he would like to have a proper estimate of the cost of the work before taking action.

Mr. Shook pointed out that a rider might handicap the company in the sale of lots. They had several purchasers in view, who wanted to build this fall and the Company wanted to be in a position to assure them that they would be provided with sewer conections.

Mayor Morrow pointed out that this year's Council was not in a position to pledge next year's Council to do the work.

The Mayor moved that the chairman of the Board of Works be instructed to get from Mr. Chipman and the City Engineer an estimate in writing of the cost of the work. This was seconded by Ald. Phelan.

The City Engineer pointed out that the Dickson Company had received an estimate from the Cameron Septic Tank Company to do the work for $1200. If this plan was acceptable there would be no need of a future estimate.

Mayor Morrow again reiterated that he wanted to be sure just how much the work would cost, so that the city would not be committed before knowing what expenditure it was going to involve.

Ald. Duncan's motion was then put and was carried, as the Mayor's motion, that reports be obtained from the City Engineer and Mr. Chipman and the Septic Tank people.

A letter was read from the Peterborough Lumber Co., complaining of the condition of Charles and Birdsall streets, and asking that repairs be made there.

Ald. Hicks explained that he had given authority to the Street Commissioner to take action there and this was approved of by the committee.

A report was read from the Street Commissioner in regard to an accident to Mrs. P. Warner, Harvey street who had fallen on the sidewalk and been hurt. She made no claim for damages, but would like monetary assistance to tide her over illness.

Mayor Morrow moved, seconded by Ald. Hicks that the matter be referred to the Legal committee.—Carried.

Street Commissioner Evans reported that he had cut down the brush on Mill stret. He recommended grading and other improvements there, the greater part of the cost, he thought, being due from the City Trust Commissioners.

The report on adoption was forwarded to the City Trust Commissioner.

A request for a sewer on Bethune street, between King and Sherbrooke street, will be granted when the petition is properly signed.

A sidewalk will be built on Hunter street, between Rogers and Concession streets, having been properly petitioned for.

A report was received from the City Engineer in regard to sidewalks on Dale and Engleburn Avenues, East City.

Mr. Hay reported that as Dale Avenue was only forty feet wide it would be advisable to secure the five feet reserve along the north side as far as the intersection of Engleburn Avenue and build the sidewalk thereon.

Ald. Duncan and Gillespie moved that providing a properly signed petition be presented that the sidewalks be laid as approved by the City Engineer.—Carried.

# ALL ROADS LEAD TO TORONTO EXHIBITION

All roads lead to the Toronto Exhibition just now and the attendance is ahead of last year's figures. The verdict is that the big fair is better than ever.

All the regular features are well carried out, including the blowing up of ships on the water front, demonstrations of Japanese fireworks and the judging of horses and cattle in the attached to the shrdlumunonat.ioio outside rings. Much interest also attached to the butter-making contest in the dairy building.

There is no lack of music on the grounds throughout the day, the concerts of the Grenadier Guards' band of the Sixty-fifth regimental band of Buffalo, and the band of the Royal Grenadiers.

The information bureau opened by the city council at 37 Yonge street has been doing quite a business. The bureau has a registration list of over a thousand splendid rooms in all parts of the city, and the rates for bed and breakfast, one dollar for each person, is considered very reasonable.

**NERO, THE TRICK HORSE**

Of all the shows on Midway there is none with a wider appeal than "Nero, the Trick Horse." The peculiarity about him is that he was born without a tail.

Little Nero is the whole show in himself. For 25 minutes he keeps a crowded tent in roars of laughter. He does everything but talk, and he nearly does that. At any rate, he answers all questions which his trainer asks him. He goes to church and prays there, and is not ashamed to say so. He does a startling teeter act, and rolls around in barrels, and generally has a good time, in addition to giving other people the same. This is one of the best shows of the Fair.

If Peterborough people will take in the attraction, they will see a number of familiar faces in charge.

**BIRD'S DINING HALL.**

A number of people visiting the Exhibition waste time going down town for meals. This is needless, for Bird's dining hall is on the grounds, opposite the Grand Stand. Here as good a meal is served for 25 cents as can be secured in the city. They can accommodate over 800 people and have an enormous staff of waiters. Quick courteous service is assured, no matter how large the crowd. The hall is in one of the permanent buildings and so the weather has no effect on the quality of the service. The boast of the management is that although they advertise that anyone not satisfied with the meal need not pay for it, they have not had one application for refund.

**THE FOLDING BATH M'FG CO.**

Mr. J. E. Saunders is in charge of the exhibit of the Fielding Bath Manufacturing Company, of Hamilton. This exhibit is attracting much attention on account of its novelty. A bath tub that will fold up into small space, it is made of cotton fabric and Brazilian Para rubber. This is tacked on a hardwood frame and braced with steel supports. When folded it takes up no room in the house. There are two sizes on exhibition—for adults and for small children. During Exhibition the Company makes a special rate of $6.50 (freight prepaid in Ontario) to Exhibition visitors. They are also advertising for live agents.

**THE ERIE IRON WORKS, LIMITED**

One of the new exhibits under the Grand Stand is the Erie Iron Works, Limited, of St. Thomas. They are showing their regular lines of plows, harrows, rollers and tanks, and are also exhibiting a new departure — a potato digger. Mr. William Boyd, the Company's genial traveller, is in charge of the exhibit and has a smile and a hearty hand clasp for everyone.

**THE HOUSEHOLD CONVENIENCE COMPANY.**

In the Process Building is placing "Wondershine" on the market, which removes tarnishes from gold and silver in remarkable fashion. It is particularly effective on embossed plate. One has merely to dip, rinse and dry.

**DEAN CANOES AND BOATS.**

For over twenty years Walter Dean has been building canoes and boats and his manufacturing plant, at Sunnyside, Toronto is one of the most complete in Canada. This year Mr. Dean is making a splendid exhibit of his canoes, skiffs, dinghys and motor boats, under the Grand Stand, and all lovers of water sports should be sure to see it.

"Dean" Canoes own every Championship in the American Canoe Association in 1908, 1909 and 1910. They also won eight out of eleven championships in Canada in 1908, eight out of ten in 1909, and eight out of eleven in 1910. Canoes are made on all popular models and quality is the ruling point throughout.

"Dean" Dinghys are equally good in quality, model and speed, as is evidenced by the fact that they have won the championships in Muskoka Lakes and Georgian Bay.

Everyone interested is invited to call at the exhibit, on the factory, or to send for illustrated catalogue of canoes, boats and accessories, to Walter Dean, Sunnyside, Toronto.

**JOHNS GLASS BLOWERS.**

The never failing Glass Blowers are just as popular this year as ever and their scientific and nimble work is always interesting to old and young alike. O. H. Johns, Glass Blowers, have one of the best shows on the Midway and are deserving of the large crowds they gather. Souvenirs are given to all visitors.

**CAREY SAFES STAND THE TEST.**

In the left-hand aisles of the Industrial Building is the exhibit of Fold and Featherstone, of Hamilton, representatives in Canada of the famous Carey Safes. This is the seventh year that this firm have had an exhibit at the Exhibition and they are by no means unknown in Toronto and the surrounding country.

The Carey Safe, which is displayed has made rapid strides in the past ten years. That this safe is second at the exhibit and will only be 100 the fires at Three Rivers, Que., Fernie, B.C., and Cobalt, Ont., and numerous other great fires in the last few years.

The Carey Safe being constructed with a solid 6-inch wall never fails to preserve the contents. Mr. Featherstone one of the firm, is in attendance at the exhibit and will lonly be too pleased to point out the many good qualities of the safe to anyone who calls.

**OPERAS TO BE SELECTED BY VOTE.**

The Aborn English Grand Opera Company is deciding its repertoire in the various cities it is to visit by popular vote. Several hundred names of theatre-goers are selected at random in each city, and to each of these a list of a dozen operas is sent to select from, with a return postal card with which to notify the Aborn executive officers in New York of the first, second and third choice of operas. At no period in the history fourths send them back with their facordingly. So far this plan has worked admirably, and of all those to whom these voting cards are sent, an average proportion of over three-thers, the selection is made and announced and the cast scheduled accerns. When a sufficient number is received from any one place to indicate what operas are most desired yourite operas marked. A good many have already been returned from music lovers in this city, and as soon as the usual number of votes are in, the selection will be announced, probably within the next fortnight. The Aborn singers will come to the Grand Opera House Wednesday night, September 28th.

**GOURLAY, WINTER AND LEEMING.**

One of the most attractive exhibits in the Manufacturers' Building, and one which appeals to the finer tastes is that of Gourlay, Winter and Leeming. This firm is showing, in the south-west corner of the building, the well known Gourlay Pianos and the Gourlay-Angelus Player Pianos.

The Gourlay-Angelus Player piano combines all the good points of the Gourlay piano and of the "Angelus," the first piano player, and the one which has maintained its supremacy by its simplicity, perfection and ease of action. The combination of these two instruments is ideal and many of Canada's most beautiful homes have the Gourlay-Angelus Player pianos. Several models of the Gourlay-Angelus on view contain an Angelus action of the very same model as that supplied in a Brinsmead piano by the British agents, to his late Majesty, King Edward VII shortly before his death.

Music lovers are invited to call at the exhibit and hear those instruments, or to visit the Toronto warerooms of Gourlay, Winter and Leeming at 188 Yonge street. There are many models and designs of the Gourlay-Angelus, as well as Gourlay pianos, shown here, and everything possible is done for the pleasure and comfort of visitors.

**WONDERFUL TOLEDO SCALES.**

"No Springs."

Our readers should not fail to see the Toledo Scale Co's wonderful exhibit in the Manufacturers' Building. This Company is to-day selling more automatic scales in Canada than all others combined, and guarantee to sell a better computing scale for less money than any other Company.

The merchant public have long been in need of an automatic weighing machine "without springs," and not until the "Toledo" was invented, was such a scale available. Its phenomenal sale has clearly demonstrated the superiority of its correct gravity principle and wide-awake merchants are rapidly losing faith in the old time "spring" scales, and even-balance scales, and discarding them for the up-to-date Toledo. Among the large users of those scales is the T. Eaton Co. Limited, who have purchased fifty (50) for their Toronto and Winnipeg stores.

The factory is at Windsor, Ont., and the head office at 235 Yonge street, Toronto.

**TRIED AND NEVER WANTING.**

Prominent in Society Row at the Exhibition is the "resting tent" of the Independent Order of Foresters for the accommodation of members and visitors to the Fair. The tent, which affords every comfort, is in charge of Mr. George A. Mitchell, the energetic Superintendent of Field Work of the order, which, year by year, keeps on forging to the front, at the same time showing results which are astonishing. "The history of the order from its beginning," remarked Mr. Mitchell yesterday, "shows that its patrons are drawn from the ranks of the intelligent, home-loving and home-building people, who constitute the bone and sinew of every enlightened community. It is, therefore, a tribute to the I. O. F. to be able to record the fact that the amount of insurance carried by its thousands of members is very much in excess of other fraternal orders."

The I. O. F. is now in the 36th year of its existence, and, therefore, has passed the experimental point. Its foundations have been laid on a solid basis, and every department of the order managed on business principles, thereby securing for all Foresters large and varied benefits at the lowest possible cost, consistent with safety and permanence. Among the visitors at the tent yesterday were many members from different parts of Canada and the United States, all of whom were present with handsome souvenir buttons bearing the likeness of the late Dr. Oronhyatekha, the master builder of the order, and Mr. Elliott Stevenson, its present Supreme Chief Ranger. A cordial welcome is extended the members and friends of the order to call at the tent. Mr. Mitchell is ably assisted by Messrs. James Glendenning and John T. Thompson, D. S. C. R.'s.

# IN THE WORLD OF SPORT

# THE OFFICIAL LIST OF ENTRIES FOR MONDAY'S BIG MEET AT RIVERSIDE

## Every Event is Well Filled and the Programme is By Long Odds the Best That Has Ever Been Presented to a Peterborough Crowd---Toronto Athletes Are Running a Special Train for the Occasion---The Sporting Event of the Year.

Everything is now ready for the big Penman games at Riverside Park, under the auspices of the local Y.M.C.A. on Monday (Labour Day) afternoon. As will seen from the list of entries given below, the finest bunch of athletes every assembled in Peterborough, will be here for the events. Outside contestants are coming from Toronto, Belleville, Montreal and Orillia. The Toronto Y.M.C.A.'s are running a special train for Peterborough for the games, and will bring a big crowd down with them. The intense rivalry between Toronto Central and West End Y.M.C.A.'s is indicated by the number of entries from each Association in every event. The track is in grand condition; fit to break records on, and Riverside Park will prove an ideal place for the meet. The finishes will all take place in front of the grand stand, so that people there will be able to see the interesting part of every race.

Much interest is being taken in the handicap walk in which Geo. H. Goulding, the famous walker, will be here. He is very popular here and will get a great reception from the crowd, who are anxious to see him perform.

Every event promises to be a race and there will be some tall doings. Sebert is booked to win the sprints, Knox or Tait the middle distances, Archibald the pole vault, Bricker, Archibald or Barber the jumps and Howard or Tressider the five mile, but there may be some surprises handed out and the talent may get bumped. The relay race, which brings together West End and Central Y.M.C.A. of Toronto and the Ottawa Y. will be an interesting feature.

Following are the entries.

**100 Yards, Boys.**

Roy Anderson, Ottawa.
E. Langdon, Ottawa.
W. Flowers, Peterborough.
V. Knox, Toronto Central.
F. Applegath, Toronto Central.
G. Applegath, Toronto Central.
G. Kennedy, Toronto.
W. E. J. Moriarty, Toronto.
W. E. Adam, Toronto W. E.

**100 Yards, City Championship.**

W. Flowers, Y.M.C.A.
N. Rue, Y.M.C.A.
H. Wood, Victoria Harriers.
E. Kelly, T.A.S.

**100 Yards Dash.**

C. Boyle, Orillia.
G. Barber, C. Thorley, V. C. Margutt, Sinclair, Toronto Central.
L. Sebert, M. J. Follinsher, R. Elliott, J. Platt, S. Mansfield, Toronto West End.

**One Mile Run.**

Ottawa—G. Guy, S. Cuff.
Toronto Central—G. Lister, C. Howard, J. Near, H. Tressider, A. C. Mitchell, A. Waring.
Toronto W. E.—R. Pratt, R. Holden, M. Brock, J. Tait.

**Running Broad Jump.**

Orillia—C. Boyle.
Toronto Central — G. Barber, C. Thorley, M. McEachern, F. Applegath.
Toronto — W. E. E. Gannery, E. Archibald, W. Marshall, M. Langstaff, J. Bricker, F. Bowes, W. Worthington, J. Platt, S. Mansfield.

**440 Yards, Boys.**

Ottawa—R. Anderson, E. Langdon.
Peterborough—N. Phelan.
Orillia—C. Boyle.
Toronto Central—V. Knox, F. Applegath, G. Applegath.
Toronto W. E.—H. Adam, J. Moriarty, G. Kennedy.

**Running High Jump.**

Toronto Central — G. Barber, A. Cameron, H. Duke.
Toronto W. E.—F. Bowes, J. Bricker, M. Langstaff, W. Marshall, E. Archibald.

**Mile Walk, Handicap.**

Toronto Central—Geo. Goulding, E. P. McDonald, W. Jackson, W. Russell.

**220 Yards Run.**

Toronto Central—G. Barber, C. Thorley, F. Margrett, Sinclair, Robbins.
Toronto W. E.—R. Elliott, M. Follinsbee, M. Brock, L. Sebert.
Montreal Y. M. C. A.—J. Platt.

**Half Mile Run.**

Toronto Central—A. Knox, J. Near, H. Tressider, H. L. Smith, A. Warring.
Ottawa—G. Guy, S. Cuff.
Montreal S. Mansfield.
Toronto W. E.—J. Tait, M. Brock, R. Holden, A. O. Wright, F. Bowes, R. Pratt.

**12 Pound Shot Put.**

Toronto Central—A. Cameron, A. Woolnough.
Toronto W. E. Worthington, Bowes Langstaff, Marshall, Archibald, Grannery, Sibley.

**120 Hurdles.**

Toronto Central—Barber, Cameron, McEachern.
Toronto W. E.—Archibald, Marshall, Wright.
Montreal—J. Platt.

**Pole Vault.**

Toronto Central—Cameron, Warde, Duke.
Toronto W. E.—Archibald, Bricker, Langstaff.

**12 Pound Hammer Throw.**

Toronto Central—Barber.
Toronto W. E.—Archibald, Bricker, Sibley, Grannery.

**400 Yard Run.**

Toronto Central—Thorley, Knox, Margrett, McDonald, Smith, Robbins.
Toronto W. E.—Sebert, Brock, Tait, Pratt, Wright, Elliott, Follinsbee.
Montreal—Platt, Mansfield.

**Relay Race.**

Toronto Central.
Toronto West End.
Ottawa Y. M. C. A.

**5 Mile Run.**

H. Vickers, Belleville.
G. Robinson, Peterborough.
H. Tressider and C. Howard, Toronto Central.

The officials are requested to meet at the Y. M. C. A. at 1 o'clock on Monday afternoon.

The following will be in charge:
Referee—Dr. A. W. MacPherson.
Field Judges—T. W. Stafford, Rev. W. C. Riddiford, F. Young.
Judges at finish—J. J. Howden, Fred McGrath, G. L. Galley.
Clerk of course—J. J. McLeod, of Toronto.
Timers—Jas. Brydon, Fred G. Mara, Toronto; R. M. Glover.
Scorers—S. Hall, C. Sisson, M. McCarroll.
Starter—J. J. Thompson.
Announcer—F. D. Craig.

# HE WILL BE HAPPY IF LANG MAKES GOOD

## Hugh McIntosh Says He Has Paid the Expenses of the Fighter in Order That in Him Australia May Have the Makings of a Possible Champion.

H. D. McIntosh, in his quest for a man to defeat the black heavyweight champion of the world, has taken on a contract. He brought Lang from Australia under the impression that he might match him with "Jack" Johnson whether the negro won or lost at Reno. Thus would a solid stepping stone to the goal aimed at have been provided—that is, of course, if Lang had proved successful; but evidently the big negro, though a professional fighter, does not desire to fight any more than he can help, for in response to Mr. McIntosh's offer of $50,000, and then $75,000 for three fights, with "Tommy" Burns, Langford and Lang (as named) for his opponents, he said he did not intend to enter the ring again inside of twelve months. As it is, Johnson, instead of making hay while the sun shines—that is, if he is satisfied he can make much more of that commodity—is having a good time in Chicago spending his motor car into trouble with the police and otherwise enjoying himself according to his bent.

Lang has proved an expensive hobby for Mr. McIntosh so far. The big Australian has been in this country verging on two months and has travelled everywhere first class and lived at the very best hotels at his patron's expense, hence there is no possible chance of a margin, however small, of profit for Mr. McIntosh. He must be a loser on the venture no matter how it turns out, but that does not trouble him. Mr. McIntosh is a great lover of his country, and he likes to see her well in the forefront, particularly as a producer of athletes. Consequently if Lang succeeds against Kaufman at Philadelphia on 15th of next month there will be no prouder man in the United States than Mr. McIntosh, and there will surely be great joy, in the land of Lang's birth, where his modest bearing and simple earnestness have won him hosts of friends.

That Lang should have a good chance with the best there is every reason to believe. He is a big, strong fellow, standing over six feet high and weighing about 196 pounds. He is full of ambition, chock to the chin with grit, and has skill (self taught) much more than is usual in these pugilistic times.

Lang is, or was until he took to the game of upholstered fists, a noted cyclist with remarkable powers of endurance, and he was a famous football player, playing the Australian game, which calls for quickness of thought and readiness of resource far beyond that demanded by many other pastimes, and it also requires that he who would excel must have pluck in no ordinary degree.

Lang, with only a few days' preparation, faced Johnson in Melbourne, Australia, four years ago and stood before him for nine rounds, making a fine showing the while, and then only withdrew at his seconds' bidding when want of condition had told its tale.

# MANY FREAK PLAYS OF 1910

PITTSBURG, Sept. 2.—The present year in the major leagues abounds in baseball sensations. Since the season opened there have been two no-hit games. There were six no-hit games in 1908. In that year Joss, of Cleveland, pitching against Chicago, on October 2nd, did not allow a man to reach first base. Last year, on April 15th, when the season opened in New York, Rud Ames held the Brooklyns hitless for nine innings, but they beat him in the unlucky thirteenth.

Five one-hit games have taken place this year. There were sixteen in 1909.

The Philadelphia National league team has worked the triple steal—a feat performed but three times in the history of big league ball. It was in the Philadelphia-Cincinnati game on the Reds' ground May 10th. Bransfield, Magee and Grant were the principals, and they started the steal while Fromme was winding up. Grant scored by sliding under the throw and the other two moved up one station on the play.

The three other occasions when the play was successful, with the names of the players concerned, are as follows:

September 26, 1905—St. Louis Athletics game; Padden, Sugden and Burkett.

April 27, 1908—Athletics-Washington game; Davis, Coombs and Oldring.

April 26, 1909—Boston-Athletics game; Lord, Speaker and Gessler.

Several triple plays are on the scorers' records for 1910. In fact, thus far it has been a busy year.

## BASEBALL YESTERDAY.

**The Eastern League.**

**Dr. de Van's Female Pills**

A reliable regulator. Never fails. While these pills are exceedingly powerful in regulating the generative portion of the female system, they are strictly safe to use. Refuse all cheap imitations. Dr. de Van's are sold at $5.00 a box, or three for $10.00. Mailed to any address. The Scobell Drug Co., St. Catherines, Ont.

# Few Pitchers Accomplish Feat Of Thirty Victories

Are bonuses to pitchers for winning a certain number of games a good thing for baseball? This question is as much in mind this summer as ever. Several big league club owners have offered their star twirlers sums of money providing they win thirty or more games, says an exchange.

When George Mullin had so much difficulty in pulling down his prize for winning twenty-five games last season, the Detroit management gave it out that no more bonuses would be offered, as it appeared to handicap this clever twirler t oa great extent as he neared his goal.

At the first glance the offer appears generous enough. When we think of the great number of games in a league schedule it seems easy enough for a pitcher to win the required number, but it isn't.

Chase back through the records of the National league and see how many pitchers have won thirty games. "Joe" McGinnity won just thirty for Brooklyn in 1900. Not until 1903 did another pitcher reach the mark. That year "Joe" copped thirty-one victories, and "Christy" Mathewson reached the mystic number. The following year the great "Iron Man" won thirty-five to "Christy's" thirty-three games.

In 1905 Mathewson was the only twirler to pass the mark, winning thirty-one battles. The next year brought not a single 30-victory pitcher, but in 1908 "Christy" came to the fore again with thirty-seven victories. Last year Mordecai Brown led all with twenty-seven victories.

The story of the American League twirlers is similar. "Cy" Young marched in victorious thirty-one times in 1901, representing the Boston club. The next season he added one to his string, making it 32 victories. He led all his league's slab performers in 1903, but won only 28 games.

"Jack" Cheshro was the shining light of 1904, his greatest year in baseball. He brought home the bacon forty-one times for the Highlanders, establishing a record for wins in a single season under modern conditions. "Bill" Bernhard of the Naps came within one game of landing inside the Murphy limit.

Until "Ed." Walsh's great year in 1908, when he won forty games and lost but 15, the American League had but one pitcher with forty victories.

# Chief Bender Is After The American League Record

The American league pitching record may rest in new hands, when the season of 1910 is completed.

"Chief" Bender has shown a desire to wrest the laurels from "Bill" Donovan, now holder of the league record mark in percentage of victories.

Bender won twenty games and lost three up to last Thursday. His percentage of .870 has seldom been equalled by any pitcher at this stage of the year who has performed in more than ten games. To equal Donovan's record, made in 1907, Bender must win five more games and lose one.

A herculean task confronts the big Indian, but at this distance it appears that the record is at his mercy. He has seemed to improve as the season advanced, if that were possible, and is getting just as perfect support from his teammates as at any time in the year. The Athletics have not shown the slightest sign of weakening under the strain of having in prospect a series of games with the National league champions, for the world's championship, and as everybody knows, the support accorded a pitcher is a prime factor in his success.

Going back to ancient history Donovan's record stands out like a beacon light on a dark night. Only once before in the history of baseball was his record surpassed. That was by Al. Spalding in 1875, when pitching for the Boston club. He won 58 games and lost seven. That looks a trifle greater than the records of today. Imagine the pitchers of to-day pitching sixty-three games. In 1908 Ed. Walsh, of the American league, pitched sixty-six games, getting a percentage of .727.

Bender may not obtain as great a percentage as Spalding, but with an ordinary amount of that luck and skill which he has possessed all season he stands an excellent chance of coming close to it.

# Johnson Wants $30,000 Win, Lose Or Draw

BUFFALO, Sept. 2.—Jack Johnson, who is appearing in a vaudeville turn at the Lafayette, stated to-day that he would meet Tommy Burns anywhere, providing Burns will agree to fight him under the same terms as he, Jack, fought the Canadian in Australia two years ago.

Burns then insisted on $30,000 win, lose or draw, Johnson and his manager, Sam Fitzpatrick, getting $5,000, just enough to cover expenses of the trip to Melbourne. Now Burns seeks another chance. And Johnson gets back at him.

"Thirty thousand to Mistah Johnson, win, lose or draw," insisted the champion this afternoon when questioned as to the possibilities of being matched to fight Burns in England in November. "Burns can have five thousand."

Johnson is training consistently and expects to confer with Burns' representatives in a few days. Johnson goes to Toronto next week to visit Tom Flanagan and will, after the close of his American tour, go abroad. The champion about this time last year promised Buffalo people that he would next appear before them as world's heavyweight champion. Jack kept his vow and Buffalo people rewarded him with a great ovation when his big grey touring car was recognized on Genesee Street.

# The Chicago Cubs Hit The Ball On The Nose

CHICAGO, Sept. 2.—If any one is very anxious to find which is the classiest ball team in the National league to-day one has only to glance over the recent record of the Cubs. After taking a peep at the scores and averages, fielding and batting, you will easily see why Frank Chance's aggregation of ball tossers are now leading in the home stretch in the race for the pennant. Take, for instance, the recent series with the Giants, in which several records were made that will probably stand for many seasons. In the last two games the Giants made thirty-one hits against twenty-six for Chicago and scored twenty runs against nineteen for Chicago. The total of hits for the series of four games is forty-three for the Giants and forty-two for the Cubs. Of these hits twenty-two of Chicago's were extra base drives for a total of sixty-one bases. The Cubs tore off eight home runs, thirteen two baggers and one triple. The four games drew approximately 80,000 persons, the lowest attendance for any one day being 15,000. Schulte, the happy-go-lucky right fielder of the Cubs, set a major league record by his great work at the bat against the Giants in the recent series that will probably stand for some time—that of making four home runs, two were made in the last game played. To Schulte belongs the credit of rapping out the longest hit of the year. In the first innings of the last game against the Giants Frankie drove the ball over a signboard back of the bleachers which is sixty-one feet high, clearing it by about twenty feet. The distance from home plate to where the ball went over the fence is 350 feet. Jimmy Sheckard's big stick was also very much in evidence. The Cubs' star left fielder managed to rip out two hits that were good for four sacks.

Government statistics furnish ample evidence that local option and reduction of licenses does not curtail drunkenness. Why not advocate the drinking of Regal Lager and promote true temperance.

**CAN CY YOUNG MAKE IT 1,000?**

Can Cy Young pitch 1,000 games in his big league career? This is the question Cleveland fans ask since Cy has won his 500th game, and bids fair to continue winning as often as the majority of good pitchers in the American league.

In his twenty-two years, Cy has pitched 800 games, or about that number. To pitch in 1,000, to use round figures, Cy must work in 200 more contests. Give him an average of twenty-five games a season, which the old boy can stand, and stand well, and it will take eight years to finish the mark.

# CANADIAN NAVY

Continued from Page 13.

parts for home. He is going down the Otonabee for a trip to-night and leaves the city for good this evening. It is four years since he was here before and he expresses his regret at leaving.

Actuated by these several considerations, I put forward this proposal. Let the ships be owned by Canada. Let them be maintained by Canada and administered by Canada. Let Canada maintain her list of officers, sufficient in number to man these ships. But let us make an arrangement with the Admiralty whereby there will be a common list of officers for the British, Canadian, Australian and New Zealand Navies. Let each Nation have on that list a proportion of officers roughly adjusted to the sign of its field.

Once we arrange that, several plans could be followed. We might arrange that Canadian officers should serve in alternate commissions in Canadian and in other vessels; or we might let them take their chances in the whole big service, content that if an Englishman commanded a Canadian Cruiser off Esquimault, and an Australian a Canadian ship working out of Halifax, a Canadian would be commanding a battleship in the North Sea and another Canadian a ship on the coast of South Africa. I should regard the latter as the preferable scheme. Observe this feature of the arrangement and I advocate—that numerous prizes would offer themselves to the Canadian lad entering the service, and that a Canadian who showed aptitude could hope to rise to be a British Admiral. Of course, the British officers posted to Canadian ships would be under the control of the Canadian authorities: just as the British soldier officers lent to Canada are under the control of our Militia Department.

I urge this as a great need of the situation. Separatism will be a great danger to the actual efficiency of the force in which we expect to take so much pride. We cannot hope to be better than the Royal Navy. Let us resolve to be as good. The only way to achieve that is to standardise our forces—to keep our officers and our men in the Big Navy.

Depend upon it, whoever tries to sell you a substitute is doing so for the profit and not for your good. "D and L" Menthol Plasters for stiffness, etc., have many imitators. Beware of the substitute. Get the genuine, made by Davis and Laurence Co.

## Tea Meetings at Toronto Fair

Ladies from every part of the world meet at the Toronto Fair and drink tea in the Red Rose Tea booth at the same old place in the Manufacturers' Building. Nothing else is so refreshing in the midst of a day at the Fair as a cup of truly delicious tea daintily served.

## RED ROSE "Is good tea" TEA

Industrial, Mr. R. H. Leary, was doing the Toronto Industrial on Friday, getting pointers for the Peterborough show.

Mrs. W. A. Greenslades has returned from her vacation and will resume her vocal and instrumental classes after Sept. 6th at her studio, 180 King street.

Dr. and Mrs. Middleton leave at the beginning of the week for Chicago, where the Dr. will take up some special work in the Chicago College of Dental Surgeons.

Miss Maud Watson of this city, will spend Sunday and the holiday at her home, Lakefield, where she will be the guest of her parents, Mr. and Mrs. J. Watson.

Miss Olive Gooding left for her home at Kenora this morning. Her sister, Miss Alberta accompanied her to Toronto. Miss Olive has been attending Bishop Bethune School, Oshawa. Her many friends in Peterborough will regret to see her leaving for the west.

**WAS BALD SIX YEARS.**

**Three Months of the New Scientific Treatment Restored His Hair.**

Baldness is caused by dandruff, which is caused by a germ. Kill the germ and it is almost certain that hair will grow again, if the follicle has not been totally destroyed. Nels Peterson of Lime Spur, Mont says: "I had been bald six years, and had tried all kinds of 'cures,' but without any effect whatever, until I tried Herpicide. November 16, 1909 I began using Herpicide, and in three months a fine growth of hair covered my head completely." Ask your druggist for Herpicide. Everybody can have luxuriant glossy hair, if Herpicide is used thoroughly. Take no substitute. Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

For sale by McDermid and Jury, druggists; also Payne's drug store. $1 bottles guaranteed.

## OBITUARY

**MRS. MORRIS MEAD.**

The death occurred this morning at seven o'clock of Mrs. —. Mead, wife of Mr. Morris Mead, lot 1, concession 4, Douro. Deceased was seventy-seven years of age and a life long resident of Douro. She was well known and highly respected. Death was due to a general break up caused by advanced years.

The late Mrs. Mead is survived by her husband, four sons and two daughters. The sons are Morris and John, of Douro; James, of East City; Michael, of Saginaw, Mich. The daughters are Mrs. John O'Toole, Otonabee, and Mrs. John Herr, of Asphodel.

The funeral will take place Monday morning, at 9 o'clock to St. Joseph's church and thence to St. Joseph's cemetery for interment.

**The Barber Shops will be closed all day Labour Day. 2-53**

## CONTRACTS LET FOR THE SEWER WORK

The Board of Works committee of the City Council met at noon to-day and awarded the contracts in conection with the new sewer accommodation in the south part of the city.

The tenders were opened at last night's meeting and were referred to City Engineer Hay and the consulting engineer, Willis Chipman, C.E., who went into them this morning and made their report to the committee at noon.

On their recommendation Mr. E. Conroy was awarded the contract for the sewers, storm drains and pumping station. The Ontario Sewer Pipe Company were given the contract for the vitrified pipe and Messrs. Taylor and Hall for the supply of reinforced concrete pipe. Agreements will be prepared by the city solicitor. The work is to commence within ten days.

## FREE CONCERT

The 57th Regiment will spend Labour Day in Gamenee with a general shooting match on the ranges. The regiment will be accompanied by both brass and bugle bands and will leave on the 8.30 G. T. R. train, returning on the 9 o'clock train at night. A concert by the band and a "cook's parade" by the Buglers will be features of the day's outing. A large representation of the regiment will attend.

## WILL COST MORE THAN WAS THOUGHT

(Continued from page 16.)

Messrs. E and F. Conroy, contractors.

To Corporation of the City of Peterborough, Dr.—

| | | |
|---|---|---|
| By work as per contract | $30333.32 | |
| Extra work outside contract | 601.74 | |
| To payment on ac. $24266.66 | | |
| Balance | 6668.40 | |
| | $30,935.06 | $30935.06 |
| By balance | | $6,668.40 |
| To complete bridge— | | |
| Total expenditure to date | $26241.11 | |
| Balance due contractors | 6668.40 | |
| Estimated amt required to finish bridge | 2100.00 | $35009.51 |
| Appropriation | | 32500.00 |
| | | $2,509.54 |

Yours truly,
T. A. S. HAY,
City Engineer.

Ald. Hicks, chairman of the Board pointed out that the confusion was the result of paring the estimates of the cost of the work down too close. This policy had been carried out in Peterborough for years; estimates were put down as low as possible; no provision was made for contingencies, and the result was generally an overdraft. He was satisfied that the work on the bridge was well done and would rather face an overdraft, knowing this to be the case than to build the bridge under the appropriations, and feel that a good job had not been done.

Mayor Morrow thought the city should have been informed earlier in the year that there was going to be more money needed for the work. He did not like it coming in so late in the year.

Ald. Bradburn said that the bungle in the figures meant that half a mill would have to be added to the rate next year. There is a surplus of some $3,000 or $4,000 left over from the construction of bridges over the creek. The city will ask the Legislature for power to divert this sum to the Smith Street bridge. In the meantime no action was taken.

## ELLIOTT'S BIG STORE

**A Boy's Needs Grow Just as the Boy Grows—We Fill This Need**

It is said that the boy from infancy to maturity represents in his development the various stages of the civilization of the human race. However that may be, the stage that is making mothers think just now is his capacity to wear out his clothes.

In close connection with this a little talk on yarn may be much to the point. Did you ever consider the varying strengths of the different yarns? This can easily be tested. Try it to-night after tea. Take a yard of stocking yarn, make a loop at both ends, put your finger through the loop at one end, fasten the other end to a weight, do not jerk the thread, lift it gently until it gradually lifts the weight from the floor.

By this test you will find that 2 lbs. will break a poor home-made yarn; a good home-made yarn will lift 5 lbs. and a Scotch fingering yarn will lift 11 lbs., thus showing the latter to be twice as strong as the best home-made yarn.

The reason for this is, the Scotch fingering yarn is combed and the home-made yarn is carded; when yarn is carded they put in all the wool that is on the fleece, but the combing machines can only use the long fibres, the short fibres fall through the combing machines to the floor, they call these short fibres "noils," and they are usually sent over to the carding machines, thus weakening still more the carded yarn. We have boys' stockings made from this strong Scotch fingering yarn in all sizes for 25c per pair. Double Thread Worsted Stockings at 40c and 50c.

(Stocking Department—South Side Main Floor).

**Boys' Boots.**

Just next to the Stocking Department is the Shoe Department, where you will find a satisfying range of Boys' Strong School Boots, all sizes at $1.00, $1.25, $1.50, 200 and $2.25. These are made from good material and well put together.

Elliott's Big Store, Peterborough.

## How to Make the Fat Comfortable in Summer

If you are fat and have difficulty in breathing or walking or eating and if you find that the heat is exhausting to you during the heated term you will be interested in knowing that the famous Marmola prescription is now being prepared in tablet form and that one of these little tablets taken after each meal and at bedtime will reduce your fat at the rate of from 12 to 15 ounces per day. These tablets stop fat from being made and they assist the body to throw away the fat already made in a natural manner. They are harmless and you will find that their use will build up your system to a higher degree of perfection than ever before. They have perhaps the greatest army of responsible men and women who have written of their effectiveness than any other prescription ever written. You need not diet or exercise and you may eat when and what you will. The food you now eat turns into fat. The food you eat will make

take a Marmola tablet after the meal; and more than that, you will so strengthen your digestive organs that you will need no assistance in a short time even from Marmola Tablets. Every druggist sells them or you may write the Marmola Company, 323 Farmer Bldg., Detroit, Mich. A case of Marmola Tablets costs only 75 cents for [illegible]

# How do you eat?

Some people eat with their palates—and others with their brains. To which class do you belong? Those who eat with their palates eat only the food that **tastes** good, no matter whether it **nourishes** the body or not. Those who eat with their **brains** eat food which supplies the greatest amount of **body-building material** in the most digestible form.

## SHREDDED WHEAT BISCUIT

not only tastes good but IS good. It supplies all the elements needed for building sound bone, healthy tissue and good brain; and more, is easily digested.

Made in Canada of the choicest selected Ontario Wheat—A Canadian Food for Canadians. Served with milk or cream and sliced pineapple, fresh berries or preserved fruits, it is a healthful, delicious substitute for heavy meats and soggy pastries.

## WON FIRST PRIZE

Mr. H. P. Kennedy's horse "The Preacher," a bay gelding, on Friday took first prize at the Canadian National Exhibition at Toronto, in the combined class, not over 15.2 hands, for conformation, style, all round action, pace and good manners.

## MUSIC AND DRAMA

Eighteen years of unbroken success the record of that famous dialect play of the opening is coincident with at the Grand Opera House, Saturday September 10th, matinee and night. The play was produced in 1891, but it went a begging for several years prior to that time before managers could be induced to look upon it with favor. The Swede as the central figure seemed to lack their confidence, although it introduced to the stage a brand new dialect and an ingenious conception never before dreamed of.

Ben Hendricks saw a future in this novelty that other managers had lost sight of and early realized the growing Scandanavian population of the great Northwest, which would give it liberal support, and upon that and his former study of the character in his native haunts, was at least willing to give it a trial, which he did entirely to his own satisfaction, and the chagrin of the "wise managers" who had prophesied his failure. Ole Olson's initial tour netted a profit of over $50,000, and Ben Hendricks became famous in almost a single night, and is now a great favourite as a delineator of the Swedish dialect character. In short, he has become in his particular line a parallel to Denman Thompson plays treat admirably the unsophisticated life of a simple but honest people.

The present season finds Ole Olson in the West after an absence of two seasons, and its return will be welcomed as of yore.

It will be the same old Ole, with the same good old story that has always pleased so well, but all new music and songs of the class that dispels dull care. That is what the public want. The supporting company will be practically the same, always pleasing. "Never went out on a cheap scale yet" said Mr. Hendricks last August in New York City, when, in his usual painstaking way, he was personally preparing this attraction for the road.

## SUCCESSFUL STRIKE

**Examiner Special.**

NEW YORK, N.Y., SEPT. 3.—Eighty thousand cloak makers who have been on strike nine weeks, will return to work, having secured a notable victory, securing raised wages, uniform preference and better hours.

## ARE OUT IN NEW YORK

BUFFALO, SEPT. 3.—Signal men are out all over New York Central system on strike for more pay and better hours. Officials of the road relieve effect of strike, and trains are running about as usual.

## DOWNEYVILLE PICNIC

The annual picnic in connection with the congregation of St. Luke's R. C. church, Downeyville, will be held in Burley's Grove on Wednesday, September 14th. In addition to other attractions, a number of prominent public speakers are invited to be present. Admission to the grounds and dinner, 50c., children 25c. All are invited. 8d-54-1w.

**SCHOOLS TO RE-OPEN.**

The Public and Separate schools and Collegiate Institute will all re-open for the Fall term on Tuesday next, Sept. 6th.

## TIT-BITS

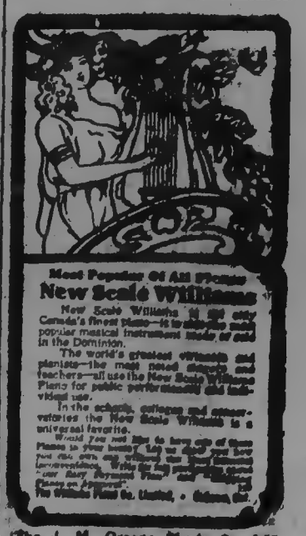
So a splendid trained nurse who makes her specialty the bringing back to health of sickly babies, told me the other day.

It was a pretty harsh indictment of that class of personage whose very name evokes a thought of tenderness and wisdom and a sort of mellowed and intensified motherliness, so naturally I demanded an explanation.

She gave it.

"They are the worst enemies of our modern methods. Not all of them, of course, but some. Because their babies lived and grew up in spite of what mistakes they made they try to have their daughters make the same mistakes.

"There is no doubt about it that modern methods have reduced infant mortality immensely, and though of course it's true that plenty of babies grow up into healthy children with the old careless methods, a baby brought up in the modern way has twice the chance to grow up that they did.



Most Popular of All Pianos
New Scale Williams
New Scale Williams is all over Canada's finest piano—it is the most popular musical instrument made or sold in the Dominion.
The world's greatest virtuosos and pianists—the most noted singers and teachers—all use the New Scale Williams Piano for public performances and individual use.
In the schools, colleges and conservatories the New Scale Williams is a universal favorite.

And thousands of others who know after much experience that the National Cash Register is indispensable in business.

Progress has been the watchword of the Company from the beginning, and ever will be. To this end a large corps of experienced gents, instructors and inventors are constantly studying the needs of merchants throughout the world and devising new systems to upply these needs. In the factory, inventors and mechanical experts are continually engaged in experimenting with the single idea of mproving the product, while from the users of N.C.R. machines the Company is eager to have suggestions and criticisms which will add o the improvement of registers, or business systems in general.

## The Connecting Link

**BETWEEN YOU AND YOUR PROFITS IS THE NATIONAL CASH REGISTER**

You protect your stock of goods. You check each shipment of goods you receive with the invoice, to make sure you are not "shipped short." You insure your goods against loss by fire.

Your money, when placed in your bank, is reasonably safe.

So far so good. ***But, how about your money from the time it leaves your customer's hands until it is placed in the bank?*** How about the hours it lies uncounted and unprotected in your cash drawer?

Mr. Merchant: When your goods leave your shelves all insurance has stopped—unless your present method of handling your business absolutely insures your getting a full dollar in return for every dollar's worth of merchandise sold—unless it positively insures you that a permanent record will be made of every charge sale.

But, does your present method insure you this?

Think this over.

Many merchants go to considerable trouble to protect their goods and to check their bank accounts, but they seem to forget all about their money and accounts in their stores.

A National Cash Register is the connecting link between your stock of goods and your bank account.

It safeguards your money and accounts against loss.

Without it you cannot hope to bank all your profits.

Over 825,000 persons are using National Cash Registers. Isn't that evidence that you need one?

Prices as low as $20.00. Easy monthly payments, or a liberal discount for cash.

Send for catalogue and prices to-day.

# ...al Cash Registers

## Complete with ALL Improvements

During the year 1909 we sold over 105,000 National Cash Registers, which is 24,300, or 30 per cent. more than had been sold in any previous year. April, 1910, output was 13,063 Registers, valued at $1,389,175.

This enormous output was handled without increase in operating expenses.

There has always been a demand for a low-priced cash register. Heretofore this demand has been filled with registers lacking certain desirable improvements.

We will no longer manufacture registers without improvements. This simplifies our line and enables us to manufacture in greater quantities.

This all means a big saving in cost of manufacture. We are going to give you the benefit of these savings.

Therefore we have reduced our prices from $10 to $100 each since August, 1909.

Further, owing to our Canadian Plant, we save you 30% duty. This is a big saving to you.

All cash registers made by us will now be equipped with every known improvement, at prices lower than those formerly charged for registers lacking certain features of protection.

Our present line of registers meets every requirement for all classes of stores, large or small, at prices as low as $20.00.

When you buy a National Cash Register you are guaranteed a first-class mechanical principle, first-class material and first-class workmanship. This insures accuracy and durability.

Our Guarantee: "We guarantee to furnish a better Cash Register for less money than any other house in the world," has never been equalled. If you are interested in knowing more about this "Guarantee," or any register we make, sign and send in the coupon. It will place you under no obligation to buy.

Terms Cash, with a liberal discount; or easy monthly payments without interest. All sales F.O.B. Toronto.

Your Clerks May Be As Honest As The Day, But Mistakes Will Happen!

**The value of a guarantee, like that of a**
**Our guarantee is backed**

1. 25 years' experience in the building of Cash Registers.
2. 825,000 National Cash Registers have been manufactured and sold, and we have satisfied users in all parts of the world.
3. A plant of 34 acres of floor space, and more than $10,000,000 invested.
4. 1,547 patents, containing over 28,000 claims.
5. Labor-saving machinery of the most improved and exclusive pattern. All Registers thoroughly inspected and tested before they are shipped.

Our System of Travelling Inspectors constantly covering your territory insures you continual satisfaction and the best possible value from your National. We protect you AFTER you buy.

## When Goods Are Sold From Your Shelves

will the sale be handled *absolutely* without loss to you?

That's the one question that has caused storekeepers so much worry and money in answering. Thousands of merchants say *"Yes, absolutely sure,"* because they are using National Cash Registers.

A National Cash Register will insure a permanent record of all the goods sold from your shelves.

With a National Cash Register you are sure to get all the money in exchange for the goods you sell. The National is the *only register* that will do this.

*Don't guess*—it is costing you more every year than the price of a National Cash Register to guess at this question.

With a National Cash Register in your store, you know, no matter where you are, that you have *a perfect mechanical record* in the register, under lock and key, of *every cent's worth* of goods *sold from your shelves*, whether the purchase be *cash, charge, C.O.D., goods carried or delivered.*

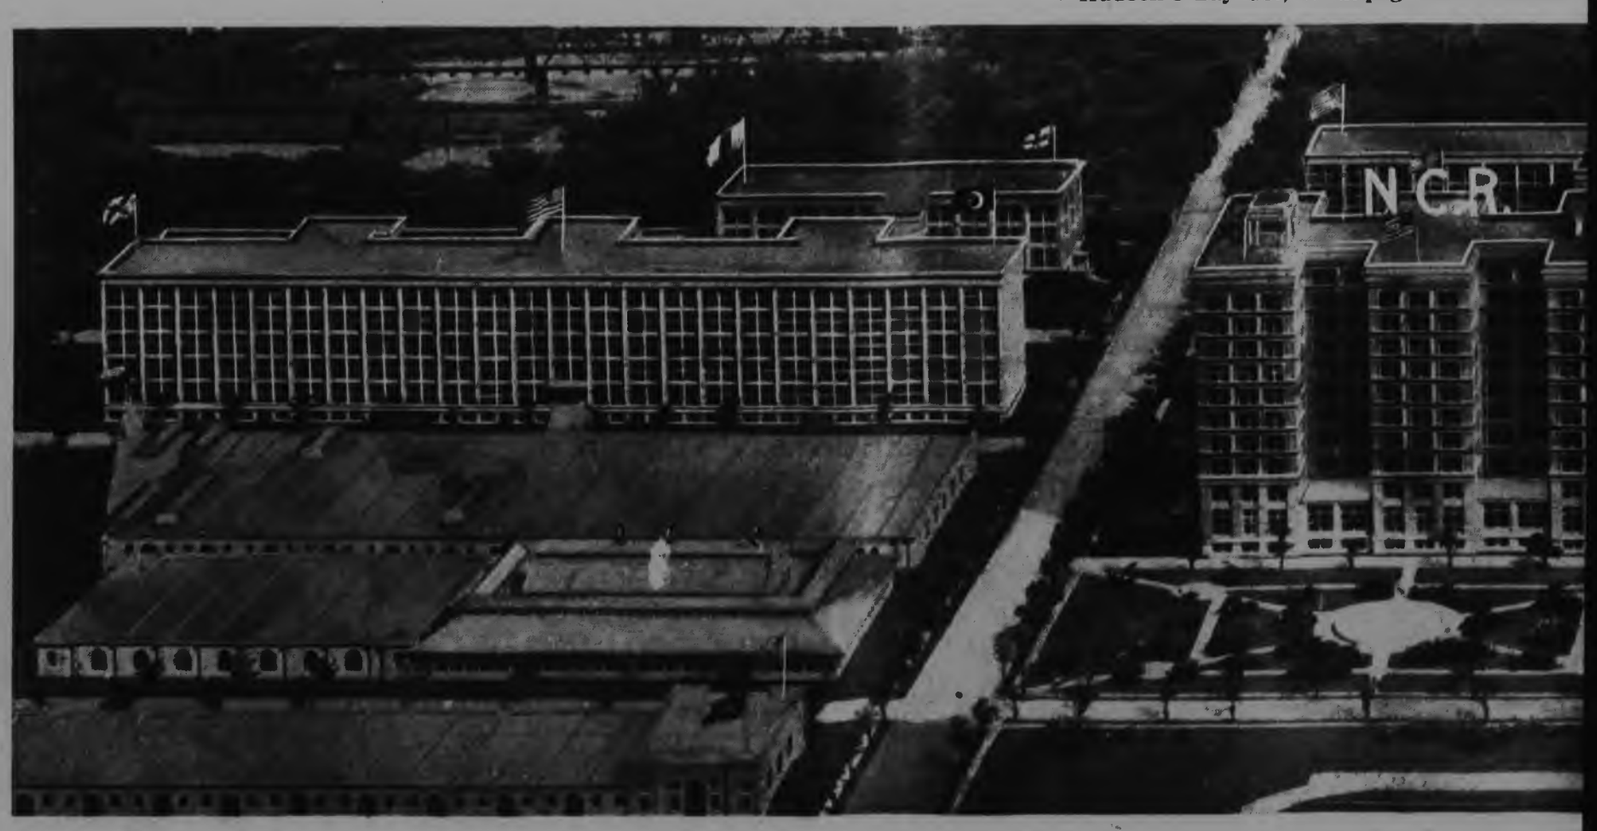
That's a strong statement. *Think* what it means to *you,—all the profit on all the goods that leave your store.*

We can prove this. *You* will be convinced when you *understand* how it's done.

We manufacture 250 styles and sizes of National Cash Registers. There is one just suited to your particular needs. Prices as low as $20.00. Small monthly payments if desired.

SOME of our prominent customers whose investment in National Cash Registers runs into hundreds and thousands of dollars:

T. Eaton Co., Limited, Toronto and Winnipeg.
Canadian Pacific Railway Co.
Canadian Railway News Co.
Robert Simpson Co., Limited, Toronto.
A. E. Rae & Co., Montreal and Ottawa.
Bell Telephone Co.
Paquet & Co., Quebec.
Henry Morgan & Co., Montreal.
Russill Hardware Co., Toronto.
P. Burns & Co., Calgary.
Hudson's Bay Co., Winnipeg and Branches.



Our Dayton Plant utilizes 158 acres of ground, and contains 32 acres of floor space. Our Factory is the largest in the world We employ 7,700 persons in all parts of the world. We have $10,000,000 invested in the manufacture of cash registers and the supplies. We have, in addition to our Dayton plant, factories in Toronto and Berlin. We sell 97 per cent. of all the cash registers made and sold in the world. We own 1,296 patents, covering approximately 21,500 claims. We make and sell 526 styles and sizes at prices from $20 to $960.

### SIX DAYS IN BOAT.

**Officers and Crew of Wrecked Ship Found In Atlantic.**

London, Sept. 6. A wireless message received yesterday morning from the steamer Mauretania, bound from New York for Liverpool, gives further details of the rescue on Friday night of the missing officers and crew of the burned British tramp steamer West Point. The first news that the shipwrecked men had been picked up was transmitted to the American side of the Atlantic yesterday.

The West Point was burned at sea a week ago Sunday. On Thursday the Leyland Line steamer Devonian, westbound, picked up six of the crew while the remainder, making another boatload, were found by the Mauretania.

At 11 o'clock on Friday night the Mauretania was battling with a northerly gale that a lookout sighted the West Point's small boat. The steamer hove to and the little boat came alongside. It was found to contain Capt. Pinkham, the second officer, two engineers and 12 seamen.

All of the party were well, in spite of the fact that they had been tossed about in an open boat for six days. Capt. Pinkham said that just before he made out the lights of the Mauretania he had given up hope of being saved by a passing vessels and was steering toward the Azores.

The rescue was effected in 38 minutes from the time the lookout discovered the little craft bobbing along on the high waves. The passengers of the Mauretania subscribed $450 for the relief of the West Point's men, including $10 which one contributor paid for Capt. Pinkham's cat.

# America Is Their Field

**London Priest Says That Protestantism Is a Soulless Religion and That While Half Is Tending to Rome the Other Half Is Tending to Unbelief—Congress May Meet Every Other Time In America**

Montreal, Sept. 6.—Everything is in a forward state of preparation for the opening of the twenty-first Eucharistic Congress, and the first of the kind ever held on Canadian or American soil, although it is said that the pontifical legate will hint in his opening speech this evening that these congresses may alternate in future between Europe and America.

It is said, in fact, that the authorities at Rome realize that, while the church is losing ground in the Latin countries of Europe, the progress being made both in the neighboring republic and the Dominion is sufficiently satisfactory to permit the pope's representative throwing out the hint in question.

The legate spent yesterday at the different religious establishments and spoke to the workers at Notre Dame yesterday afternoon.

The talk of the town yesterday was Father Bernard Vaughan's sermon in St. Patrick's on Sunday, the famous London priest having declared that Protestantism was a soulless religion and that half of the English Protestants were going to Rome, and the other half to unbelief.

Yesterday afternoon, the reverend father strolled into The Gazette office and interviewed Editor Kidd, who is a strict Presbyterian; yet he told the father that he had no fault to find with his sermon, as good Protestant doctrine demanded that a man should state in the pulpit what he thought was truth. At this reply, Father Vaughan smiled and retired.

The great opening to-day at the St. James Cathedral will be one of the events of the week, as the legate will deliver his address in French, also reading the Pope's letter to the people, after which Mgr. Bruchesi will reply on behalf of the congress.

It appears to be pretty certain that a red hat will come to the brilliant Archbishop Bruchesi, but it is not at all probable that the event will take place for some months at least. On Thursday, the cardinal will visit the Italian Church, and address the people in their own tongue, while the Monsigneur of Montreal, who also speaks Italian, will also speak in that language.

Speaking at the Monument National last night Father Vaughan of London, Eng., again lived up to his reputation as a vigorous lecturer. "Character" was his theme, and he declared there was "too much slim, sleep and slopp." "We want people to stiffen before they die," he cried.

At the same time Father Vaughan took an optimistic view of the future of the faith. Catholics were increasing, other denominations decreasing. If he were a Protestant he would work for all he was worth against race suicide, lest Catholics should gain possession. But it was needless to talk to a Catholic audience of race suicide.

**Collision at Sea.**

New York, Sept. 6.—With her decks swept clear of lifeboats and rigging and her starboard rail and upperstructure raked fore and aft, the Brazilian steamer Tapajose yesterday put into port bringing a tale of collision at sea and of the mysterious disappearance of the vessel causing it. The Tapajose left New York bound for various Brazilian ports, and when 35 miles southeast of Scotland Light, suddenly came upon an unknown four-masted schooner bearing down upon her through the fog. The schooner struck the steamer on the starboard bow, and her anchor fouled the Tapajose's fore rigging, which was torn away like so much paper. The supports of both upper and lower bridges were also swept away, together with the lifeboats and davits. The impact was such as to dent several of the steamer's plates.

**France Buys Airships.**

Parir, Sept. 6.—The Ministry of War yesterday ordered the purchase of ten military monoplanes and twenty biplanes within the coming three months. This will give the French army an aerial flotilla of sixty by the end of the year.

The army's aeroplanes to be acquired in 1911 must be capable of carrying a weight of 300 kilograms or approximately 661 pounds in a continuous flight of 300 kilometres, or about 186 miles at a minimum speed of 80 kilometres, or 37.26 miles an hour.

The Ministry offers a premium of $20,000 for a machine fulfilling these conditions. President Falleries has offered a cup as a trophy for the constructor of the French machine which wins the most honors at the Bordeaux aviation meeting, Sept. 11.

**Bear From Arctic.**

Newport, R.I., Sept. 6.—Two polar bears, two walrus, six musk ox calves, and a great variety of birds are among the living trophies brought back from the far north by Harry Whitney of New Haven, Conn., and Paul J. Rainey of New York, the wealthy sportsmen who arrived here Sunday night after a summer's hunting beyond the Arctic circles.

**Charged With the Crime.**

Alix, Alta., Sept. 6.—The inquest to inquire into the death of Hector Murray, contractor, who was apparently killed by Clarke Woods, a laborer, here on Wednesday last, brought in a verdict yesterday morning charging Woods with the crime. The preliminary hearing of Woods will be held at Stettler next Wednesday morning.

# Labour Day Was Wet

**Fifty Thousand Representatives of Organized Labor Are In Line and Not a Strike Mars the Harmony of the Day—Toronto Unionists Are Drenched—Winnipeg and Guelph Are Soaked by Rain.**

Toronto, Sept. 6.—Out-of-door pleasures were at a severe discount yesterday. Indeed, it hardly looked at all like a holiday until the rain finally ceased early in the evening. Traffic on the lake steamers was not much greater than the normal of exhibition time, the water being rough. The outside amusement resorts had a bad day.

The rain yesterday was general in Ontario along the lake and to the north. In the western part of the province, it was fair. The downpour in Toronto totalled nearly 1 1-2 inches of water. The street car track on Queen street, east of the Woodbine became undermined, and the service was tied up during the afternoon.

Traffic at the Union Station was heavy.

**Parade at Guelph.**

Guelph, Sept. 6.—The dignity of labor was upheld here yesterday under the most trying climatic condition. In spite of the heavy showers that fell throughout the day the local trades and labor unions succeeded in carrying out a very successful program of labor demonstrations.

In the morning there was a big parade, in which about 400 men marched in attractive uniforms, and with pretty and interesting floats. The prize for the best union in the parade was carried by the local union of moulders, who were about 75 strong, while the printers carried off second money. The Guelph Musical Society and Galt Kilties' bands took part in the parade and gave concerts afternoon and evening in the winter fair building, where the big program of athletic sports was carried out.

**Heaviest Rainfall In Years.**

Winnipeg, Sept. 6.—Drenching rain all day effectually doused all Labor Day celebrations and sports. Rain started about 6 o'clock Sunday afternoon and has continued steadily ever since, varied by occasion cloudbursts. It will be measured by inches for the twenty-four hours, and it looks like continuing. Reports from Manitoba and many other western points indicate general heavy rainfalls, and harvesting operations will be severely checked. Local old-timers claim it is the heaviest continuous fall for several years.

**The Day at Quebec.**

Quebec, Sept. 6.—Favored by ideal weather, the celebration of Labor Day by the various labor unions was magnificent. There was yesterday morning a grand procession of all the national unions and yesterday afternoon a grand picnic on the fair grounds.

**50,000 Parade In New York.**

New York, Sept. 6.—For the first time in fifteen years, Labor Day dawned in Greater New York without a single strike to mar the celebration of the day.

"With the cloakmakers' long strike settled in the nick of time, there is no labor trouble of any kind in the city—a most magnificent showing for organized labor," was the comment of Edward J. Hannah, grand marshal of the biggest Labor Day parade ever planned in the metropolis.

The only indication of any impending labor disturbance was of extremely minor importance. It was announced yesterday that the Stage Hands' Union, representing employes of 51 theatres, have presented demands for wage increases averaging about 18 per cent., and declare they will strike on Sunday next if their demands are not granted. The stage hands at present receive from $18 to $28 a week, and the stage carpenters from $30 to $45. *It is said that a compromise* settlement by the theatres is likely.

Fully 50,000 paraders, representing practically every labor organization in Greater New York, participated in the parade. The members of the Cloakmakers' Union, the settlement of whose strike last week is looked upon by organized labor as a great moral victory, were given a noisy ovation all along the line of march.

**Trio Assaulted Police.**

Toronto, Sept. 6.—Policeman Disney took a severe beating at the hands of three men last evening, but finally, with the assistance of Policeman Older, landed the trio in the Agnes street station, charged with assaulting the police. One of the three assaulted a citizen in Wilton avenue, just east of Victoria street at 6.30. Disney, who has only been in uniform three weeks, started in to arrest the man, when he, with the other two, turned on him.

Disney was knocked down, beaten and kicked, sustaining several cuts in the face and head, and a deep gash in the back of his neck, in addition to an assorted collection of bruises. He stuck to the job, however, and when Policeman Older arrived, the three were quelled. They are Edward Dillon, 170 Duchess street, 23 years, an expressman; Thomas McEwen, 1 Alice street, 20 years, a teamster; Jos. McGrogan, 51 Fleming street, 23 years, a teamster. They are charged with assaulting the police.

**Two Drown In Collision.**

New York, Sept. 6.—The barge Bristol, in tow from Newport News to New York, laden with 1,600 tons of pig iron, is lying at the bottom of the ocean, off Barnegate, N.J., as the result of a collision with the outward bound Italian steamer Dinamare, bound for Norfolk.

Two of the barge's crew, J. Brown, the captain, and Wm. Holmes, a seaman, were drowned.

**Liquor Law Being Enforced.**

Vancouver, B.C., Sept. 6.—Provincial license and police officers are having a lively time enforcing the Government's new regulations for the liquor traffic. At Prince Rupert, where for a time blind pigs flourished during the early history of the town, fines have been imposed aggregating between $8,000 and $10,000, while in other cases it has been made so warm for undesirables in the trade that they have left the country. At Sheep Creek an application for a license was peremptorily cancelled and a fine of $300 imposed for illicit selling at the established hotel. At Fort George two men were sentenced to a year's imprisonment, but given two weeks in which to leave the country before sentence commenced.

**Cholera In Italy.**

Bari, Italy, Sept. 6.—Fourteen deaths from cholera and twenty new cases were reported from Southeastern Italy during the past 24 hours.

**Queen's Own Officers Ill.**

London, Sept. 6.—Seven of the Queen's Own officers are suffering from influenza, and one of them is seriously ill. The sudden transition from the Canadian summer to changeable British weather is believed to be the cause.

**Loggers' Hospital Burned.**

Vancouver, B.C., Sept. 6.—A loggers' hospital at Rock Bay, one hundred miles up the coast, burned Sunday. Fourteen patients, who occupied beds, were removed with great difficulty, and only one was injured or burned.

***The Cause***

**of Eye Troubles is usually not disease, but defect in the structure or muscles of the Eye.**

**Consider the incessant work of the Eye, the instantaneous and exact adjustment demanded that sight may be always equal, single and ready to every change in position, distance and light. The nerves compel and control the mechanism in these instant adjustments. The mechanism may be defective, that is—**

**There may be defects in the structure, or focus of one or both Eyes;**

**The Muscles may be imperfectly balanced, so that both Eyes do not work in harmony;**

**There may be inability to focus for close work;**

**There may be strain through overwork, abuse, poor lights, bright reflections, etc.**

***An examination will tell you just what condition your Eyes are in.***

# "Take the Siding"

**A Warning by Which an Accident Was Averted.**

**By EMMA ARCHER OSBORNE**

Copyright, 1910, by American Press Association.

After an absence of four years from Radnor, James Casey had returned as superintendent of the eastern division of the railroad and had married Libbie Nelson. The wedding was only yesterday, and now that it was over and they had started for the east the villagers had time to revert to the story. The Nelsons were so proud of their new son-in-law that they could not restrain themselves from telling, despite the protestations of Libbie and Jim.

Shortly after the night of the church concert when Casey heard Libbie Nelson sing that song which had something in it about "angels in charge" he commenced to think things about angels, and one day his imagination evolved an angel, or something as near like one as he could picture. When Casey's mental vision beheld it he broke into a satisfied grin. If brought forth to visual observation it would have appeared strikingly like Libbie Nelson.

Things went along quietly for two months and then something happened.

While Casey was on his way to the yards at Buffalo to board 800 for the return trip an ambulance went galloping past him. Ambulances pass people frequently in a big city, and there was nothing about this one in particular to apprise Casey that Nat Taylor, fireman for Bill Whalen, who was running 809, was inside. It was a nasty night, and Taylor had slipped on the icy tracks and broken a leg.

When Casey, with a few extra minutes on hand, sauntered into the train dispatcher's office he found that institution in voluble ferment. Of course everybody was sorry for Taylor, but a fireman with a broken leg was of small concern in comparison with the awkward situation in which he had left them.

A special, carrying the president of the road from New York to Chicago on business of vital import, was at that moment only ten miles from the station and coming at the rate of a mile a minute.

Bill Whalen, one of the best engineers on the road, and 809, the pick and pride of the roundhouses, were out in the depot yards waiting to relieve the incoming and already overheated locomotive. Whalen and 809 were ready to couple on at a moment's notice, but no substitute had yet been found for Taylor, and there were precious few minutes to spare.

Casey was not given long to ponder on the excitement of the office. He had scarcely more than crossed the threshold when Thompson, the train dispatcher, literally leaped across the room and grasped him by the arm.

"Get out to 809 as quick as you can!" he shouted. "Hurry! For God's sake hurry! Don't stop for anything! Run! Whalen 'll tell you!"

Casey peeled off his coat as he was climbing into the cab, and he had scarcely grabbed a shovel and commenced to throw coal when the special, straining and wheezing, crunched on the track alongside.

Switching and coupling were matters of seconds only, and, although the night was intensely cold, two men stood on the platform of the single coach anxiously watching proceedings. One was a large, stern visaged person. He was restless. He chewed at his short white mustache, buttoned and unbuttoned his fur coat and never took his eyes off the engine until they were getting under headway.

"Do your best, boys!" he shouted across the tender to the men in the engine as they shunted on the main track and set off. The determined nods he received in reply were assuring.

Wakeful farmers and belated villagers were puzzled by the unusual traveler as 809 with her single consort momentarily flashed on their view like a monster one eyed demon wraith, sliding, gleaming, screeching across country.

The special had left murky Cleveland and had climbed the long west grade to the bluff land bordering the lake. The snow had turned to sleet, and everything indicated that it had been sleeting for some time in that locality. The landscape glistened, telegraph poles and fences shone like crystal specters, wires were thick with incrustations, and after a distance they were sagging, and then some were broken and dragging on the ground.

"There's no use talking," growled Whalen, "I've got to slow down some or we'll be blown into the middle of nowhere. Get away from this devilish ice, then we can make up."

He eased 809 a bit. Yet she puffed and pulled and stuck nobly to her task.

"If orders to clear the tracks didn't get through before those wires went down we may be all in," observed Casey.

"You're about right," replied Whalen glumly, "but the only thing I can do is to watch for signals."

"And in a drizzling sleet like this there might just about as well be no signals," continued Casey.

They had passed Dempsey and in another forty minutes would reach Radnor. Under ordinary conditions the local was due at this point, but if no error in orders had occurred she should be waiting now on the siding at Putnam, the station beyond, giving right of way to the president's special.

The strain was beginning to tell on both men and on Whalen in particular.

Casey was turning away from coaling when he noticed Whalen lean against the window post.

"Come, take the lever for a minute," he called. "I'm feeling bad"—Before he could finish he slid to the floor of the cab.

Casey, bending over him, saw he was unconscious, but whether dead or in a faint it was impossible for him to determine in the cramped space and under the stress of responsibility which suddenly presented itself. In a flash he realized his position. He recalled afterward how he was planning what to do even as he stepped across Whalen's prostrate form and grasped the throttle lever.

The fire bed would last to Putnam, and there he would coerce some one from the sidetracked local to finish the run. Yes, he could do it—that is, if the track was clear.

Casey was leaning half out the cab window in his eagerness to watch the track and catch the signal. His dark eyes pierced into the great invisible; his head was bare and his black hair was a disheveled mass; his neck, which was bare also, despite the sleet and cold, seemed to spring out twice its usual size from his masterful shoulders. His face was tense. He had called into command every bit of human vitality he had in him to battle with the horrible possibilities he was facing and was facing alone.

Finally the signal came to view—very faintly, waveringly and indistinctly at first, then a trifle plainer until he caught its full significance.

"Clear track!" it indicated.

He reached toward the lever to throw on more speed, but instead, out in the black night and just ahead of the cab window, glided the spirit form of Libbie Nelson. She was peering intently ahead.

"Take the siding!" she motioned to Casey, and instantly his hand was impelled to the whistle and 809 was shrieking for the switch to the Radnor sidetrack.

Casey felt as if a kind of insanity had seized him, yet he slowed down and then found himself watching for the switch signal, and watching eagerly, impatiently.

He brought 809 to a full stop. He waited.

Why didn't they send the signal? Would the siding never be opened? Was it ice locked? What was wrong anyway? He asked himself a thousand questions as he grew more and more frantic with apprehension.

It seemed that he had waited there a hundred years when he finally caught the flash of the waving lantern.

Then he had to get 809 into action again. It took only a few seconds, but these seconds seemed hours.

When the locomotive moved forward Casey, pressing forward also as if to carry the great, throbbing engine with him, looked half mad with dread of the imminent—the imminence of something terrible and near.

But 809 didn't fail him. She obeyed the commanding touch which he applied to the levers.

And Casey was obeying the commands of the recognized supernatural, yet for the life of him he couldn't understand.

The special shot on the siding with not a second to spare from colliding with the local.

Then he understood, and his gray, trembling lips murmured one word. That word was "Libbie!"

When Casey staggered down from the cab he was weak, so weak that it was all he could do to stand. At first he seemed to forget who or where he was. Then gradually his mind cleared and he looked about him.

"Whalen's come to," some one told him. "Had some kind of a spell."

They had taken Whalen into the station.

Stamping up and down in the snow and the slush was the president of the road, blustering with mingled gratitude and severity and firing questions at the dazed Casey.

Then Casey fully realized his danger. It was wonderful what things he remembered, things that he had scarcely noticed when they happened, even details after he gave way to the supernatural. One thing, however, he failed to mention when telling of the peculiar influence that had controlled him, and that was the name of Libbie Nelson.

"It was a premonition," he insisted.

"Young man," said the president, gripping Casey's rough hand when they were parting at Chicago, "those who were responsible for that snafu back yonder will be dealt with summarily.

"As for yourself, the rules of this company compel employees to run trains by orders and signals instead of by premonitions. As you have disregarded a signal, even though it would have proved disastrous if you had obeyed it, it would be the duty of your boss to dismiss you. I shall, however, take it upon myself to do that. This is your last trip. Consider yourself discharged."

Casey was weary and jaded almost to the limit of human endurance. He was the picture of woe and would have turned away, but the president still gripped his hand.

"But," he continued, with a twitching around his mouth, "there's something in you that calls for better things than firing on a locomotive. I have your name and address—here are mine," handing Casey a card. "Be at my office in New York two weeks from today. I'm in a tremendous hurry now. Thank you for your splendid run, and goodby!"

Two weeks later Casey called on the president and received his reward.

**Piles Or Hemorrhoids**

**This Most Torturing Disease Invariably Yields to DR. CHASE'S OINTMENT.**

Piles and Dr. Chase's Ointment are connected in the minds of most people because this treatment is recognized as about the only actual cure for this annoying disease.

Until you have tried Dr. Chase's Ointment you will not believe how quickly it brings relief from the nasty, itching, stinging, burning sensations.

It is just as sure to make a cure if you persist in its use. Naturally and gradually the ulcers in the rectum are healed and cured and life is again made worth the living.

It doesn't mattter what the cause, Dr. Chase's Ointment will bring you relief every time, and that right quickly. Put it to the test and you will be able to write just as enthusiastic a letter as this one:

Mr. James Hurley, Pockshaw, Gloucester Co., N. B., writes: "I cannot find words of praise to express my opinion of Dr. Chase's Ointment. For thirty years I was troubled with itching piles and tried all sorts of remedies, none of which gave me more than temporary relief. What other treatments have failed to do Dr. Chase's Ointment has done. It has positively cured me of itching piles."

If you can get Dr. Chase's Ointment today you can make this your last day of suffering from piles. Should your dealer not have Dr. Chase's Ointment in stock write to us for a free sample box, or enclose 60 cents for a full size box, which will be sent postpaid.

No substitute will satisfy you if you realize the merits of Dr. Chase's Ointment. For sale by all dealers or Edmanson, Bates & Co., Toronto.

**SHE WAS SURPRISED**

**When Dr. Morse's Indian Root Pills Cured her Chronic Liver Complaint**

Mrs. R. Smith, of Winnipeg, Man., tells an interesting story of relief from almost intolerable sufferings:

"I can hardly tell you how great my sufferings have been. Chronic liver complaint accompanied by biliousness were a daily source of trial to me. Every day I experienced the sickening effects of these ailments. I longed for some medicine that should permanently drive them away.

Hearing of Dr. Morse's Indian Root Pills, I thought they were worthy of a trial. My surprise was indeed great. From the very first I experienced relief. Continuing with them I found my troubles were slowly but surely leaving me, and before long I once more knew what it was to be free from the harassing effects of the ailments that had long sickened and weakened me. So great is my faith in Dr. Morse's Indian Pills that I shall never on any account be without them."

Dr. Morse's Indian Root Pills cure Bowel and Kidney as well as Liver troubles, and keep you healthy. 25c a box at your dealer's. 14

**HOW WORDS CHANGE.**

**A Knave Was Once a Lad and a Villain Only a Peasant.**

In the New York panic of 1857 a Frenchman declared that he should lose all his "propriety." It sounds like something to laugh at. Nevertheless "property" and "propriety" have the same French derivation. Words have a knack of shifting not only from their sources, but also out of their own original meanings.

We accept an anecdote as a short diverting story. Etymologically it means something as yet unpublished.

To prevent, which is now to hinder, meant in its Latin original to anticipate.

A girl was anciently a young person of either sex.

Mountebank was the term applied of old to the patent medicine vendor who mounted a bench to proclaim his wares. It is from the Italian.

Paradise in oriental tongues meant only a royal ark.

Astonished means literally thunderstruck, coming from "attonare."

A knave was once merely a lad and a villain only a peasant.

To be silly was in its ancient sense to be blessed.

To be officious was to be courteously ready to do kindly office.

If a man was facetious, in the early English, he was but urbane.

An idiot was a private citizen as distinguished from an officeholder.

Frontispiece, if considered from its Latin source, is not a picture in the front of a book, but the front view of something. The Latin word is frontispicium.

Beldam is not an abusive term in its French source, but means a fair lady.

Shamefaced comes from a good Anglo-Saxon term which means not one exhibiting shame, but one protected by shame, being therefore innocent and modest.—New York World.

**The Flower Harvests of Grasse.**

When Catherine de' Medici sent her skilled physician Pata to Grasse with orders that he was to found a laboratory for the distilling of the perfumes of flowers she could not have chosen a better situation. Grasse and the hamlets that surround it are a paradise for growing flowers, so sunny are they and so well protected from the mistral. Tier upon tier of terraced beds are cut out upon the mountain side. Countless patches of gardens lie in the plains below. They are always full of flowers more or less in bloom. Jasmine, tuberose, roses, mimosa, jonquils, hyacinths, carnations, orange flowers and many other things are grown in masses not for ornament or pleasure, but solely for their scent. The first harvest of the year is that of violets. Then follow hyacinths and jonquils, roses and orange blossoms, pinks, carnations and mignonette, jasmine and, lastly, cassia and tuberoses. —Wide World.

**Dutch Worthy of Great Trust.**

Replying to an address of welcome from the Pietermaritzburg municipality on a recent occasion, General Botha, the Union Prime Minister, reiterated his intention of making the Union a success and of proving to the British people that the Dutch were worthy of the great trust reposed in them. Any Government, Gen. Botha continued, which adopted any other policy would be short-lived. The British flag was the best thing for the Union, and ensured the protection of the young nation. He promised to do his utmost to kill racialism throughout the Union, and urged the use of common-sense, which would enable the races to live peacefully together.

**Lady Minto's Successor.**

To follow Lady Minto in India will not be the easiest of tasks, but Lady Hardinge is one of the few women who can be depended upon to perform it adequately. A graceful, pretty, and very charming personality is hers, she has enjoyed since her girlhood the intimate friendship of Queen Alexandra, of whose household she was for years a member. Lady Minto's care for the children of India will be continued by her successor, who takes a very special interest in the poor children of London. Her own children are two sons well advanced in their teens, and a ten-year-old daughter who owns the uncommon Christian name of Diamond.

**An Earl in Musical Comedy.**

The Earl of Yarmouth, who recently appeared, under his stage name of "Eric Hope," in "The Pigeon House," a musical comedy of which he is the author, has had a good deal of stage experience. Some years ago he created a sensation by not only singing and acting in public, but also by appearing in the role of a skirt-dancer. He is said to have twirled his skirts with a skill and dexterity worthy of Loie Fuller herself. The earl is the eldest son of the Marquess of Hertford, and married, in 1903, a sister of Harry Thaw. It may be remembered that this marriage was dissolved two years ago.

**On Nagging.**

My son taught me a lesson on the subject of "nagging" when he was but four years old and one that I have never forgotten. He had been guilty of a small misdemeanor and had tried to wriggle out of it by not telling the exact truth. I gave him a mild spanking and, as has always been my custom, talked the matter over afterward. I began by saying, "Now, Robert, if you had told me the truth I should not have punished you."

He stood before me, scraping one foot along the carpet, and he looked up at me and said, "What would you have done?" And I answered, "I should have only talked to you." "Well," he drawled, "how long would you have talked?"

He is a big boy in high school now, but when times arise requiring a reprimand and I get started I still hear that little voice, "How long would you have talked?" and I go right to the point and say what I have to say on the subject; but, in the boy's own language, I "cut it short" and never refer to it again unless it is absolutely necessary.—Harper's Bazar.

For one who can stand prosperity there are a hundred that will stand adversity.—Carlyle.

# PEOPLE'S PULPIT.

Sermon by CHARLES T. RUSSELL Pastor Brooklyn Tabernacle.

## Messiah's Coming Kingdom Spiritual

"Behold, a King shall reign in righteousness, and princes shall rule in judgment" (Isaiah xxxii, 1).

Brooklyn, Sept. 4.—Pastor Russell preached to-day in the Academy of Music, our largest Auditorium, the "Tabernacle" being of insufficient capacity. He had a very attentive hearing. There were many Hebrews in the large audience. He said in part:

"Coming events cast their shadows before." Startling shadows are all about us. A great change in the affairs of men is indicated and acknowledged by all thoughtful, intelligent people. The world's pace during the past fifty years astonishes everybody. New conditions meet us on every hand. The majority of books written half a century ago along scientific lines are considered rubbish to-day. Rules and customs and theories of the past, supposed to be immovable and absolute, are abandoned as worthless—in chemistry, in manufactures, in art, in finance and commerce. All these changes necessitate a new view of social conditions and a re-examination of the relationship of religion and the Bible to man and his conditions, as seen from the present viewpoint. The business and social world have been compelled to keep pace with the steps of progress, some of them gladly and some of them reluctantly. But religionists have been placed in a most awkward position. Religion and moral sense constitute the backbone and fiber of the best progress in civilization. The perplexity of religious thought, and its manifest inability to adjust itself to the changed conditions, is working a serious disadvantage to all disposed to look to the Almighty for guidance in life's affairs.

The increase in worldly wisdom, the improved human conditions, the advancement along scientific lines in material prosperity have turned many of the world's brightest intellects away from God and from the Bible. Many of these, still professing Christianity in an outward, formal manner have really abandoned it in favor of a theory of "civilization." They have wandered from the Divine Revelation, the Bible, into paths of speculation—their own and other men's. They have cogitated that the reverse of the Bible statements is the Truth—that instead of man falling from the image of God into sin and death, he is rising from a brute or monkey plane upward, gradually, to Divine heights. Instead of looking for a great Deliverer, Messiah, Saviour, Life-Giver, they are hoping to be let alone by any outside influence, that certain fancied laws of Evolution might help them upward and onward to glory, honor and immortality.

The result is that religious thought to-day everywhere and in all denominations is chaotic. The whole of Christendom has practically become Agnostic—admitting that they do not know the Truth nor how to adjust their reasoning faculties to present consecration. They are in an expectant attitude — seeking light. Nevertheless many fear the light lest it shall make manifest cherished errors or selfish hopes and ambitions which must be abandoned. But they are still pretending to know many things which we and they know that they do not know. But daily the strain becomes more intense. Gradually everybody is recognizing that there is a great crisis along every line—that the people are awakening and thinking and will no longer receive their errors.

Fifty years ago Christian people, full of faith in the Bible which they seriously misunderstood and read with sectarian spectacles of various colors, were fully agreed that God had given his Church the commission to convert the whole world and to establish Messiah's Kingdom, when the nations would learn war no more, but beat their swords into plowshares and their spears into pruning-hooks. Zealous Christian people urged that the heathen were going down to a hell of eternal torment at the rate of ninety thousand every twenty-four hours. And noble men and women sacrificed their earthly interests for the assistance of the heathen to prevent that awful catastrophe, to help thwart the very program of God which some other Christian people of an earlier day had declared was predestinated and foreordained as unalterable Good was certainly attempted. We trust that some good was accomplished. We know that some harm was done, in that fallacious conceptions of the character and plan of the Creator were promulgated amongst the heathen, which have hardened and embittered some of them.

But by and by practical people sought for statistics, and now know that there are twice as many heathens in the world as there were a century ago. Of course, there are unthinking and unstatistical people who refuse knowledge and who are to-day claiming with a commendable zeal, but a reprehensible ignorance, that large contributions of money would enable them to capture the whole world for God. Nevertheless, the masses no longer see the matter as they did, and can no longer be swayed to the same extent. Thinking people refuse to believe that God for centuries has sat calmly viewing the situation, allowing millions to go to eternal torment. They refuse to believe that their hearts and sympathies are more tender than those of their Creator.

Even the heathen are getting awake to the inconsistency of what has been given them under the Gospel label. They are finding out that the word Gospel signifies "good tidings," and that what has been preached to them is the most awful message conceivable—that all of the heathen and the majority of their civilized neighbors and friends and relatives have been decreed, sentenced, foreordained, to eternal torture because of ignorance, because of a misbelief in respect to which they were thoroughly honest. Perplexed, the missionaries ask, What shall we preach? The message of damnation does not sound good to the heathen, and they do not run after it nor feast their souls upon it. The question comes to the ministers and professors of colleges throughout Christendom and they are perplexed what answer to give. The majority of them have become "higher critics" and no longer accept the Bible as the Word of God; they are Evolutionists and no longer believe the Gospel which the Missionary Societies were organized to proclaim. They are in perplexity. And many of them are prepared to abandon the former theory of missions and to continue their work henceforth merely along humanitarian lines. Indeed, within the last twenty-five years missionary effort has turned gradually to secular education and medical practice in the interests of the heathen, with little religious doctrine—and so much the better.

Everybody is agreed that the Kingdom of Messiah cannot be brought about by the wholesale conversion of the world. And logical people see that larger numbers have been lost to Christianity in civilized lands during the last twenty-five years than were ever claimed to be converted amongst the heathen. We say lost to Christianity, because why should anyone be called a Christian who has lost all faith in the Bible—in the Law, the Prophets and the teachings of Jesus and his Apostles? The great cloud of bewilderment which encompasses Christendom is realized by all earnest people — churchmen and others. And no wonder there is a certain dread associated with the dark cloud. What kind of a storm will result? And what will be the effect upon the great religious systems of civilization? It is to join hands against these ominous conditions that the clergy of all denominations are arousing themselves in favor of Church Union or Federation of some sort. But the people—the people feel comparatively little interest in the proposition, which they will oppose, however.

The difficulty with the present situation is that we have stupidly and blunderingly misread the Bible. We have twisted what we did read and picked out certain portions which pleased best our fancies and supported best our various creeds. We have neglected the honest, truthful study which we should have given to our Heavenly Father's message. The confusion of Christendom is the result. That confusion and perplexity the Scriptures portray, assuring us that we are in the midst of a great falling away from faith in God and in his Revelation. We see fulfilled all about us the wonderful prophetic and symbolic picture of Psalm 91. A thousand fall at our side and ten thousand at our right hand—only the "Israelites indeed," in whom there is no guile, will be kept from stumbling in this evil day: The chaos which we already see everywhere in evidence is only beginning.

The fault of Christendom has been the rejection of the Divine Plan and the acceptance instead of a human plan. The Church was going to convert the world—going to conquer the world for Jesus and present it to him as a trophy. Alas we have not been able to convert ourselves, which is the particular work the Master gave us to do. Greater humility would have shown us our folly long ago.

Bible students do not need to be reminded that all through the Old Testament Scriptures God's promises abound, telling Israel and all who have ears to hear of the glorious reign of Messiah and of the success of his Kingdom and how the result will be that "every knee shall bow and every tongue confess to the glory of God;" of how "all the blind eyes shall be opened and all the deaf ears shall be unstopped;" of how the blessing of the Lord will be with Israel restored to his favor and operate through Israel to the blessing of all peoples. We remember the prophecies which picture earthly governments and show us their termination and the establishment of the Kingdom of Heaven on their ruins. We remember the Jubilee picture repeated by the Israelites every fiftieth year, proclaiming liberty for the people and restitution of all that has been lost through sin, and which is to be restored through Messiah's Kingdom.

Bible students know also how the New Testament abounds with references to the Kingdom! the Kingdom! the Kingdom! Nearly all the parables that our Lord gave were in illustration of something connected with the Kingdom or the class called out of the world to inherit the spiritual Kingdom. All such know, too, that the Great Teacher proclaimed that Kingdom and taught us and all of his followers to pray for it, "Thy Kingdom come! Thy will be done on earth as it is done in heaven!" They all know, too, that all of the Apostles refer to that Kingdom and point the Church to its establishment for the realisation of her hopes—the time when the marriage of the Lamb will take place—the time when God's New Covenant with Israel will go into effect. The time when he who scattered Israel will also gather them, and when the Law shall go forth from Mt. Zion, the Celestial Kingdom, and the word of the Lord from Jerusalem, the capital of the earthly princes. God's remedy is just what humanity is coming to realize it needs. In its establishment, as the Scriptures declare, "the desire of all nations shall come" (Haggai ii, 7).

Bible Students are more and more coming to see that this Gospel Age is the time in which Messiah is selecting from amongst men—of Jews and Gentiles—a saintly class and is testing and proving their loyalty to God and to righteousness. These are to be Messiah's assistants — the Bride, the Lamb's wife. As Abraham typified the Heavenly Father, so the Messiah's Bride and joint-heir and co-laborer in his Kingdom was typified by Rebecca. Thus seen the great Plan of God has progressed well.

Our neglect of the Word of God and our study instead of the Talmud and the Creeds of the dark ages have been our undoing. Under all this wrong influence we have failed to cultivate the fruits of the Holy Spirit—meekness, gentleness, patience, long-suffering, brotherly-kindness, love. Instead we cultivated pride, ambition, selfishness. We have done those things which we ought not to have done, and we have left undone those things which we ought to have done. Our help must come from God. According to our understanding of the Scriptures help is near, but coming in an unexpected way. Pride and selfishness blossomed and brought forth a fruitage of strife. The bad example set by Christian people has extended to the world and been thoroughly appropriated. It has become the spirit of the world—of all classes. Now, as faith in the Bible is waning and respect for God and his word is proportionately waning, what could we expect but that which the Scriptures declare is at hand, namely, the "time of trouble such as never was since there was a nation?" The selfishness which both rich and poor, learned and ignorant, have cultivated will, in that time of trouble, be represented in conflicts between labor unions and capitalistic trusts. The Bible declares that then "every man's hand will be against his neighbor"—all confidence will be lost—the bond of human sympathy and brotherhood will be utterly snapped in riotous selfishness.

The Scriptures identify this trouble with Messiah's taking to himself his Kingdom power and beginning his reign (Daniel xii, 1; Revelation xi, 18). Thank God, the intimations of the Scriptures are that the conflict of that time will be short. It must, however, last long enough to teach humanity a lesson never to be forgotten—that God and his arrangements must stand first and must be obeyed, if blessing is sought.

When it is remembered that Messiah's Kingdom is not only to bless those living at the time of its establishment, but gradually to awaken the dead from the slumber of the tomb and to give all of Adam's race a full opportunity for attaining life eternal or death eternal, then it will be seen that the Kingdom must be a spiritual one. Then, too, Messiah's Kingdom of light is represented as superseding Satan's Kingdom of darkness — both spiritual. With this thought our text is in full accord—"A King shall reign in righteousness." (Messiah will be that Great King, his Bride being associated with him.) And "princes shall execute judgment in the earth," carrying out the decrees and regulations of the Heavenly Messiah. This is the meaning of the Lord's promise to Israel, "I will restore thy judges as at the first, and thy counsellors as at the beginning" (Isaiah i, 26).

The princes who will execute judgment will all be Israelitish and all perfect men—tried and approved of God. They will be the Ancient Worthies, Abraham, Isaac and Jacob and the prophets. These men, great in faith and obedience to God, will be known to the Jews as the "fathers," as the prophecy respecting them declares, "Instead of the fathers shall be the children, whom thou (Messiah) mayest make princes in all the earth." They will be the children of Messiah in the sense that they will derive their resurrection life from him, the Great King. Indeed, the Scriptures assure us that eventually the whole world shall receive new life from Messiah, in offset to the life received from Adam forfeited through sin. Thus amongst the various titles of Messiah mentioned by the prophets we find that he will be the "Age-lasting father," as well as the "Prince of Peace and mighty Elohim and a wonderful Counsellor" (Isaiah ix, 6).

### Steam as a Fertilizer.

For some time large growers of tomatoes, cucumbers and similar vegetables for the London market have been accustomed to inject steam into the soil with the view of destroying insects and slugs. The plan operates very well for that purpose, but the unexpected fact has developed that the soil thus treated increases greatly in fertility.

### A Reasonable Fellow.

"What sort of a clerk does he make?"

"He's open to argument. And when I can convince him that a piece of work comes within his province and that he was hired to do it he is very efficient."

### Makes Them Run.

Cityman—I suppose you have a dog on your place to keep tramps off?

Subbubs—No, but I have a horse that scares them away.

C.—A vicious horse?

S.—No, it's very quiet. It's a sawhorse.

### Her Selection.

"What kind of cigars will you have," asked the dealer—"light, medium or strong?"

"Strong ones, by all means," said the blushing damsel. "Strong enough not to break in the young man's pocket, you know."

### His Patent.

"A million dollars seems a trifle high, daughter."

"But he has a patent of nobility, dad."

"Well, let's be a bit cautious. When does this patent expire?"

### Bad as a Bull in a China Shop.

On most voyages of a first-class ocean steamer about 3,000 pieces of glass and crockery are broken.

### Acute Sense of Hearing.

Camille—Clarence isn't so efficient when he talks to you through the phone, is he? Estelle—Isn't he? Even through the phone I can hear his heart flutter.—Exchange.

### Know the Outcome.

Sympathetic Father—Parted from Harry forever, have you? Well, perhaps it's just as well not to [illegible] other for a day or two.—Life.

A sunny temper gilds the edges of the blackest cloud.—Gutheie.

### INDIANS' PRIDE.

Native Reserve and Conservatism Keep Them Apart From Whites.

Even among the Five Civilized Tribes there still remain many communities wholly full blood. These people drift together, following their own ideas of life, speaking their own language and retiring before the whites with the same strange reserve and pride that characterized them in their wild state.

Although claiming the name of several Christian denominations and following certain beliefs with devoutness, their ways of thinking, their dislike of innovation and their aversion to work have made them withdraw to the mountain districts. Whether this so called reserve comes from pride or a distrust of the white man or timidity or merely a stubborn conservatism, it produces the same result, the backward and nonprogressive Indian.

There is, too, a certain mystic quality that holds the Indian aloof, says the Southern Workman—a quality that we do not understand and with which there is little sympathy in our everyday life. He is so much of a philosopher that he looks upon our strenuous life with some contempt, dismissing our efforts for personal comfort and material advancement with the remark that "the white man is heap trouble to himself." While people call him lazy because he does not care to exert himself for those things which seem important to whites, yet to some religious ceremonial or some artistic expression his application is persistent, and the "patience of an Indian" has passed into a proverb.

### WORKED LIKE A CHARM.

She Joined a Card Club in Order to Forget Her Work.

An Atchison woman who found the monotony of dishwashing, cooking and laundry work proving too much for sanity was urged to join a card club. "It will take your mind off your work," she was told, and so she joined. In order to attend she had to get up that morning an hour earlier to get her work done; a neighbor girl was hired to stay with the baby, and when, flustered, nervous and tired, she left the house fifteen minutes late she was followed by the screams of her three children because they couldn't be taken along. But she had her mind taken off her work at the card party. Of that there is no doubt, for when she made a misplay her partner, a perfect lady, walked right over her, then picked her up and shook her, and then chewed on her for fifteen minutes. She became so frightened that the little wits she had under her hair fled, and she made another misplay with another partner, and this woman, also a perfect lady, talked to her in a way the woman should have been ashamed to talk to a dog. It was more than she could endure, and, weeping like a sprinkling cart, she got up and went home.

"It did even more than it promised," she told her husband. "Nothing has ever happened to me in all my life that so effectively took my mind off my work. Why, there were times when I even forgot I had you and all the children."—Atchison Globe.

### Athletics and the Unfit.

Those who are unfit should not indulge in athletic games is a warning by Dr. Woods Hutchinson in Outing.

A boy, for instance, is a little weak after a mild attack of infectious fever, pneumonia, influenza or tonsilitis, and his heart is beating faster and more violently than it should on exertion. But the team wants him or he wants a record, or both, and away he goes into training.

"Suddenly one day the heart can no longer drive on its overload of blood, and down goes the runner or oarsman in an attack of heart failure," and athletics get all the discredit.

The same danger lies when there is no training, the sport being purely informal. It lies also where the girl just convalescent persists in taking part in a long anticipated dance. Only that phase of common sense which is manifested in common prudence is necessary, to avoid such perils.

### Jarrow Wood.

The jarrow wood, which grows in Australia, is almost the only kind known to the lumbermen which effectively resists the depredations of insects. Not an insect will touch it.

**A Warning to the Public**

Dishonorable, and disreputable pharmaceutical concerns are flooding the market with cheap and worthless preparations designed to be imitations of

**Dr. Fowler's Extract of Wild Strawberry.**

Some of these are even labelled "Extract of Wild Strawberry," "Wild Strawberry Compound," etc., in the hope that the public may be deceived and led to purchase them, thinking they are getting the genuine "Dr. Fowler's."

For over sixty-five years "Dr. Fowler's Extract of Wild Strawberry" has been used in thousands of families for

**Diarrhoea,**

Dysentery, Colic, Cramps, Pain in the Stomach, Summer Complaint, Cholera Morbus, Cholera Infantum, Seasickness, and all Looseness of the Bowels.

Ask for "Dr. Fowler's" and insist on getting what you ask for. Price 35c. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

**2 IN 1 SHOE POLISH**

The Canadian Home Polish. Famous all over the World. Canada's best foreign representative. It contains no injurious ingredients such as acids and turpentine. ALL DEALERS, 10c.

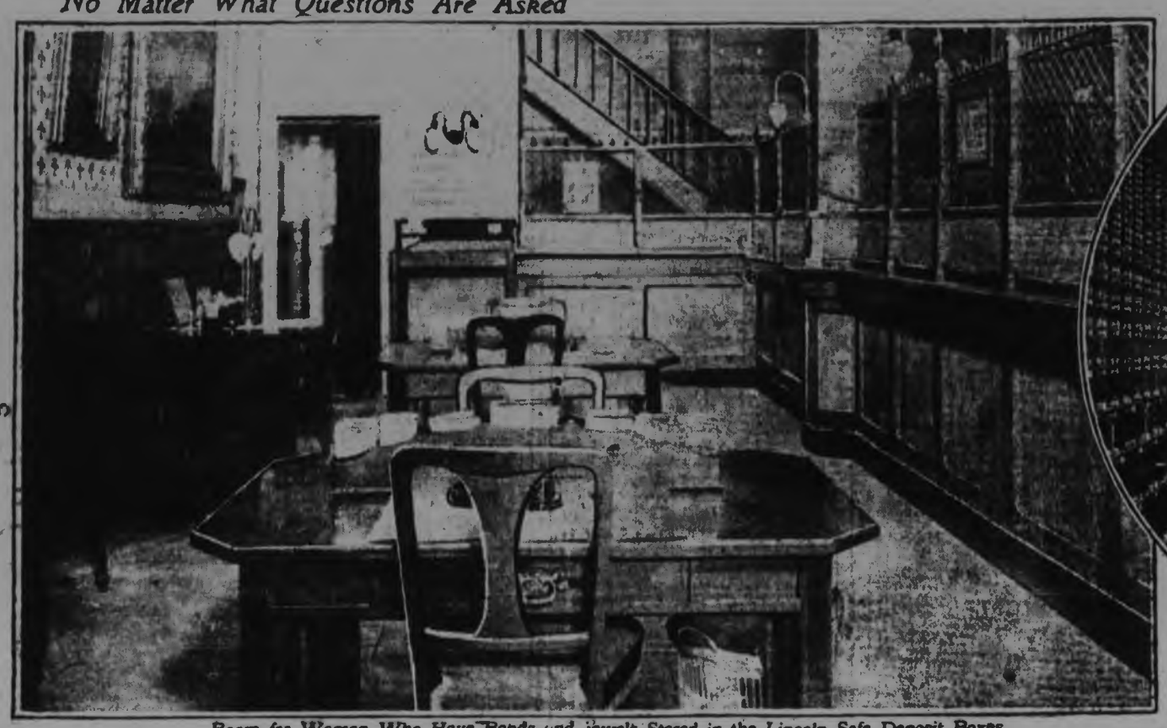
# TEACHING WOMEN WHAT MONEY MEANS.

*BANKS Nowadays Make Special Arrangements for the Fair Ones, Even to the Extent of Placing at the Windows Men with Tact, Politeness and a Smile That Stays On, No Matter What Questions Are Asked*



Room for Women Who Have Bonds and Jewels Stored in the Lincoln Safe Deposit Boxes

Assuring Herself of the Safety of Her Securities

(Copyright, 1910, by the New York Herald Co. All rights reserved.)

NEW YORK, Saturday.

"LADIES' accounts respectfully solicited." This polite invitation hangs up in numerous bank windows, and is printed in alluring circulars setting forth the reliability, convenience and attractiveness of the banks that cater to women, as almost all banks do nowadays with the exception of those in the distinctly financial quarter.

Yet it is within quite recent days that the anecdote regarding the woman, presumably typical, who drew a check against "no account" in any bank she fancied was passed merrily around. In reality, she is as much out of date as Dickens' Dora, who wept over her household accounts because the figures would not add themselves up right. There are even to-day a few Doras and a few women who do not know how to draw a check, but they are too rare to be reckoned with.

In 1869, when Mr. Joseph S. Case, at that time a teller in the Second National Bank, persuaded the directors to fit up a room for the accommodation of women and give them a separate window for the transaction of their business, there were so few women carrying separate accounts that other officers of the bank were far from enthusiastic over the innovation, but Mr. Case saw that more and more women would be making use of the convenient checkbook to pay their household as well as their personal bills, and that the bank that was ready to give special accommodation was the one to which they would turn. The Second National was especially favorably located for a woman's bank, being then, where it was for so many years, in the old Fifth Avenue Hotel Building, at the corner of Twenty-third street; the fashionable shopping thoroughfare, and Fifth avenue, the residential street of the wealthy.

### Bank's Vast Growth.

There were only five depositors when the bank opened this department, but Mr. Case, now one of the directors, has lived to see the list grow to more than three thousand, with an aggregate of over $3,000,000 in deposits. It was a small room with few of the luxurious fittings of the present time women's departments that the bank provided, but the women were grateful for a place that was exclusively their own, for the services of a maid and for a teller who would explain to them the intricacies of bank processes, save them from blunders or rescue them after they had blundered, with tact and amiability.

The substantial growth in the deposits made by women and the talk of the matter attracted the attention of other banks, not only in New York but in other cities, which sent representatives to look into the matter, and the Second National's plan, widely copied everywhere, met with success.

"The old corner became too active," said Mr. Case, recently. "Ours was largely a carriage trade, and as conditions changed it was not so pleasant for ladies to drive up to the bank as it had been in the old days. This is better," referring to the new building, at the corner of Fifth avenue and Twenty-eighth street. Here the entrance for women is in Twenty-eighth street, and all that side of the building is given up to tellers', cashiers' and clerks' windows exclusively for their accommodation, with a waiting room at the end of the corridor.

It was only a few years after the Second National Bank established its women's department that the Fifth Avenue Bank did the same thing. It has to-day probably the largest number of women depositors of any bank in New York—between four and five thousand. Although there are already fairly spacious rooms for the accommodation of this class of depositors, changes are being made which will almost double the space now allotted to the purpose. This will be ready by the time that the women, who form so large a proportion of the patrons, return to the city for the winter. The decorations are in charge of one of the finest decorators in the country and will harmonize with the other part of the bank, which is peculiarly happy in coloring, design and proportions, and will have such additions of curtains, draperies and fittings as are appropriate to a woman's department. All the facilities for business are there, desks, telephones, writing materials, but the severity of the ordinary office is modified by the shaded lights, comfortable chairs and dainty furnishings which appeal to the taste and add to the comfort of those who in their business moments appreciate being surrounded by pretty things.

It Is Like a Fashionable Club at the Fifth Avenue Bank.

### Down in the Vaults.

This bank has its own safe deposit department, a convenience which the law compels national banks to arrive at by means of a connection with a separate company. The facilities furnished for the examination of the boxes are a tribute to the wealth of the depositors.

There is a labyrinth of corridors and rooms of varying sizes that in itself is embarrassing to the novice, even if there were no such things as barred grated and locked doors, polite but vigilant attendants, mirrors placed at suggestive angles and other details of paraphernalia that suggest that the most respectable persons and those most expensively apparelled are under the same surveillance as the poor and the shabbily attired. Even the officers of the bank must submit to the same conditions as those imposed upon outsiders and wait their turn for the unlocking of doors and the letting down of other safeguards.

The boxes in their glistening rows look almost trivial, yet their size is no clew to their value. In even the smallest there is often stored a fortune in securities, bonds, stocks and other valuable papers. The largest boxes are like small safes, and these accommodate jewels as well as papers.

There is a fine disciplinary value in the possession of a safe deposit box. The owner must remember her key; no influence, threats, tears or suasion of any sort will otherwise gain her access to it. Having gained possession of the box by a strict obedience to all the mandates of the institution, however, she may be assured of perfect privacy while she examines the contents in the little room assigned her, gloats over their quantity, or deplores their lessened value, makes notes on the paper provided for her use, or telephones in regard to some transaction connected with the papers she has come to examine.

More than three thousand women are enrolled as depositors in the Lincoln National Bank, one of the early ones to request deposits from women. As an uptown bank, as it was then, it recognized its different requirements from those of downtown institutions. Not only was its location in its favor in attracting women in the city and those arriving at the Grand Central from the suburbs, but the arrangement by which the storage warehouse and safe deposit vaults were brought into requisition for the use of depositors proved highly convenient. The storage company has a different name, but its president is president of the bank, and there is no visible dividing line for those who want to do business in both departments. Not only jewels, but silver, bric-a-brac, valuable furniture and clothing are stored beneath this roof in vast quantities.

### Women Are Capable.

One of the prettiest women's departments is that in the Knickerbocker Bank, at the corner of Thirty-fourth street and Fifth avenue, beautifully finished and furnished with glass covered oak tables and desks, a handsome fountain and wide windows that open on the diverting scenes of two of the busiest streets in New York. About one-half of the depositors in this bank are women and, as one of the officers said, "more would be welcome; we find that women are quite as capable of managing their business affairs as men and we are glad to do business with them."

Many of the big banks that carry on business downtown, where only depositors having at least $10,000 and who agree to keep a balance of that amount as desired, maintain branches in the residential localities, where small accounts are bothered with, not for the profit there is in them, but because the owners of small accounts to-day may have big ones to-morrow, or they may have wealthy friends who will patronize the bank on their recommendation. Woman's influence is greatly counted on in this kind of business. It is not safe to count on allowing permitted to overdraw an account by a city bank, but to a woman of limited income, whose wants are less limited, has been given considerable latitude in this matter because she has brought to the banks so many persons who kept profitable balances.

At the time of the panic three years ago the number of women depositors in the banks was emphasized. Many stood in line as doggedly as the men and others hired substitutes to keep their places. On the whole they behaved neither better nor worse than men under stress of panic. They were just human beings who did not want to lose their money. In a city bank you will notice that the women who put in and draw out money are of all classes. Women of great wealth are conspicuous but not predominant. They are the ones who enjoy that most enviable of prerogatives, clipping off coupons at dividend paying time and swelling their bank accounts to proportions that call for the obsequious respect of the bank employes, even as it would from you or me if it did not make us hatefully envious. There is a constantly increasing number of women who have not inherited wealth and who do not get their money from rich husbands who are important depositors, women in business, some of them in a large way—dressmakers and milliners of the fashionable class, shopkeepers of one kind and another, high salaried employes, clever artisans, women who in a thousand ways, pushed either by necessity or ambition, are making money and need the services of the bank to facilitate their use of it.

In some of the circulars that have been sent out by uptown banks recently it is distinctly stated that the small depositor will be cordially received, and the point is emphasized that women will find it greatly to their advantage to pay all of their bills by checks instead of in cash.

In some of the banks which cater largely to women the young men assigned as tellers to the windows set apart for their use are chosen as much with regard for their good looks and winning manner as for their knowledge of the banking business. "Although of course they must have that, too," admitted a somewhat disgruntled young man who had not been sent to the woman's side of the bank. "But it's a hard job," he added, "because you have to keep on your smile all the time."

## LESSONS IN EXPLORING.

THE modern explorer, who goes about his work in very different fashion from his predecessors of a few years ago, receives every possible aid from the geographical societies of the world, from which, in the first place, he is able to obtain all the information others have collected as well as the results of their experience. The Royal Geographical Society, of England, indeed, may be said to hold regular classes for the training of explorers, and frequently it will not only lend its instruments, but even finance an expedition.

In these classes are taught the proper use of instruments for the taking of astronomical observations and for surveying, and the prospective explorer is taught how to pack and care for his instruments under divers circumstances.

He is also taught how to take the best photographs, how to keep a diary and how to study "natives" to the best advantage. The society furthermore supplies him with medical information of the sort necessary to the success of his expedition, and, finally, it is fully prepared to advise him touching the choice of furniture, weapons, dwellings and food.

The first and most important item of the explorer's paraphernalia will be a house—that is, a tent—and this he may have arranged for transport by wagon, cart, camel, horse, mule, ass or porter. Explorers' tents are of all sorts, from the silk contrivance, weighing fifteen pounds, which can also be used as an overcoat, to a marquee of canvas, one hundred feet by forty feet, which can be carried by a camel. Then, too, there are tents to be used in connection with shooting wagons, not to mention the "punt" tent, which will overspread a boat and convert it into a complete dwelling of green waterproof canvas, fitted with windows and ventilators. The explorer also carries a portable dark room, fitted with a ruby window. This, when folded up, may be no more troublesome than a big walking stick.

Furniture for the use of an explorer, like his dwelling, must afford the greatest convenience and yet be capable of collapsing into the smallest possible space. An official of one society devised a bed on the convertible principle. By day it was a valise into which all manner of things might be packed, and at night it could be thrown on the ground, its lattice framework pulled out, its mattress put on and its mosquito curtain attached, the whole contrivance furnishing a decided convenience to the explorer for whose special purposes it was constructed.

One of the unique items of an explorer's equipment is the "Congo" stove. This has an oven several feet square and will serve a mess of fifty men. It is in halves, capable of being used separately, and each can be carried on a porter's head.

Among the collapsible articles of the explorer's outfit may be mentioned tables, baths, water buckets, litters, stretchers, chairs and other items. For crossing rivers, where even native bridges are unknown, there are provided portable folding boats, and there are also pontoon carts which can be taken from the wheels, emptied of their load of provisions, ammunition, &c., and speedily converted into floating bridges.

About everything in the way of compressed food is made up for the explorers, even to milk in the form of powder. It has been said that enough food for a hungry man's dinner may be placed in a pouch about the size of a tobacco pouch and weigh only a few ounces, and that the modern explorer can feast in the wilderness on such luxuries as truffles, oysters, caviar and boned quail should he so desire.

Everybody who has ever used or who knows about

**ROBERTSON'S PAINT**

*(Ready-to-use)*

Insists on having that paint and no other. They know it's reliable—that it's right through and through.

They know it is made in Ontario and specially adapted to stand the climatic conditions of this Province.

They know it will give a good job of painting every time.

And the price of Robertson's Pure Prepared Paint is right.

If you pay more you are paying too much. If you pay less you are not getting as good paint.

Come in for color-card and special prices.

**JAMES MURTY, Esq.**

Peterborough, Ont. 1854

# TEMISKAMING'S GREAT ADVANTAGES

From Farm and Dairy.

Someone has said that Temiskaming is the greatest corner of the terrestrial globe. The richest silver mines ever discovered, the vast deposits of gold, the prolific forests that have made the Ottawa famous, the proven agricultural lands upon which the eyes of the East are turning are proof sufficient of the veracity of the author and truth of the statement.

New Ontario is the oldest part of North America if not the first land in the world to rise above the sea. The hills that are now so interesting to geologist and prospector alike, probably when young, rivalled the Rockies in height and ruggedness but years of exposure to rain, frost and the erosion of running water have reduced them to low round-topped hills. But in these stumps are to be found the richest mineral deposits in the world. There is no doubt about that.

But what has that to do with agriculture? Just this. As the mountains were slowly worn away by the untiring atmospheric agents the rock was ground into a fine sand and deposited on the land north of the bare rocky part and to-day from North Bay to Cobalt is a vast area principally rock, but from the Silver City or a few miles beyond it and stretching away to the North in the shape of a great V lies the Great Clay Belt, a land of twenty million acres of virgin soil proved to be more productive than that of Old Ontario, a land of vast forests and of lakes and great rivers. It is a rich heritage, a land of promise beside which the land of sacred history is small indeed.

TEMISKAMING'S ADVANTAGES

The soil is an alluvial clay, light brown or black. To one accustomed to the behaviour of clay in Old Ontario the action of this northland material is indeed surprising. Under the influence of the sun, and moisture it readily breaks up into a fine seed bed. On the surface of all farms there will be found a few inches of black vegetable mould which is plowed up and assimilated with the rich clay loam. It makes one of the best soils that could be produced.

The climate is much like that in Old Ontario. The winters are severe but the dryness of the atmosphere prevents the cold from being unpleasantly felt. The snow is usually from two to three feet in depth. At times it is very warm in summer.

In considering the matter of taking up land there are three principal points that a farmer will consider, soil, climate and markets. In the demands of timbering, mining and prospecting the settler has a rapidly increasing home market for all the farm and garden produce he can supply and prices are very high. Indeed the demand is eagerly made at his door and cannot be met so that much has to be imported. The time when the Clay Belt becomes an exporting country, that is, when it seeks the market on the seaboard, is not near. New settlements farther north and on the Transcontinental Railroad will absorb all that can be produced.

TRANSPORTATION FACILITIES

Another advantage is found in the transportation facilities. Rarely if ever in the history of the settlement of a new country has a railroad played such an important part as does the Temiskaming and Northern Ontario Railroad, owned and operated by the Ontario Government in the settlement of the agricultural section of New Ontario. Starting at North Bay it threads its way up rocky valleys and around numerous lakes that hide their silvery surfaces deep among the thousand hills. Leaving the rocky country at Haileybury, a few miles above Cobalt, it extends north across the rolling, forest clad acres to its terminus at Cochrane, 252 miles north of North Bay and 480 miles north of Toronto. In addition the Transcontinental is under construction from Lake Abitibi to Lake Nipigon and the Canadian Northern will shortly build a loop from Sudbury to the Nipigon River. The prospect is that both these roads will be flanked by prosperous communities of settlers.

The necessity of clearing the land is offset by the fact that in this encumbrance lies an ample source of revenue valuable to the settler during the years he is getting his place in shape. In many cases the pulp wood taken off a farm has much more than paid for the clearing of it. The settler can hire all the work done and yet it costs him never a cent; but this cannot be done in all parts of the country. Usually he must work himself.

The forests of New Ontario are entirely different to those of Old Ontario in so much that the trees are all small and their roots spread out near the surface of the ground. No stumping machines or dynamite are required in clearing a farm. If the stumps are allowed to remain in the ground a few years after cutting the trees, a single horse can pull them with little or no difficulty according to the locality, as the timber is heavier on the higher levels.

CROPS UNEXCELLED

The crops are unexcelled. Generally speaking it may be said that with the exception of the lighter fruits everything grown in Old Ontario may be produced in the New Country. Clover and timothy hay do especially well. The yield is commonly three tons to the acre. Wheat, oats, barley and peas also do well while the soil and climate seem particularly suited to root crops.

It is true the season is shorter but compensation is made by the fact that the days are from one to two hours longer than in the south. At Cochrane the sun stays on the job 19 hours a day which accounts for the almost incredible growth.

Some one has said: "Go west young man, go west." That is good advice but "Go north, young man, go north," is much better. Temiskaming offers advantages unrivalled the world over. It is only a matter of a few years before The Great Clay Belt in New Ontario will be the Garden of Canada.

The mining possibilities, like the agricultural ones, are unlimited. The surface has, so to speak, merely been scratched and the silver, gold and iron are only an index of the buried treasure that has been carefully laid away by the tireless hand of the ages.

The last two years have seen as great a change as did the previous 10 and everything points to an even more phenomenal development during the coming few years. In no other country are conditions so conducive to rapid growth. Where else are the consumer and producer such close neighbors? There is indeed a wonderful future in store for Temiskaming. —Colin W. Lees.

**Shiloh's Cure**

quickly stops coughs, cures colds, heals the throat and lungs. 25 cents

PALE, ANAEMIC GIRLS

The languid, semi-invalid girl is no longer popular. Firm flesh, rounded form and a healthy glow to the complexion are the results of using Dr. Chase's Nerve Food. Mrs. Goodson, 104 Sebastopol Street, Montreal, Que., writes: "My daughter's appetite was bad and she was pale and bloodless. Since using Dr. A. W. Chase's Nerve Food there is a marked change in her condition. She is stronger and healthier in every way."

## WANTS SOME DEVELOPMENT.

**Taft Says There Is a Lot of Rhapsody In Conservation Talk.**

St. Paul, Minn., Sept. 6.—President Taft, in an address before the National Conservation Congress here yesterday, made plain his position on the whole subject of conservation. The speech was an exhaustive one and prepared with great care. The President showed an exact knowledge of the subject.

The central note of his address was an appeal for practical common sense in conservation.

"The time has come, he declared, "for a halt in general rhapsodies over conservation, making the word mean every known good in the world, for after public attention has been aroused, such appeals are of doubtful utility and do not direct the public to the specific course that the people should take, or have their legislators take, in order to promote the cause of conservation.

"Real conservation involves wise, non-wasteful use in the present generation, with every possible means of preservation for future generations.

"The problem is how to save and how to utilize; how to conserve and still develop."

President Taft announced that he would submit to the congress the solution of the problem of adjusting of control of water power, such as between the States and the general government.

The President got a most demonstrative welcome at the conservation congress. Gifford Pinchot, who has been in St. Paul for two days, was not present. He went into J. A. Tawney's district yesterday to deliver a speech in favor of Mr. Tawney's opponent. The former forester will be back in the city to-day to meet Col. Roosevelt.

Mr. Taft gave repeated credit in his speech to Col. Roosevelt for his work for conservation, but he apparently took a fling at "Nationalism" when he said:

"In these days there is a disposition to look too much to the Federal Government for everything. I am liberal in the construction of the constitution with reference to federal power, but I am firmly convinced that the only safe course for us to pursue is to hold fast to the limitations of the constitution and to regard as sacred the powers of the States."

## BRIEFS FROM THE WIRES.

James McNeil of Belleville was drowned at Desoronto.

A death from infantile paralysis is reported from Bonville, Ont.

M. Bielovucci, the French aviator, will attempt to fly from Bordeaux to Milan.

John Kelly, charged with horse-stealing, escaped from New Hamburg lock-up.

A strong movement is afoot in Germany to bring about free trade in cattle and meat.

Sir James Whitney and Hon. Dr. Pyne visited the Q.O.R. camp at Aldershot yesterday.

Peter McDonald was nearly drowned at Detroit while trying to walk on the water of the river.

Port Hope riflemen defeated a team from Rochester, N.Y., for an international challenge cup.

Thomas J. Duffy, M.C.R. engineer, was struck by an auto at St. Thomas and probably fatally injured.

Sir Wilfrid Laurier is expected back in Ottawa to-morrow. Hon. W. S. Fielding is also expected home on Thursday.

Before leaving Washington President Taft signed a proclamation containing the treaty between Great Britain and the United States, defining the location of the international boundary line in Passamaquoddy Bay.

Word was received here yesterday from Kenora that McGregor, superintendent of the Winnipeg Y.M.C.A. camp at Lake-of-the-Woods, and Miss Henrietta Valentine, Winnipeg, clerk for the T. Eaton Co., were drowned in the Red River.

### A Marvelous Escape.

Ashtabula, Ohio, Sept. 6.—Climbing from the wreckage of his buggy, on the pilot of a locomotive flying at the rate of 50 miles an hour, Fred. Miner, aged 18, clambered up on the running board of the engine and into the engine cab. His escape was near to the miraculous.

The engine, on the Lake Shore Railroad, struck his horse and buggy a few miles outside of this town. The horse was killed and Miner wedged in the wreckage of the buggy, remained on the pilot of the rushing engine. Indignant, he climbed into the cab, he says, to tell the engineer what he thought of him.

He claimed that the engine had no headlight. The engine stopped to let him off, Miner pointing out that his parents would expect him home early, and he walked the six miles back to town. He was not hurt.

**BRINK HABIT**

*The Gatlin Treatment Cures Liquor Drinking in THREE DAYS Under Contract—No Hypodermic Injections or Other Disagreeable Features.*

The Gatlin Institute was established eleven years ago. More than eleven thousand men and women have been cured of liquor drinking by the Gatlin treatment— there has been failure to cure in no case.

No hypodermic injections, no bad after effects, no poisonous drugs, no substitutive stimulants—a treatment so harmless that any child could take it.

Each patient is accepted for treatment under legal contract to cure in THREE DAYS—the cure to be entirely satisfactory in every particular or the fee paid is refunded when the patient is leaving the Institute and treatment costs nothing.

The Gatlin Home treatment is just as effective as Institute treatment if plain, simple directions are followed.

Call or write for books of particulars, copies of contracts to cure and other information.

## CATTLE MARKETS.

**Union Stock Yards.**

TORONTO, Sept. 5.—Receipts of live stock at the Union Stock Yards were 104 carloads, consisting of 1997 cattle, 16 hogs, 883 sheep and lambs, 45 calves and 18 horses.

**Exporters.**

Exporters sold from $5.60 to $6.65 for steers; heifers, $5.50 to $6.10; bulls, $4.50 to $5.50.

**Butchers.**

The best butchers' cattle were 20c to 25c per cwt. higher, owing to many heifers of butchers' weights being bought for export; prime picked lots of butchers sold at $6 to $6.25; loads of good, $5.60 to $5.12½, medium, $5.25 to $5.50; common, $4.80 to $5.15; cows, $3 to $5.25.

**Stockers and Feeders.**

Few feeders or stockers on sale, prices were unchanged, but firm.

**Milkers and Springers.**

A limited number only was offered. The market for milkers and springers was very strong and prices firm at $50 to $65 each.

**Veal Calves.**

Market a shade easier at $3.50 to $6 per cwt.

**Sheep and Lambs.**

Sheep market was strong. Ewes of light weight, $4.50 to $4.75; ewes, heavy, $4 to $4.50; rams, $3 to $3.50 per cwt. The lamb market was easy at $6.75 to $6.25 per cwt., the latter price only being paid for selected lots.

**Hogs.**

There were only 10 hogs on sale. But dealers report prices steady at $9 for selects fed and watered, and $8.65 to drovers for hogs f.o.b. cars at country points.

**Montreal Live Stock.**

MONTREAL, Sept. 5.—(Special.)—At the Montreal Stock Yards, west end market receipts last week were 350 cattle, 2674 sheep and lambs, 2160 hogs and 130 calves. The supply this morning amounted to 1,3. cattle, 1200 sheep and lambs, 1400 hogs and 325 calves. Considering the liberal supplie of cattle that have come forward during the past ten days, of which a large percentage are from the northwest, the tone of the market has remained remarkably steady, and prices show no important change as compared with those of a week ago, which may be attributed to the large increase in the demand from local buyers on account of the much heavier consumption. There has also been a better demand from outside buyers and several carloads were bought for shipment to Quebec and Ottawa, and a few small lots were picked up for export account. Choice steers sold at 6c to 6¼c; good at 5¾c to 6c, fairly good at 5c to 5½c, fair at 4½c to 4¾c, and common at 4c to 4½c per lb. There were a good many cows which brought from 3½c to 5c per lb., as to quality. Bulls for canning purposes sold at $1.35 per cwt. Owing to increased receipts, hog prices were 25c per cwt. lower, as compared with a week ago. The demand from packers was good with sales of selected lots at $9.25 weighed off cars. Some deliveries were made on contracts made last week at $9.40. Lambs were easy on account of liberal supplies and the somewhat limited demand. The crop of lambs this year is much larger than a year ago. Trade was slow at 5½c to 6c per lb. Sheep offerings are limited.

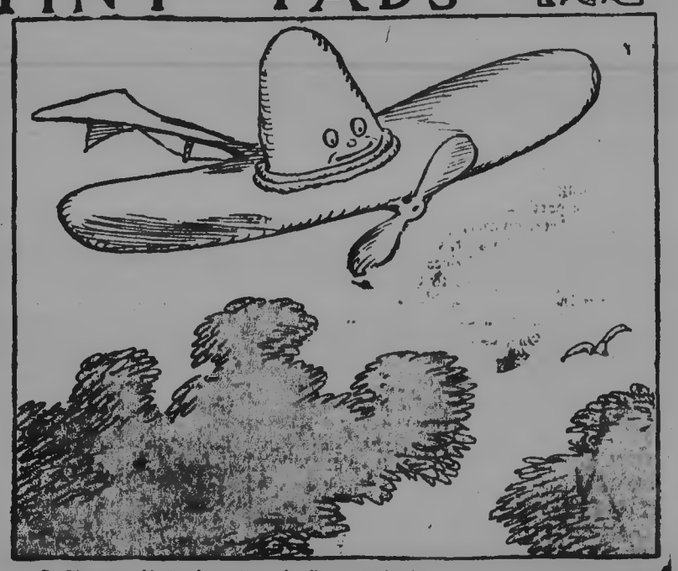
# THE TERRORS OF THE TINY TADS

1—Once more the Tads have wandered to the land of hats and caps. They want to see the animals and catch a few, perhaps.

2—They see some Tam-o-shanturties, but these they cannot get, Unless they swim across the pool and make their clothing wet.



3—They see a big Sombreroplane who flits across the sky. "We'd like to take a ride on him," the Tiny Tads all cry.

4—And now they see some little things that look just like straw hats. "They look like pussycats," they cry. "They also look like cats."

5—They chase the little creatures. Then they suddenly stop still, Because they see two bigger ones who stand upon a hill.

6—"Oh, we must hide!" they whisper. "There's nothing else to do, "For here's the old Papanama and Panamamma, too!"

**THE LADIES' TAILORING AND DRESSMAKING DEPT.**

has re-opened for the Fall season with Miss WELSH again in charge. We can promise early delivery of all orders placed now. :: :: ::

## A Fall Style Exhibit in our New Cloak Section

The best possible proof that we are giving our customers what they want, when they want it, at wantable prices in women's ready-to-wear apparel, is the fact that this Department's sales have increased to such an extent as to demand twice the original floor space. This we have been able to provide by securing the two upper floors over Messrs. W. A. Sanderson & Co. To celebrate the opening of this enlarged section we will offer some most unusual prices.

**HANDSOME NEW FALL SUITS.**—If you are interested in knowing what's what in Styledom for ladies this fall you will enjoy a visit to our new enlarged Cloak Section. We are especially anxious to have you see our **Young Women's Business Suits** *@* **$15.00.** Made of Rough Cheviots or Plain Broadcloths, in black, navy, gray, taupe, bronze, dark red and old rose. Coat is 34 inches long and silk lined. Skirt is in new banded effect. Very Special at .....$15

**High Class MODEL SUITS, $25.** Most of these are individual suits, only one of a style or colour. **Made of diagonals, worsteds, Hopsack or tweeds,** in new sombre shades in many styles, portraying entirely new features in coat or skirt. All silk or satin lined. Opening Sale .....$25.00

**SEPARATE COATS FOR EARLY FALL.** The correct length of the separate coat for fall is the full length, which means that a coat made of the ordinary weight cloth is a burden to carry. We have overcome this disadvantage by procuring a cloth that is much lighter in weight but just as firm, and with equal wearing qualities. See the new colourings of green, gray, and plaid back Tweeds. Prices run $10.95 to .....$25.00

# Are Getting At People

**No Body In the World Has Drawn So Many of Its Chief Men From the Lowest Classes—They Lacked the Confidence of the People However In England — Needs of the Slums of Old London.**

Halifax, N.S., Sept. 6.—Social problems occupied the Anglican Church Congress here yesterday. Two sections sat in different buildings, one occupied with the more public aspect of the problems discussed, and the other considering them in special church and religious relations. The great meeting in the evening in St. Paul's Church was a magnificent climax to the day's deliberations, and the Bishop of London, Dr. Ingram, spoke with the power and sympathy of a master. Another meeting was held in St. George's Church, at which Sunday school problems were considered.

Dr. Ingram followed the Bishop of Niagara, Dr. Du Moulin, who was somewhat reactionary in his address, and the man from the slums spoke with a directness and outrightness which was startling in comparison.

"My brothers and sisters," he began, "I am sure we have all listened with the deepest interest while my dear old friend has told you of the touching efforts of a working class church to win the confidence of workingmen. But, the fact remains, in spite of all this, that we have somehow failed with the workingman. When you come to take the representatives they send up to the British Parliament, not one is a churchman. We have somehow failed to win their confidence and our non-conformist brethren have also failed, and have even less of their confidence.

"I want to face with you the question why that is. We never yet as a church caught the ideals that inspire them. We do not see the visions that draw them. We criticize them, but we do not understand them. We do not know what they are aiming at. I tried to describe something of their aims in my sermon on Sunday. Some one of the newspapers was pleased to call it socialism. If that is socialism, then I say, God bless socialism. Is it not the ideal of the New Testament?"

"The workingman wanted equality of opportunity. This was very different from the stereotyped socialistic doctrine. When the workingman asked this he only asked something God wanted him to have. Every man should have a chance to live a human life; with time for his mind and soul as well as for his body. He asked pathetically also a chance for his children, a ladder of education, so that the poorest in the land might climb up and take his place with the highest. No body in the land," said the bishop, "had had its highest offices, filled so often from the poorest class, as the Church of England.

"That dream—that day dream if you like—I claim the church has got to sympathize with. God never meant men to be downtrodden slaves. I claim that dream should be realized, and it will as far as I can do it in my time," declared the bishop with emphasis.

But then came the difficulty. He had lived for nine years in the middle of the slums, with only his thirty colleagues from Oxford. What stirred his heart was the two million with no room to live, two or three families in one room, with grown boys and girls, father and mother, and perhaps a workingman also, because there was no place else. Did they wonder if one's blood boiled at the impossibility of having decency? And yet girls, pure as a lily, and boys such as they could hardly believe about, came out of such places through a mother's grave.

"We have no right to give them such places to live in, only fit for dogs," he flamed. Picture after picture, he drew of the horrors he knew. Perhaps there were bitter socialists, but none should forget the sights that stung them into bitterness, he remarked.

Then he turned to Canada, almost a land of promise, with wages half as much more, with room for a hundred million people, and only seven. Coming from those fetid dens, he found room here to breathe and live. He looked at the bonny children in Toronto and Halifax, and thought of the poor little dwindled children left behind in London. The paradise was not so complete, however. He would like to see larger industries in places like Halifax, and he would tell capital when he returned of the opportunities. Why should there be six or seven hundred unemployed here? Why were labor exchanges not better organized at move labor to where it was needed? He would like more methodical immigration system.

### Excursion Steamer on Rocks.

New York, Sept. 6.—With more than 300 passengers, including many women and children on board, the excursion steamer Sea Gull, which left Glen Island, on Long Island Sound, late Sunday night for New York, broke her anchor chain while at anchor outside Hell Gate waiting for the fog to lift, and drifted on the rocks off Oat Brian Island. She was released yesterday.

### Dead, Sitting In Bed.

Woodstock, Sept. 6.—Sitting bolt upright on the edge of the bed and with an unlighted cigar in his hand, the fully dressed body of Walter Quick was found in his room at the Royal Hotel this evening. He had been seen last at the G.T.R. station Sunday evening and had evidently been dead some hours when found. Dr. West and Coroner McLay decided that death was due to an apoplectic seizure and that an inquest was unnecessary.

Mr. Quick, who was a young man employed as a tuner at the Thomas Organ Co.'s factory, had been staying at the hotel while his mother was away in Cleveland.

He was to be married in a day or two to a popular Woodstock young lady.

### Menelik Dying Again.

Rome, Sept. 6.—A despatch from Addis Abeba says King Menelik of Abyssinia has suffered another attack of apoplexy and that his condition is grave.

PETERBOROUGH TUESDAY SEPTEMBER 6 1910

## SCHOOLS OPEN THE HOLIDAYS ARE ALL OVER

### Large Attendance at Public Schools To-day—Some Rooms Being Over-crowded—Changes in Staff

### REPAIRS TO SCHOOLS

"School days! School days!
Dear old golden rule days,
Reading, writing, and 'rithmetic,
Taught to the tune of a hickory stick."

So goes a song that was popular a short time ago, and many hundreds of Peterborough children were reminded of it this morning, when the public and separate schools of the city swung open their doors after the long summer vacation.

School Inspector Mowat reports that there was a splendid attendance throughout the city this morning. In some cases the classes were too large for comfort and the rooms were overcrowded.

Repairs have been made to the buildings during the holidays, especially at the West End, South Central, and Queen Alexandra schools.

A number of new teachers have been added to the public school staff. Among them are Mr. Neale, Miss Walker, Miss McDonald, Miss Carmichael and two new kindergarten teachers, Miss Wilson and Miss Fair.

All of the public school teachers reported for duty this morning. Classes were arranged, promotions made, and everything is now in readiness for the real opening to-morrow morning.

There was a very large first-day attendance at the Collegiate Institute, which also opened to-day.

## BAND FOR TORONTO

### 57th Musicians Will Meet To-night to Rehearse Numbers

Mr. Gliddon has called a special rehearsal of the members of the 57th Band to-night for the purpose of going over the two selections which they are to play in conjunction with the massed bands at Toronto Exhibition to-morrow. One of the selections is a big descriptive number entitled "Episodes in a Soldier's Life." The 57th Band leaves for Toronto to-morrow morning and will play two concerts at the Canadian National, as well as taking part in the massed bands numbers. The band is not going in full strength, but will have thirty-one men in uniform.

**Clark's Pork and Beans.**

Clark's Pork and Beans are flavoured to suit all tastes. You can eat them plain, or with tomato or Chili sauce. For the sake of variety order different flavours at different times. Wm. Clark, Mfr., Montreal.

## RETURNED HOME

Mr. and Mrs. F. W. Miller have returned home after two months spent i nthe Old Country. They returned on the S. S. "Empress of Ireland" and arrived back in the city on Friday evening. It was thirty-six years since Mr. and Mrs. Miller visited their old home and every hour spent among their former associates was thoroughly enjoyed. They visited principally at Waltham Cross, near London. Two young Englishmen came to Peterborough with Mr. and Mrs. Miller and intend to reside here.

## OPERAS ARE TO BE SELECTED BY VOTE

The Aborn English Grand Opera Company is deciding its repertoire in the various cities it is to visit by popular vote. Several hundred names of theatre-goers are selected at random in each city, and to each of these a list of a dozen operas is sent to select from, with a return postal card with which to notify the Abon executive officers in New York of the first, second and third choice of operas. At no period in the history fourths send them back with their favordingly. So far this plan has worked admirably, and of all those to whom these voting cards are sent, an average proportion of over three-there, the selection is made and announced and the cast scheduled accordingly. When a sufficient number is received from any one place to indicate what operas are most desired vourite operas marked. A good many have already been returned from music lovers in this city, and as soon as the usual number of votes are in, the selection will be announced, probably within the next fortnight. The Aborn singers will come to the Grand Opera House Wednesday night, September 28th.

## CANOE CAPSIZED, YOUNG MAN WAS UNABLE TO SWIM

### William Parsons, of Dummer, Was Drowned Near McCracken's Landing, Stony Lake, on Sunday Afternoon---Sank Before Help Could Reach Him From the Shore---Body Was Recovered.

Special to The Examiner.

McCRACKEN'S LANDING, STONY LAKE, SEPT. 6. William Parsons, twenty-one years of age and son of Mr. J. Parsons, who resides in Dummer, about two miles from here, was drowned on Sunday afternoon about one o'clock within a hundred yards of McCracken's Landing wharf, as the result of the capsizing of his canoe. The unfortunate young man was starting out for a short paddle when the sad accident happened. He was paddling in the stern of his canoe when he missed a stroke and lost his balance, the boat turning over and throwing him into the water. The wind spun the boat away from him before he could seize it and he was unable to swim, going down before help could reach him.

The upset was witnessed by a number of people sitting upon the verandahs of the Victoria House, and they hastened to the rescue in canoes and skiffs. Before they reached him, however, Parsons had gone down for the last time and they were too late to save him.

The body was recovered about three hours afterwards in sixteen feet of water.

The young man was well known to summer residents at the lake, as he had been employed by Mr. Hamilton to deliver milk to the cottages and paddled round to the different cottages in the vicinity every morning. He made his usual rounds on Sunday morning, and it was only a short time after his return to McCracken's that the accident occurred.

## ONE MONTH IN GAOL AT HARD LABOUR FOR THE THEFT OF AN UMBRELLA

### Watch Case Concluded—Reynolds Allowed to Go—Not Sufficient Evidence to Convict Him—Man in Hospital as Result of Fight.

### OUT ON $200 BAIL

The third watch-stealing case which has taken place in the past few weeks was concluded this morning at the police court, when the accused Joseph Reynolds was allowed to go, as his Worship explained, after the evidence was taken, that there was not sufficient proof to convict the prisoner.

The adjournment of the case was commenced this morning by the hearing of John Copperthwaite's evidence. He gave his excuse for not being present at the previous trial, that he had slept too late. He claimed that about one month ago he saw Reynolds with a gold watch, (open faced), near Victoria Park. Reynolds replied to him when asked where he got the watch, that he obtained it at Clarke's jewellery store. Copperthwaite said that what he told the Chief on the day he was summoned, was true.

Chief of Police Thompson was the next to give evidence, and said in part:

"Reynolds told me that he had a racket with his father and for eight or nine nights previous to the theft incident he slept in different barns. He said he hadn't had a watch since he lost his gun metal one last winter.

In connection with Copperthwaite's evidence the Chief swore that Copperthwaite told him (Chief Thompson) that Reynolds had the watch a week before he was brought up for trial.

In this case his Worship discharged Reynolds. Crown Attorney Wood prosecuted and Mr. G. N. Gordon appeared in behalf of Reynolds.

Reynolds pleaded guilty to the charge of having stolen an umbrella from the Mattress Factory in East City, the article being the property of H. Smith, an employee of that establishment. On this charge his Worship gave the prisoner one month in the county jail at hard labour.

His character was stained by several court cases in the past, the latest being that in the year of 1907, when he pleaded guilty to the charge of stealing eighty dollars.

Saturday night seemed to bring forth very unpleasant feelings for some people in the city. Unfortunately two young men met in a fistic exhibition, which resulted in one man being badly abused, so much so that he now lies in a serious condition in St. Joseph's hospital. The man who is accused of inflicting serious injuries on his opponent, was allowed out on two hundred dollars' bail, his employer being the only surety. The trial will be held on Tuesday, Sept. 9th.

One young man was asked to pay two dollars for being drunk on Saturday evening last. He made good.

## Celebrated The Fifteenth Anniversary Of Wedding

Mr. and Mrs. Walter Naish celebrated the 15th anniversary of their wedding at their residence, 396 Mark street, yesterday, Labour Day. There were present about 35 adults and 15 children, who sat down to a sumptuous dinner at 6 o'clock. Many were the favourable comments passed on the excellent menu. After the good things provided had been done justice to, the company spent the evening in music, song and games, and the children greatly enjoyed an impromptu dance with the help of musicians present.

Mrs. W. Naish is a daughter of Mr. Willan, a well known ex-councillor of the town of Reading Berks, England and Walter Naish is a son of Mr. and Mrs. Henry Naish, Murray street, of this city. An interesting feature of this gathering was that there were present Mrs. H. Naish's four sons-in-law, bandsmen in the Salvation Army and who played together in a Salvation Army Band in Reading, Eng. Mr. Henry Naish and his family came from Reading to Canada over seven years ago and all are doing well, always speaking very highly of this grand country.

Ice cream and other refreshments were passed around by the ladies about 10.30 o'clock after which the jolly party broke up, wishing Mr. and Mrs. Walter Naish many more years of matrimonial bliss. All joined in singing "Should Auld Acquaintance be Forgot," and God Save the King.

Among the guests were Mr. and Mrs. Owen Montgomery, of Bridgenorth and Mr. Palmer, of Cobourg.

## SOME FINE EXHIBITS AT THE TORONTO EXHIBITION

### "RUBY RUB."

This metal polish is the subject of constant demand at the tent of J. A. French & Co., Limited, opposite the north-east corner of the Process Building. It has no equal for polishing brass headsteads, lamps, door-plates, metal parts of automobiles, jewellery, and even tinware. It also preserves from rust and corrosion. Will be in Manufacturers' Building at London Exhibition.

### GAY PAREE ON THE MIDWAY.

One of the stellar attractions on the Midway is "Gay Paree." Here one may get as big a dime's worth as anywhere. The show lasts an hour with really fine music and dancing by a bevy of pretty girls. They deserve good patronage for there is nothing to offend the most fastidious.

### CLEANING SILVERWARE.

Cleaning tarnished silverware until it shines like new, by simply dipping it in a solution, is what "Wonder-Shine" accomplishes. Every house wife should see this almost magical demonstration and obtain a package of "Wonder-Shine" before leaving the Exhibition.

**KID GLOVES**

T. C. Elliott opens this Fall, one of the largest Kid Glove Departments in Peterborough. All the best makes are shown—all shades

## SAIL BOAT CAPSIZED AT THE LAKES

### Party of Young People Had Exciting Experience in Stony Lake Yesterday Afternoon—Boat Was Upset

### ALL WERE RESCUED

Mr. Robert Lowe of Cleveland, who is stopping at Glenwood, Stony Lake, in company with two young ladies from same resort had a rather exciting experience yesterday afternoon. They were sailing down to Juniper Island, and they were just out from Mr. T. Barrie's Island, when the boat capsized and the occupants were thrown into the lake. Mr. Lowe stated that he was trying to avoid a skiff when the wind caught the sail and turned the boat over. A number of persons, who witnessed the upset were soon to the rescue and brought the young ladies to Juniper Island. The party was none the worse for their experience.

## TO BE BACK THURSDAY

MONTREAL, SEPT. 6.—Sir Wilfrid Laurier is expected here from the West Thursday, and will immediately be in attendance at the Eucharistic Congress. It is expected that the Premier will be faced with demands for closer connection between the church and the state.

## HAVE NOT THE CLASS

NEW YORK, SEPT. 6.—A crowd of sports returning from Philadelphia, where Al. Kaufman got the decision over Bill Lang, last night, say Jack Johnson need not fear losing the championship honours to either of these men, as they are not in his class.

## ASSAULTED BY BURGLARS

Special Wire to The Examiner.

TORONTO, SEPT. 6.—Miss Maggie Morrane, an aged lady, was brutally assaulted by burglars at midnight, at their home in Weston, where she lives with another sister. Her condition is serious. The intruder escaped with no booty.

## NO INDIGESTION OR STOMACH DISORDER

### No Gas, Heartburn, Headache or Dyspepsia Five Minutes Later.

Why not get some now—this moment and forever rid yourself of Stomach trouble and Indigestion? A dieted stomach gets the blues and grumbles. Give it a good eat, then take Pape's Diapepsin to start the digestive juices working. There will be no dyspepsia or belching of Gas or feeling like a lump of lead in the stomach or heartburn, sick headache and Dizziness and your food will not ferment and poison your breath with nauseous odours.

Pape's Diapepsin costs only 50 cents for a large case at any drug store here, and will relieve the most obstinate case of Indigestion and Upset Stomach in five minutes.

There is nothing else better to take Gas from Stomach and cleanse the stomach and intestines, and, besides, one single dose will digest and prepare for assimilation into the blood all your food the same as a sound, healthy stomach would do it.

When Diapepsin works, your stomach rests—gets itself in order, cleans up—and then you feel like eating when you come to the table, and what you eat will do you good.

Absolute relief from all Stomach Misery is waiting for you as soon as you decide to take a little Diapepsin. Tell your druggist that you want to become thoroughly cured this time.

Remember, if your stomach feels out of order and uncomfortable now, you can get relief in five minutes.

## PROSECUTOR MAKE SCATHING ARRAIGNMENT OF DR. CRIPPEN

### Touched Upon a Startling Piece of Evidence When He Said Remainder of a Suit of Pajamas Found in Crippen's Cellar Has Been Discovered Among the Prisoner's Effects.

Special Wire to The Examiner.

LONDON, ENG., SEPT. 6.—Thousands besieged the doors of the court room this afternoon at the continuation of the investigation into the Crippen and Leneve murder case. A hundred newspaper men were present but few spectators could get in. Travers Humphreys outlined the case for the Crown, telling of the finding of the body thought to be Mrs. Crippen's and traces of deadly hydrocyanic poison. Both prisoners appeared to be in better spirits.

While both seemed more cheerful when brought into the court room, it was noticeable that their demeanour was much affected by the staring of spectators. The girl wore good clothes and a large picture hat, supplied by relatives. She was not long in the court room before she showed signs of collapse, and restoratives had to be administered. Crippen started visibly at ominous noises from the outside, where the police had to charge the crowd to keep them away from the windows.

Prosecutor Humphreys made a scathing arraignment of Crippen, tracing his career in the United States and Toronto. He called him a quack doctor, and then made the direct assertion that Crippen had poisoned his wife with deadly poison, and mutilated the remains so that he could live unquestioned with his mistress, Miss Leneve. This reference to herself brought tears and sobbing from Miss Leneve.

Finally the Prosecutor caused a sensation in stating that part of a suit of pajamas had been found with the body in the cellar, and the remainder of the same suit in the effects of the prisoner, Crippen.

After hearing much evidence, already given, the investigation was adjourned till Thursday. It is evident that Miss Leneve will be used as a witness against Crippen. Application for bail for her was refused.

## CANADIAN GENERAL TEAM BEATEN BY THE THISTLES

### Midland League Champions Knocked Out of the Peoples' Shield Competition---Heavy Going Was Too Much for the Light, Fast Electricians, Who However Put Up a Fine Game.

The Canadian General Electric soccer team, Midland League champions, were knocked out of the People's Shield competition at Scarborough Beach, Toronto, on Saturday, when they were defeated by the Toronto Thistles by three goals to two.

The game was played in a field that was covered by seas of mud, and the conditions played havoc with the Electricians, who depend exclusively upon their speed and team play. They were much lighter than the Thistles, who are the best team in Toronto, and in the heavy going were unable to do themselves justice. However, they forced the Thistles to go their limit, and made a fine showing. It was their first defeat this season. Here is what the Toronto papers have to say of the game:

Toronto Mail: The weather clerk could not have been more unkind than he was on Saturday at the soccer tournament at Scarboro Beach, fro the rain came down in sheets just before the first game between the Thistles and Peterborough.

The visiting team sprang a surprise on the redoubtable Scots and held their own until half-time, when the score card read one goal each. In the second half the locals proved to be in the better condition, and gradually assumed the upper hand, scoring two more goals. Peterborough came back again towards the close of the game, and by means of one of the prettiest pieces of combined play of the day, scored a beautiful goal. Try as they would, nothing further resulted, and an interesting game ended in favour of the Thistles by 3 goals to 2.

The ground was in a pitiable condition, the deluge of rain swamping the field in parts. The floundering of the players created great amusement among the three hundred spectators present.

Mayor Geary kicked off, and remained an interested spectator for an hour.

Toronto World: In spite of the unruly weather, a fair crowd gathered at Scarborough Beach Saturday afternoon to witness the first round of the fifth annual Canadian championship for the People's Challenge Shield. There were two matches, the playing teams being the Toronto Thistles v. Peterborough and the Broadviews v. Hamilton City. The first game was one of the most hotly contested of the season. The Thistles are strenuous cup fighters, and the best exponents of scientific soccer in the east; but though a modest combination, the Peterborough team was a hard nut to crack and they put up quite a sportsmanlike fight. They were defeated, however, 3 to 2. The line-up was as follows:

Thistles (3)—Goal, J. Hardy; full-backs, A. Campbell, W. Marshall; half-backs, H. Jones, H. Norcut, G. MacBain; forwards, V. Raven G. Appleton, Alex. Cates, Arthur Rowe, W. Nichol.

Peterborough (2)—Goal, W. Carlton, full-backs, R. Evans, W. Forrest, half backs, R. Evans, W. Forrest; half-backs, T. Allen, W. Hitchens, A. Sparrow; forwards, J. Miller, A. French, A. Padgett, J. Baird, J. Williams.

The goals were scored, for Toronto, by G. Appleton, who put in two, and A. Rowe, while J. Baird did the honours for Peterborough. Out of thirteen games, this is the first defeat Peterborough has sustained this season.

## MONSTER CROWD AT THE OPENING OF THE CONGRESS

Special to The Examiner.

TORONTO, SEPT. 6.—The prospects are that the opening to-night of the Eucharistic Congress in Montreal will bring the greatest crowd of any religious festival ever held in Montreal. Standing room in the great cathedral has long since been at a premium, and he who has the necessary ticket is indeed feeling fortunate. The city has taken on an extremely ecclesiastical appearance, with all the Cardinals, Bishops, and others moving about the streets in rich robes.

This morning Cardinal Vannutelli, the Pope's emissary, celebrated mass at the hotel, and visited wards of hospitals, afterwards calling at various monasteries and convents, giving blessings. A cable arrived this morning for Cardinal Vannutelli from King George, but the nature has not not been given out.

## Peterborough Lacrosse Team Beaten In Campbellford

A bunch of Peterborough lacrosse players gathered together without even an hour's practice, journeyed to Campbellford on Saturday and played a friendly game with the home team, losing a closely-fought battle by 5 goals to 4. Some of the Peterborough team had not had a stick in hand for years and while the team had the class they lacked condition. While they laste dthey were on Easy street, leading at half time by three goals to 1, but the Campbellford team were in better condition and came strong on end, managing to squeeze out a victory. Peterborough scored twice in the first quarter, L. McCoy and Dobson doing the trick, while Campbellford were blanked. In the second quarter Judd scored for Peterborough, while Campbellford got their first counter. The last half completely reversed things, however, Campbellford scored twice in the third, whitewashing the Petes, while in the final quarter Peterborough sandwiched a counter in between two Campbellford scores, leaving the final five to four. The Petes were hospitably entertained and had a very enjoyable visit. They lined up as follows:

Goal, H. Gilman; point, Doria; cover, Beland; 1st defence, Heffernan; second defence, L. McCoy; centre, Tucker; third home, F. McCoy; second home, Dobson; third home, Donovan; outside home, Judd; inside home, Coughlin.

## WAS MISTAKEN FOR BURGLAR WOMAN SHOT

### Invalid Had Been Frightened by Housebreakers and When Woman in Same House Returned From A Ball, He Fired

### SURRENDERS TO POLICE

Special Wire to the Examiner.

NEW YORK, SEPT. 6.—Mistaken for a burglar in her own apartments, Mrs. Louise Geis, 36 years of age, was shot and instantly killed at 430, 18th street, this morning, at 4 o'clock. With her husband and family she was returning from a German ball. They were met with a fusilade of bullets from rooms in the same house, occupied by Karl Wolfslog, who had been seriously ill and who had been frightened by burglars. Wolfslog surrendered to the police.

## SPECIAL PRIZE

### Cattle Raisers Are Given Every Chance to Show the Various Breeds

The Peterborough Industrial Exhibition of this city which will outshine all past exhibitions is offering every inducement to the farmers to show their cattle and gain a prize for their thoroughbreds.

Among the many special prizes given, the man showing the best three cows and bull will be awarded ten dollars and the second best group will be given four dollars. This is open to Jersey, Holstein and Ayrshire breeds.

## DOUBLE FUNERAL

### Victims of Friday's Drowning Fatality Laid to Rest.

A sad spectacle manifested itself yesterday afternoon, when two hearses wended their way to the Little Lake cemetery, carrying the remains of Mrs. Wm. Laing and that of her little daughter, Hazel.

The funeral was one of the largest seen in this city for some time, showing the esteem and sympathy of the many friends which the deceased possessed.

The wreaths of beautiful flowers simply covered the casket and all around it.

A large number of the employees of Peter Hamilton's Foundry turned out as did the station and freight office staff of the Grand Trunk Railway Company, and marched to the graveyard, walking at the head of the procession to the graveyard entrance, and then after allowing the hearses to pass, fell into line behind and gathered at the grave.

The large number who attended, and the beautiful flowers testify to the sympathy of the Peterborough people for the bereaved as well as their love for the departed.

## $25 CHECK

### Firemen Honoured by Check of Twenty-Five Dollars From Mr. A. W. Cressman

Firemen wish to acknowledge with thanks the receipt of twenty-five dollar check from Mr. A. W. Cressman, Amount has been placed in the Bank of Montreal to the credit of Firemen's Benefit Fund. Mr. Cressman was well pleased with the work of the firemen at the fire which recently took place at his store. He was on hand soon after the alarm was given and says the men handled it with tact and skill and has asked Chief Howard to convey his thanks to the men.

## DOWNEYVILLE PICNIC

The annual picnic in connection with the congregation of St. Luke's R. C. church, Downeyville, will be held in Hurley's Grove on Wednesday, September 14th. In addition to other attractions, a number of prominent public speakers are invited to be present. Admission to the grounds and dinner, 50c., children 25c. All are invited. 8d-54-1w.

## AT ST. ANDREW'S

### Preparatory Service To-morrow Night Will Be of Special Interest

The service at St. Andrew's Church to-morrow night preparatory to communion on Sunday next will be of special interest and importance as this will be the last communion of Rev. Mr. Potter's fourteen year pastorate at St. Andrew's. Rev. Kenneth W. Barton, B.A., of Toronto will preach the sermon. All members and adherents are invited to be present.

TUESDAY, SEPTEMBER 6, 1910

## POSTPONING THE EVIL DAY.

It promises to be hard work to dam the direful drift of destiny to imperial *desentigration, forecast by* Sir James Whitney in one of his frequent moments of pose and prophecy. But perhaps British pluck and resource, will achieve it. In the near future a number of Imperial gatherings, whose effect will be to draw the Empire together will be arranged. Next year we shall have that magnificent and significant pageant, the Coronation of King George V. and in conjunction with it an Imperial Conference will be held. At the same time an Imperial Educational Conference will be held in London, under the cooperation of the school authorities of the several self-governing States of the Empire. Sir Jeremiah Whitney's Lamentations have done this much; good they seem to have stimulated imperial activity in the work of patching up the empire to last a little longer. When one sees the spirit behind these proposals, when one reflects upon what they mean, we can get some better idea of the ineffable meanness of Sir James Whitney's idea, that, unless Great Britain consents to tax the bread of her poor the empire will collapse like the baseless fabric of a vision. Sir James *should become practical and have the* courage of his theories. He should list imperial sentiment and cohesion on the stock exchange. Then we might know where we are not. Then every time the tariff went up a few notches, imperial sentiment would advance a point or two. We could then keep tab on things and by keeping tariff jumps on tap, be always ready, semper paratus, to save the empire from slumping ingloriously.

## RIFLE RANGE AND RIFLE SHOOTING.

It is unfortunate that when members of the 57th Regiment wish to practise rifle shooting, they have to go to Omemee—become pensioners on the kindness and courtesy of their more fortunate neighbours. It is not only unfortunate, but prehaps discreditable to somebody, that, with the money available for the purchase and equipment of a rifle range, one is not provided. The Militia Department has the money ready to hand over when the local and central military authorities can agree upon a suitable site. It is stated that it is difficult to secure within reasonable distance of the city, a site, which, in relation to the surroundings, will not contravene the regulations in regard to the safety of the public But certainly there must be some place which can be hit upon to meet the requirements. The battalion is placed at a great disadvantage by the lack of a range. They that are whole need not a physician, but they that are sick. The members of the 57th who can shoot are not those suffering from the want of a range, but those who cannot shoot. The forbmer will find a way, as they did yesterday, but the great body of the regiment is deprived of the privilege of acquiring an art without which the soldier lacks his right hand. More and more since the experience of South Africa, is a soldier's ability to shoot becoming an indispensable qualification. It is to be hoped that the authorities concerned will be able to organize a scouting party that will be able to discover a site for a suitable and reasonably accessible rifle range. It isn't often that money goes begging. Whoever or whatever, if anybody or anything, is responsible for the present condition should become active, or be eliminated.

**PILES** Dr. Chase's Ointment is a positive and painless cure for Itching, Blind, Bleeding and Protruding Piles. 60 cents a box. At all dealers or Edmanson, Bates & Co., Toronto. DR. CHASE'S OINTMENT.

## A NEW MOVEMENT.

General Baden-Powell will have no difficulty in getting recruits for the boy scouts if they are to be amalgamated with the proposed new scout force. It is suggested by Major and Mrs. Swaddling, of Cobourg, to originate a corps to be known as the "Florence Nightingale Girls." The object is to train all our girls in ambulance nursing and self help, their motto to be the same as that of the boy scouts, and the same rules to apply. While it seems quite appropriate that such an organization as that proposed should at the outset be in Swaddling bands, the idea underlying the movement is not without merit. It might well be extended. The training and discipline of the boy scouts is supposed to assist in fitting them for the duties of adult life. In this regard it cannot be too highly commended. To fit girls for the active duties of life the instruction should be extended beyond nursing a broken leg or binding up a broken head. The normal destiny of girls is not hospital nursing, nor ambulance nursing. In properly constituted and managed society, to become wives, mothers, and the heads and hearts of homes, is, or should be, the normal destiny and aim of the average girl. Why not extend the girl scouts idea to teaching the mass of our girls, the special knowledge that would permit them to enter upon the duties of wives and mothers, well equipped in body and knowledge for the duties which they will, or should, in time, assume. The physical training would make them healthy, and the training in the duties they will later be called upon to fulfil will tend to make them the ruling genii of happy homes, and contribute to the prosperity of the state. Would the inroads made upon our population record, as represented by the terrible prevalence of infant mortality so extensively prevail of the mothers who enter that state in actual and acute ignorance of their duties had been properly instructed and trained in the elements of the duties they now fall so far short of?

## EDITORIAL NOTES.

The bread-and-butter loyalists, who hold their devotion to the empire at a price, whose loyalty is measured by the extent to which they have whip hand in trade matters over Great Britain, should lay to heart the Examiner's idea as expressed a few days ago, that the real bond of empire was affection, as endorsed and eloquently expressed by Hon. Mr. Lemieux, in South Africa. He declared that Canada is united to the Motherland in *heart and life independently of tariff* arrangements, Sir James Whitney, to the contrary, nothwithstanding.

We have to fight for what we harvest, especially in the matter of fruit. The latest Dominion Fruit Crop Report, says, of apples: "There has been no improvement in the prospects for apples during the month of August. *The apples that are on the trees have* grown well, and there is a prospect for a medium quantity of very fine fall and winter fruit in all orchards that are reasonably well taken care of. In the orchards where the apples are not well cared for, the codling moth appears to have concentrated upon the few apples that are left. The scab is as bad as usual." The phase "apples not well cared for" is significant and instructive. With proper spraying at proper times the causes that have shortened this year's aple crop would be largely removed.

## HECTOR FABRE.

(Toronto News.)

Mr. Hector Fabre, F.A.S.C., C.M.G., whose death is announced in Paris, was a scholarly French Canadian, a brother of the late Archbishop of Montreal, a brother-in-law of Sir George Cartier and a warm admirer of the late Sir John Macdonald, by whose Government in 1882, he was appointed Canadian Commissione rto France. For nearly three decades he occupied that important post to the satisfaction of both countries and many Canadian visitors to Paris have kind remembrances of the good offices he performed for them in the French capital.

## "THE MAN WHO WOULD BE KING."

(London Advertiser.)

Mr. Roosevelt has got the habit of publicity. After his trip through Europe, when he lectured the nations of the earth, the world might have expected that he would rest from his herculean labours. After living in such a blaze of publicity, not being able to enjoy a single quiet hour, he might have reasonably longed for a spell when he could have made his own that soothing verse, "The world forgotten, by the world forgot." Such would have been the normal man's desire; he would have been gorged with fame, repleted with royal tit-bits, surfeited with the world's applause; he would have liked nothing better than to crawl away somewhere to rest behind drawn curtains and starve his ego. But not so the inimitable Theodore. When he arrived in New York he did intimate that he was out of politics and wished to be regarded as a private citizen. The better part of America took him seriously and heaved asigh of ineffable content to think his name would soon be mis-

NATIONAL DRUG & CHEMICAL COMPANY OF CANADA, LIMITED, MONTREAL. 22

ing from the daily paper, but alas and alack" he rested only for a few hours. Since that time he has been on the jump. At present he is being whirled across his kingdom on a tour in which he is making ever so many speeches a day to his obedient, hero-worshipping subjects. President Taft is reading the reports of Roosevelt's car-end harangues with mingled amazement, anger, and chagrin. He must feel several sizes smaller as he goes on with his menial tasks in Washington while "the man who would be king," is shouting to the people, "I will make the corporations come to time." For execrable bad taste and perfervid egotism the ex-president's present trip across the Republic is the great exhibition of the century.

# Canada, the New Home For The Down And Discouraged

On Sunday the Bishop of London preached the inaugural sermon in the new cathedral, Halifax, marking the bicentenary celebration of the establishment of the English church in Canada. Bishop Ingram, who is noted for his work among the poor of London, preached the gospel of glad tidings for the poor and the wretched of Great Britain, of a new heaven and a new earth beyond the Atlantic. He chose his text from Revelation xxiii; 1: "And I saw a new heaven and a new earth."

It was the hope of this that cheered *the immigrant from Britain*, he said, "I am weary of these sweating dews in old London. I am sick to death of looking for work day after day, and finding none," says the unemployed man. He sees pictures of others like himself, who have gone to Canada and prospered, and he resolves to find the new earth beyond the sea. "I will go to the granary of the world," he says, "I will find space to breathe, I will leave the old land and find a new one. There are only seven millions there, and I shall surely find room to live." He wants a personal liberty and to live under a flag where justice is not bought, where he can reap the fruits of his labours and gather his children round him Such an earth he has not found in Great Britain, but he feels that he will find it in Canada.

With the new earth he may find a new heaven. "It is hard to believe in God when the children cry for bread," said the bishop.

So the bishop dwelt on what must be expected of Canada, and what must be offered to the immigrant, broken loose from old associations. Old things are past away. All things are new. His soul is given a new *chance. Canada is called to answer* the question whether he shall be doomed to disappointment.

Canada, said the bishop, is destined to be the greatest nation for good or evil in the world. In the near future there will be a hundred million living there. It was clear that there must be in the nation five things. There must be freedom. Britons drank in a love of freedom with their first breath. They had fought for it and handed it on to the new nation, and it must be gloriously free in a deeper and wider sense than the ordinary political one.

They were oppressed by monopolies at home, liquor monopolies. It was not too late to assure equal opportunity to all in Canada, where the only aristocracy was the aristocracy of merit. They must have swift and accessible justice. They must recognize the sacredness of home life, and their children must learn to keep their bodies in temperance, soberness and chastity, and to get their own living.

*The new Canada must have charity* and no pharisaic exclusiveness, but a true nation in the family of nations. The influence of Canada, said the bishop, on Japan and China would be paramount, and that influence would arise out of its Christianity. While fortyone per cent of Canada was Roman Catholic, seventeen per cent., Methodist fifteen per cent. Presbyterian, and only twelve Anglican, he was grateful to recognize that nine-tenths of the truths they preached were preached by all. So they might learn to live in brotherly sympathy and forbearance with all those who named the name of the Lord.

In the evening the Bishop of Massa*chusetts preached in a similar vein*, according to Canada a great national destiny. China had 350,000,000 of people, and the Bishop of London hit said with truth that Canada would hold at no late date a hundred millions. If there was a yellow peril when China was poor and ignorant, working by hand and only scratching the surface of their rich earth, what would it be with western industrial civilization?

This was but one feature for Canada to consider, but the higher motive should also be, realized that Christ came to save all men. Greater than an industrial building, or a hospital, or a college even, was the gift of a city of a cathedral, where a centre of spiritual uplift, of spiritual solidarity, patriotism and the brotherhood of mind would stand for all time to send for the spiritual power to cheer, to purify, to uplife and comfort with the name of Jesus Christ.

# A Splendid Sermon On Labour By Canon Davidson

On Sundays evening in St. John's before a large congregation, Canon Davidson dealt dealt with the subject of "Work" in connection with Labour Day. He showed from the Bible that work was a gift of God to man for His good. It's consequent dignity was emphasized by the Saviour's life of constant work among the toilers, much of which was *lived* in the carpenter's home at Nazareth. The dignity and duty of hard work was further taught by the Apostles. Applying this teaching, the preacher urged that all right work was honourable. People spoke of a Clergyman "doing good" as if his occupation was peculiar in this respect, whereas the fact was that the other members of his household and his church enabled him to work and were partners in it. In each of our callings we were *doing* part of the whole work of the world and what we did was not so important as how we did it.

In this connection Mr. Davidson emphasized the honourable nature of domestic work which was a most important branch. The domestic worker in preparing God's food was a fellow worker with God and she should take pride in doing her duty skilfully and faithfully. Artistic work might be done by the skilful use of a stove as well as by a paint brush.

Work was to be done not only skilfully but honestly an dfaithfully. The great question was "Can you be depended on for effective service at your post of duty?"

British work had achieved renoun through these qualities. What standing would Canadian work have before the world? The answer would be made by the conduct of ability of the Canadian workman.

In conclusion Canon Davidson urged that the workman should not become mechanical, a part of his machine, but should work intelligently, exerting a personal influence. The man should not be lost in the worker, but the worker develop the man whose individuality could not be replaced.

**Have You Made It Certain?**

You have every intention of stating those little tots, you are so fond of, with a good education. You believe you will be able when they have grown to give them a good start in life,—better than you yourself got You look to see the olden years of that good woman, your wife, made a little more comfortable than many in the past have been. You are making money, laying some by, and getting ready for these things. —But, *what if you should die?* What will they do then?

Think it over, and then get some Life Insurance particulars from The

# PENMAN GAMES GREAT SUCCESS IN SPITE OF UNFAVOURABLE WEATHER

**West Ends and Centrals, of Toronto, Tied for the Championship —Geo. Barber Won the Individual Honours, Making a Fine Showing.]**

## ATTENDANCE LARGE

The weatherman did not favour the Penman games under the auspices of the local Y.M.C.A. at Riverside Park yesterday afternoon, but in spite of his efforts to interfere with the event, the day was a gratifying success from every point of view. The attendance, between seven and eight hundred, was surprisingly large under the circumstances, and the events were all well filled. Every number on the programme was well contested and all things considered it was the best athletic meet ever seen here.

There were disappointments, however. The weather was one and the non-appearance of Lou Sebert, Jack Tait and C. S. Goulding was another. They were confidently expected by the local association, had entered and promised to come and there was great disappointment when they failed to show up. The downpour of rain in the morning was no doubt responsible for their failure to come, but Physical Director Thompson of the local "Y" was indignant over the matter and has written to the National Y.M.C.A. Athletic Board to report Tait, Goulding and Sebert.

However, everybody else who was advertised to come, was on hand and the crowd was given a splendid programme in which there were few dull moments.

The Penman contest was a most exciting competition between Toronto West Ends and Toronto Centrals and when it was all over and the points totalled the two teams were tied at 51 each. The championship will have to be settled later. Centrals won seven firsts, four seconds and four thirds, while West Ends cleaned up four firsts eight seconds and seven thirds. First place in the other two Penman events went to the Orillia Y. M. C. A., C. Boyle cleaning up the boys' sprints.

The individual honours and incidentally the handsome medal donated by His Worship Mayor Morrow, were easily carried off by Geo. Barber. The Centrals' crack all-round man took first in the 100 yards, 120 yards hurdle, broad jump and running high jump and second in the 220 yards dash and the twelve pound hammer throw. Barber made a record hit with the crowd, who liked to see him win.

One of the features of the day was the defeat of E. B. Archibald, Canadian champion in the pole vault. The big fellow fell to Geo. Cameron, of Centrals, in the event, which was looked upon as an easy five points for the West Ends.

Arnold Knox, of the Centrals, ran true to form by winning both 440 and half mile events, although he was chased hard by M. L. Brock in both events. Archibald cleaned up the shot put and hammer throw handily.

The city championship was easy for Wood of the Victoria Harriers.

The five mile open was captured without difficulty by Roy Holden, of Toronto West Ends, who also carried off the mile.

The weather was anything but favourable. It poured rain all morning until nearly one o'clock and while it did not rain during the afternoon it was always threatening and the air was damp and disagreeable. The track, however, was in splendid shape, the hard cinder path showing little signs of the downpour. The turf was a little too soft for the pole vault and jumps, preventing a good takeoff, but in spite of that the athletes gave a fine performance.

The officials handled the meet in capable fashion and ran off the long programme in good time. There were no delays and everything was all over at 5 o'clock. The non-appearance of Goulding was responsible for calling off the walking race and the relay road race had to be dropped as other events over the Toronto teams time to catch the 5.30 G.T.R. train for home.

### 100 Yards Dash.

The first event on the programme, the one hundred yards, was an easy victory for Geo. Barber, of Toronto Centrals, who breezed home fully a yard in front of M. Follinsbee, of the Toronto West Ends. C. Thorley, of the Centrals, was third. The time, a fifth above even, was very good under the circumstances.

### Boys 100.

The boys' one hundred uncovered a most promising sprinter in the person of C. Boyle, of the Orillia Y.M.C.A., who showed a great burst of speed and ran in a heady, well-judged race. He won his heat from Anderson, of Ottawa and Adam, of Toronto West Ends in handy fashion. Walter Flowers, the Peterborough "Y" runner, who is comparatively a novice at the game cleaned up his heat from J. Moriarity, of Toronto Centrals, without any trouble. Boyle had too much speed for him in the final, however, and although Flowers ran even with him until the last quarter, the Orillia boy had something to reserve and won by a yard in 10 4-5.

### Half Mile Run.

The half mile run resolved itself into a thrilling battle between Arnold Knox of Centrals and Mel. Brock, of West Ends. It was a beautiful race and Brock chased Knox hard all the way but the Central man had something on him in the last sprint for the tape and won by a small margin. Pratt, of the West Ends was third. The time was 2.04 2-5.

### A Surprise in the Pole Vault.

The pole vault was looked upon as easy for E. B. Archibald, the Canadian champion and the crowd was therefore surprised when he had to doff his honours to Alex. Cameron, of Centrals. The condition did not favour Archibald who failed to clear 11 feet 2 inches, a mark away below his record. Cameron cleared the bar at that height and won the event, with Archibald second and Langstaff third. The latter could not be better than 9 feet 8 in.

### The 220 Yards.

The 220 yards dash was a nice race. Geo. Barber looked to have the event on ice until the tape. He got away well, led at half way, stalled off a sprint from Follinsbee of West Ends and swung into the stretch a yard in front. He weakened in the last twenty yards, however, and Follinsbee showed that he had something left by flashing past and winning by at least a yard in 23 2-4.

### Archibald's Shot Put.

Archibald had little trouble in the twelve pound shot put which was a clean sweep for West Ends. The big fellow heaved the pellet 38 feet 2 inches and won easily. E. Grannery was second with 37 feet and Felix Bowes, the lank West Indian, a club-mate of Archibald and Grannery carried off third with a put of 35 feet 4 inches.

### The Mile.

The mile run was marked by one of the best finishes and closest battles of the day. It was a three-cornered fight between Roy Holden of the West Ends and C. Howard and Geo. Lister of Centrals. Guy and Cuff, of Ottawa and Pratt of West Ends, were also starters, but were never in the running. Holden set the pace with Howard and Lister gluing on at his heels. The little West Ender cut out a rapid clip from the go in, but Howard and Lister seemed to like it and hung right on. Coming into the last quarter Howard tried to jump the West Ender but Holden was there. The Central man showed in front, but not for long, as Holden uncorked a spurt that put him on even terms and then as they swung into the stretch he shot past and won by a yard. Lister tried to hold them, but the terrific spurt was too much for him.

### Barber Wins High Jump.

There was a big field in the running broad jump and the crowd took interest in the result. Geo. Barber of Centrals, and M. Langstaff and W. Marshall of West Ends, out-jumped the field and Barber added another first to his string by winning with 20 ft. 1 1-2 in. Langstaff was second and Marshall third.

Knox, of Centrals and Brock, of the West Ends. The two, with Follinsbee, of West Ends, furnished an exciting race. It was close up all the way until the tape, being a repetition of the 220. Knox and Brock were even up at the last turn but once more Knox's sprint stood him in good stead, and he won by a margin in 53.

### Wood's City Championship.

There were only three starters in the one hundred yards dash for the Peterborough championship, H. Wood of the Victoria Harriers, Walter Flowers, of the Y.M.C.A., and Egbert Kelly, of the T.A.S., and they finished in that order. Wood won handily by at least two yards, while Flowers had the same margin on Kelly. The time was 10 4-5.

### The Hurdles.

The 120 yards hurdle was another clean-up for Geo. Barber. A. Cameron, of Centrals, won the first heat from A. O. Wright of West Ends without trouble and Barber defeated Marshall of West Ends in the second heat by four feet, leading all the way. The final was a pretty race. Barber broke away in front at the start, but his club mate, Cameron, was coming fast and caught him half way home. It looked like a close finish, but Barber had something to call on and went away in the last quarter, winning on the bit. Cameron was second and Wright third.

### The Boys' 440.

Boyle, of Orillia, once again demonstrated his class in the boys' 440 in which there was a large field. Adam, of Toronto West End and Anderson, of Ottawa, made all the running in the early stages. Boyle, running well within himself, contented himself to remain third until the stretch, when he let loose with a pretty sprint that carried him around the leaders as if they were standing still, and he won easily.

### The High Jump.

One of the most exciting events of the day was the running high jump, the ending of which was rather unsatisfactory, in which Geo. Barber and W. Marshall find a most exciting battle. There was a big field, which gradually narrowe ddown to the pair mentioned, Cameron, of Centrals, being third. Both Barber and Marshall cleared the bar at five feet nine, but could not get any higher and had to jump off to settle the result. The bar was lowered and Marshall was the first to clear it at the height set. West Ends claimed the event, but Barber followed Marshall by passing the jump successfully and Dr. McPherson, the referee, decided that they would have to jump again. Marshall would not do so and Barber clearing the bar, was awarded the event. The crowd took a keen interest in this event and both men were warmly applauded on their brilliant performance.

### The Hammer Throw.

Ed. Archibald showed that he was in a class by himself in the twelve pound hammer throw, which he won with ridiculous ease with a throw of 162 feet 5 inches. Geo. Barber, the next nearest, had a throw of only 94 feet 7 inches.

### Five Mile, Open.

The five mile open race had a field of six runners and resulted in an easy win for Roy Holden, who came in all by himself. The West End youngster showed speed and beautiful, easy gait. Geo. Robinson, the little Victoria Harrier and Charlie Thorpe were the Peterborough entries. Thorpe, who had no training whatever, went in only to make a race and it was no surprise to the crowd when he dropped out in the third mile, while Robinson, although he was game enough, lacked speed. He led for the first lap, but then Holden took the lead and was never headed afterwards. Bowes, the West Indian, and Smith, a club mate, of the other two, glued on for a while, but Holden gradually drew away. Robinson steadily dropped back and then Bowes began to come back as well and the field spread out. Away out in front Holden ran steadily and well and his lead increased. In the last mile he lapped Robinson and Bowes and was three-quarters of a lap in front of Smith at the finish. Holden's time by miles was 5.28 3-5, 11.07, 16.53, 22.33, 28.26 4-5. Smith was second, Bowes third and Robinson fourth.

The complete results follow:

**100 Yards Dash**

1 Geo. Barber, Toronto Central.
2 M. Follinsbee, Tor. W. E.
3 C. Thorley, Tor. Central.
Time 10 1-5 secs.

# THE EVENING CHIT-CHAT

By Ruth Cameron

DEAR NIECE JOAN.—And so my little girl has decided that she wants to earn her bread and a little cake to go with it instead of having her father supply it to her.

Now, Joan, if you hadn't as housewifely a little sister as ever took real pleasure in making beds and doing dishes I'd do my best to discourage you. Right off the reel I'd say, "Why not stay at home and help your mother?"

You see, I've seen so many girls in the business world who would be really earning just as much money and be much better off if they would stay right at home and help their mothers and save the cost of a servant.

The average wages and board of a maid and whatshe wastes, I've been told by good authorities, amount to eight or ten dollars and sometimes more, and there are a good many thousand business girls who don't bring in any more than that.

Of course, part of the trouble with that idea is that the girl who stays at home is seldom given any regular wages. When she wants anything, if he feels like it, her father gives her the money, but she doesn't have the feeling of independence that a girl who gets a nice fat little envelope every Saturday noon, enjoys.

They had some talk in the papers a little while ago about starting a movement to have men pay their wives regular salaries. I don't believe that would be possible, because to pay a good many married women that I know half what they earn as cook, nursemaid, waitress, seamstress, trained nurse and in half a dozen other capacities, their husbands would have to turn over their whole salaries and then some.

But I do wish that fathers would get the habit of paying the girl who stays at home and helps her mother as regular a wage as he would the maid whose place she takes.

I think it would keep a good many girls out of the business world who don't belong there.

Well, niece, that's quite far afield fromwhat I started to say which was that as long as you had a sister who liked housework better than you do, and who could help mother all that was necessary, I wouldn't forbid the banns with your new sweetheart—a business career.

Will I write you some advice from my store of experience?

What a ridiculous request, niece.

What is the one thing that everybody likes to give and nobody wants to receive?

You know perfectly that you'd have to disable my typewriter or put my arms out of commission to keep me from deluging you with it.

And that wouldn't do any good because then I'd take to dictating.

Of course I know you only ask to flatter me and I'm glad of it, Joan. A good brain and a fund of common sense are the first two requisites for business success but the third is being able to manage people and I'm glad you evidently have that ability even if you do use it on.

Your Gullible Old Aunt.

P. S. On second thought I think I'll place the ability to manage people second.

P. P. S. Or maybe not.

Ruth Cameron

# "THE PILLAR OF LIGHT"

By Louis Tracey, (Copyrighted)

(Continued from Saturday)

"Well, with this little chap on the bridge, the pointer would have told the captain unerringly. I don't suppose it will be thick whilst you are here, or you would see it pick up distant blasts of a steamer long before we can hear them, and follow her course right round the arc of her passage. It is most interesting to watch its activity when there are several ships using their sirens. I have never had an opportunity of testing it on more than three vessels at once, but as soon as I could deduce a regular sequence in the seemingly erratic movements of the indicator, I marked the approach and passing of each with the utmost ease."

"Would that stop collisions at sea?'

"Nothing will do that, because some ship's officers refuse at times to exercise due care. But with my instrument on board two ships, and a time chart attached to the drums, there would be no need for a Board of Trade inquiry to determine whether or not the proper warning was given. To the vast majority of navigators it will prove an absolute blessing."

"You clever old thing!" cried Enid. "I suppose you will make heaps of money out of it."

"The inventor is the last man to make money out of his inventions, as a rule," said Brand. "I suppose I differ from the ordinary poor fellow inasmuch as I am not dependent for a livelihood on the success of my discovery."

"There's not the least little bit of chance of there being a fog tonight" queried Enid, so earnestly that a wave of merriment rippled through the room.

"Not the least. In any event, you two girls will be in bed and sound asleep at ten o'clock."

"Perish the thought!" cried Constance. "Bed at ten, during our first and only night on a lighthouse!"

"You will see," said her father. "You canont imagine how the clock dwaldes in this circumscribed area. Work alone conquers it. Otherwise, men would quit the service after a month's experience."

"Ship ahoy!" screamed Enid. "Here comes the Lapwing round Carn du. Mr. Lawton must have lent her to bring the relief. How kind of him."

"The Lapwing cannot approach the rock," said Brand. "I will signal 'Landing impossible to-day.' It will save them a useless journey."

He selected the requisite flags from a locker, the phrase he needed being coded. Soon the strong breeze was trying to tear the bunting from the cordage, and though they could not hear the three whistles with which the little yacht acknowledged the signal, they could easily see the jets of steam through their glasses.

Constance happened to overlook the table on which stood the auriscope.

"This thing has actually recorded those whistles," she cried in wonder.

"What sort of whistle has the Lapwing?" asked Brand.

"A loud and deep one, worthy of a leviathan. It was a fad of Mr. Lawton's. They say his siren consumes more steam than his engines."

Her father laughed.

"Anyhow, he is sticking to his course," he announced. "I may as well take in the decorations."

Undauntedly, but much flurried by a sea ever increasing in strength as the force of the ebb tide encountered the resistance of the wind, the Lapwing held on. With wind and sea against her she would have made slow work of it. As it was, there was help forthcoming for both journeys unless the wind went back to the north again as rapidly as it had veered to the southwest.

She would not be abreast the rock for nearly an hour, so Brand left the girls in charge of the lookout whilst he visited the oil-room. A wild night, such as he anticipated, demanded full pressure at the lamp. If the air became super-saturated, breakage of the glass chimneys might take place, and he must have a good stock on hand. Water and coal, too, were needed; the double accident to Bates and Jackson had thrown into arrears all the ordinary duties of the afternoon watch.

Naturally, the pair in the lantern found the progress of the yacht exasperatingly slow.

"A nice Lapwing," said Enid scornfully. "I will tell Mr. Lawton he ought to rechristen her the Bantam. All her power is in her crow."

When Brand joined them matters became livelier. More accustomed than they to the use of a telescope, he made discoveries.

"The two supernumeraries are there," he announced, "but I cannot see Lawton. Indeed, so far as I can make out, she is commanded by Stanhope, dressed in Ben Pollard's oil skins."

"He has left Lady Margaret!" cried Constance.

"He never went home!" essayed Enid.

"Poor chap, he was going to take us for a drive to-morrow," said Constance.

"To Morvah," explained Enid, with a syllabic emphasis meant for one pair of ears.

"It is very nice of him to struggle on and have a look at us," said Brand. "He can come close enough to see us, but that is all. Our small megaphone will be useless."

Indeed, the Lapwing dared not approach nearer than the Trinity mooring buoy. By that time the three, protected from the biting wind by oilskin coats, were standing on the gallery. The reef was bellowing up at them with a continuous roar. A couple of acres of its surface consisted of nothing more tangible than white foam and driving spray.

Stanhope, resigning the wheel to a sailor, braced himself firmly against the little vessel's foremast and began to strike a series of extraordinary attitudes with his arms and head.

(To be continued)

# News of the Night.

As the enamelled metal bed is to the wooden bedstead, so the "Ideal" Guaranteed Metal Bed is to ordinary metal beds. If it were not above the average in every detail, the "Ideal" Guarantee would not be on the footrail.

For while any metal bed is sanitary, sensible, practical, the "Ideal" Metal Bed is all these and more besides. The Guarantee label means satisfaction to the buyer.

Because "Ideal" Metal Beds retain the snowiness of their enamel—no chance of its turning yellow or dingy. Take it down or set it up without risk of breaking it, and with no need for a mallet and much muscle—the parts fit snugly. Forty inspections make us so sure of that that we can afford to guarantee it to you.

Maybe you will be asked a little more for "Ideal" quality—perhaps forty cents more. But that cannot weigh against the certainty the "Ideal" Guarantee gives you of genuine value—and of the same quality in material and workmanship, even though you pay but three dollars for your "Ideal" Metal Bed. Write for Booklet No. 125 3

## OBITUARY

### ARTHUR E. W. R. HUFFMAN.

The death occurred on Sunday morning of Arthur Edward Huffman, aged seven months, only child of Mr. and Mrs. Alfred Huffman, 586 Rogers street, East City. The child had been ill but a short time, and in spite of the best medical attendance, passed away. Rev. Mr. Webb of the Murray Street Baptist Church, presided at the funeral service yesterday afternoon.

### SISTER ALOYSIUS.

All the beautiful solemnity and touching simplicity that characterizes the church's farewell to her departed children, marked the funeral service for Sister M. Aloysius Fitzpatrick, at Mount St. Joseph this morning. The service began at 8.30, with the celebration of solemn requiem High mass, and at that time the Chapel of the Sacred Heart was filled by the immediate relatives and friends of the deceased, the community of Mount St. Joseph, and most of the Sisters from the various other convents in the city. An added pathos was given to the morning's sad proceedings by the fact that the celebrant of the High mass was a brother of the deceased, Rev. Father Fitzpatrick, of Emismore. Rev. Fr. Bretherton, Hastings, acted as deacon, and Rev. Fr. Galvin, Galway, sub-deacon, with Rev. Dr. O'Brien, Sacred Heart church, master of ceremonies. Presiding at the throne was His Lordship Bishop O'Connor and in the sanctuary, gathered to show a last mark of respect to one whom everybody revered as one of the best beloved sisters of St Joseph, were Rev. Fr. McColl, rector, of St. Peter's Cathedral; Rev. Fr. Conway, Peterborough; Rev. P. J. McGuire, Downeyville; Rev. P. J. Kelly, Norwood; Rev. James Toner, St Peter's, and Rev. D. A. Casey, St. Peter's.

The chief mourners were Rev. Fr. Fitzpatrick, Emismore; Edward Fitzpatrick, and Philip Fitzpatrick (Norwood), brothers; Mrs Garvey, sister, and Mr. Garvey, Norwood, Mrs. M. Mahoney, sister, and Mr. Mahoney, Asphodel; Mrs. English, sister, and Mr. English, Westwood, Sister M. Stanislaus, sister, Fort William Convent, was unable to be present.

Mr. J. C. Sullivan, Dr. Galvin, Dr. McNulty, Inspector O'Brien, Mr. J. Lynch and Mr. LaPlante were the pallbearers. The music of the mass was rendered very impressively by the sisters' choir, the beautiful offertory hymn, "The Nun at Death," being exceptionally well delivered.

The last absolution was pronounced by His Lordship, the Bishop, and then, headed by the priests the coffin was borne to the door of the chapel by the sorrowing sisters, to whom the deceased nun had ever been at once an inspiration and a dearly loved companion. At the graveside the last prayers were recited by Rev. Fr. Fitzpatrick, and then one by one the mourners departed, having looked their last upon one of the uneanonized saints of God. And so in the nun plot of St. Peter's cemetery sleeps Sister Aloysius awaiting the Eternal Dawn. To Father Fitzpatrick, and thee members of her family and to the community of St. Joseph's our sympathy goes out in this, their sad bereavement, but we feel at the same time that the tears in those eyes this morning are not symbols of regret, for those who, like Sister Aloysius, give their lives to the Master's service, death cannot be but the beginning of life. "There is no death—what seems so is transition," the poet says. There is no death for the true Christian. The final summons is but the call of the Master, bidding the faithful servant come and receive the reward He has promised. It was only this morning as I stood alone at the bier of Sister Aloysius that I realized the full import of the words so appropriately selected by His Lordship the Bishop, for his touching discourse, "Blessed are the dead who die in the Lord." And as one listened to the funeral music re-echoing through the chapel one somehow found it easy to understand how it is that there never yet have been found wanting souls who could give up the world and all that it offers in exchange for the sister's cell. We do not weep, said His Lordship, rather do we rejoice that God has seen fit to take unto himself our sister, to give her in return for her life of service, thereward of an eternal crown. For nineteen years she had worked and laboured for Christ, knowing that He who regards as done to Himself what we do to the least of his children, would accept her service to Him in the person of the poor and sick and the ignorant. She had been tried a few have been tried. For long years she had borne with sublime resignation pain and suffering and sickness. She had suffered with Christ, she had trusted in Him, and He would not be outdone in generosity. Those who sow in sorrow shall reap in joy in the glory that aboundeth for ever and ever.

Of those who were present at the obsequies this morning, there was not one but prayed in the depths of their heart thta their's would be a death and a judgment like that of Sister St. Aloysius.

### H. A. MULHERN.

The death occurred on Sunday morning of one of the city's well-known citizens, in the person of Mr. H. A. Mulhern, 546 Aylmer street.

The late Mr. Mulhern was born in Kingston and spent his earlier years in the village of Warkworth. About twenty-seven years ago he came to Peterborough, where he engaged in the flour milling business in the old Imperial Mills, which were situated at the north end of the city, near the street railway terminus. He then operated the stone mill east of Hunter street bridge. When the new system of grinding corn in bond and re-exporting the finished product was introduced, Mr. Mulhern was one of the first millers to adopt this system. After spending some years in the McAllister mill, above referred to, he established the Central Milling Company at the C. P. R. station, which he has operated successfully until the present time.

The deceased had had ill-health for the past few years but did not get seriously ill until lately, which ended with fatal results.

Mr. Mulhern was well known to a large number of the citizens of Peterborough and was highly respected. He leaves to mourn his loss a wife and three sons. The sons are: Alexander Hamilton of Renfrew; Harry and Barnard, city.

The funeral was held this afternoon to Little Lake c -tery at 3 o'clock.

### EARL IRWIN.

The death occurred this morning at 3.30, of little Earl, four year old son of Mr. Alex. Irwin, 352 Water street. The little fellow had been ailing for a few days with heart trouble, which ended in his demise. He is survived by two little brothers, Harold and Roy.

The funeral will be held on Wednesday morning at 3.30 to the Little Lake cemetery.

### CLARA BELLE MILLER.

The death occurred last night of Clara Belle, the three months old daughter of Mr. and Mrs. Thos. Miller, 486 George street. The twin sister of the deceased little one was laid to rest about two weeks ago.

The many friends of the deceased sympathize with them in their great bereavement.

The funeral was held this afternoon, at four o'clock.

**WOMEN HAVE BACKACHE**

**Many women have kidney disease and do not know it because they attribute backache to other causes. The use of Dr. Chase's Kidney and Liver Pills makes short work of backache and prevents serious trouble from deranged kidneys. Ask your neighbors about this great family medicine.**

## REV. J. G. POTTER'S INDUCTION ARRANGED

The Montreal Presbytery met this week and made arrangements for the induction of Rev. J. G. Potter of Peterborough, into the pastorate of the McVicar Memorial Church, Montreal. The event will take place on Thursday, Sept. 16, at 8 p.m. Rev. Principal Scrimger of the Presbyterian College, Montreal, will preside. Rev. Mr. MacGillivray of the Taylor Presbyterian Church, Montreal, will address the minister, and Rev. G. A. MacLennan of Chateauguay Presbyterian Church, the congregation. The public reception will take place on September 20, when Rev. Dr. Symonds Rev. W. R. Young, and Rev. Wm. Major, three former Peterborough clergymen, have been invited to attend. Mr. Potter will leave for Montreal on September 14th.

## CATTLE KILLED

About a week ago Thursday Mrs. John Fitzgerald, Lot 4, Con. 4, Otonabee, had ten cattle killed on the C. P. Railway. During the night the gate was blown off its hinges by the terrific storm. The cattle strayed on to the track and ten were found lying along the track dead in the morning.

GURNEY-OXFORD

*Don't try To make the old Range do*

A makeshift cook-stove is always expensive. You waste food because it is not properly cooked. You waste time trying to make things right. You waste fuel trying to heat your oven—or get a hot fire—or keep a low fire all day and night. You lose money every day you try to use an unsatisfactory range.

**THE IMPERIAL OXFORD**

Here is the range for your purpose. The one perfect **all right** cast iron range, day in and day out, year after year. Will last you a lifetime. Reliable as the firm back of it. Made for coal or wood—gas attachment if desired. Has detachable nickel rims, easy to clean. New device for removing ashes.

**The OXFORD ECONOMIZER**

which easily saves 20% of your fuel. No other device of the kind ever invented is worth so much to you in cold cash. You lose money every day you try to get along without it.

Come in and let us show you the Imperial Oxford with "Economizer" attachment. It means dollars and cents to you.

Other **Gurney-Oxford** stoves and ranges for every purpose and any kind of fuel. Get acquainted with the best known, best liked stoves in all Canada. It will be your gain.

**George Hutchinson & Son**

## ENJOYED THE DAY'S OUTING

In spite of the rain and squally weather, making conditions rather unfavourable, the sixty officers and men of the 57th who went to Omemee yesterday, had a good day's shooting and a successful outing.

The shooting took place at the ranges of the Omemee Rifle Club and considering the disadvantages of the weather the averages were excellent. The visitors shot at two ranges, 200 and 400 yards. The scores will be made out on Saturday and will be published on Monday.

A test of the Ross rifle was made by Capt. Watt who put on eight bulls-eyes in succession.

After the shooting several members of the Omemee Rifle Club were guests of the visitors from the 57th at the Commercial House.

**THE POWER OF STEAM.**

**Many May See But it Takes Genius to Realize.**

When James Watt saw the steam causing the kettle lid to jump up and down he said "There must be power in that steam that it can lift such a weight."

There was.

Millions prior to him had seen the same phenomenon and regarded it as an unexplained mystery.

Recent scientific research has put its finger on the "cause" of Dandruff, Falling Hair, and consequent Baldness, and has unearthed a tiny germ which eats the life from the roots of human hair.

Newbro's Herpicide destroys this germ and consequently restores the hair to its natural state.

Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

For sale by McDermid and Jury, druggists; also Payne's drug store. $1 bottles guaranteed.

### GOLF

The opening of the fall season of the Ladies' Golf Club will be held on Wednesday, Sept. 8th, with the usual monthly competition, the medal round, starting at 2.30 sharp.

The result of the draw will be announced every Wednesday and Saturday in the Review and the Examiner.

## POULTRY ASSOCIATION

The regular monthly meeting of the Peterborough Poultry Association was held Thursday night in their hall, Simcoe street. The minutes of last meeting was read and received.

Mr. Ellis of the staff of Farm and Dairy gave a very interesting talk on Poultry Industry in Ontario from a commercial standpoint.

Birds on exhibition were judged as follows:

Black Wyandottes 4, cockerel 1 and 2 pullets, 1 and 2 Wr. Grose.

Brown Leghorns 2, pullet 1 and 2 to John Mathieson.

White Leghorns 4, cockerel 1 and 2, pullets 1 and 2, E. Wegg.

Minorcas 2, Cockerel 1 and 2 to R D. Robson.

White Rocks, 2, pullets 1 and 2 to Joe Kelly.

Bantams, Pyle Game pullet, 1 to Geo. Buller.

Duck Wing, 2, cockerel 1 and pullet 1 Geo. Buller.

JOE KELLY, Sec -Treas.

## POST CARD COLUMN

Birmingham, Eng., Aug. 25th, '10.

To the Editor of The Examiner:

After a very enjoyable holiday in the mother country, I shall return to Peterborough on the steamship Victorian, which leaves Liverpool on Sept. 2nd. I received some of your papers during my stay. I tell you I did not feel elated when my friends read an article with the heading worded as this, what Peterborough lacks. For instance, the little petty, forgoing vilages in England, who have tremendous displays, such as a horse show, flower show, cattle show. In fact there is always something fresh to occupy the attentions of the people, and at these events you nearly always see a grand firework display, which we never see in Peterborough. Another noticeable feature is the enthusiasm with which the people take an interest in these events. It certainly acts as a stimulant and is very refreshing to those interested.

Yours truly,
E. PARKES.

## CHIMNEY FIRE

**Blaze Extinguished by Chemicals—No Damage**

At 1.45 yesterday morning the fire brigade made a run to the west end of the city, to the home of Mrs. C. Whaley, 515 Cedar street, where a chimney had taken fire. By a prompt application of the chemicals the blaze was soon extinguished. No damages.

**THE LADIES OF PETERBOROUGH MAY NOW GROW BEAUTIFUL HAIR**

McDermid and Jury, backed up by the manufacturers of SALVIA, the Great Hair Grower, guarantee it to grow hair.

SALVIA destroys Dandruff in ten days.

The roots of the hair are so nourished and fed that a new crop of hair springs up, to the amazement and delight of the user. The hair is made soft and fluffy. Like all American preparations SALVIA is daintily perfumed. It is hard to find an actress who does not use SALVIA continually. A large bottle for 50c.

**THE CANADIAN LADY**

For style, wear and comfort try "The Canadian Lady" Boot at $3.00, $3.50 and $4.00

T. C. Elliott, 392 George Street.

## IS RECOVERING

About a month ago Mr. Court Scobell, of Fraserville, met with a painful accident and has been suffering from the effects of the fall since. On Wednesday of last week Mr. Scobell was brought to Peterborough Hospital, where Dr. Halliday and Dr. Marshall performed an operation which the doctors report as having been successful. The patient is doing as well as could be expected and it is to be hoped that Mr. Scobell will be about in a short time in his usual state of good health.

## WEDDING BELLS

**THOMPSON—CARL.**

The following from the Toronto Star will be read with interest here. Mr. Thompson is a former resident of Peterborough and is a brother of Messrs. W. J. and H. C. Thompson:

On Monday, August 29th, the marriage of Miss L. Carl, second daughter of Mrs. M. A. Carl, and Mr. Kinald T. Thompson, of Toronto, was solemnized very quietly at the home of the bride's mother, at 1991 Queen street east.

The bride, who was given away by her grandfather, Mr. Wm. Battiste, was attired in a travelling suit of navy blue broadcloth, and large blue hat with yellow plumes. The groom's gift to the bride was a beautiful diamond Marquise ring. The happy couple were the recipients of numerous costly gifts, among them being a handsome cabinet of silver from officers and staff of Central Canada Loan Company, with which company the groom is connected.

After their return from a trip through the Eastern States, Mr. and Mrs. Thompson will reside at 1 Dowling avenue, Parkdale.

**SMART—MAHOOD.**

A quiet wedding was solemnized at the residence of Mr. Robert McOmber, on Thursday evening, when his daughter, Miss Ella, was united in marriage to Mr. Norman Smart of Fort William. The young couple were unattended. The bride wore a pretty costume of white crepe de chene over white silk taffeta. The going away gown was of navy blue broadcloth with hat to match. The ceremony was performed by Rev. H. J. Keith, of Knox church. The bride received many handsome presents including a number of cash. Mr. and Mrs. Smart will reside in Fort William.

**EDMONDSON—MAUDE.**

A wedding was quietly solemnized at the residence of the bride's father, Mr. Jas. L. Maude, Nassau street, at 8 p.m., on Saturday evening when his daughter, Miss Elizabeth Christine Maude was united in marriage to Mr. William Thomas Edmondson of this city. The young couple were unattended. The ceremony was performed by Rev. J. G. Potter of St. Andrew's church.

**HEFFERNAN—CLEARY.**

A pretty but quiet wedding was solemnized by Rev. W. J. Coll, at St. Peter's Cathedral this morning, when Elizabeth Heffernan, of this city was united in the holy bonds of matrimony to Michael Cleary of Hastings. The bridesmaid was Miss Mary Doherty, of Otonabee, while Mr. John McMillan was groomsman.

**M'MANUS—CLARK.**

A quiet wedding took place this morning at 8 o'clock at St. Peter's cathedral, when Miss Grace Clark, of Belleville, was united in the holy bonds of matrimony to Mr. B. McManus. Rev. Father O'Brien officiated.

The bride, who was attired in a blue silk costume, with hat to match, was attended by Miss [illegible] McManus, while Mr. G. Conlin, of Bolivar street, assisted the groom. The young couple's many friends join in wishing them a happy and prosperous future.

### At the British Association.

London, Sept. 7.—(C.A.P. Cable.)—Among Canadians attending the meeting of the British Association are Prof. Parker Jack of Winnipeg; C. B. Handcock, A. B. Clark, Mrs. Clark, Winnipeg; Professors Coleman, Lang, McLennan of Toronto; J. W. Hayward, Montreal; James Robertson, Ottawa, and Prof. Cameron of Toronto.

### Crushed by Auto.

London, Ont., Sept. 7.—James Snowden, a messenger, was probably fatally injured by being run over by a large touring car. Snowden was riding behind a wagon loaded with big boxes and turned out suddenly right in front of the auto, which struck him squarely. He passed beneath the wheels and was terribly crushed.

### Posed as a Priest.

Montreal, Sept. 7.—A sensation developed yesterday when it was discovered that a man dressed in priest's apparel, who had smuggled his way into the Archbishop's Collegiate Institute, where, with twenty-five regular priests, he was enjoying the free hospitality of the diocese, was nothing but an imposter.

### Will Build Big Iron Plant.

Kingston, Sept. 7.—The organization has been completed for the Hawthorne Silver Iron Mines to develop iron ores around the Kingston & Pembroke Railway. The company has 20,000 acres, will ship ore and manufacture pig iron. A plant with a capacity of 2,000 tons will be built.

### Beat Regulars Erecting Tents.

Alton, Eng., Sept. 7.—The Queen's Own of Toronto, on a march of fourteen miles, led the way and set the pace yesterday morning for 8,000 troops in the second division camp, two miles from here. They beat the regulars in putting up tents. The men stood the march well, though there were a few blistered feet.

Captains George Pellatt, Kirkpatrick, Lieuts. Massey and George Gzowsky will remain in Aldershot for some time, owing to a slight attack of influenza. It is not serious, and is due to the change of climate.

### Daring Silver Robbery.

Cobalt, Sept. 7.—The most daring robbery ever perpetrated in Northern Ontario occurred Monday night, when 35,000 ounces of silver bullion disappeared from the safe at the Nova Scotia mill. The value of the bullion is roughly $17,500. The silver disappeared between the hours of 10 Monday night and 7 next morning. The entire staff of the provincial police are detailed on the case.

### Drowned From Motor Boat.

Chatham, Sept. 7.—Returning from a fishing party near Prairie Siding, Arthur Bury, aged 38, attempted to move to the stern of a motor boat.

In some way he fell overboard and never rose to the surface. It is believed that he was sucked under the boat and possibly hit on the head with the propellor.

### A Peculiar Perversion.

New York, Sept. 7.—A weakness for babies, white or black, and an admitted inability to pass them without kissing and biting them, landed Elisabeth McGuirk, 35 years old, in the cells last night. Lillian Smothers, a negress, leaving her 18-months-old daughter Ruby in a go-cart, heard it cry, and returned to find teeth marks and blood on its left forearm. Two little girls said that a woman had kissed and bitten the child.

### Double Drowning.

Brockville, Sept. 7.—J. J. Letool, a Thiel detective of Ottawa, and A. Brander, typewriter agent, were drowned from a launch five miles east of here yesterday morning.

With their wives and J. O. Clendenning, in charge of the boat, the party left here in the launch Imp, for Ogdensburg, and at a point mentioned the launch capsized. Clendehning managed to save the women and himself.

### Army Up to Full Strength.

Washington, Sept. 7.—Though President Taft's policy of retrenchment is to be followed more effectively than ever, the standing army will be recruited up to its authorised strength of 87,000 men, according to announcement made by Major-Gen. Wood, chief of staff, when he returned to Washington yesterday, after a trip to Beverley, where he conferred with the President.

# Motive Is Now Alleged

**Mrs. Crippen Was Enraged at Crippen's Persistence in Keeping Ethel Leneve as His Mistress, Says the Prosecution In Offering Explanation For Crime—Identify Mrs. Crippen's Body by Old Scar.**

London, Sept. 7.—The charge against Ethel Clare Leneve, co-defendant with Dr. H. H. Crippen, was yesterday reduced to that of being an accessory after the fact. This was announced when the hearing of the pair was resumed in the Bow street police court.

When arrested she was accused of being an accomplice.

Prosecutor Travers Humphreys, who made the announcement, also for the first time gave out the case of the prosecution, declaring that the examination of the remains of Belle Elmore (Mrs. Crippen) showed that there had been a criminal operation on the victim, while the chemical analysis revealed large quantities of hyoscin, one of the most powerful drugs known.

A few days before the death of Belle Elmore, her husband bought five grains of hyoscin, enough to kill forty persons.

The prosecutor charged flatly that Ethel Leneve was Crippen's mistress and that their relations had aroused the anger of Mrs. Crippen. By this move, the prosecution has advanced its theory of motive.

Application to admit the prisoners to bail was refused, and an adjournment was taken until Thursday.

New testimony will doubtless be elaborated later by the physicians who conducted the post mortem, with the statement of Mrs. Paul Martinetti to the effect that Mrs. Crippen had once shown her a scar on the lower part of the body which had the appearance of being from an old cut. The doctors who examined the body found in the Crippen home, discovered a piece of flesh bearing a similar scar.

All night long crowds surrounded Bow street police court, to get a glimpse of the prisoners when they were taken in yesterday for the continued hearing before Magistrate De Rutzn. At dawn the throng increased and by the time the principals in the most enthralling mystery of a decade were hurried into the building, flanked and led by guards, fully 10,000 were crowded about the court and on the adjacent streets. A heavy detail of police was hard put to it to preserve order. When the prisoners mounted the steps of the building, the crowd surged forward, and several persons were crushed. Four women had to be carried from the danger zone by the police.

### Drowned in Motor Boat.

Chatham, Sept. 7.—Returning from a fishing party near Prairie Siding, Arthur Bury, aged 38, attempted to move to the stern of a motor boat.

In some way he fell overboard and never rose to the surface. It is believed that he was sucked under the boat and possibly hit on the head with the propellor.

# He Hopes For Unity

**Cardinal Vannutelli Reads the Papal Greeting at the First Session of the Great Congress of Bishops—Mgr. Bruchesi Makes a Splendid Reply—Message From the King Is Appreciated by Catholics.**

Montreal, Sept. 7.—The formal opening of the 21st International Eucharistic Congress, and the first ever held in the new world, took place here last evening at eight o'clock in St. James' Cathedral, amid extraordinary pomp and display, probably never before seen in any Catholic centre of this continent.

Archbishop Bruchesi made many sacrifices to obtain this signal honor for the Canadian church and for his diocese, but his triumph last evening was sufficiently magnificent to repay this brilliant prelate and probably prince of the church for all he has done.

As hinted in the despatch of Monday evening, the legate in his opening address declared that in future these congresses would probably alternate between the old and new world.

Another important feature was the telegram to the King, and His Majesty's reply.

In answer to a telegram to the Holy Father, the cardinal secretary of state also sent a message of congratulation.

It was a magnificent sight at about eight o'clock, when a hundred bishops and archbishops, headed by Cardinal Vannutelli ,the pontifical legate, and Cardinal Logue, beautifully robed in scarlet and gold, left the grand salon of the archbishop's palace, and, coming out to Palace street, entered the cathedral from Dorchester street and proceeded to their respective places in front of the altar railing.

The great cathedral was packed to the doors, and there would have been many thousands more had the vast edifice been large enough to contain them. The legate first delivered his message to the congress, supplementing the same by reading the papal message, which had just arrived from the Vatican. In part the message said:

"By these letters we appoint you our legate, to preside in our name and place at the eucharistic congress of Montreal.

"The mission entrusted to you is in keeping with your piety and rank, and peculiarly calculated to advance the Christian cause. For, by this public manifestation, the eucharistic bread, unhampered by space and division, will bind together the lands which the seas divide, stimulate distant nations to vindicate and proclaim the glory of God, the Saviour, and to honor with due loyalty and submission the centre of Christian unity, to wit, Christ's vicar on earth.

"Consequently, all those matters will be discussed in the congress, whereby the devotion to the august sacrament may be spread and honored more widely, so that, in this wise, the insults heaped upon it may be repaired, the practice of frequent communion revived, and all be convinced that no devotion is more efficacious than this, to link souls together in the bonds of peace and good will, so necessary to Christian and civil society; in fine, that by the writings and the manifold activities employed for this purpose, men may be led to higher and better achievements.

Mgr. Bruchesi's reply was a splendid effort. His grace referred to the modification of the royal declaration, adding that Catholics all over the British Empire would be ever grateful for this latest royal act. The reading of the royal message to the congress created very great enthusiasm, and his grace the Archbishop of Montreal told your correspondent that Catholic hearts were especially grateful to King George for his very prompt message from Balmoral.

### Expects a Fortune.

Chicago, Sept. 7.—Until he actually gets the million dollars which he expects from his grandfather's estate, Harold Donn will remain on his tailor's bench here at $18 a week. The fortune is to come from an estate in Russia bequeathed by Donn's grandfather to his mother, who died nearly ten years ago in England.

The prospective millionaire came to the United States four years ago from Toronto, where he has a wife and four children.

### No Airships Over Strassburg.

Strassburg, Germany, Sept. 7—What practically is a complete prohibition for the Zeppelin or other passenger carrying airships to make trips over this city and vicinity has been decreed by the Government. The military feared that foreign passengers might photograph the fortifications and therefore decline to grant landing facilities to the airships.

### Nearly Severed His Foot.

Kingston, Sept. 7.—Eldred Bennett, Willet's Holme, aged five, was riding on the back of one of three horses attached to a gang plow when the animals ran away. The little fellow fell off and the revolving cutter nearly severed one of his feet. He was brought to the General Hospital where the flesh was stitched together

### Another Fire at Brussels Ex.

Brussels, Sept. 7.—Widespread consternation was caused by a second fire on the exposition grounds last evening. The fire was discovered in the gallery of the international machinery building, and extinguished without much difficulty.

Last month the exposition was the scene of a conflagration which wiped out a number of buildings, and entailed a loss of $20,000,000.

# Discuss Problems

**Bishop of London In Powerful Address Carries the Message Home to Every Hearer That the Work Is His to Do—Canon Tucker Lauds the Chinese For Their Civilization and Arts of Peace.**

Halifax, Sept. 7.—While diocesan and parochial and other church problems occupied some of the congress meetings yesterday, it was the relations existing between the Church of England and other churches, its attitude to the unchurched and to the churchless nations that contributed the main topics.

The personality of the Bishop of London, has in this discussion irradiated an influence which all men have felt.

"It is a great responsibility," he said, "to hear two such appeals. As I sat and heard those two impassioned appeals from two such wholehearted men of God, I said to myself, 'I have to answer that at the Judgment Day.' And so have you. There is no literary grace about this, but the words burned in."

Most of the day's proceedings were an elaboration in one form or another of this message of personal responsibility.

If appeals could do it, a thousand missionaries would start out next Monday. The Bishop of Glasgow satirized those who see all sorts of good things for other people to do, but never dream of finding a lesson for themselves, and Bishop Ingram put his finger on the same point. "I don't want to have you say, 'We have had some fine inspiring addresses to-day,' as if they only involved other people, and did not involve you. I want to involve you." And he involves them.

He told them that it was God's holy will to convert the world through man and that God was not afraid to face the consequence of His own actions. If man did not do the work, it was not done. If they had not built 240 churches in London in the forty years past, two and a half million people would have no churches. If they were missionaries, they would be red-hot missionaries, wherever they were, at home or abroad, and the red-hot missionaries could not stop until the world was won, as he believed it could be in this generation, and he told how an arid parish desert in East London had blossomed as the rose in seven years.

The good qualities of the heathen were much dwelt on yesterday from various points of view. Canon Tucker canonized the Chinese. They were the most vigorous people in mind and body in the world, thrifty, industrious, loving their parents with a devotion beyond all parallel, and winning the promise of long life in their land. With laws before Moses and psalms before David, and silk when Britons painted their skin, we assumed to look down on this glorious people. China has learned her lesson and by and by will be able to speak with her enemies in the gate. All the nations were in upheaval, straining and rending themselves in the throes of a renaissance.

***The Cause***
**of Eye Troubles is usually not disease, but defect in the structure or muscles of the Eye.**

**Consider the incessant work of the Eye, the instantaneous and exact adjustment demanded that sight may be always equal, single and ready to every change in position, distance and light. The nerves compel and control the mechanism in these instant adjustments. The mechanism may be defective, that is—**

**There may be defects in the structure, or focus of one or both Eyes;**

**The Muscles may be imperfectly balanced, so that both Eyes do not work in harmony;**

**There may be inability to focus for close work;**

**There may be strain through overwork, abuse, poor lights, bright reflections, etc.**

***An examination will tell you just what condition your Eyes are in.***

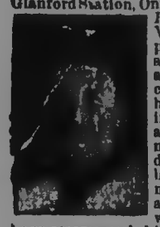
# MORE PINKHAM CURES

## Added to the Long List due to This Famous Remedy.



Glanford Station, Ont.—"I have taken Lydia E. Pinkham's Vegetable Compound for years and never found any medicine to compare with it. I had ulcers and falling of the uterus, and doctors did me no good. I suffered dreadfully until I began taking your medicine. It has also helped other women to whom I have recommended it."—Mrs. HENRY CLARK, Glanford Station, Ontario.

Gardiner, Me.—"I was a great sufferer from a female disease. The doctor said I would have to go to the hospital for an operation, but Lydia E. Pinkham's Vegetable Compound completely cured me in three months."—Mrs. S. A. WILLIAMS, R. F. D. No. 14, Box 39, Gardiner, Maine.

Because your case is a difficult one, doctors having done you no good, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial. It surely has cured many cases of female ills, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, indigestion, dizziness, and nervous prostration. It costs but a trifle to try it, and the result is worth millions to many suffering women.

If you want special advice write for it to Mrs. Pinkham, Lynn, Mass. It is free and always helpful.

# "THE PILLAR OF LIGHT"

By Louis Tracey. (Copyrighted)

(Continued from Tuesday)

"Why is he behaving in that idiotic manner?" screamed Enid.

"Capital idea—semaphore — clever fellow, Jack," shouted Brand.

Abashed, Enid held her peace.

The lighthouse-keeper, signalling in turn that he was receiving the message, spelled out the following.

"Is all well?"

"Yes," he answered.

"Bates and Jackson reached hospital. Bates compound fracture. If weather moderates will be with you next tide."

"All right," waved Brand.

The distant figure started again:

"Love to Enid".

Enid indulged in an extraordinary *arm flourish*.

"And Constance."

"That spoils it," she screamed. "It ought to be only kind regards to you, Connie. I believe you are a serpent, a——"

"Do stop your chatter," shouted Brand, and he continued the message.

"Weather looks very bad. Little hope for to-night. Lancelot due at six. Will see personally that no chance is lost. Good-bye."

"Good-bye," was the response.

The Lapwing fell away astern from the vicinity of the buoy.

"Why is he doing that?" asked Constance, close to her father's ear.

"He is too good a sailor to risk turning her in that broken water. A little farther out there is greater depth and more regular seas.

They watched the yacht in silence. At last her head swung round towards the coast. When broadside on, a wave hit her, and the spray leaped over her masts.

"That gave them a wetting," cried Brand, and his calm tone stilled their ready fear. Indeed, there was greater danger than he wanted them to know. But the Lapwing reappeared, shaking *herself, and still turning.*

"Good little boat!" said Brand. The crisis had passed. She was headed at full speed, for the Bay. And not too soon. Ere she reached the *comparative shelter of Clement's Island* she was swept three times by green water.

Inside the lantern, their faces ruddy with the exposure, their eyes dancing with excitement, the girls were voluble with delight. Could anything be more thrilling than their experiences that day!

"That semaphore dodge is too precious to be lost," cried Enid. "Connie, you and I must learn the alphabet. You shall teach us this very evening, dad. Fancy me signalling you the whole length of the Promenade: 'Just look at Mrs. Wilson's bonnet,' or 'Here come the Taylor-Smiths. Scoot!' Oh, it's fine."

She whirled her arms in stiff-jointed rigidity and mimicked Stanhope's fantastic posing.

"Why should you scoot when you *meet the Taylor-Smiths?*" asked Brand.

"Because Mrs. T.-S. hauls us off to tea and gives us a gallon of gossip with every cup."

"I thought your sex regarded gossip as the cream?"

"Sex, indeed! Old Smith is worse than his wife. He doesn't say much, but he winks. One of his winks, at the end of a story, turns an episode into a three-volume novel."

"It seems to me I must teach you the code in my own self-defence," he replied. "And now for tea. Let us *have it served here.*"

They voted this an admirable notion. The girls enlivened the meal by relating to him the doings and sayings of current interest ashore during the past two months. By a queer coincidence, which he did not mention, his *relief was again due* within a week, just as on the occasion of Enid's first appearance on the rock. The fact struck him as singular. In all probability he would not return to duty. He had completed twenty-one years of active service. Now he would retire, and when the commercial arrangements for the auriscope were completed, he would take his daughters on a long-promised Continental tour, unless, indeed, matters progressed between Stanhope and Enid to the point of an early marriage.

He had foreseen that Stanhope would probably ask Enid to be his wife. He knew the youngster well, and liked him. For the opposition that Lady Margaret might offer he cared not a jot. He smiled inwardly —as the convenient phrase has it—when he reviewed the certain outcome of any dispute between himself and her ladyship. He would surprise her.

Brand, the lighthouse-keeper, and Brand urging the claims of his adopted daughter, would be *two very* different persons.

Of course, all Penzance knew that he was a gentleman, a scientist in a small way, and a man of means; otherwise Constance and Enid would not have occupied the position they held in local society. Those unacquainted with English ways ofttimes make the mistake of rating a man's social status by the means he possesses or the manner of his life in *London. No greater* error could be committed. The small, exclusive county town, the community which registers the family conections of many generations, is the only reliable *index. Here, to be* of gentle birth and breeding—not bad credentials even in the court of King Demos—confers Brahminical rank, no matter what the personal fortunes of the individual.

Brand, it is true, did not belong to a Cornish county family, but there were those who conned him shrewdly. They regarded him as a well-meaning crank, yet the edict went forth that his daughters were to be "received," and received they were, with pleasure and admiration by all save such startled elderly mammas as Lady Margaret Stanhope, who expected her good-looking son to contract a marriage which would restore the failing fortunes of the house.

All unconscious of the thoughts flitting through his brain, for Brand was busy trimming a spare lamp, the two girls amused themselves by learning the semaphore alphabet from a little hand-book which he found for them.

When the night fell, dark and lowering, the lamp was lighted. They had never before seen an eight-wicked concentric burner in use. The shore lighthouses with which they were better acquainted were illuminated by *electricity or* on the catoptric principle, wherein a large number of small Argand lamps, with reflectors, are grouped together.

To interest them, to keep their eyes and ears away from the low-water orgy of the reef, he explained to them the capillary action of the oil. Although they had learnt these things in school they had not realized the exactness of the statement that oil does not burn, but must first be converted *into gas* by the application of heat. On the Gulf Rock there were nearly 3,000 gallons of colza oil stored in the tanks beneath, colza being used in preference to paraffin, because it *was safer, and there was no storage* accommodation apart from the lighthouse.

Requiring much greater heat than mineral oil to produce inflammable *gas, the colza had to be* forced by heavy pressure in the cistern right up to the edge of the wicks, and made to flow evenly over the rims of the burner, else the fierce flame would eat the metal discs as well.

He read them a little lecture on the rival claims of gas and electricity, and demonstrated how dazzingly brilliant the latter could be on a dark clear night by showing them the fine light on the Lizard.

"But in hazy weather the oil wins," he said, with the proper pride of every man in his own engine. "Fishermen sailing into Penzance along a course equidistant from the two points tell me that if they can see anything at all on a foggy night they invariably catch a dull yellow radiance from the rock, whilst the Lizard is invisible. The oil has more pene*trative power. Its chemical combina*tion is nearer the mean of nature's resources."

At the proper time he banished them to the kitchen to prepare dinner, a feast diverted from the hour of soon by the chances of the day. He adopted every expedient to keep them busy, to tire them physically and mentally, to render them so exhausted that they would sleep in blissful calm through the ordeal to come.

As he could not leave the lamp, and they refused to eat apart from him, the dinner, in three courses, was a breathless affair. Going up and down five flights of stairs with soup, joint and pudding, whilst one carried the tray and the other swung a lantern in front, required time and exertion. They were cheerful as grigs over it.

Enid, whose turn it was to bring up the plates of tapioca pleaded guilty to a slight sensation of nervousness.

"I could not help remembering," *she said,* "what an awful lot of dark iron steps there were beneath me. I felt as if something were creeping up quickly behind to grab me by the ankles."

"You should go up and down three times in the dark," was Brand's recipe. "When you quitted the door level for the third ascent you would cease to worry about impossible grabs."

Constance looked at her watch.

"Only eight o'clock! What a long day it has been," she commented.

"You must go to bed early. Sleep in my room. You will soon forget where you are, each of the bunks a comfortable. Now I will leave you in charge of the lamp whilst I go and lock up."

They laughed. It sounded so homelike.

"Any fear of burglars?" cried Enid.

"Yes, most expert cracksmen, wind and rain and sleet," he added quietly. "I must fasten all the storm-shutters and make everything snug. Don't stir until I wake you in the morning."

"Poor old dad!" sighed Constance. "What a vigil!"

He was making new entries in the weather report when she remarked thoughtfully:

"It is high-water about half-past one, I think."

He nodded, pretending to treat the question as of no special import.

"From all appearances there will be a heavy sea," she went on.

"Just an ordinary bad night," he said coolly.

"Do the waves reach far up the lighthouse *in a gale?*" she persisted.

Then Brand grasped the situation firmly.

"So that your slumbers may be peaceful," he said, "I will call your kind attention to the *fact* that the Gulf Rock light has appeared every night during the past twenty-five years, or since a date some four years before you were born, Constance. It contains 4,000 tons of granite and is practically monolithic, as if it were carved out of a quarry. Indeed, I think its builder went one better than nature. Here are no cracks or fissures or undetected flaws. The lowest course is bolted to the rock with wrought-iron clamps. Every stone is dove-tailed to its neighbours, and clasped to them with iron, above, below and at the sides. If you understood conic sections I could make *clearer the scientific aspect* of the structure, but you can take it from me you are far safer here than on a natural rock many times the dimensions of this column."

"That *sounds very satisfactory,*" murmured Enid, sleepily.

"I am overwhelmed," said Constance, who grasped the essential fact that he had not answered her question.

Soon after nine o'clock he kissed them good-night. They promised not to sit up talking. As a guarantee of good behaviour, Enid said she would ring the electric bell just before she climbed into her bunk.

The signal came soon and he was glad. He trusted to the fatigue, the fresh air, the confidence of the knowledge that he was on guard, to lull them into the security of unconsciousness.

The behaviour of the mercury puzzled him. In the barometer it fell, in the thermometer it rose. Increasing temperature combined with low pressure was not a healthy weather combination in January. Looking back through the records of several years, he discovered a similar set of conditions on a day in March, 1891.

He was stationed then on the North east coast and failed to remember any remarkable circumstance connected with the date, so he consulted the lighthouse diary for that year. Ah! *Here was a possible explanation.* The chief-keeper, a stranger to him, was something of a meteorologist.

He had written: "At 4.15 p.m. the barometer stood at 27.16 degrees, and *the thermometer at 45.80 degrees.* There was a heavy sea and a No. 7 gale blowing from the S. S. W. About five o'clock the wind increased to a hurricane and the sea became more *violent than I have seen it during* five years' experience of this station. Judging solely by the clouds and the flight of birds, I should imagine that the cyclonic centre passed over the Scilly Isles and the Land's End."

Then ,next day:

"A steady northeast wind stilled the sea most effectually. Within twenty-four hours of the first signs of the hurricane the Channel was practicable for small craft. A fisherman reports that the coast is strewn with wreckage."

Brand mused over the entries for a while. With his night glasses he peered long into the teeth of the growing storm to see if he could find the double flash of the magnificent light on the Bishop Rock, one of the Atlantic breakwaters of the Scilly Isles. It was fully thirty-five miles distant, but it flung its radiance over the waters from a height of 143 feet, and the Gulf Rock lamp stood 130 feet above high-water mark. A landsman would not have distinguished even the nearer revolutions of the St. Agnes light, especially in the prevalent gloom, and wisps of spindrift were already striking the lantern and blurring the glass.

*(To be continued)*

ECZEMA FOR 30 YEARS

What is so annoying and disfiguring as itching Eczema? Mr. Fred W. Clark, Petworth, Adington Co., Ont., writes that his mother suffered from Eczema on both legs for twenty years unable to get relief or cure from doctors or medicine. She found that Dr. Chase's Ointment brought great relief and it soon made the cure complete. He states that no one could have the disease worse or suffer more.

There are no dead flies lying about when

WILSON'S FLY PADS

are used as directed. All Druggists, Grocers and General Dealers sell them.

## THE PRESERVATION OF MILK

From Farm and Dairy.

*J. A. Ruddick, Dairy Commissioner, Ottawa.*

Refrigeration will not remove impurities from milk, but it does have the effect of checking the multiplication of bacteria. It is of the utmost importance that the cooling of milk should be proceeded with as quickly as possible after it is drawn from the cow. Milk which is cooled immediately say to 60 degrees F. will keep longer and be in better condition than if it is allowed to remain at a temperature of 70 to 80 degrees for several hours and then afterwards cooled to 40.

Some years ago an attempt was made to ship milk long distances in a frozen condition. Milk was sent from Scandinavia to Great Britain, covering a journey of two or three days, and it was predicted that it would be possible to ship it by this method across the Atlantic. The scheme has apparently not been commercially successful, because we have heard nothing about it of late years.

One of the objections to the freezing of milk is the formation of flocculent particles of albumen or casein compounds which are not readily dissolved when the milk is thawed. It also has the effect of collecting the fat globules into small lumps of fat.

It may be said, therefore, that for practical purposes a temperature of 40 degrees F. or under is low enough for the preservation of milk.

# A Fire-pot That Won't Crack

THE greatest strain falls midway between the top and bottom of a one-piece fire-pot, because the live coals are located at the centre of the fire. This continued strain overtaxes the expansion powers of a one-piece fire-pot and causes it to bulge out and crack at the centre, and through the cracks, dust and deadly coal gas escape and eventually pass through the registers. In self-defence, you have to buy a new fire-pot. Every fire-pot you replace is so much added to the cost of the maintenance of your furnace.

Now, the Sunshine fire-pot is built in two sections, which are joined together with our "famous" cup-joint. Because of the shape of the cup-joint and the layer of McClary Oil Cement this joint is absolutely gas-proof, smoke-proof and dust-proof.

The layer of cement acts as a "buffer" between the two sections and allows each section to expand or contract independently of the other. This feature prevents the Sunshine fire-pot from cracking.

*Less than 1 per cent.* of Sunshine fire-pots have been replaced. This shows conclusively that the Sunshine two-piece fire-pot will save you money, and that's the kind of a fire-pot you want in the furnace you are going to have installed in your new house.

Get the Sunshine—the economical, *guaranteed* furnace. It's the A1 furnace investment.

## DOGS AND COWS

From Farm and Dairy.

Editor, Farm and Dairy.—The [illegible] saw that there are *two sides to a que*tion again becomes evident in the short article by Mr. John Steel of Lanark Co., Ont., in Farm and Dairy, Aug. 11. There are dogs and dogs. My experience has been that it is highly doubtful, even with the best dogs, whether or not it is advisable to take them near the cows at all. With the average dog, and it is surprising how many must be classified as such, or even a *lower* classification, it is direct loss every time they are used to bring the cows from the pasture.

As Mr. Steel rightly contends it is most trying on one's patience to bring cows out of the pasture, especially in the early morning when each one requires to be escorted individually while all the time she is trying to take out her morning meal. A man armed with a good long whip, however, can bring them to their stalls, and while it may take a little longer to get the cows than with the dog, they will invariably give more milk to amply repay any extra time spent in thus bringing them from the pasture.

I should like to hear what has been the experience of other Farm and Dairy readers upon this matter of bringing cows from the pasture.—Fred. James, Middlesex Co., Ontario.

Miller's Granules are small children will take them readily. Wm. Madill, druggist.

## For the Children

Strange Friendship of a Dog and a Lion.

A curious friendship between a lion and a dog has attracted wide attention in England, where they are being exhibited. The dog is a fine specimen of his kind and performs many clever tricks. He seems much attached to his fierce companion, and they frequently have a game of romps. This is all the more remarkable, as dog and lion rarely make friends.

The most wonderful fact concerning this strange pair is that Leo, as the lion is named, has a decidedly vicious temper when with other animals and has killed several that were caged with him before the advent of his present canine companion. The two live together in amity, sharing the food thrown to them and sleeping side by side in a corner of their cage.

### The Diving Bell.

How many of you children know who first invented the diving bell? It was not a man or a woman, but a little spider that built its home under the water long before man thought of the diving bell, says the Chicago News. The spider's house, made of the finest spun silk, is, strange to say, though under water, filled with air. To keep his house from ascending to the surface the spider fastens it with silken cords to the grass in the pond or brook or wherever the house may be. If he did not it would rise like a balloon, float from its moorings and leave the spider family homeless.

These spiders, called naiads by naturalists, show a large degree of intelligence and are clever hydraulic engineers. They swim easily, and under water they look like round, moving pearls, a layer of air concealed under the skin giving them this strange appearance. They rise to the top of the water to inhale a bubble of air, swim with it to the bottom and when building their bell houses completely fill them with air by this process.

### Telling Fortunes.

Have you a game of dominoes? If so you can have lots of fun when your friends come to see you. Shuffle the dominoes well and lay them face down on a smooth table. Tell your friends to turn the dominoes, and the following are what the points denote:

Double six denote receipt of money; will be very rich.

Six-five denotes success and pleasure.

Six-four early marriage; happiness.
Six-three affection, constancy.
Six-two industrious, economical.
Six-one twice married.
Six-blank sorrow, trouble.
Five-double very lucky.
Five-four will marry poor.
Five-three eventual wealth.
Five-two love.
Five-one engagement; invitations.

If you know these you can regulate your answers accordingly, no matter what points turn up, and much fun can be had.

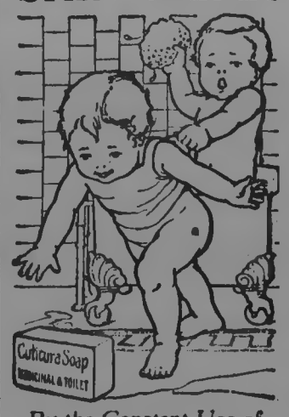
### Shearing Sheep.

In spring and fall sheep shearing is an important operation, and the shearer is an important individual. In England very frequently his craft runs right through the family—first the father, then the sons and then their sons. When shearing is done there it is done by specialists, but they are not confined to one family. These men take the animals, tie their legs together, throw them on their backs and soon the shears are at work. An adept shearer will take off the fleece in one smooth piece, and these pieces are rolled into neat bundles to facilitate the counting. When an accidental cut is made in the sheep's flesh lime mixed with lard is applied at once to prevent an attack by flies.

### England's Navy.

The "father of the British navy" was Henry VII. It was in 1488 that Henry built the Royal Harry, considered to be the beginning of the English navy. His own subjects were deplorably ignorant of the art of shipbuilding, and he imported Genoese workmen to instruct them. The Royal Harry was the first real English warship ever built, and it remained the model ship for more than fifty years.

# KEEP BABY'S SKIN CLEAR



By the Constant Use of

# CUTICURA SOAP

Assisted, when necessary, by Cuticura Ointment. These pure, sweet and gentle emollients preserve, purify and beautify the skin, scalp, hair and hands of infants and children, prevent minor eruptions becoming chronic, and soothe and dispel torturing, disfiguring rashes, itchings, irritations and chafings. Peace falls on distracted households when Cuticura enters.

Sold throughout the world. Depots: London, 27, Charterhouse Sq.; Paris, 10, Rue de la Chaussee d'Antin, Australia, R. Towns & Co., Sydney; India, B. K. Paul, Calcutta; China, Hong Kong Drug Co.; Japan, Maruya, Ltd., Tokio; So Africa, Lennon, Ltd., Cape Town, etc.; U. S. A., Potter Drug & Chem. Corp., Sole Props., 139 Columbus Ave., Boston.

Cuticura Book, post-free, 32 pages of valuable information on Care of the Skin, Scalp and Hair.

### Baltimore and Soft Crabs.

The genuine soft crab, or Brachyura baltimoriensis, is the most delicate as it is the most delicious of all victuals. It will no more bear transportation than a saphyr or a daffodil. The moment it is taken from its native deep it begins to lose bounce and flavor, and once it has left the Chesapeake littoral it is no longer eatable. That is why the soft crab is a superb delicatessen in Baltimore and a bitter disappointment everywhere else. So sensitive is it, indeed, to climate and handling that it is impossible to get a decent soft crab anywhere west of the first tollgate on the Frederick road. In Pittsburg, where embalmed soft crabs are offered in the gilded lobster palaces, their flavor is that of grieose. In Chicago the soft crab is a mere curiosity, to be gaped at, but not eaten. Baltimore alone has the genuine article, and it is fortunate for Baltimore that it cannot be transported. If it were possible to ship soft crabs the whole earth would bid for them, running up their price to $1, $5 and perhaps even to $100 a dozen.—Baltimore Sun.

### A Teacher in the Making.

She was a popular young normal student who had been to a party the night before, and as a consequence was "not prepared" in the geography class. The woman instructor, true to her method of drawing upon the general knowledge of a student rather than to permit a failure, after eliciting two or three inconsequential "stabs" from her fair but jaded disciple, asked for the products of China.

The victim brightened. "Tea," she asserted, preparing to sit down.

"Yes, and what else?" encouraged the instructor.

The young woman smiled with sweet hopelessness.

"Now you can mention others, I am sure. Just think about it."

"Tea," drawled the flutelike voice of the pretty girl, "and," puckering her forehead with an intellectual tour de force, "and laundry work."—Youth's Companion.

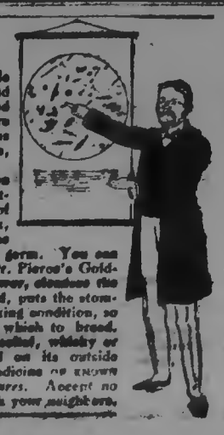
### Oldest Shot Tower.

The oldest shot tower in the world, which William Watts made in Bristol, England, in 1769 by sawing a hole in the center of the floors of a house and building a well in the cellar, is still in operation.

### Helping the Bees.

A custom widely prevalent in Germany and Austria is the placing of beehives on wagons and moving them to fields or orchards that are in bloom

*Afraid of Ghosts*



Many people are afraid of ghosts. Few people are afraid of germs. Yet the ghost is a fancy and the germ is a fact. If the germ could be magnified to a size equal to its terrors it would appear more terrible than any fire-breathing dragon. Germs can't be avoided. They are in the air we breathe, the water we drink.

The germ can only prosper when the condition of the system gives it free scope to establish itself and develop. When there is a deficiency of vital force, languor, restlessness, a sallow cheek, a hollow eye, when the appetite is poor and the sleep is broken, it is time to guard against the germ. You can fortify the body against all germs by the use of Dr. Pierce's Golden Medical Discovery. Its tonic-alterative power, eliminates the system of clogging impurities, enriches the blood, puts the stomach and organs of digestion and nutrition in working condition, so that the germ finds no weak or tainted spot in which to breed. "Golden Medical Discovery" contains no alcohol, whisky or habit-forming drugs. All its ingredients printed on its outside wrapper. It is not a secret nostrum but a medicine of known composition and with a record of 40 years of cures. Accept no substitute—there is nothing "just as good." Ask your neighbors.

### GARDEN PARTY GOWN.

It's a Cool and Dainty Creation For Midsummer.

IN LACE AND BRODERIE.

Quite the smartest and most successful of the white frocks for afternoon wear are the simplest. The great fashion authorities are everywhere emphasizing the charm of the graceful outline and attaching the greatest possible importance to bring this result about without any extraneous help from furbelows.

The dominant white frock is made over a one piece lining that is cut on the simplest lines and has no bones in it. The skirts are of three styles, the flounced, the puffed and the straight and scant model finished with a four inch hem. At first glance the voluminous skirt appears to be of endless width and fullness; but, although a great deal of material goes into its makeup, it is invariably mounted over the closest fitting and narrowest of foundations, so narrow that it seems at times unsafe to take a step in it.

The garden party gown pictured is a charming affair, a simple but exclusive creation of lace and broderie.

### Veils as Cause of Red Noses.

A prominent physician has given voice to a definite protest against women wearing veils. This authority asserts it is one of the most injurious practices of which he has knowledge and insists red noses are the result of veils and nothing else. If there is anything a woman objects to it is a red or greasy nose, and these troubles, according to this physician, find their origin in the wearing of a veil on almost every occasion. The veil prevents the air striking the face as it would if the veil was off, and when the face is heated the nose becomes greasy and almost invariably has a reddish appearance. This doctor would not even advise a veil to be worn on automobile rides, asserting a pair of "goggles," merely to protect the eyes from dust and insects, is all that is required for a woman who cares about her complexion and general facial appearance, and what woman does not?

### Play a Good Game.

A girl once started in business, a very young, green and awkward specimen. But she had always played games as a boy might, and she started out to work in the same spirit. She wasn't personally hurt when the manager was worried and less polite than usual; neither was she mean and fussy over small things. She had a normal, healthy attitude toward her fellow employees. Her work was not mere drudgery, but a part of the game to be skilfully played. Moreover, she worked for the firm who employed her as eagerly as she had played on her basketball team. This same spirit carried her to victory in the bigger game.

It's a great game. To be happy and wise we must play a good game. Let's get into the game and—play ball.

### Rolling Pins.

When the young housekeeper is buying a rolling pin she might as well buy a pretty one as an ugly one, especially as there is no difference in the price. Some wooden pins are as highly polished as a fine piece of furniture and china rolling pins may be either perfectly white or of delft blue and white. In selecting a rolling pin, however, a thought must be given to cleanliness. A wooden pin may not be as pretty as a china one, but if the wooden handle of the china one does not fit closely into the roller the dough will get inside and there is no way to get it out. So, however pretty the china roller, see that the wooden handle fits snugly. There are glass pins which many housekeepers prefer to either china or the wooden.

### Nothing in a Name.

"Look here, waiter," said Mr. Grouch, scowling deeply over his plate. "I ordered turtle soup. There isn't even a morsel of turtle in this."

"Of course not," returned the waiter. "Shakespeare said there was nothing in a name. If you ordered cottage pudding would you expect a cottage in it? Any tea, sir?"

### Detroit's First Map.

It is claimed that Joseph Gaspard Chaussegros de Derby, a French engineer, made the first maps of Detroit in 1749 and 1754.

# Peerless Peninsular

## Is Honest All Through— In Little Things As Well As Big

For example, let us take the OVEN.

The oven bottom of all sizes is 20 inches deep. This is the actual depth of the oven floor, the part of the oven that is of the most value to you. We do not include an inch or two in the bottom of the oven door.

Measure the oven bottom of other ranges—especially those with swing doors—and see if the ovens come up to this specification

"Peerless Peninsular" is a big, honestly built range—full size—with all the new conveniences of the most expensive steel ranges—and with the durability of cast-iron which is superior to steel in lasting qualities.

"HARMONY", "CONSTANT" and "ADANAC" have the same quality, workmanship and construction as the "Peerless", the difference is only in the outer appearance.

Let us show you all four styles—or write for illustrated booklet. 111

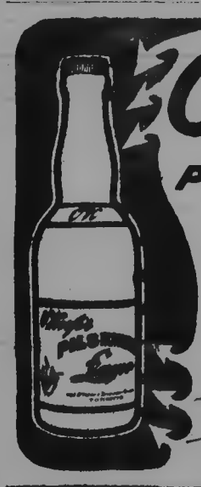
# O'Keefe's PILSENER LAGER



"The Beer with a Reputation"

O'Keefe's "Pilsener" has a reputation because it sets a standard of quality reached by no other lager—imported or otherwise.

Insist on having 217

"The Light Beer in the Light Bottle."

# MEN—WE CAN CURE YOU

FINEST MEDICAL INSTITUTE IN AMERICA

OWNED AND OCCUPIED BY DRS. K. & K.

"YOUNG OR MIDDLE-AGED MEN who need the services of expert specialists why waste your money in trusting with doctors you know nothing of, why waste your money with worthless electric belts or drug store nostrums, when you can get guaranteed, reliable, successful treatment from these Master Specialists. Drs. K. & K. have treated patients throughout Canada for over 30 years and are responsible financially. They accept only curable cases and should your case prove incurable it would not cost you a cent. If you are unable to call at our office for a personal consultation we will send a Question List for you to fill up from which we can diagnose your case and tell you whether you are curable or not. Then we will prescribe special remedies for your individual case which you can take at home. We have no cure-all remedy that we send to everybody alike as most specialists do, but we prescribe the remedies required for each individual case to complete a cure. That's one of the secrets of our wonderful success when others fail. Send for our Free Booklet on Diseases of Men (Illustrated.)

CURES GUARANTEED OR NO PAY

We Guarantee to Cure Nervous Debility, Blood Diseases, Varicose Veins, Kidney, Bladder and Urinary Diseases.

CONSULTATION FREE

If unable to call, write for a Question Blank for Home Treatment

DRS. KENNEDY & KENNEDY

Cor. Michigan Ave. and Griswold St., Detroit, Mich.

NOTICE All letters from Canada must be addressed to our Canadian Correspondence Department in Windsor, Ont. If you desire to can personally call at our Medical Institute in Detroit as we can and treat the patients in our Windsor office with the same correspondence and Laboratory for Canadian business only. Address all letters as follows:

DRS. KENNEDY & KENNEDY, Windsor, Ont.

# BOYS' CAMPAIGN ! !

## $$ BOYS $$

This is a heart-to-heart talk with Boys about selling the Examiner, and how it may act as a stepping-stone to a successful business career in after years.

BOYS, do you recognize the fact that this little business offers you an opportunity to

## Make100

## MAKE MONEY

## per cent.

or in other words, to double the money invested in selling the EXAMINER to transient buyers.

### Here's How It's Done

BUY the EXAMINER at one cent each and sell it for two cents each; in the case of weekly patrons, they pay six cents per week and receive 10 cts. from the subscriber, thus making a profit of 62 2-3 per cent.

DO you know of any business in the city that pays such profits with as little chance for bad debts?

IT only requires a Boy to HUSTLE, the same thing that is required when he gets into a bigger business world.

OF course we do not mean to say that the Boy, to become a successful business man, must be a newsboy, but we do say, the successful newsboy has gained an experience that is of much service to him in after years.

### Climbing Steadily

THE Street Sales of the Examiner are climbing steadily and have touched by far the highest point in the history of the paper.

This result has increased the value of the Examiner as an advertising medium. In the city and in the districts outside the city limits, the increase in circulation is most gratifying, and credit is due to the pushing newsboys for their good work in bringing in new subscribers.

### Persistency Draws Good Wages

Enough persistency in Boys is necessary to draw good wages, and this quality gives the biggest awards to the Boys who stick to business.

TO know how to KEEP ON is important in selling papers. It is the secret of the boy who is called "fortunate."

THERE are a number of Boys in Peterborough making four and five dollars per week, not necessarily selling the Examiner, but some make three dollars per week selling the Examiner exclusively.

### Use Spare Time Usefully

GET in the game. It won't hurt you, but will give you a right start. You will have money of your own to save or buy useful needs with.

BOYS! Take your spare time between four and six o'clock and see what success you will have between now and 'Xmas.

## SELLING THE EXAMINER

The delivery of the Examiner is under strict and constant supervision. Yet irregularities will creep in, because carrier boys make mistakes like all other people.

Subscribers are invited to complain PROMPTLY. Complaints are welcomed when there is a reason for them. They will be given prompt attention.

*Boys, figure this proposition out for yourselves. Be Ambitious. Good Newsboys are taken care of and recommended for future positions*

# HOW MANY REALIZE THE MARVELLOUS VALUE OF FRUIT

## IN CURING MANY DISEASES?

**Wonderful Success of "Fruit-a-tives"**

**—The Famous Fruit Medicine**

Fruit juice consists of about 91% water, 8% of sweet matter, and only 1% of an intensely bitter substance. Careful experiments show that it is this bitter principle, which is the active or medicinal material of fruit juice.

Under certain conditions, the bitter principle can be made to replace or transform some of the sweet atoms in the juice, thus making a new compound which is much more active medicinally than the ordinary juice.

Many fruits were analyzed and it was found that the juices of apples, oranges, figs and prunes gave the best results. These fruit juices, having been made more active by the secret process of changing the sweet principle into the bitter, are combined with tonics and antiseptics and made into tablets. These tablets are the famous fruit medicine—"Fruit-a-tives"—known in every part of Canada for their wonderful curative qualities in diseases of the Stomach, Liver, Bowels, Kidneys and Skin.

"Fruit-a-tives" is the only medicine in the world made of fruit juices. 50c a box, 6 for $2.50 or trial size, 25c.

—Price Benefits on—

**Boys' School SUITS**

Come any day and fit the boys out for school again. On serviceable stylish School Suits we offer price inducements of the best kind all this week. Mothers should take advantage of the saving chances.

Boy's two-piece Tweed Suits, Norfolk jacket style in browns, greens and greys, all sizes 26 to 33. Prices $2.90-3.50-4.00.

Boy's 2-piece Suits, single or double breasted style with plain knicker trousers, all sizes from 26 to 33. Prices range from..... $2.00 up to 4.50

Boy's two-piece Tweed and Fancy Worsted Suits with bloomer pants, all the latest shades, with double seats and knees in trousers and flannelette lined and double elbows in the coats. Prices range from ..... $4.00 to 6.00

Boy's three-piece Tweed and Worsted Suits, 29 to 34, either single or double breated. At.. $3.00-4.00-5.00

Boy's Kicker Pants, 50c-65c-75c-$1.

# CROP REPORTS FROM ALL OVER THE DOMINION

From Farm and Dairy.

Latest reports from all the fruit growing districts in Canada received by Farm and Dairy, indicate that the total crop this year will be much smaller than last year's. Of all the provinces, British Columbia alone reports a full crop. They expect to harvest the largest crop in their history.

Prof. M. Cumming, Secretary of Agriculture for Nova Scotia, writes: "The fruit crop is the most signal failure since it became commercially established in the province. Frosts in the latter part of April followed by cool, wet weather and severe frosts on June 5th and 6th explain the shortage in fruit."

Theodore Ross, Secretary of Agriculture for Prince Edward Island, writes us that they do not expect more than a 50 per cent. crop for that province. The fruit crop in Prince Edward Island was injured by heavy frosts on June 4th and 5th.

Mr. Aug. Dupuis, director of experiment stations, reports that the apple crop in the province of Quebec is light. The fruit set well but the drop has been heavy. Cherries failed completely and plums will be an average.

EASTERN ONTARIO

Reports from five of the principal fruit sections in Eastern Ontario would indicate that early apples are plentiful but little effort has been made to market them profitably. Fall apples will be a medium crop but winter varieties are estimated at only one half to one third of a crop. Some correspondents report a complete failure. Pears will be a good crop. The plum curculio has seriously injured the plum crop in many sections. In spite of the crop failure, it is pleasant to learn that orchards are being pruned and sprayed more than formerly, so that what crop there is will be of good quality.

WESTERN ONTARIO

Conditions in Western Ontario are much the same as in Eastern Ontario. There will be a light apple crop, a good pear crop and up-to-date orchard practice is on the increase. The plum curculio is also very much in evidence, though correspondents who spray, report that it can readily be controlled. Apples in the Georgian Bay District are almost a complete failure.

The reports of our correspondents include the following:

Small fruits are a good crop: cherries good; plums light. Fameuse apples medium to full crop. Spot developed rapidly but is at a standstill now. Wealthies, Scarlet Pippin, and McIntosh Red, medium crop; winters, light.—Harold Jones, Grenville Co., Ont.

Apple crop is very poor. There has been a lot of spraying done.—H. F. Retterson, Grenville, Ont.

Apples are not more than half a crop. Spraying is not practised and bark lice and codling moth are bad.—Chas. Thompson, Northumberland Co., Ont.

The fruit crop is fair this year but not so good as last. Apples will be as good as last year but the quality will be poorer. Most of the growers are practising spraying and pruning.—W. J. Wood, Durham Co., Ont.

I would estimate the apple crop at one third of what it was last year. Quality will be good. Plums are light. Insect pests have not given much trouble. Quite a number of trees have leaf curl.—Cecil Walsh, Durham Co., Ont.

Apples are not as good as last year. Early varieties are very small. Winter varieties are doing very well now and will be a fair sample. Orchards are well pruned but spraying is not practised.—J. A., Ontario Co., Ont.

The apple crop is very light. Bloom was good but dark, damp weather prevented setting. Clapp's Favorite pear is well loaded but all others light. Plums are a failure; work of the plum curculio is in evidence.—D. B. Heover York Co., Ont.

The apple crop is a failure. There are hardly any winter varieties and not many fall apples. Spraying is not general. Plums and cherries are light; pears good.—Geo. W. Mahon, Halton Co., Ont.

Orchards which last year yielded large crops will have a very short crop this year. The plum crop is also very small. The pear crop also.—Wm. Sharp, Halton Co., Ont.

Apples are a very short crop. Most of the orchards have been pruned and had three sprayings, so that what fruit there is will be of good quality.—J. C. Foster, Norfolk Co., Ont.

In the north part of Norfolk, the apple crop is not as plentiful as last year. There is very little spraying done here. Sprayed plums are a fair crop; the rest have suffered from the plum curculio.—Albert Jull, Norfolk Co., Ont.

Astrachans, Duchess and Wealthy will be a full crop. Fall varieties about half a crop; winter varieties one third of a crop. Pears are a fair crop. More spraying is being done every year.—Frank Barber, Norfolk Co., Ont.

The outlook for fruit is very poor. No apples worth speaking of.—Geo. Pitman, Norfolk Co., Ont.

The apple crop is almost a complete failure, not more than one tenth of what they were last year. There is not much spraying done.—N. A. Bryant, Middlesex Co., Ont.

Small fruits are less than half a crop caused by early frost and drought. Apple crop is very light. Orchards are not well pruned or sprayed and the codling moth is prevalent.—Wm. Dawson, Middlesex Co., Ont.

Apples are a very poor crop. Pear trees are well loaded.—Geo. Hill, Middlesex Co., Ont.

The fruit crop is almost a complete failure.—R. R. Stoan, Huron Co., Ont.

Apples are almost a total failure.—D. G. Salkeld, Huron Co., Ont.

**Easily Tired Exhausted**

DOES THIS DESCRIBE YOUR CASE? — THEN READ THIS LETTER ABOUT

**DR. CHASE'S NERVE FOOD**

The accompanying letter describes so well the condition of a person whose nerves are weak and exhausted that little need be added.

The danger of such a state of health is sometimes overlooked by persons who do not realize that the next step is some form of paralysis which leaves one helpless in mind and body.

Mrs. Edward Schwartz, Ladysmith, Que., writes: "It is a pleasure to let you know how I was benefitted by Dr. Chase's Nerve Food. I was run down and weak, unable to do any housework, was easily tired and exhausted, lacked energy and ambition, was very nervous, easily irritated, could not concentrate the thoughts, hands and feet were cold, I could not sleep, had frequent headaches and dizzy spells and palpitation of the heart.

"Nervous prostration was my trouble, but Dr. Chase's Nerve Food cured it all and I cannot find words to express my thankfulness for this wonderful medicine."

The results achieved by Dr. Chase's Nerve Food are often more wonderful than words can tell. In cases such as this patient persistent treatment is necessary, but you are encouraged by steady and natural improvement until the cure is thorough and complete.

There is a satisfaction in knowing that each and every dose is bound to be of at least some benefit in rebuilding the wasted nervous system.

Dr. A. W. Chase's Nerve Food, 50 cents a box, 6 for $2.50, all dealers; or Edmanson, Bates & Co., Toronto. Write for a free copy of Dr. Chase's Recipes.

# THE TOMATO TRADE

From Farm and Dairy.

Three boxes of tomatoes packed in peat and sawdust were shipped to Covent Garden Market last week. "It is expected that they will find a ready market," said Mr. J. Lockie Wilson in an interview with the Toronto Globe. "The northwest is now a good customer for Ontario fruit but if any falling off in the demand from there should come it is as well to have an English market cultivated. In any case a brisk trade could be developed with the old country."

That this would be to the advantage of Ontario growers is evident from the fact that whereas the Prince Edward county farmers get 25 to 30 cents a bushel (60 pounds), the price in London is from five to 10 cents a pound.

DEMAND IS GOOD

The demand in England for Canadian fruit generally is good. The peaches, for example, coming to Covent Garden from the continent are yellow, thick-skinned, and juiceless, being grown in hot, dry countries, like the southern California apples, which are punky and juiceless, especially those grown on irrigated land. The juicy, well-flavored Canadian fruits should, therefore, command a ready sale at good prices.

That our tomatoes would reach the British market in good condition Mr. Wilson thinks is certain, as there were shipped last year nearly a million dollars' worth of tomatoes from one of the Canary Islands. It takes seven days by steamship for their fruit to reach Liverpool. A box of Kent county tomatoes came from London to Toronto last week in six and three-quarter days. Mr. Wilson expects the Canadian product to do fully as well as the Canary Island shipments.

# CARE OF MACHINERY

From Farm and Dairy.

*A. Hector Cutten, Colchester Co., N. S.*

When harvest is finished how many of us clean, oil and pack away our machinery? We know how much we have to pay for implements. Formerly a wagon, sleigh, plow, harrow, scythe, cradle, axe, grindstone and a long chain would be an outfit. Now we must have drills, sulky-plows, binders, straw-cutters, pulpers, tedders, horse-rakes, pitching gears for unloading hay, and so forth.

After investing in an outfit of this kind there is negligence if a suitable building is not provided for their reception when not in use. It is safe to say that more machinery is rusted out than worn out. The life of a mowing machine is estimated at 1,000 acres, say 10 years cutting 100 acres, or 40 years cutting 25 acres each year, or 20 years cutting 50 acres. Does it last that time? If not, why not? How many mowing machines are left out from the time they cut their first field of hay until the last is cut? How many more are left out until late in the summer or autumn? And how many more are left out all winter?

One may drive in any direction at this season of the year and find machinery of all kinds, wagons, sleighs, and so forth, standing just where they were last used. The writer has seen plows left frozen in the ground all winter by good farmers. Others, however, when done mowing a field of hay drive their machine into the barn out of the sun, rain or whatever kind of weather the next day might bring forth.

Again, are workshops provided with tools kept in order? Is a sufficient number of bolts, nuts, copper rivets, wire and so forth kept on hand so as to repair any little breakage instead of having to go to a blacksmith shop, perhaps in the midst of harvest?

# QUALITY OF CHEESE OUTPUT

From Farm and Dairy.

The quality of the cheese output from many points in Ontario and Quebec is not what it should be, due to the existence of too many factories. Where factories are small and crowded close together it is not possible to install proper facilities for either making or curing cheese. A first class cheese maker could not be induced to take one of these small and poorly equipped factories. The following letter received from a Farm and Dairy correspondent tells of a condition of affairs which is all too common:

"In 1899 I engaged with the Bogart Cheese Company. That year we made 90,000 lbs. of cheese. Last year we made 52,000 lbs., and this year it will be still less. For three or four years I engaged an assistant. Now I have to run the factory alone in order to make ends meet. The reason for our large falling off in make is that another factory was built three miles away since this one was started. This factory is just one mile distant from a third factory which was built three years previously. There are three factories where there should be only two."—L. Butter, Hastings Co., Ont.

A condition of affairs such as described by this maker is discouraging not only to the maker, but also to the patrons. With large central factories, properly equipped and well-manned, better cheese would be made, higher prices received, and there would be more satisfaction all round.

The centralization of factories would probably put several poor makers out of a job and make it necessary to haul the milk a greater distance, but the higher prices and ready demand would put the cheese industry on a firmer basis with greater profits to all.

**DAVIS' MENTHOL SALVE**

Draws the fire out of a burned or blistered skin; heals chafing, chapped hands and similar troubles while you sleep; eases and cures sore feet; cures rheumatic fingers or joints; good for any trouble which can be reached from the outside. Keep it in the house.

All Druggists, 25 cents a box.
Accept no substitute.

DAVIS & LAWRENCE CO., Montreal.

# SASKATOON

According to statistics obtained by the Winnipeg Free Press the average increase in land values alone in eight Western Canadian cities during the past five years is 562 per cent. and profits of over $100,000,000 (one hundred million dollars) was the result of last year. ***HAVE YOU PROFITED BY THIS INCREASE?***

The opportunities for profitable investment are greater now than ever. The population of the West is small, but is increasing by leaps and bounds, and soon we shall have cities in the West, almost, if not quite, as large as those in the East. The population now is less than two millions, many of us will live to see a population of forty or fifty millions in this vast country known as Western Canada.

You have undoubtedly many friends who have benefited or will benefit by these increasing values. ***HAVE YOU, IF NOT, WILL YOU?***

The chance of loss in purchasing real estate in or near a good Western city is eliminated, and, as is as certain as anything can be that lots bought "right" adjoining a growing Western city will in ew years make the buyer much money.

Calgary less than three years ago boasted a population of about fifteen thousand, to-day Calgary claims fifty thousand.

The leading wholesale hardware merchant of Canada, having warehouses in the most important western centres, is quoted as saying, when purchasing his site for his Saskatoon warehouse, that he "considered SASKATOON would in a very few years be the largest Canadian city west of Winnipeg." Do you realise what this means? Will you share in the resulting profit?

—***SASKATOON*** is the livest City in the West to-day, its citizens are the most energetic and progressive.

—***SASKATOON*** is now a Divisional Point for the:
Grand Trunk Pacific Railway.
Canadian Pacific Railway.
Canadian Northern Railway, and will be the terminal for the
Hudson Bay Railway.

—***SASKATOON*** has an ideal location from a scenic point of view, and is traversed by the South Saskatchewan River.

—***SASKATOON*** is the centre of the most fertile agricultural portion of Western Canada.

—***SASKATOON*** has already ninety wholesale warehouses and factories.

—***SASKATOON*** is the natural distributing centre for 45,000 square miles of territory on car-loads shipped in, embracing already 155 towns and villages, and:

—***SASKATOON*** is the natural distributing centre for 70,000 square miles on goods manufactured locally already embracing 213 towns and villages.

—***SASKATOON*** has unlimited electric power obtained from damming the Big South Saskatchewan River. Electricity quickly makes a city in the East and will do so much more quickly in the West where it is not plentiful.

—***SASKATOON*** Census figures tell of the wonderful strides made in the past few years.
Population in 1903 was..... 113
Population in 1906 was..... 3,011
Population in 1909 was..... 12,100
Percentage of increase 10608 per cent., which is equal to the combined percentage of increase of the other largest eleven Western Cities. The population for 1910 is estimated to be 16,000.

—***SASKATOON*** is the Educational Centre of Western Canada.

—***SASKATOON*** is now having built the Provincial University for which ($2,500,000) two million five hundred thousand dollars has been set aside by the Saskatchewan Government.

—***SASKATOON*** has at present four Public Schools and a Collegiate Institute, each one of which would compare favorably with any school building in Toronto.

—***SASKATOON*** is the best real estate proposition in Canada to-day.

The Financial Post, in a recent issue, says prices seem to be reasonable at this time.

The property of the ***Saskatoon-Saskatchewan Land Corporation, Limited,*** is well located, high, dry and level, within easy reach of the centre of the City. Lots range in price from $125.00 to $250.00 each, according to location.

Payment 25 per cent. cash, balance ten dollars a month on each lot.

***WITHIN THREE YEARS EACH ONE OF THESE LOTS SHOULD BE WORTH SEVERAL TIMES THE PRICE PAID.***

Inside lots sold a few years ago at these prices are now worth from ten to a hundred times the prices then paid.

The best locations will naturally be taken up first, but every lot, we believe, is a good purchase at the price and terms offered.

We will send you, on request, illustrated book issued by the Saskatoon Board of Trade.

# How the Concrete Fence Post Came

## The Travelling Agent Tells About Improved Farm Conditions Back Home

"ONE of the most striking changes amongst the farmers in the vicinity of my old home," said the travelling agent of a large Canadian firm of agricultural implement manufacturers, upon his return from a visit to his birthplace, in the State of New York, recently, "is the better and more permanent character of the buildings and various farm improvements."

"I remember how, years ago, it took my father and all three of us boys one whole day to harvest a certain field. The present owner of the place says that his young son now does that work in a single day, and so far as he can see he never even has to mop his brow.

"Talking with some of the farmers in that section, regarding the methods of the present day, as compared with the past, I find that a very great saving has been effected by the introduction of the use of cement. The price of this article, when I was a boy, was almost prohibitive. In fact, we had hardly ever heard of cement at all, and when we did, it was more as a luxury—an article to mend the dishes in mother's kitchen—rather than as an article to be used out on the farm. Nowadays, most of the boys have been learning how to use it, and no matter where you go you are sure to see something made of it."

"I was particularly struck with a fence which my brother put up on his place, some years ago. My brother and I, you must know, particularly hated looking after fences. We used to prop the posts up mainly by aid of the stones we had picked off the property. Somehow these stones would get removed, and down would come the fence. Father used to be a little hard on us sometimes we thought. When the other boys were off playing he used to set us at work repairing these fences. As the stones wouldn't hold the posts up, he made us dig holes deep in the ground, and drive the posts down into them. These held fairly well, but the trouble was that the posts would rot. That did not matter so much those days, for posts were cheap. The trouble was that we had to go over the fence and repair it and waste all sorts of time over it. In fact, the fence was the bane of our lives, and must have cost a lot to keep in repair.

"A good many accidents took place, one way and another, with those fences, which it seems to me now must have cost father even more than the fences did. I remember one night the horses got tearing around the fields and bumped into a part of the fence which had been neglected for some time past, for the reason that we were busy harvesting the hay. There was a field of green grain. The horses got into it and trampled all over it; but worse than that they gorged themselves with it, with the result that two of them died the following day, and the other two were barely pulled through by the aid of a veterinary from the nearest town.

"As I was about to say, my brother, who lives on part of the old farm, took me down to the old line fence, just to look at the place where the horses broke through that time. He told me that when he saw cement being used so much he wondered if it wouldn't be a good thing to make fence posts of, so that they would not rot or break. He got into touch with a cement firm, without further delay, with the result that they sent him full instructions regarding the making of cement fence posts.

"Jack was very proud of his fence, and it struck me, when he showed it to me, that I had never seen anything nicer. It was as straight as a die, and there wasn't a sign of a break in it from end to end. The posts were all upright, and the wire—it was smooth wire—was as tight and as trim as it used to be on Judge Foster's lawn. Jack asked me how long I thought it was since the fence was built. I told him perhaps a few months—four or five months. 'Well,' said he, 'make it years instead of months and you would be nearer it.'

"It was a fact that for half a dozen years that fence had stood there, and that during that time not a break had taken place, and Jack had not spent five minutes looking after it.

"I asked my brother if the fence had not been a little costly.

"Said he: 'That's the cheapest fence I ever had on my farm. It cost more to begin with than the old kind we used to have so much trouble with when we were boys, but once put up it is there forever. Those posts can never rot. The longer they are up, the harder and the stronger they become. I made a few little mistakes when I began the work, but they were not serious, and I now know how to provide against them. One of the great advantages of this sort of fence is that it never needs to be repaired. I suppose, in the course of time, the wire will rust out and break, but that will not be the fault of the posts; and as you will remember, it was always the posts that used to give us the worry when we were boys'

"I asked him if the posts never loosened and fell over to one side in the way that used to make so much work for us in the old days.

"'Well,' said he, 'they do loosen sometimes. But do you remember how solid the wooden posts used to be after they had been in the ground a good while and before they began to rot. The longer they remained there the solider they became. That's the way with these posts. I never have to tinker with them, so that they are never disturbed, but are allowed to become imbedded in the earth. I have sunk them pretty deep, so that the frost will not affect them, and the result is that the fence is always just as you see it now. The strongest man on this farm could hardly move one of those posts. I am just now completing the last fence on my farm, and after it is finished the fence problem on this place will be settled forever. No more time will be wasted looking after them, and there will be no danger of the horses breaking in like they did at this spot thirty years ago, or so—as you may remember.'

"I remembered all right, and as we stood there laughing, we instinctively began rubbing the sore spots once more, which father left on us upon that memorable occasion."

### THEY COVERT THE FINES.

**Resolution Before Municipal Convention Regarding Speed Penalties.**

Toronto, Sept. 7.—A number of resolutions of an important character, in their relations to municipal affairs were presented by the resolution committee at the meeting of the Ontario Municipal Association, which opened in the City Hall yesterday morning. There were almost 40 delegates present, and President George Geddes, mayor of St. Thomas, presided. For the most part the delegates comprise mayors, reeves and city clerks of the Ontario municipalities.

Among the resolutions submitted and which will be discussed this morning, is one in effect that in consideration of the cost to municipalities of the construction and maintenance of roads and streets and the extent to which they are used in the operation of motor vehicles, the Ontario Government be petitioned to pay over to the said municipalities a just proportion of the amount collected annually in permits and fines imposed in connection with the operation of motor vehicles. This resolution was passed by the Ottawa City Council Aug. 8, and may be endorsed by the association.

W. C. Nickle of Belleville was the mover of a resolution that the association ask for legislation amending the municipal act, giving cities and towns the powers, with the assent of the electors, to hold nominations on the last Monday in January and the election on the first Monday in February.

Another resolution, moved by Mayor J. W. Lawrason of Dundas, is that the Good Roads Act be amended so as to require that all streets through towns and villages, not separated from the country, which are a continuation of the roads forming part of the good roads scheme of the county, shall be maintained and kept in repair as a part of the good roads system of the county.

Reeve George S. Henry of York Township submitted a motion proposing an amendment to the registry and land titles act, to provide that plans of property shall not be registered until submitted and approved by municipal councils or county judges, or master of titles, and that no street shall be laid out less than 66 feet wide, no lane less than 20 feet and that parallel streets shall not exceed a distance of 660 feet apart.

It was the general opinion that the best interests of the association could be served by dividing it into the urban and rural divisions, the idea being that greater concentrated effort is needed to thwart the grasping methods of corporations.

**Will Delay G.T.P.**

Vancouver, Sept. 7.—That the completion of the Grand Trunk Pacific Railway through northern British Columbia may be delayed a couple of years became very apparent to railway men here yesterday, when it became known that no effort would be made to get under contract this year a large section between Aldermere and Tete Jaune Cache. All the rest of the line is now under contract and it was expected that on the present trip that President Hays of the G.T.P. would announce the awarding of the contract.

The reason for the delay is the scarcity of labor, and the deadlock that had arisen between the railway company and the British Columbia Government on the Oriental employment question. Up to the time of his return to Vancouver from Prince Rupert, it is under stood that President Hays intended to award the final contract, but he was met here by the declaration of Contractor J. W. Stewart that he did not care to take up any more work, and that, so far as he was concerned, he would care for further work by building westward from Edmonton, rather than east from Prince Rupert. In order to finish the new transcontinental on time in 1913 it would be necessary to rush work from both ends.

### BRIEFS FROM THE WIRES.

Lieut.-Col. George Dowker died at Ste. Anne de Bellevue.

Two young sons of J. D. Payne of Bancroft, were drowned yesterday.

The Grand Trunk Pacific has purchased a site for a hotel at Victoria, B.C.

Rev. Reuben Millyard, president of the London Methodist Conference, died at Fort William.

Col. Morrison, editor of The Ottawa Citizen, was injured by his horse rolling into a barbed wire fence.

John B. Moissant, the American aviator, reached London last night, completing his flight from Paris.

The late Mrs. Mary A. White, who conducted the Palace Hotel, Toronto, left a large estate to employes and friends.

The Vermont State election, which was held yesterday, promises a Republican majority, but one reduced far below the safety line.

Some fifty-eight persons, many of them accused of first degree murder in connection with the lynching of a private detective in July, were placed on trial at Newark, Ohio.

**Would Weaken Bonds of Empire.**

London, Sept. 7.—(C.A.P. Cable.)—The Daily Mail, after paying a glowing tribute to Sir Wilfrid Laurier's wonderful hold on the Canadian people, says the pleading of western farmers is mostly on the part of Americans, who desire cheaper terms for American makers of implements, whose views they represent and are urged to represent. "This is a point," it says, "which Sir Wilfrid, having subordinated politics to his philosophy, wholly conceals. He could not, indeed, confess it, but the point is crucial. We welcome Sir Wilfrid Laurier's reiterated words of loyalty to the Empire, but the grant of special concessions to the United States, organized for their fellows by American purchasers of Canadian land, can only weaken the bonds of Empire, and would in the sequel obliterate the southern line, on which Canada's individuality is based."

The Standard points out that tariff commissions are no novelty in Canada. It says: "Sir Wilfrid Laurier's statements of his policy of to-day or to-morrow must be estimated by reference to his whole public career. Does anyone suppose protection is no longer backed by a large majority of Canadians? Though Laurier holds the Cobden Club's medal, yet for 15 years he has held the Premiership without taking a single important step towards freeing Canadian ports."

**Foul Play Suspected.**

Ottawa, Sept. 7.—Lying dead in bed, with blood on his face and a pool of blood on the floor, George Beduke was found at 10.30 yesterday morning by Detective Joliat at 44 Elisabeth street. When the detective arrived at the house he found five foreigners in the room, two of whom were asleep in the same bed as the dead man.

The strange fact is that in spite of the blood, no outward signs of violence were noticeable on the body.

The police are investigating and an inquest will be held.

**Lived Two Days With Broken Neck.**

Ottawa, Sept. 7.—Fred. Foster of Caldwell, Renfrew County, lived for over two days with a broken neck. Early Sunday morning Foster, who was but a young man, was brought to the hospital here with his neck broken between the fourth and fifth vertibrae, and his lower limbs paralyzed, as the result of an accident with runaway horses. An operation was performed, but Fraser died early yesterday morning.

**Panama Canal Fortifications.**

Washington, Sept. 7.—The construction on the fortifications along the Panama Canal is to be done by the same engineering organization which is building the canal itself. Such a decision has been reached by President Taft, Major-Gen. Wood, chief of staff of the army, and other officials interested.

**Gets Half a Million.**

Waterous, Sask., Sept. 7.—F. F. Farrar of this town has received word that a relative in Scotland has bequeathed to him one-fourth of an estate valued at $2,000,000.

**Engineer of Train Killed.**

Massillon, O., Sept. 7.—A runaway locomotive on the Wheeling & Lake Erie Railroad crashed into a passenger train at Run Junction, seven miles south of here, yesterday, killing the engineer of the passenger train. C. W. Foster, of this city. Not one of the 100 passengers was seriously hurt.

**Attempted Train Wrecking.**

Brockville, Sept. 7.—Reuben Lee, a young man of 20 years, residing at Forfar, was arrested Monday charged with attempting to wreck a train on the R. W. & N. Railway, the recently acquired branch of the Canadian Northern, on Aug. 8 last.

**President of New College.**

Red Deer, Alta., Sept. 7.—The new Presbyterian Ladies' College here has appointed Rev. Neil D. Keith as president, and he will take up his duties of organization at once. Mr. Keith comes from Prescott, Ont., and was formerly secretary of the Y.M.C.A. at McGill University.

**Appointed a Woman.**

St. Thomas, Sept. 7.—Mrs. Sperry Ghant, wife of Ald. Ghant of St. Thomas, has been given a place on the board of management of Alma College by the General Conference of the Methodist Church. It is the first time on record that the church has so appointed a woman.

**Tried to Murder Her Mother.**

Ottawa, Sept. 7.—Eliza Thompson, a middle-aged woman, has been brought down from the Northern Gatineau district by Constable Deercier, charged with attempting to murder her mother with a butcher knife. The woman is evidently insane.

**Condemns American Regulations.**

London, Sept. 7.—Leading export firms in London, Manchester and Paris energetically condemn the new customs regulations governing the admission of foreign textile fabrics into the United States.

These, it is asserted, are so unpracticable that they can have been framed only to shut the American market hermetically to foreign products.

**Mistaken For a Burglar.**

New York, Sept. 7.—Mistaken for a burglar, Mrs. Louise Ceis, 36 years old, was shot in the heart and instantly killed at 4 a.m. by Kurt Wiglos, aged 19, a boarder, in her home at 47 East 11th street. Her husband and a year-old daughter were grazed by the bullet fired by the boarder.

**Acting President of Chile Dead.**

Santiago, Chile, Sept. 7.—Vice-President Elias Fernandez Albano, acting president of Chili, since the death of President Montt, died suddenly yesterday from an attack of heart failure.

**Liberian Sugar Cane.**

In Liberia sugar cane reaches a height of twenty to thirty feet. A stalk sometimes becomes so heavy that it is bent over until it touches the ground in two or three places, taking root at each place.

**Tired Feet.**

When your feet are very tired and hot, plunge them into a basin of cold water and keep them there until a sensation of warmth begins. Then dry them and put on fresh stockings and shoes.

**Arab Music.**

Arab music has been described as the singing of a prima donna who has ruptured her voice in trying to sing a duet with herself. Every note starts from somewhere between a sharp and a flat, but does not stop even on one, and splits up into four or more portions, of which no person can be expected to catch more than one at a time.

**Netherland Fruit Farms.**

Some fruit lands in the Netherlands are valued as high as $3,200 per ...

### Black Hand Active.

New York, Sept. 7.—Activities of the dreaded Black Hand show no diminution, two attempts being made yesterday to destroy the homes of Italians who refused payments to the society. A blackmailing band sought to blow up and burn the house of Frank Mazetetta, a contractor, in Brooklyn, because he would not pay $10,000. Mrs. Mazetetta fled to Europe with her children. Firemen checked the flames in Mazetetta's home, and threw two unexploded bombs out of the window.

Blackhanders ignited a can of explosives against the front door of Giovanni Palmero on East 87th street early yesterday. The fuse burned out without exploding the can. Palmero has received many threatening letters.

### Winston Churchill Wounded.

London, Sept. 7.—Much curiosity, not unmixed with anxiety, is felt here over a despatch printed in The Manchester Guardian, to the effect that Winston Churchill, Home Secretary, had been wounded in Smyrna.

Churchill, who is taking advantage of the lull in English politics to make a tour of the Orient, was understood to be traveling in Asia Minor, but his exact whereabouts were not known until the receipt of this despatch. The cablegram, which lacks detail, states that Hon. Mr. Churchill was accidentally wounded in the leg.

### Niobe Commissions for Canada.

London, Sept. 7.—The Niobe was paid off Monday and recommissioned yesterday for the Canadian service.

Sir Hugh and Lady Graham, and Judge Wolf sail for Canada on the Carmania.

The British-Canadian Explosives Co. has been formed with a capital of $100,000.

### Mr. Bryce in Jamaica.

Kingston, Jamaica, Sept. 7.—Right Hon. James Bryce, the British ambassador at Washington, arrived here yesterday from New York, and is the guest of Governor Oliver. Mr. Bryce sails to-day for Chile.

### Silver Service for Cruiser.

Halifax, Sept. 7.—The Province of Nova Scotia will present to the mess of the Canadian cruiser Niobe a silver service valued at $500.

## ALD. HICKS DEFIES "JIM CROW" TO COME OUT UNDER HIS REAL NAME

### Chairman of Board of Works Read Letter Published in Examiner of July 19th, Before the Council---Denounces Men Who Write Anonymous Letters---Retracts Apology Made to Ald. Phelan---Claims He Knows of Letter Signed Thos. Tudhope.

At the conclusion of the transaction of the regular business of the city council last evening, Ald. Hicks rose and referred to a matter to do which, he said, was an 'unpleasant task. He said he was like a man travelling along a road, and someone from behind a bush first hits him with some mud, a second one hits him with a stone and a third one with a piece of elm bark. However, he would rather be the man on the road than the ones behind the bushes.

His reference was to an anonymous letter which appeared in this paper on July 19th, and which was signed "Jim Crow." The letter in part said, "Whereas Mr. Chapman and the resident engineer appointed on the south end sewer and pumping station are outside men, be it resolved that Ald. Hicks be given every opportunity of ascertaining if either or both gentlemen are members of the Roman Catholic church, and, in case one or both should be a Catholic, I suggest that the matter be referred to the Board of Works, with power to act." Ald. Hicks, after expressing in the strongest terms, his contempt for men who write anonymous letters, defied "Jim Crow" to come out in the open and substantiate the insinuations made in his letter to the paper. He had many friends who were Roman Catholics, and he assured the members of the Council that the question of a man's religion never had a part in his actions in the Council. He intimated that he had a great deal more information which he was not then prepared to disclose, but it was his intention to ferret the matter to a finish.

Ald. Hicks then went on to speak of the accusation he made against Ald. Phelan at the last meeting of the Council, when he stated that he (Ald. Phelan) was the man who wrote the letter to the Council signed by Thos. Tudhope. Ald. Hicks later sent a letter of apology to Ald. Phelan, believing that he (Ald. Phelan) did not know anything of it, as he had stated, but since that was written he had learned certain things, which led him to believe that Ald. Phelan did know something of it. "Why can't you give me the man's name who said I paid too much for the rock elm?" Ald. Hicks asked Ald. Phelan.

Ald. Phelan said that he had given it to the Mayor.

Mayor Morrow stated that the man was a reputable citizen. Mayor Morrow said, that he had hopes that Ald. Phelan would tell it to Ald. Hicks and thus end the matter.

Ald. Hicks asked Ald. Phelan to put himself in his position. He thought that if Ald. Phelan had the city's interests at heart, he could have come to him and told him what this man had said. He thought in fairness to a fellow alderman, he should disclose the name of the man. As for the letter signed Thos. Tudhope, it was written by the left hand in a Hunter street office and Ald. Phelan knew of it. Ald. Hicks could give the name of the messenger who carried it.

Ald. Phelan denied having any knowledge of the letter and he thought that when he received Ald. Hicks' letter of apology, it should have been made in open in the Council, as Ald. Hicks had stated he would make it. Ald. Phelan then read the letter.

His Worship told Ald. Hicks that when he made a charge against a member of the council and received a straightforward denial, he should accept it.

### LAWNS WILL BE JUDGED TO-MORROW

The lawns and gardens entered in the contest of the Peterborough Horticultural Society will be judged to-morrow afternoon by an expert from Toronto. It had been arranged to hold the inspection yesterday, but the judge selected could not be here yesterday and in any event the rain would have prevented the lawns from appearing at their best. The results of the contest will be announced in Friday's Examiner.

## NO EXCURSION

All persons intending to join the excursion of the Woodmen of the World to Jubilee Point, per Steamer Empress, on Saturday, September the tenth, and under the auspices of the Degree Team, are hereby advised that there will be NO excursion held on that date.

## WENT THROUGH BRIDGE

### Traction Engine Met With Delay on Mark Street, East City

The traction engine belonging to Mr. Robert Scott of Smith, was passing along Mark street last evening, and apparently it was too heavy for the bridge, as it went through, breaking all the planks. Fortunately no one was hurt, but considerable difficulty was experienced this morning in getting it back on the road, but after some hours of hard labour, it was proceeding on its journey.

Another crew of men, in charge of a threshing machine, brought it to a standstill on Hunter street last night and the men proceeded to make merry. Considerable disorder was the result and officers Meharry and Adams were called and soon scattered the gang.

## WEDDING BELLS

### TOVEY—BUTCHER.

The marriage took place this morning at eleven o'clock, at St. John's church, of one of Peterborough's most popular young ladies, in the person of Miss Florence Amelia Butcher, second daughter of Mr. John Butcher, Burnham street, East City, to Mr. Albert J. Tovey, of Unity, Sask., and formerly of this city. To the strains of the wedding march, played by the organist, Mr. R. J. Devey, the bride entered the church leaning on the arm of her father who gave her away. She loked very pretty in a smart tailored costume of grey serge. She wore a hat of grey Persian silk with a grey mount and carried a shower bouquet of lilies of the valley. The ceremony was performed by Rev. Canon Davidson, M.A., rector of St. John's, and was witnessed by a large number of friends of the contracting parties. The bride and groom were unattended. While the register was being signed, Mr. Geo. Chandler sang, "O, Perfect Love."

After the ceremony Mr. and Mrs. Tovey drove to the G. T. R. station, where they took the 11.40 train for Rochester, N.Y., where they will spend a short honeymoon before returning to Peterborough. After spending a few days here on their return, they will leave for their home in Unity, Sask. The bride has a wide popularity among the people of Peterborough, and the groom, before taking up his residence in the west, was one of the city's most highly esteemed young men. Their host of friends will join in extending them the sincerest of best wishes.

### JOYES—STEWART.

A very pretty wedding took place this afternoon at a quarter past two at St. Luke's church, when Miss Ena Jean Stewart, second daughter of Mr. James Stewart, Mark street, East City, was united in marriage to Mr. Francis Ernest Joyes, of Peterborough. The ceremony was performed by Rev. Dr. Langfeldt in the presence of a large number of friends. The wedding march was played by Miss Flowers, as the bride entered the church leaning on the arm of her father, who gave her away. She looked very pretty in a dress of white duchess satin with veil and wreath of flowers. She carried a shower bouquet of white roses and astors. She was attended by her sister, Miss Maud Stewart, who looked charming in a dress of white silk and white Panama picture hat. She carried white astors. The groom was supported by Mr. Harold Smith, of Toronto. After the ceremony a reception was held at the residence of the bride's father, where luncheon was served and hearty congratulations were bestowed on the young couple. About fifty guests were present.

Mr. and Mrs. Joyes left on the 4.30 train for Toronto and points west and on their return will reside at 112 Sophia street. Mrs. Joyes travelled in a tailored suit of wisteria shade with a hat to match.

## BRITAIN HAS WON

### Successful in the Long Argued Case Against United States in Connection With the Newfoundland Fisheries

### DECISION TO-DAY

Examiner Special.

THE HAGUE, HOLLAND, SEPT. 7.- Great Britain has won the long-argued case against the United States before a Hague tribunal, regarding Newfoundland fisheries. The decision was given out this afternoon.

The Hague, Holland.—While independent experts agree that the decision of tribunal in the North Atlantic fisheries case greatly favours Great Britain, the decision, as read by Professor Lammasch to-day shows that the international peace court has the failing common to lesser tribunals of giving judgments so lengthy and technical that they are beyond the grasp of the lay mind. It is evident in all points of difference except that dealed on the interpretation fishing rights fishermen from the bays, the tribunal decides in favour of British contentions. All the seven points hinged on the interpretion of fishing rights around shores of Newfoundland, as laid down in the treaties following the American war of Independence and the Campaign of 1812-13. The States sought for her fishermen privileges that Newfoundland, Canada and Great Britain were not inclined to give. On more than one occasion the dispute nearly developed war between the two Anglo-Saxon nations. Sir Charles Fitzpatrick, Chief Justice of the Supreme Court, was the British representative on the Hague Tribunal during the long trial and argument of the case. Hon. A. B. Aylesworth, Minister of Justice, prepared the case for Canada and was assisted by many prominent legal lights of Canada and the Old Land. One net result of the decision is the permanent settlement of a question which has agitated the two nations for many years and caused many fears of bloodshed. The decision actually means a lot for Canadian and Newfoundland fishermen. Although the States get decision technically on points, 2, 3, 4, 5, 6 and 7 and Great Britain on 1 and 5, it is Britain's victory, because the two latter were most important from the British standpoint They dealt directly with the areas in which the British are entitled to exercise fishing.

## NEW ROOF

Mr. T. Dobson, foreman of the Bridge and Building Department of the Grand Trunk Railway, completed to-day the new rubberoid roof on the G. T. R. engine house. Mr. Dobson started his men at work on Monday last and since then the men have laid 33 squares, which are ten feet square, making a total of roofing of 3,300 square feet.

This evening Mr. Dobson and his men leave for Maddock, where they will make the same renovation on the engine house of that town.

## GOOD PROGRAMME

### Arranged For the George Street Roller Rink This Week

A programme of much interest has been arranged for the George street roller rink for the present week and there will be something doing every night at the popular headquarters of the young people. The advertisement in another column gives the details of the good things arranged for this week. There is a big attendance every evening.

### SPECIAL MEETING OTONABEE LODGE, I. O. O. F.

**The officers and members of Otonabee Lodge, I. O. O. F. are asked to meet to-night at the Oddfellows' Hall to make arrangements for attending the funeral of our late brother, Harry Vaughan.**

C. GOOLD, N. G.

## A CONVENTION

"A Convention of the Members and friends of the Canadian Defence League, and everyone in sympathy with the movement, will be held in the Amphitheatre of the Dairy Building, Canadian National Exhibition Grounds, Toronto, at 10 a.m., on Friday, September 9th, 1910. This League is a recently organized, non-political, educational association, standing for the defence of Canada against internal and external enemies—enemies social, commercial, political, moral and national. Amongst the speakers are Rev. Dr. Carman, E. E. Wippford, James L. Hughes, and Senator Sir Geo. Ross. Sir Frederick Borden will speak at the Directors' Luncheon on the same day.

## RESENT "HOMAGE"

### Toronto People Complain of the Wording of Message of Welcome to the Cardinal by Mr. Justice Girouard

### VISIT TO THE GAOLS

Special to The Examiner.

TORONTO, SEPT. 7.—There is a tendency on the part of some citizens of Toronto to resent the word homage used in the message of Mr. Justice Girouard, Administrator of Canada in the absence of Earl Grey, to Cardinal Vannutelli. They say it commits Canada to reverence the Pope, whom the Cardinal represents. It is stated in Montreal that the word homage in French simply signifies respect.

**Visited the Jails.**

MONTREAL, QUE., SEPT. 7.—Cardinal Vannutelli spent this morning in the jails and prisons of the city. "We are all prisoners on this earth," he told hardened criminals in the local house of detention. His comforting words of admonition and encouragement brought tears to many eyes.

**Will be Banquetted.**

MONTREAL, QUE., SEPT. 7.—To-night the visiting dignitaries to the Eucharistic Congress will be banquetted at the Windsor Hotel.

## ELLIOTT'S

### This is a Little Talk on the Reason Why Your Woollen Clothes Shrink

A lady the other day said: "I don't know why my clothes shrink. I always take such care of them and I use nothing but home-made soap."

If you look at a fibre of wool through a strong microscope, you will see that it is just a pipe filled with natural oil, and anything that destroys this oil causes the wool fibre to flatten together, or, in other words, to shrink. Many of the much advertized soaps of to-day are chiefly composed of soda, and this chemical eats away the wool oil, and the lye in the home-made soap will perhaps do so still more rapidly, and how often you will see some one hang a wool garment near a sharp heat, and if the garment is not browned they think it hasn't been injured, but they wonder afterwards why that wool garment has lost its springy softness.

A very good guide for correct handling of wool is to remember that wool is an animal product, and anything that will hurt the hands will injure the wool. You would not roast your hands, or leave them in frosty water, or wash them in lye or washing soda.

In connection with this it may be said that a mixture has been discovered that when the wool has been immersed therein, it protects the oil within the wool so it cannot shrink, and the wool so treated always stays soft and springy.

Our Reina and Zenith Underwear for Ladies and Children has been treated in this way and should either of these brands shrink, if you bring the shrunken garments back to us we will give you a new one for it.

The Reina Underwear in ladies' sizes in Vests and Drawers, winter weight, are 50 cents each.

The Zenith cashmere wool Vests and Drawers are in ladies' sizes, 75c each.

The children's sizes run from 25 cents.

## ELLIOTT'S

## WON ST. LEGER $30,000 STAKES

Special to The Examiner.

DONCASTER, ENG., SEPT. 7—Earl Derby's Swynford won the St. Leger stakes (thirty thousand dollars), the famous classic for three-year-olds, today.

## WAS REINSTATED

Special to The Examiner.

POUGHKEEPSIE, N.Y., SEPT. 7—Rev. Wm. Hubbard, Baptist, who denounced one wealthy member of his congregation because she permitted dancing and card-playing in her home and who was dismissed by the church trustees, has been ordered reinstated in the pulpit by the State Baptist Association. It is expected that most of the trustees will leave and form a new church.

*Temperance, in its true sense,, does not, and should not, prohibit the sensible use by adults of a beverage so rich in health help as Regal Lager. This pure, delicious, mild beer greatly aids digestion.*

## PETERBOROUGH LOCK MF'G. CO. ASK FOR A FIXED ASSESSMENT OF $20,000 ON THEIR PROPERTY

### Request Made in Letter to the City Council Last Evening---Have Recently Made Improvements at a Big Expenditure---Employ a Large Number of Additional Men.

The Peterborough Lock Company, in a letter to the City Council, which was read at the meeting last evening, asked for a fixed assessment on their works of $20,000. The request was referred to the Manufacturers' Committee.

The letter is as follows:

To the Mayor and Council of the City of Peterborough.

Dear Sirs,—Instead of making application to the city, asking for fixed taxation, before improvements were made, the Peterborough Lock Co. undertook to make an expenditure of $25,000, before intimating to the Council that they desired a fixed assessment, believing that the Council would realize that the Company was entitled to the same treatment extended to other industries under a similar circumstance.

The Lock Company has within the past few months expended $25,000, providing for the trebling of the output of the plant, and the employment of a large number of additional hands —increasing the pay roll to a considerable extent weekly. This has been accomplished without having said anything to the City, believing that the Council would deal as justly with them as it did with those who sought first the fixed assessments, and then proceeded with the work. The Lock Co. has gone on and done its work without bargaining for favours, and they have shown the city that the work and expenditure has been made.

His Worship, the Mayor, who is a director of the Company, favoured first proceeding with the work and then make application for fixed assessment.

A fixed assessment has been given the following companies:

The Canadian General Co., $150,000. Central Milling Co., $12,000; J. J. Turner & Sons, $6,000; Peterborough Creamery, $1,000; Rapid Tool Co., $1,000; Peterborough Cereal Co., $10,000; Canadian Cordage M'f'g Co., $4,500; Auburn Mills Co., $40,000; Peter Hamilton Co., $20,000; Peterborough Shovel and Tool Co., $4,000; The Opera House, $3,000; Wm. Hamilton Co., $10,000; B F. Ackerman Co., $15,000.

The real estate and business assessment of the Peterborough Lock Co. is $10,360, and of the Company's property, leased by Mr. Rishea, $7,090. The Company expects to occupy these premises and make certain alterations within a reasonable time. In the meantime we have no objection to this assessment standing, but when the premises come to be occupied by the Company, the whole assessment should not exceed $20,000.

We shall be glad, therefore, to have your kind consideration of our request for fixed assessment.

Yours truly,

J. R. STRATTON, President.

## OVERCROWDING IN SOME OF SCHOOLS IN THE CITY

At last night's meeting of the Board of Education, School Inspector Mowat presented a verbal report of the conditions in the public schools when they opened yesterday morning.

The inspector remarked that while there was some crowding, the conditions were not any worse than was anticipated, and he was confident that in a couple of days things would be readjusted, and there would be good classes and organization.

The King Edward school was likely to be somewhat overcrowded, but by diverting a few from the King Edward they might get through the present year all right. One class was too large. One or two forms in the South Central and also in the Central were congested. In the latter school there was one form with fifty-one pupils. It was proposed to divert some from here to the North Ward school.

## PRINCIPAL TO CONFER WITH MEMBERS OF SCHOOL BOARD

### Will Have a Confidential Talk Over the Results of the Last Collegiate Institute Examinations and the Work of the Staff Generally.

At last night's meeting of the Board of Education Mr. D. W. Dumble brought up the subject of the showing made by the pupils of the local Collegiate Institute at the recent examinations. He had heard some talk outside about it, he said, and thought the Board should be able to keep in touch with the work of the Collegiate staff.

Mr. Hill agreed with this opinion. He thought the Board should have as much information and be as closely in touch with the Collegiate work as they were with that of the Public School staff. They were able to watch the work of the Public School teachers and know what they were doing, but they had not the same information in regard to the Collegiate. Mr. Hill thought the Principal of the Collegiate should supply the Board with information about the work of the teachers.

A motion of Mr. Dumble, that the principal of the Collegiate Institute be asked to meet the Board of Education in committee of the whole, in order that he might make explanations and suggestions in connection with the work of his staff, was carried.

The use of a number of text books in both Public Schools and Collegiates until new ones have been secured was authorized.

## Salvation Army Band's Good Showing At Lindsay

The Lindsay Warder says:

Last evening the famous Peterborough Salvation Army silver band gave a concert in the S. A. citadel, after holding a very successful concert at Fenelon Falls in the afternoon. At 7 o'clock an appreciative concert was held and at 7.30 the band adjourned to the barracks, divisional officer, Major Hay, very ably presiding.

The band appeared only in fairly good force as some were absent in Toronto. Bandmaster Peryer led the players with excellent capability, the band responding constantly to each quiet movement of his baton.

Owing to the unsettled state of the weather not nearly as large an audience as was expected appeared, but nevertheless the programme was excellent and much credit is due the band for the manner in which the concert was carried through. Among the many features of the programme were: The song rendered by the band men, entitled "Jerusalem," and a recitation, "The Veteran's Cornet," by one of the visiting members.

Mr. Henry C. Hamilton favoured the audience with his beautiful composition of three national airs with a depth of feeling and technique very seldom heard outside the large cities. The visiting bandsmen and the audience were delighted with the rendition, and Mr. Hamilton kindly responded with an encore of "Irish Airs."

In order for the band to catch the train the concert had to be cut a little short.

The following is the complete programme:

March—Victory.
Vocal solo—Bandsman Moynes.
Selection—"Experience."
Address—Bandsman Hodgins.
March—"Battle Cry."
Piano solo—Mr. H. C. Hamilton.
Band Song—Jerusalem.
Trombone solo—"Alice, where Art Thou?"
Recitation—The Veteran's Cornet.

It is hoped that the band may soon visit the town again and in more agreeable weather.

## SCHOOL CHILDREN'S CHANCE TO SEE THE EXHIBITION

The school children of Peterborough will have an opportunity of attending the Peterborough Industrial Exhibition.

All the schools of the city will be closed on the afternoon of Friday, the 16th, this second day of the Industrial.

Mr. R. H. Leary, president of the Exhibition, wrote the Board of Education, asking that Friday afternoon be made a holiday in the schools as usual, and at last night's meeting of the Board, on motion of Mr Crane and Dr. Burnham, the request was granted.

## MINIATURE RAILWAY WILL BE FEATURE OF THE FAIR

A miniature railroad will be one of the features of the midway at the Peterborough Industrial Exhibition on Sept. 15, 16 and 17.

Yesterday the Canadian Miniature Railroad Company of Canada, well known builders and operators of amusement outfits, entered into an agreement with the directors of the Industrial Exhibition to have a miniature railroad plant in operation here for the fair. This should prove a great attraction for the young people, as it is a safe and enjoyable form of amusement.

## Norwood Girl Finds Purse Which Was Taken By Thief

TORONTO, SEPT. 7.—A story dealing with the frustrated plot of a pickpocket and the recovery for an American drummer of a purse containing $25 in money and some railway transportation, through the honesty of two other parties, was related by the police yesterday.

It appears that as Miss Jennie Barry, of Norwood, Ont., was passing through the crowded waiting-room at the Union Station to her train she heard a cry of "pickpockets" and a moment afterwards a heavy object hurtled through the air and fell on the floor at her feet. She saw it was a purse and picked it up, but, as her time was limited she did not investigate her find until she was on the train side. When she saw the money it contained she handed it over to Mr. Nievel, a druggist, of 57 Avenue road, who notified the police yesterday.

Investigation showed the wallet to be the property of Mr. Charles Schender of Tenton, Iowa, who will be in possession of his property again in a few days.

## OBITUARY

### THOMAS HENRY VAUGHAN.

The death occurred yesterday afternoon of Thomas Henry Vaughan, in his thirty-third year. Mr. Vaughan, who was a brass finisher in the Canadian General Electric Works, has been in this country for the past eight years, coming here from Staffordshire, England, where he was born. The deceased leaves to mourn his loss, a wife and two children.

The funeral will be held under the auspices of Otonabee Lodge of Oddfellows, of which the deceased was a member, on Saturday, at 2 o'clock, from his late residence, at the corner of Cameron street and the boundary, to the Little Lake cemetery for burial.

### DAVID DOIG.

The death occurred yesterday afternoon at Nicholls Hospital of a lifelong resident of this city, in the person of David Doig. Mr. Doig was highly esteemed by all who knew him, and leaves, besides his many friends, a family of eight, two brothers and two sisters, to mourn his loss. The children are Mrs. J. Moran, of South Parkdale, Toronto; David, of Oshawa, Mrs. Shamey of Toronto, James of Nakusp, B.C., Mrs. C. A. Du Vasder, of Samoa, Cal., Annie of St. Michael's Hospital, Toronto; Frederick, and Herbert Francis, of this city. The sisters and brothers of the deceased are Mrs. R. Rutlege, Toronto; Mrs. Jayes, California; John and George of this city.

The funeral will take place Thursday afternoon at 2 o'clock form Cluxstock's undertaking establishment to the Little Lake cemetery for interment. Rev. J. G. Potter will officiate at the funeral service.

## CHURCH NOTES

### KNOX CHURCH.

The usual mid-week service will be held to-night (Wednesday) evening, at 7.30 o'clock. The choir will practice at 8.30 p.m.

On Thursday afternoon at 3 p.m., the monthly meeting meeting of the Ladies' Aid Society, will take place.

Friday evening, at 8 p.m., the Go Forth Club will meet at 544 Bolivar street.

### ST. JOHN'S NOTICES

Wednesday, 8 p.m.—Evening Service. The Rector asks for a good number of men to meet him in the vestry after his service, in connection with the summer work among men.

Thursday, 8 p.m.—Special choir practice for Harvest Festival Sunday. Boys assemble at 7.45.

Saturday, 9 a.m.—Boys' choir practice. The Sunday School Committee reports fifty members of books not returned. Will all under the last any books belonging to the school return them or notify [illegible]

## THE VICTORY OF THE HAGUE TRIBUNAL.

The dispute, in relation to fishing rights in Canadian waters, which has been pending for nearly a century—since the treaty of 1818—between Great Britain—practically Canada—and the United States—has, as will be seen by a brief despatch in this issue, at last been definitely and decisively settled by the award of the Hague tribunal, to which the questions involved were referred. The first point at issue was the definition of the term of the treaty—"inhabitants of the United States," equivalent to the question "can vessels flying the United States flag have employed crews composed of other than bona fide United States citizens shipped at United States ports." The second question arose in respect of the liberty of United States citizens to take fish "in common" with Canadians; in other words, "had the British or Canadian Government power to frame regulations to apply to United States fishermen?" The third question was similar and related to and concerned the requirement of United States citizens to report at Newfoundland custom houses, pay light-house dues, etc. The fourth question related to the definition of the three miles' limit—where it is to be measured from—the shore indentations, or from headland to headland. The fifth question was as to the right of United States fishermen to fish in bays, harbours, etc. It appears that the British and Canadians have won all five contentions, except the last, which excluded United States fishing in bays.

The settlement of this question is the settlement of a long-continued international squabble, which contained elements of friction, with possibilities of much more serious dispute, to be settled by arbitriment, much less peaceful than that of the Hague Tribunal.

## BURIAL OF FLORENCE NIGHTINGALE.

With the ceremony of the utmost simplicity, the mortal remains of Florence Nightingale, who has earned the admiration and love of generations of Britons, were interred at East Willow churchyard, near London, England, on Saturday last. The city of London paid its tribute of respect to the noble dead through a public memorial service held at St. Paul's, but the quiet impressive service at the humble church where Florence Nightingale's parents lie buried was perhaps more expressive of the noble lady's career of pure endeavour and self-denial than any pompous funeral rite. The service at East Willow, conducted by Rev. S. M. Watson (the vicar), and Rev. Thory Gage Gardiner, was held in rainy weather, the church paths being deeply lined with mourners, and innumerable wreaths and floral crosses testified to the heroism of the woman whom the Queen Mother addressed upon a wreath Her Majesty sent as "the greatest benefactress of suffering humanity."

PILES Dr. Chase's Ointment is a certain and guaranteed cure. Sold by every dealer in the world. You can buy it and pay for it if cured. If you can't use it and return it to us, we will pay for it ourselves. Dr. Chase's Ointment.

## THE EAST AND THE WEST.

Sir Wilfrid Laurier's tour in the west, and the incidents associated with it, have given rise to a great deal of press comment. Much of this comment has been of such a character as to suggest the idea that in interest, ambition and sympathies, there is a distinct line of cleavage between the portion of Canada west of Lake Superior and the portion east of this point. There is, however, reason to believe that any circumstances that suggest these conditions are only surface indications. The older and more developed forms of British civilization and genius of government make their influence felt here as they are felt throughout the Empire. Non mutat genus solum. The soil does not change the race. Geographically widely separated units of the empire apparently diverse in climate, peoples and characteristics of their peoples are knit together by the intangible, but tenacious bond of imperial cohesion. Whatever influences seem to conflict with the British idea, have to surrender to it, and acknowledge it paramount in essence and effect, if not in appearance. In a word, the phrase "blood will tell" finds an illustration of its force and spirit. The East and West of Canada are in reality only geographically separated. They have common interests and a common bond of unity. Sir Wilfrid Laurier has been emphasizing and promoting that unity, and a recent distinguished British visitor, Sir Baden-Powell, has endorsed and impressed the idea. The unity of the Canadian people is a decided force and the tour of Sir Wilfrid served to impress its immanence and permanence. The West abounds in residents from the east, and necessarily they are of the most enterprising and ambitious of our eastern people. They represent every section of the east, the Maritime Provinces, Quebec and Ontario. We are told how they made their influence felt during the Laurier tour, and how they retain their affection for, and their interest in, their forfer homes:

> At Moosejaw, Hon. G. P. Graham and Mr. Pardee, were the guests of a Canadian Club, whose members are nearly all from the East. At Edmonton, Mr. Graham was dined by old Ontario boys and Mr. E. M. Macdonald by old friends from the Maritime Provinces. There were other such reminders at Calgary and Medicine Hat; and somebody calculated that there were more than three hundred in Edmonton from *one Eastern Ontario County*. At all sorts of unexpected places a little knot of Quebec people made their presence known to Sir Wilfrid; other members of the party had similar visits from former compatriots, who desired by this much to get back into touch with Ontario and Novad Scotia.

We sometimes complain that, the newer Canada is being built up at the expense of the East. While, in one sense this is true, urged too strongly, it becomes an expression of parochial patriotism. In effect it makes for the unity and solidarity of Canada. In the west the public men, the men in control, the ruling spirits, who may be counted upon to steer the west into the broadened groove of good government at its best manifestatoins in this country, are from the east. We sometimes criticise the English, Irish, Scotch, the French, the German and other peoples, for their fond recollections *of the home land*. But this spirit is one which, working among the various members of western population in regard to their native and home province, operates, and will continue to operate, to bind Canada together. It is the same spirit working among the ruling races of the various red-painted parts of the world, which forms the cohesive element and makes the British Empire, one and indivisible.

## EDITORIAL NOTES.

Young men, make yourself fit, and the door of opportunity in Canada will not be closed to you.

Several of the Queen's Own officers are suffering from influenza. They find that the old country climate is not to be sneezed at, but sneezed with.

The grand old vine at Cumberland Lodge, Windsor Great Park, England, which supplies Their Majesties' table with magnificent black grapes, looks better than ever this year, and boasts 600 splendid bunches, the average weight of which is 4 lb.

The East Durham Rifle Club has beaten a Rochester Rifle Club at target shooting. If our Port Hope friends should shoot as well, if our neighbours with hostile intent, should make themselves targets, the country would feel safe.

Ex-President Roosevelt is a homeopathist—advocates like to cure like. He is in favour of largely increasing the power of the national government with himself as the head tyrant, of course—so as to give it greater control of monopolies; that is, create one tyranny to overpower another.

2 IN 1 SHOE POLISH
A leather food that will not gum or cake on the shoes. Shines quick as a wink, and is brilliant, hard, lasting and waterproof. Contains no turpentine, acids or injurious ingredients.
ALL DEALERS, 10c.
THE F. P. DALLEY CO., LIMITED, Hamilton, Ont., and Buffalo, N.Y.

## THE YOUNG MAN'S DAY.

(Ottawa Free Press.)

This is the young man's day. To the ambitious youth of Canada never has opportunity presented so many chances of success. Equipped with a national mind and possessing that rare quality known as "horse sense," the young Canadian has the world at his feet to-day. The skilled worker, the specialist, has the better chance, perhaps, but the dynamic force within any man if directed in right channels will, even by the more circuitous routes, bring him to the level of his trained competitor.

The need of the present day is for the dependable man; one to whom the gratification of foolish vanities is unknown—one who, while willing to sing small at the beginning aims at higher things. Self discipline is the great thing in a young man, that power of self control which makes his pleasures a vitalizing and not a devitalizing force.

A significant and not at all satisfactory, feature in Canadian business life is that Canada seems to be drawing from outside rather than inside the materials with which executive positions are filled. Certainly "the best man" must and should win ever; but is there any reason why the Canadian youth should not qualify for the best positions the country has to offer? The only valid reason lies in the answer to the question: Is the young man fit?

**Children must have good blood,** otherwise they will be puny, sickly and delicate. If your children are pale, easily exhausted, give them **Ferrovim** the invigorating tonic, which is composed of fresh lean beef, citrate of iron and pure old Spanish sherry wine. Nothing could be more beneficial in such cases. $1.00 a bottle.

## GENERALLY SPEAKING

Although a trifle late in the season, it is not too late to give particulars of a certain canoe life-saving device, which is extensively made use of in British Columbia. It is so simple that one wonders on loking at it, why it has not been utilized before. From the cut shown in a Toronto paper the device simply consists in having ropes fastened loopshape to the gunwales of the canoe. These loops lie inside the canoe, but in case of an upset, they float to the surface of the water and afford a better grip than the slippery bottom of the craft can possibly furnish. The paper in question advances the opinion that were such an equipment rendered compulsory, Toronto Bay would claim fewer victims. What about Peterborough?

### The Recent Drowning Accident at Wolfe Street.

life by drowning, which was recorded in the columns of the Examiner last week, shows how quickly a sudden shock can turn the sanity of a well-ordered aggregation of mortals into an incompetency bordering on imbecility. It is evident from the accounts given by eye witnesses that the unfortunate boy who was drowned, clung to the raft for some time, yet amid all that crowd of humanity, there was not one, seemingly, who had the presence of mind to throw out to him one of the many life belts with which every steamer is so well supplied. Women wrung their hands, and men rushed wildly about, while the steamboats' crew attended to their duties, but the one safeguard placed for use in such "emergencies" nobody seems to have thought of employing.

### The Peterborough Exhibition.

The Exhibition will soon be open, and citizens will have a chance of showing to what extent they appreciate the enterprise of the public-spirited men, who have brought it from humble beginnings to its present progressive and excellent state. Last year was the first year that the Peterborough Exhibition really, from a pecuniary aspect, proved a success. From some cause or another, the shows of previous years had proved disappointments, and it had almost begun to look as if smaller places, like Lakefield and Norwood were being patronized by residents of Peterborough in preference to their own town. It is pleasant to feel that things have changed for the better, and that whilst the shows of our smaller neighbouring towns are being well attended by our citizens, our own is receiving a generous share of attention and patronage. This season the Exhibition promises to be well in advance of that of last year, both from the standpoint of agricultural exhibits and the specialties procured by the management. Given fair weather and the support that is its due the Peterborough Exhibition of 1910 should go down in civic annals as one of the most satisfactory on record.

### Fairplay in Sport.

So much has been written at various times about the comparative merits of Canadians and Britishers, in the matter of fair-play in sport, that it would seem that nothing more could be added to what has already been written.

But a paragraph in yesterday's paper, relating to that past pride of the prize ring, James J. Corbett, and the part he played in the late fistic encounter between Jeffries and Johnson brings the matter of fair-play so vividly before one's eyes, that it may be as well to refer to it. Corbett, on his own showing, says that his part in the prize fight at Reno consisted of trying to make Johnson angry during the progress of the bout—in his own elegant phraseology: "trying to get his goat." Now, there is something very despicable in the eyes of a fair-minded man in the adoption of such tactics, but Canadians are guilty of very much the same sort of thing in almost every game they play. At Riverside Park a few days ago, a player in a baseball game, who was holding down "first base," continually tried to kick the bag out of its place when runners were making for it, in order to get an underhand advantage. Such a thing may be smart work, but it is certainly not fair-play, nor does it look like fair play for spectators or players to try to rattle the pitcher by making a great outcry when the bases are full. Baseball, with such tactics in vogue, does not lend itself to the inculcation of a fine spirit of honour. It may be all right as a test of how much cunning is in a man, but as an exposition of fair and honest sportsmanship it is a failure.

In England a player guilty of unsportsmanlike acts, is disciplined to some purpose. He is placed on the same level as the man who cheats at cards, or the welcher at the racecourse, and his society is religiously tabooed. It would be a good thing if young Canadians would practise the same plan and assist in retaining all sport on a level, and more in keeping with the traditions of the great country, which it is our pride to call the Motherland.

### Popular Follies of Great Cities.

Your weeping philosopher is not the most cheerful of mortals. He is generally one, who, seeing abundance of evil in the world, is willing enough *to expatiate on it, but never over-anxious* to offer a remedy for its cure, or for the alleviation of any misery that he sees. He makes one feel damp and uncomfortable. So does the woman who lets loose her tears on every conceivable opportunity. In doing so she evinces a kindly heart, but a sunny nature is far preferable. People of this sort are never merry. They are so used to looking for cloudy skies that they take no notice of the sunbeams. Now, there are many ways in which one can take enjoyment out of life, and one of the many is in taking note of the various catch phrases that ever and anon seize hold of the multitude. The weeping philosopher and the tearful female see only vulgarity and absurdity in these, but to the ordinary mortal, like you and myself, dear reader, some of them are inexpressibly peculiar. London is extremely fertile in odd phrases. Many years ago a favourite phrase that took the fancy of the crowd was "Quoz"! What it meant, whence it sprang, nobody knew, but everybody used it, either *as a witty retort, or an insult*, and it was looked upon as the very essence of smartness. It had its day, and then "What a shocking bad hat"! came into vogue. That, too, passed into the limbo of forgetfulness and "Hookey Walker" reigned in its stead. Not for long, however, as it was shortly supplanted by that wonderfully witty saying: "There she goes with her eye out"! After it followed the very pert remark: "Has your mother sold her mangle?" This served the common herd for a space, and then "Flare up"! which took its rise at the time of the Reform riots, and even now is in occasional use, was the favourite expression. "Does your mother know you're out?" and "Who are you"? were two more witticisms which had their run of popularity. In America such like phrases grow up like mushrooms. At the present time, "Oh, you—so and so"! uttered with various inflections, is enjoying a wonderful popularity, but before long it will doubtless give way to a more up-to-date touch of barbarous vernacular. It is all very strange and looked at as an oddity, very ludicrous, but when all is said and done, what are these expressions, but harmless follies by which the masses unconsciously endeavour to lighten the load of care which presses upon their everyday existence. There is truth in what Beranger wrote:

> "Au peuple attriste
> Ce qui rendra la gaite
> C'est la gaudriole!"
>
> Which, being translated, is:
>
> "For a saddened race
> That which will produce gaiety
> Is the broad jest."

# IN THE WORLD OF SPORT

## ANNUAL MEETING OF O. R. F. U. HELD ON SATURDAY NIGHT

### Peterborough in the Junior O. R. F. U. Series---Only Four Clubs in the Senior, the Local Club Having Withdrawn---Junior Series is Well Filled.

TORONTO, SEPT. 5—The annual meeting of the Ontario Rugby Football Union was held at the King Edward Hotel Saturday evening, when matters [illegible] the coming season were thrashed out. Last year the union was on a pretty shaky basis, but thanks to the Parkdale Rugby Club's success against Varsity on the Dominion championship last fall, it is now more firmly placed.

Those present on Saturday were: President A. R. Denison; First Vice-President Rev. Father Carr; Second Vice-President, E. B. McGillivray; Junior Representative, J. Bryden, Dundas; Dr. Rykert, J. Stock, R. Mason, Hamilton Alerts; W. Howell, T. A. A. C.; E. Roy Clark, N. T. Culverhouse, Central Y.M.C.A.; M. Gladish, Hamilton; R. H. Foster, T. H. Bates, J. W. Nelson, West-end Y.M. C. A.; J. Montgomery, G. Fisher.

It was decided to admit Dundas and St. Michael's college to the senior series, which now, owing to the withdrawal of Peterborough, will be composed of Parkdale, T.A.A.C., Dundas and St. Michael's.

A large number of new clubs were admitted to the junior series, which will now be made up of Windsor, Petrolea, London, Western University, Dundas, Hamilton Alerts, Jerome College, Parkdale A, Parkdale B, West-end Y.M.C.A., I.A.A., T.C.C., T.A.A.C., St. Michael's College and Peterborough. Teams will also probably be entered from Galt, Sarnia and Chatham.

Communications were received from the Hamilton and Toronto City Leagues, asking to be allowed to enter teams in the junior series, but the request was not granted.

Notice was given that the accounts owing to St. Michael's and Petrolea by Lindsay and London had been dropped.

## T. A. S. WILL ARRANGE GAME WITH CRACK TORONTO TEAM

Before the baseball season is over the T. A. S. team, champions of the City Baseball League, are anxious to give the fans of the city an opportunity to see them in action against a really good team, and with this end in view are endeavouring to arrange a game to take place in the near future. If possible they will bring the crack St. Mary's team down from Toronto. The Saints have made a runaway fight of the City Amateur League and are one of the best teams ever gathered together in Toronto. A visit from them would be appreciated by Peterborough fans. Negotiations will also also be entered into with the Royal Canadians, Conroy Burns' fast team, in which a large number of the old Peterboorugh team is playing, in case the Saints cannot be secured.

## BOY PLAYING INDIAN SHOOTS GIRL IN EYE

Examiner Special.

TONAWANDA, SEPT. 7.—(Special).—Irene, the six-year-old daughter of Charles Hardleben, of 275 Morgan Street, was shot in the left eye with an arrow discharged from a bow by William, the seven-year-old son of Police Commissioner William Stryker of the same street, yesterday afternoon. The sight of the eye was destroyed.

The shooting occurred while a number of the children in the neighbourhood were playing Indian. Dressed in an Indian suit, young Stryker was stationed in a tree in front of the Hardleben house. Irene emerged from her home to go to a store nearby and was nearing the tree when the arrow was discharged by the boy. The sharp point of the arrow pierced the girl's eye, and she fell to the ground with blood flowing from the wound. Drs. W. A. Macpherson and Pemberton Laundy were called to attend the victim. Fears are entertained that the other eye will be seriously affected.

Complaint was lodged with the police, requesting that a stop be put to the use of the bow and arrow by children, who have been playing Indian extensively in the neighborhood where the shooting occurred.

## VISITOR ENTHUSIASTIC OVER BEAUTY OF STONY LAKE

### Texas Man Who Has Travelled Much Regards the Kawartha Chain as the Most Beautiful Summer Resort He Has Ever Seen---Gives His Impressions.

Mr. Wm. Robinson, yardmaster of the Texas and Pacific Railway at Toyah, Texas, and Mrs. Robinson, who have been spending the summer months with the former's aunt, Mrs. James Cunningham, Fraserville, spent this week the guests of Mr. Robt. Dale, city.

On Thursday the steamer Lintenia took Mr. Robinson and a party of friends up the lakes to Burleigh Falls. The members of the party consisted of the following: Mr. and Mrs. Robinson, Mrs. James Cunningham, Fraserville; Mrs. L. Thompson and children, city; Miss Lily Cunningham, and Mr. Robt. Dale.

Mr. Robinson has spent the most of his time on this side of the line, visiting the prominent Ontario summer resorts. He spent some time down on the St. Lawrence at the Thousand Islands and a number of other places of interest. Thursday's trip was his first up to the Stony Lake resorts, and he was greatly impressed with the pleasant sail and the beautiful scenery. He stated to the Examiner yesterday that he could not possibly understand why the people of this part of Ontario should go down to the Thousand Islands and other prominent resorts and leave—practically walk away from—one of the most beautiful summer resorts in the province and practically one of the most beautiful in Canada. He said it appears rather strange to an outsider to see the estimation in which the Peterborough people hold the "Lake resorts." "They do not realize what they have got," he said. "They do not patronize them as they should.

He has visited nearly every summer resort on this side of the line as well as the American resorts. He visited California's and many others famous the world over, and then took a trip up to Burleigh Falls, and delivered a verdict that it is the finest trip, and summer resort he has yet visited. When we hear it from a man "who has been there," we know it must be true. When we hear such a statement from a man who has visited some of the world's greatest resorts, we begin to realize that we are living in a part of the country which deserves to be upheld and patronized.

Mr. Robinson also spoke of the beautiful camping grounds of the Otonabee, and stated that every chance he got to spend a few months in the summer he would make Peterborough his headquarters. If a man would come all the way from Texas to spend the summer months in the vicinity of this city, it surely is a good enough recommend for its beauty and attractiveness as a summer resort.

Mr. Robinson also gave the Examiner some very interesting descriptions and facts of the peculiarities in the country where he came from. In comparing the state of Texas to Canada, he said it was very much like the Canadian West, but not nearly so fertile or so healthy a country to live in. The state as a whole is very variable in climate, soil, and manners and customs of the people. In the vicinity of Austin and a few hundred miles west the country is becoming settled, mostly by people from the northern states—very few, practically no Britishers at all. The cowboys in Texas have disappeared—they are a thing of the past. The land is being homesteaded the same as in Western Canada and irrigation is manifesting its value in many parts of the country. The class of people are also improving. The "old timers" who wore the belt and pistol are dropping out steadily and the rest are reforming. Strikes are very rare. Mr. Robinson cannot recall any strike in Texas. He states that the railway employees are paid a wage equal to that here, and are working in perfect harmony with their employers. They get more money some places, but this is balanced by the higher cost of living.

Local option has also progressed. "One might travel three hundred miles on the Texas and Pacific Railway and never touch a place where liquor is sold," said Mr. Thompson. The local option laws are being very strictly enforced.

When asked by the Examiner regarding the old game of bull-fighting, Mr. Thompson stated that that also had been banished. The law does not allow this game to go on now at all. But across the line in Mexico it is still a feature at big days or at shows. He gave a very vivid description of one of these fights which he witnessed at one of the Mexican border fairs a few years ago. He said that a large round plot was dug out with a low railing around the outside on the bank, and in the pit, which would be probably fifty yards in diameter a series of little walls were erected. The bull fighters, armed with long spears, rode in on their horses and took their places behind these walls, and then the animals were driven in one at a time. The animals were then beaten with the spears until they became raging angry and then the fight began. The rider would spear the bull with his long pike-pole-like-spear and then dodge behind the little wall, and so on until the animal was killed.

In such fights the men are often killed and nearly always the horses are killed. In order to decide a victory either the man or bull must be killed. When one looks at the brutality of such a game, it is little wonder that the law banished it.

Next Wednesday morning Mr. Robinson will bid farewell to Canada. He intends visiting friends in Buffalo and Niagara before he finally departs for home. He is going down the Otonabee for a trip to-night and leaves the city for good this evening. It is four years since he was here before and he expresses his regret at leaving.

**CURE**

Sick Headache and relieves all the troubles incident to a bilious state of the system, such as Dizziness, Nausea, Drowsiness, Distress after eating, Pain in the Side, &c. While their most remarkable success has been shown in curing

**SICK**

Headache, yet Carter's Little Liver Pills are equally valuable in Constipation, curing and preventing this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cured

**HEAD**

Ache they would be almost priceless to those who suffer from this distressing complaint; but fortunately their goodness does not end here, and those who once try them will find these little pills valuable in so many ways that they will not be willing to do without them. But after all sick head-

**ACHE**

is the bane of so many lives that here is where we make our great boast. Our pills cure it while others do not.

Carter's Little Liver Pills are very small and very easy to take. Only one pill makes a dose. They are strictly vegetable and do not gripe or purge, but by their gentle action please all who use them.

## SOME THRILLING EXPLOITS IN LIVELY NICARAGQUA

### Youth Led Band of Revolutionists Through Many Adventures and Was Nearly Killed in a Bold Attempt to Dynamite War Ship.

SEATTLE, SEPT. 7.—Just twenty-one years old, brigadier-general of a motley army of creoles, Spaniards, natives and American adventurers, and saved from a firing squad by the merest chance after a sentence of death had been passed on him, Clifford Sands came back to Seattle from Central America in the same way a smaller boy would return from an imaginary but exciting battle with Indians.

A year ago Sands was a freshman in Washington University, and freshmen are never heroes. In a space of seven months he joined the Nicaraguan revolutionary army, stole the plans of a government fort, was made a general, fought in the thick of every battle, attempted to dynamite a warship and was finally captured, sentenced to be shot the next morning and saved only by the entirely unexpected intervention of an American physician.

He was pardoned on the condition that he would leave Nicaragua at once. This he did, landing at New Orleans July 4, returning to Seattle, and eight months after theday he set sail for Nicaragua he was back attending neighborhood parties given by young folks of his own age, where euchre and five hundred furnished the maximum of excitement.

A revolutionary agent came to Seattle last November. Sands was a member of the university cadets and had been captain of his high school cadets. The revolutionist promised both excitement and wealth to Sands if he would go to Nicaragua and the boy went.

The day Sands landed in Nicaragua he visited a government fort under the pretence of being a tourist and took notes on the defences which led to the capture of the fort later by the revolutionists. He was made a captain, then a colonel, and finally a general.

He tried to dynamite the gunboat Venus by paddling out to her in a canoe as she lay off Bluefields Bluff. A flash of lightning disclosed him to the lookouts on the Venus, who opened fire with a machine gun. The canoe was riddled and sunk, but the boy swam ashore uninjured.

Seven months at the head of a regiment of an unprepossessing a band of adventurers as ever existed, durin gwhich time they did his bidding as they would have obeyed the orders of a grizzled veteran, means that Sands is something of a disciplinarian.

How he did it is explained by a few incidents told by himself.

"I had trouble maintaining my authority only once," he smiled. "It was with two young Spanish officers, who became insubordinate. I had them shot."

It was at Prinzapuca that Sands was captured, two days after his attempt to dynamite the Venus. They didn't get him until he and his seven men had put up a forty minute fight against 150 marines from two gunboats.

He was immediately brought before a drumhead court martial and sentenced to be shot as a spy and a dynamiter. Two of his men who survived the fight were shot the next day and Sands was brought out to see them pay the penalty. He was to die the next morning.

Dr. Clarence Burgheim, of Houston, Texas, was in Bluefields at the time and found Sands in prison. At the same time George Irias, the Nicaraguan chief of staff, was taken seriously ill while on a gunboat.

Sands' execution was postponed until Irias could see the boy shot himself. Dr. Burgheim was ordered to the Venus at once to treat the general. He refused flatly except on the condition that Sands be paroled at once. After two days of parleying, during which time Irias grew worse and no native surgeon could furnish relief, the captors gave in and Sands left the country on a fruit steamer.

### Easy to Take.

Josh—You say he expects to make barrels of money this season. What is he going to do?

Bosh—Take boarders at a dollar a dozen.

Josh—Preposterous! How could any one make money taking boarders at such price as that?

Bosh—Easily. He's the village photographer.—New York Telegraph.

### Echoes From Eden.

WE ENVY ADAM.
Whatever trouble Adam had,
No man could make him sore
By saying when he told a jest,
"I've heard that joke before."
—Success Magazine.

WE DON'T ENVY ADAM.
Whatever troubles Adam missed,
This must have made him sore—
When he and Mother Eve fell out
He couldn't slam the door.
—Birmingham (Ala.) Age-Herald.

YET, ON THE OTHER HAND,
Whatever troubles Adam bore,
He never had to grieve
Because a woman lived next door
Who coaxed the cook from Eve.
—Chicago Record-Herald.

AND CONTINUING.
Whatever troubles Adam had,
He was a lucky man.
He was not nightly told to dump
The icebox water pan.
—Detroit Free Press.

### At the Authors' Club.

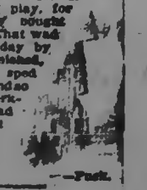
Right—Who is the round face, jovial looking fellow over there?

Penman—He writes the obituary notices for a local paper.

"Oh, I thought that cadaverous looking fellow over to the left was the obituary man."

"No; he's the one who writes the jokes!"—Yonkers Statesman.

### Vacation Triangle.



Oh, large and fat was Clerkson's waist
when Clerkson journeyed blithely
forth with fly book, line and
jointed rod to spend the summer
in the north! Alas! It
proved a costly play, for
Clerkson freely bought
and bought. That waist
it dwindled day by
day— It vanished,
dribbled, sped
away— Andso
poor Clerk-
son — sad
to sayt
Had
O
I

—Puck.

### Making a Vacancy.

"Perhaps," remarked the college oarsman who really wasn't fit to be on the crew—"perhaps I might improve if I should try a faster stroke."

"If you should get a lightning stroke," replied the disgusted trainer, "it certainly would improve the crew."
—Catholic Standard and Times.

### Still Life.

If pictures for your dining room
Appropriate you wish
You'll choose a water color scene
The right thing for a fish.

And yet if you should like a change
A very pleasant fall
For all the rest would be outdone,
They're always done in oil.
—Cleveland Leader.

## A MONSTROUS MUSHROOM

Mr. Charles Burgoyne this afternoon exhibited at the Examiner office a mushroom of prodigious size. It weighed 10¾ ounces, and measured 7½ x 6½ in. Mr. Burgoyne declines to reveal the place where he found his big mushroom, but he lives at 541 Water street, so that any one interested enough in edible fungi may follow his trail in the early mornings, and discover the site of his *mushroom mine*. It is a great temptation.

**Baby's Terrible Eczema**

**Hands Tied to Prevent Scratching**

**Five Doctors Failed to Relieve, but Zam-Buk Worked a Cure**

Mrs. Chas. Levere, of Prescott, North Channel, Ont., tells how Zam-Buk *cured her baby*. She says: "My baby's head and face was one complete mass of sores. The itching and irritation were fearful, and the little one's plight was so serious that at one time we *feared her ears* would be eaten off by the disease.

"We had to keep her hands tied for days to prevent her rubbing and scratching the sores. Doctor after doctor *treated her in vain*, until we had had five doctors. They all agreed it was a frightful case of eczema, but *none of them* did any permanent good.

"As a last resource we were advised to try Zam-Buk. The first box did so much good that we felt sure we were at last working in the right direction. We persevered with the treatment until we had used thirteen boxes, and at the end of that time I am glad to say Zam-Buk had effected a complete cure."

Mrs. Holmes, of 30 Guise Street, Hamilton, is quite as eloquent in her praise. She says: "Zam-Buk cured my boy of boils and eruptions when he was so bad that he had been unable to mix with other children. Zam-Buk is a wonderful preparation, and mothers throughout the land should always keep it handy."

For eczema, eruptions, rashes, tetter, itch, ringworm, and similar skin diseases, Zam-Buk is without equal. It also cures cuts, burns, scalds, piles, abscesses, chronic sores, blood poisoning, etc. All druggists and stores at 50 cents a box, or post free for price from Zam-Buk Co., Toronto. Refuse imitations.

# MERCHANTS AND PROPERTY OWNERS OBJECT TO PROPOSED PAVEMENT

## Regular Meeting of the City Council Held Last Evening ---Several By-laws Pass the Third Reading---Reports of Board of Works and Property Committee.

The regular monthly meeting of the City Council, and the first one since the holiday season, was held last evening, at which there were present, Mayor Morrow, Ald. Hicks, Duncan, Phelan, Buller, Bradburn, Gillespie, Batten, Graham and Metheral.

**Communications.**

A petition was read from the merchants along George street protesting against such expenditure as would be incurred by the proposed paving of its thoroughfare. The business men, the petition stated, viewed with serious apprehension the increasing tax rates as now levied, and while not desiring to decry the expenditure of a reasonable sum for needed municipal improvements, they are of the opinion that such a serious work should not be undertaken. The petitioners state that they are cognizant that rentals, taxes and business expense generally are advancing at a rate that is causing serious thought as to where it may end, and that if this venture was to go forward, relief would have to be sought. They urged that the proposed work be not undertaken.

Petitions of protest were also read from real property owners on Charlotte street, between George and Bethune streets, and owners on George street between Brock and Macdonnell streets. These were referred to the Board of Works.

**Statement of Roll.**

The statement of roll ending Aug. 31st, is as follows:

| | |
|---|---|
| To total amount on roll for year 1910 | $210,191.28 |
| By amt. deposited in June | $ 259.18 |
| By amt. deposited in June | 90903.92 |
| By amt. deposited in June | 64365.22 |
| | $155,269.14 $155,269.14 |
| Balance | $ 54,922.14 |
| Less disct. on st payment | 3,158.62 |
| | $ 51,763.52 |

First instalment, $154,722.66.

From the Deputy Minister of Lands and Forests, asking that the survey of the reservation along the west bank of the Otonabee river from Wolfe street to Hunter street, be confirmed if there is no further opposition to it.—Property committee.

From W. A. McEwen, asking the Council to consider the laying of a sewer pipe on Benson avenue, between Aberdeen and Manning avenues.—Board of Works.

From a number of residents of East City asking that a light be placed at the corner of Burnham and Maria streets.—Fire, Water and Light committee.

From G. K. Throop, applying for the position of caretaker for the new Public Library.—Property committee.

From R. R. Hall, on behalf of the Colonial Weaving Co., advising the Council that it had complied with all the terms of By-law 1334. All the necessary buildings have been erected and the machinery installed and in operation and the number of hands employed as called for by the by-law. Mr. Hall asked that a cheque for $3,500 be issued to the company.—Finance committee.

From Wm. Might, asking for the fire insurance on the new Isolation Hospital.

From Chas C. Warner, asking for doctor's expenses incurred as a result of an accident caused by boards projecting from sidewalk on Smith street.—Legal committee.

From a tenant in Fleming Place, complaining of the whistling of the Grand Trunk and asking that it be remedied.—Legal committee.

From Mrs. May Rees, applying for position of librarian of the new Public Library—Property committee.

**The Finance Committee.**

Council of the City of Peterborough.

Gentlemen,—Your Finance committee beg leave to report as follows:

1. In regard to the request of the Water Commissioners that debentures be issued for $20,000 to pay for extensions in the system during 1908 and 1909, your committee having been advised by the City Solicitor that the Council has only power to issue debentures for $10,000 for this purpose in an yone year, we recommend that a by-law be passed to provide for issuing debentures for $10,000.

2. We recommend that the assessors be requested and authorized to assess the Lundy Shovel and Tool Co. in the manner provided by the by-law regarding the assessment of the Peterboorugh Shovel and Tool Co.

3. We recommend that in cases where the City Solicitor, under the direction of the Council or a committee of the Council, draws agreements or other documents for the benefit of other persons they be required to pay for the work in accordance with a tariff to be prepared by the City Solicitor, such fees to be paid to the City Treasurer for the benefit of the city.

4. We recommend that the assessment of Park Lots 1, 2 and 3, lot 14, concession 12, for 1910, be reduced in accordance with an agreement made in 1906, when land was given for the extensions of George street through these lots, as follows: H. Rush, part of Park No. 1, to $1,000; W. Overend, part of Park Lot 2, $2200; and Henry Best, Park Lot No. 3, $3200; and that the arrears of taxes charged against Park lot 2 be written off.

5. We recommend that the matter of arrears of taxes on part of Park Lot 7 be left with the City Solicitor to take such action as he deems advisable.

6. We recommend that no action be taken in regard to the letter from S. E. Balls, respecting a successful suit of the city against him for taxes.

7. We recommend that the request of the Police Commissioners, asking that the by-laws be consolidated be referred to the City Solicitor and City Clerk to make recommendations in regard to the consolidation of the by laws.

8. We recommend that no action be taken in regard to letters asking the Council to petition the Legislature to permit municipalities to impose a lower rate on improvements than on land.

9. We recommend that a grant of $500 be made to the 57th Regiment Band on the usual terms, the grant to be paid to the Treasurer of the Band.

10. We recommend that the following accounts be paid:—

All of which is respectfully submitted.

W. H. BRADBURN,
Chairman.

The report, with the exception of clause one, which was referred back to the committee, was adopted.

**Board of Works.**

Council of the City of Peterborough.

Gentlemen,—Your Board of Works beg leave to report and recommend as follows:

1. That the offer of the Dickson Co. to give three lots on the north side of Dublin street and west of Waterford street, except the west 18 feet, for park purposes, on the condition that the city construct a septic tank at the corner of Dublin and Waterford streets, be accepted, provided the City Engineer reports that the cost of the tank will not exceed $1200, and that the City Engineer prepare plans for the tank and submit them to the Provincial Board of Health for approval.

2. That the chairman obtain for this Board an estimate in writing from the City Engineer and from Mr. Chipman of the cost of the proposed septic tank at the corner of Dublin and Waterford streets.

3. That a report received from the Street Commissioner regarding Mill street be sent to the City Trust Commissioners.

4. That a petition for a sewer as a local improvement on Bethune street from King street to Sherbrooke street be granted, as it is sufficiently signed.

5. That, provided 5 feet of land is conveyed to the city to widen Dale avenue and petitions properly signed are presented, sidewalks be constructed on Dale avenue and Engleburn avenue.

6. That a petition for a sidewalk as a local improvement on the north side of Hunter street from Rogers street to Concession street, be granted, as it is sufficiently signed.

7. That the Street Commissioner open Robinson street and ascertain the origin of the water on that street and have it remedied.

8. That the matter of oiling George street be left in the hands of the Street Commissioner with power to act.

9. That F. Bartlett be offered a cheque at the rate of $3 a day for his work on the sewer construction.

10. We received tenders for sewage and drainage work in the southwest part of the city, and recommend that the following tenders being the lowest, be accepted, provided Mr. Conroy and Messrs. Taylor and Hall give bonds with two sureties approved of by the Mayor and Chairman of this Board:

For laying sanitary sewer on Romaine street, George street and Aylmer street, including the force main, E. Conroy, at the following prices: Romaine street, Lock to George, $1.00 per foot; Romaine street, George to Aylmer street, $2.25 per foot; George street, pumping station to Westcott street, $2.25 per foot; George street, Romaine street to manhole, $2.25 per foot; George street, manhole to pumping station, $2.25 per foot; force main pumping station to George street, $1.25 per foot, and King Edward school $1.00 per foot. Manholes $30 each and junctions and markers 50 cents each.

For laying the storm drains, E. Conroy, at the following prices: Rink street, Lake street westerly, 45 cents per foot; Park street, Rink street to Townsend street, 40 cents per foot; Romaine street, Lock street to George street, 45 cents per foot; Romaine street, George street to Aylmer street, 45 cents per foot; Romaine street, Aylmer street to Park street, 45 cents per foot. Catch basin connections, 40 cents per foot. Manholes $14.00; and catch basins $14.00; and also $1.25 per cub. yard for filling where there is not enough filling taken from the excavation.

For sewage pumping station, E. Conroy, $4,915.

Tile Sewer Pipe, Ontario Sewer Pipe Co., at the following prices: 30 inch, $2.50 per foot; 20 inch, 70 1-2 cents per foot; 18 inch, 49 1-4 cents per foot; 15 inch, 38 1-4 cents per foot; 10 inch, 19 1-4 cents per foot; 12 inch, 25 4-5 cents per foot; 8 inch, 12 9-10 cents per foot. For junctions, 6 off 18, $2.05 each; 6 off 15, $1.62 each; 6 off 12, $1.10 each; 6 off 10, 93 cents each; and 6 off 8, 55 cents each, breakage in transit allowed.

For Reinforced Concrete Pipes, Taylor and Hall, at the following prices: 30 inch, $1.25; 22 inch, 90 cents; 20 inch, 75 cents; 18 inch, 60 cents; 12 inch glazed, 15 cents. Catch basin connections, 12 and 15 cents.

11. That Hunter street be sprinkled with oil from the bridge to Mark street.

12. That the balance of the appropriation for stone crushing, about $575, be equally divided between work on Water street, from Macdonnell street north and Bethune street, from Simcoe street to Brock street.

13. That the Peterborough Industrial Exhibition be given permission to string three steamers across the streets.

14. That a concrete crossing be constructed opposite No. 211 Barnardo avenue.

15. That the price for which the 5 1-2 ton horse road roller be sold to the village of Millbrook, be left with the chairman of this Board and the City Engineer.

16. That the matter of gravelling Reid street, between Charlotte and Simcoe streets, and Bethune street, between Simcoe and Hunter streets, be left with the City Engineer and Street Commissioner.

17. That a shed be built at the rear of the fire hall with a corrugated iron rof to protect the fire waggons, cart, etc., and that this be left with the chairman of this Board and the Fire, Water and Light committee.

18. That the Chairman and City Solicitor be authorized to purchase the block of land from N. T. Laplante for the Sewage Pumping Station, and to confer with the City Trust Commissioner as to the City Trust taking over the part that will not be used.

19. That the following petitions for sidewalks as local improvements be granted, as they are sufficiently signed.

South side of Smith street from Bethune street to Stewart street;

West side of Aylmer street, from Aberdeen avenue to the south side of lot No. 13, plan 133;

East side of Lock street, from Romaine street to the Grand Trunk railway.

All of which is respectfully submitted.

R. HICKS,
Chairman.

The report was adopted.

When City Solicitor Hall came into the meeting he gave Ald. Hicks an option in writing signed by Mr. N. T. LaPlante, in which the latter offered to accept $2100 for his property, required by the city for a pumping station.

Upon motion of Ald. Hicks and Metheral, it was accepted.

Ald. Duncan moved, seconded by Ald. Graham, that Architects Baker and Blackwell be paid $400 for services rendered.

A number of by-laws, including the ones authorizing the execution of the agreement between the city and the Canadian Machine Telephone Co.; the grant of $500 to the 57th band and the construction of sewers, were passed by the Council.

# SUCCESS OF MR. STRATTON'S STRING AT NATIONAL EXHIBITION, TORONTO

## Horses Will Be Exhibited at the Peterborough Central on Thursday and Friday, Sept. 15th and 16th

Hon. Mr. Stratton's horses seem to be repeating in the wider field of competition at the National Exhibition, Toronto, the successes they gained this season at the Cobourg Horse Show. In Toronto yesterday the horses captured the following awards:

Pair, 15.2 hands and under, first and second prize.
Pair 15.2 and over, first prize.
Tandem 15.2 and under, first prize.
Saddle horse, second prize.
Combination class, second prize.
Pair suitable for vehicle, first prize.

All his horses will be at the Peterborough Central Exhibition on the first two days, Thursday and Friday, Sept. 15th and 16th; but only for exhibition, and not for competition purposes. From Peterborough the horses will go to Ogdensburg State Exhibition.

# THE CAMERA CLUB EXHIBITION WILL OPEN ON THURSDAY

The Camera Club of Peterborough Exhibition begins in the Royal Studio Thursday and have had a choice of photos entered for the "Ex." Among those who have entered are:

R. S. Kauffmann.
W. H. Evans.
S. H. Gilbert.
Adam Kraft.
W. D. Bradburn, of the Wilkes-Barre Camera Club.
Wm. Thomson.
A. H. Stainton.
G. E. Todd.
W. Rou Lewis.
A. E. Hearn.
J. M. Iredale, of the Winnipeg Camera Club.
M. V. Watson.
D. Bruce Didpath.
A. S. Bowers, A. Van, of the Toronto Camera Club.

The photos sent are simply beauties. The date of exhibition has interfered materially with the number of prints sent, but for the first exhibition of the Camera Club it is a very creditable exhibit. The exhibition will be open from 7 to 10 p.m. only and a silver collection will be taken at the door to defray the necessary expenses. A very large number of prints were sent, but all will not be hung. The exact number will not be known till after next Tuesday evening, when the exhibition closes.

# Why Not Have Exclusive Costumes

## We Are Ready to Supply Them

**What a pleasure to possess a distinctive gown—to feel certain that you are not going to encounter a dozen women wearing the self same thing. A gown that is different from the ordinary run of gowns—not only different but better—more distinguished in style—more careful in workmanship finer in material—in other words, a gown MADE TO ORDER in OUR Garment Section.**

**You will find none of the sameness characteristic of ready made wear or the crudities of the ordinary dressmaker in the stylish creations which come from the hands of our expert modistes.**

**Each separate garment expresses some individual idea, expresses it in a distinctive way.**

**Cost more? Quite the contrary. You will frequently find our prices for select made to order garments less than if purchased in an ordinary way.**

**We are showing a range of delicate imported materials which are the height of textile loveliness. We will be pleased to have you look over them and will gladly give you an estimate of the cost of making.**

# REPAIRS MADE TO CITY SCHOOLS DURING VACATION

**All the Buildings Are Now in Good Shape as Result of Renovation and Alterations Made in the Holidays.**

## SOME OVER-CROWDING

During the vacation repairs and alterations had been made in the schools. At the Central the doors had been changed and now open outwards, while the classes have been re-arranged so that the smaller pupils are on the ground floor. The kindergarten room has been repaired.

The West Ward school has been thoroughly renovated and calsomined throughout, while the floors have been fixed. Agreat improvement has been made in the South Central by the placing of four windows in the cloak room, which was dungeon-like before.

Two new black-boards have been placed in the Queen Alexandra school which is now in perfect condition, with slate black-boards and modern furniture throughout.

The roof of the East City school has been repaired and the windows of the King Edward school have received attention.

THE CANADIAN LADY

For style, wear and comfort try "The Canadian Lady" Boot at $3.00, $3.50 and $4.00

T. O. Elliott, 392 George Street.

TIRED, ACHING FEET

How annoying to have the feet tired and aching, sore and chafed about the time you want to take a good long walk. You can get a world of comfort by using Dr. Chase's Ointment when the feet give you trouble. It heals and soothes the skin, makes it cool and natural and prevents corns and bunions.

# THE EVENING CHIT-CHAT

By Ruth Cameron

I was reading in a new thought book the other day of the importance of going to sleep in a good frame of mind because the thoughts that dominate the mind at the time of falling asleep, the physiologists declare, dominate it most of the night.

I am not consciously a new thoughtist.

Although I realize of course that there is a great deal that is interesting and helpful in this rejuvenation of the doctrine of the supreme power of mind over matter, I don't think it is the whole of the Truth.

I recognize it as one of the facets of the diamond but not by any means the diamond.

Just as I believe that osteopathy and Fletcherism and sleeping out-of-doors, and all the other health ideas that have come to us lately, are each valuable but no one alone all-sufficient.

But new thoughtist or not, I am deeply impressed with this idea of going to sleep in the right frame of mind.

If you were to think of some worry or difficulty steadily all the morning or afternoon it would undoubtedly affect your physical state to a certain extent. Even the most conservative and old school doctors admit that.

Now if by going to sleep in any mood one continues it half the night, as the physiologists assert, it certainly behooves us to take mighty good care in what mood we go to sleep.

*It is more important to prepare the mind for sleep* than the body. The mental bath is even more necessary than the physical one. "Saturate your mind with pleasant memories and with dreams of great expectations. Just imagine yourself the man or woman you long to become, filled with happiness, prosperity and power," says Orison Swett Marden in the new thought book to which I referred.

And again—"The devotional attitude on retiring to sleep is of very great value, inasmuch as it tends to soothe, calm and reassure the mind, to destroy all fear, worry and anxious thoughts and to put one in tune with higher, nobler thoughts."

And to these excellent suggestions I make bold to add another little one.

Why not just as you feel yourself sliping off, say some fragment of beautiful and noble poetry that you especially admire, or some bit that has the peace thought — to borrow the language of the "new thoughtists" — very strong within it.

As for example—

"Sleep sweet within this quiet room
My guest who e'er thou art,
And let no mournful yesterdays
Disturb thy peaceful heart.
Nor let to-morrow fright thy breast
With dreams of coming ill.
Thy Maker is thy changeless friend,
His love surrounds thee still."

Now please don't just say, "That sounds fairly reasonable," but go the one step further thta makes all the difference in the world.

Add will to thought.

In other words—try it to-night.

Ruth Cameron

# REGULAR MEETING OF THE BOARD OF EDUCATION

**Considerable Business Was Transacted at Last Night's Session of the Board—Reports Were Received.**

## A BUSY MEETING

A considerable amount of business was transacted in a short time at the regular meeting of the Board of Education last night, the first since the July session. A number of reports were received and other business disposed of.

There were present L. M. Hayes, chairman; D. W. Dumble, B. F. Ackerman, Col. J. W. Miller, John Crane, Dr. Morrison, W. H. Hill, Dr. Burnham.

The minutes of the last meeting were read and confirmed.

**Communications.**

From A. N. Scarrow, tendering his resignation from the position of Manual Training teacher of the Public School staff.

From J. W. Firth, Toronto, accepting the position as assistant Science Master at the Collegiate Institute.

From Mr. Cole Barrett, caretaker, West Ward school, asking for $3.00 for extra cleaning work at school.

From Boiler Inspection and Insurance Company of Canada, through their assistant engineer, giving report on inspection of boiler in Central School, which was in a satisfactory condition.

**Monies Received.**

The statement of monies received was read as follows:

| | |
|---|---|
| H. R. H. Kenner, bal. fees | $ 2.00 |
| G. S. Kingdon, for frame building, Alexandra school | 30.00 |
| Government grant | 620.00 |
| Rent, Cedar St. house (two months) | 10.00 |
| City Treasurer, Municipal grant | 1,200.00 |
| Government grant, P. S. | 1,177.00 |
| Total | $3,039.00 |

**Accounts Presented.**

| | |
|---|---|
| White Bros. | .25 |
| Kingan Hardware Co. | 12.52 |
| Trebilcock Bros. | .30 |
| West End Greenhouse | 15.00 |
| Bee Hive | 4.07 |
| Bell Telephone Co. | 2.00 |
| Peterborough Water Com'rs | 58.12 |
| Peterborough L. and P. Co. | 1.19 |
| B. C. Yelland | 1.00 |
| Fanning's Steam Laundry | 5.11 |
| Coleman Bros. | 1.56 |
| Best Stove Co. | 1.25 |
| G. N. W. Tel. Co. | .74 |
| W. J. Henry | 3.60 |
| Estate, A. McDonald | 7.50 |
| Trebilcock Bros. | 5.86 |
| R. J. Soden | 9.45 |
| Bell Telephone Co. | 10.00 |
| A. Blade | 5.00 |
| Estate A. McDonald | 2.90 |
| White Bros. | .35 |
| R. Hicks & Co. | 372.07 |
| R. Hicks & Co. | 758.27 |
| Bell Telephone Co. | .90 |
| Dennistoun, Peck & Kerr | 50.00 |
| R. Hicks & Co. | 4.08 |
| Peterborough Hardware Co. | .63 |
| A. McDonald Estate | 3.87 |
| A. McDonald Estate | 6.22 |
| G. M. Hendry Co. | 46.17 |
| R. J. Soden | .60 |
| Peterborough Hardware Co. | 12.94 |
| George H. Duncan | 65.76 |

The accounts were referred to the Finance Committee.

**Report of Committee on Appointments.**

Gentlemen,—Your committee on Appointments beg leave to report and recommend as follows:

That Miss Florence Walker be appointed on the Public School staff, to fill the vacancy caused by the resignation of Miss Sutton, at the minimum salary of $450.00, with increase according to schedule, and duties to start September 6th, 1910.

That Mr. J. W. Firth of Goderich, be appointed assistant science master at the Collegiate Institute to fill the vacancy caused by the resignation of Mr. Arnott M. Patterson, at the minimum salary of $1,,400.00, increasing according to schedule, and duties to star September 6th, 1910.

Respectfully submitted.

W. H. HILL, Chairman.

The report was adopted.

**Finance Committee.**

Gentlemen,—Your Finance Committee beg leave to report and recommend the payment of the following accounts:

| | |
|---|---|
| G. N. W. Telegraph Co. | $ 1.52 |
| Globe Printing Company | 10.20 |
| Alex. Gibson | 1.50 |
| D. Belleghem | 6.75 |
| R. J. Wolstenholm | 6.00 |
| Peterborough Hardware Co. | 13.50 |
| Times Printing Co. | 23.00 |
| Peterborough Examiner | 5.00 |
| Peterborough Review | 2.70 |
| F. C. Cubitt | 11.70 |
| C. B. Routley | 2.30 |
| Peterborough Fuel and Cartage Company | .50 |

When certified to—

| | |
|---|---|
| W. Madill | 3.95 |
| Peterborough Hardware Co. | .40 |
| Kingan Hardware Co. | 2.00 |

W. DUMBLE, Chairman.

In connection with Mr. Scarrow's resignation Mr. Hill moved, seconded by Mr. Crane, that his resignation be accepted to take place on Oct. 31st, according to the regulation of the Board and if a successor be secured prior to that time that he be allowed to go.—Carried.

On motion of Mr. Hill and Dr. Burnham, the matter of securing a successor to Mr. Scarrow, was referred to the Committee on Appointments.

No action was taken on the request of Cole Barrett, janitor of the West Ward school for $3.00 for extra work in cleaning the school during the vacation.

# Big List Of Entries For Camera Club Exhibition

**Many Beautiful Photographs Are Entered, Including Pictures From the Wilkes-barre and Wyoming Valley Clubs, and From Winnipeg and Toronto.**

Following is a list of those photos which are now hang in the Exhibition of Amateur Work, at the Royal Studio, under the auspices of the Camera Club of Peterborough:

## NEW BARBER SHOP

**Two Shops on Simcoe Street at Which the Highest Class Barbering is Done**

Finding that his barber shop on Simcoe street, on the East side of George street, was not sufficient to accommodate his customers, Mr. A. Haskill, the well-known proprietor, has enlarged his business sphere, now having in his possession, when business was started yesterday, his old stand, recently occupied by Jos. Kelly, three doors off George St., on Simcoe street, west. Mr. Haskill occupied his new premises for fifteen years, previous to going to his recent store, eight years ago, during which time his reputation for barbering was proven and still remains unshaken. He intends carrying on business in both shops, which will have the best equipments, and barbers to attend to the wants of the public. Mr. Frank Hughes will manage the east store, while Mr. Haskill will oversee the new one.

## HERE'S CERTAINTY

**We Will Cure You of Kidney Disease or Furnish Your Medicine Free.**

We know we can furnish medicine that will almost always effect easy and positive relief for kidney ailments. We are so certain of this that we sell every bottle with our printed guarantee that the medicine shall cost the purchaser nothing should it fail to do as we claim.

We have been recommending and selling this medicine to a considerable extent, and are receiving the best kind of evidence that it is doing exactly as we said it would. That's why we can safely and truthfully ask all our neighbours to try it at our risk.

Our treatment consists of Rexall Kidney Remedy, which is one of the finest pharmaceutical preparations we know of for overcoming kidney, bladder and urinary derangements, and associate ailments.

We want everyone who suffers from any kidney or urinary disease to come to our store and get a bottle of Rexall Kidney Remedy. They can try as many as three large bottles with the distinct understanding that we will return every penny paid us for the medicine at the mere hint of dissatisfaction. Certainly we know of no stronger reason as to why you should at least give Rexall Kidney Remedy a trial. We would not dare make this offer were we not positive that the result will be as we proclaim. Rexall Kidney Remedy comes in two sizes, 50c. and $1.00 per bottle. Sold only at our store.—The Rexall Store, McDermid and Jury, corner George and Charlotte streets.

## From Peterborough To Lindsay By Water, And In Poetry

The following poetic description of a trip to Lindsay and return, on the Trent Waterway, is from the pen of Mr. John Bell:

A trip on the Otonabee,
On a fine August day,
From Peterborough to Lindsay,
Is worthy of my lay.
And the Peterborough Lift Lock,
So wonderful to all,
Graceful, towering to the sky,
On Trent Valley Canal.
We then pass through five other locks
Before we reach Lakefield,
Which was the home of Mrs. Traill,
And pen, which she did wield.
We sailed along up to Young's Point -
All happy as a lord -
Which I could see upon each face
Of all that was on board.
You all have heard of Stony Lake,
What nature has done there,
Where nice cottages are planted
On islands everywhere.
And as for the lovely scenery,
There's nothing could compare;
It is beyond all description,
By pen I do declare.
The next place we had to lock through
Was there at Burleigh Falls.
It was an interesting sight,
Of locks and stony walls.
Step by step the steamboat went up,
Until she reached the height;
Excursioners on board the boat
Seemed to enjoy the sight.
And when we came to Lovesick Lock
There was a sight to see,
Two lovers sat upon the bank,
Under a shady tree.
The coincident was so grand -
And seemed to me a joke
As Jack and Jill sat on the hill,
While we passed through the lock.
Buckhorn Lake and Pigeon Lake,
And fields and forests green,
Gannon's Narrows and floating bridge,
Were pleasant to be seen.
And when we reach Bobcaygeon,
And landed at the docks,
We had to stay forty minutes,
To view the town and rocks
Where the yachts and skiffs were plenty,
Some tied up on the shore;
And ladies plying the rowboats,
Were experts with the oar.
On Sturgeon lake the Yankee flag,
Was plentiful in view,
On cottages and pleasure boats
Along the water blue.
Our Yankee friends are welcome here,
In decency just so,
But to over-display their flag
Is out of place I know.
And when we came past Sturgeon Point
The sun was in the west,
The Scugog River and lighthouses
Were seemingly at rest.
The river side was full of stumps,
And flats for fish to breed;
The spawn is safe from larger fish
Among the rush and weed.
And when we got to Lindsay dock
Darkness was drawing near,
And the walk to the railway cars
Did tire me severe!
But when we got into the cars
I found a place of rest
All the way to Peterborough—
The place I love the best.

Passengers for Peterborough should board the train at North Toronto; another train will leave Toronto Union at 10.30 p.m., arrive at Peterborough at 1.01 a.m. Going west, new train leaves Peterborough at 5.51 a.m., arrives at North Toronto 7.50 a.m., W. Toronto 8.05 a.m. Does not call at Union Depot. Above trains both carry Ottawa and Montreal sleepers. Other trains unchanged. See advt. in this paper.

## PERSONAL AND SOCIAL

Miss Clara Storey is visiting friends in Toronto.

Dr. Anys and wife left this morning for Toronto.

Mr. Arthur Lisle spent yesterday at the Toronto Exhibition.

Miss Noble, Elliott's head milliner, is staying at the Oriental.

Mr. Harry Pope, of Lachine, is visiting friends in the city and vicinity.

Mrs. E. H. Bartlett and daughter Alda, are visiting friends in Brampton.

Mr. Gerald McFadden returned home to-day from a business trip to Toronto.

Mrs. T. Campbell of Lindsay, spent Sunday with Miss Hazel Walsh of Conger street.

Mr. Harold Morrow left on Saturday for Berlin, where he will attend St. Jerome's College.

Miss Aggie Truesdale has returned home to Port Hope, after visiting friends in the city.

Mr. John Hanrahan returned home to-day after spending his vacation in Toronto with friends.

## Pictures and Tea at Toronto Fair

When you visit the wonderful loan collection of pictures at the Exhibiton you want to feel your very best and have your mind active to grasp the meaning and appreciate the art of the great works there on view. Just before going call at the RED ROSE TEA booth and sit a few minutes to enjoy a truly delicious cup of tea. You will want another cup when you leave the gallery and you will be welcome. Red Rose Tea, properly made, is refreshing, stimulating, healthful.

# RED ROSE TEA

"Is good tea"

Misses Clara and Ethel Pethick have returned home after a pleasant holiday in Port Hope.

Mr. Gordon Hewson has returned to Ottawa after spending a few days with his parents, 229 Wolfe St.

Mr. J. D. Craig returned to the city last night from Stony Lake, where she has spent the past two months.

Mr. J. M. Brooks and family have returned to the city after spending the summer at Chemong aPrk.

Mrs. W. A. Sanderson and family returned from Stony Lake to-day, after spending the summer at their cottage.

Mr. George Noyes, son of Mr. John Noyes, East City, returned to Kirkfield to-day after paying his parents a visit.

Mr. and Mrs. J. C. Anderson and children have returned after spending apleasant week with friends in Toronto.

Alderman Batten, accompanied by his grandson, Master Joe, have returned from visiting the Toronto Exhibition.

Mr. W. C. Ferguson and family returned yesterday from Stony Lake after spending the season at "Syndicate Island."

Miss Lela and Mr. Roy Smith returned this morning after a two weeks' visit with the former's parents, at Brantford.

Mr. and Mrs. J. C. Anderson and children have returned home after spending a very pleasant week with friends in Toronto.

Misses Lenore and Gertrude Kylie, Miss M. Christie and Miss E. Allen, of East City, spent yesterday at the Toronto Exhibition.

Mr. and Mrs. J. C. Anderson and children have returned home after spending a very pleasant visit with friends in Toronto.

Rev. Kenneth W. Barton, B.A., of Toronto, arrived this morning, and is the guest of Mr. and Mrs. Andrew M'Clure, Homewood avenue.

Miss Hazel Dean will be at the Conservatory to-morrow (Thursday) afternoon, at 4 o'clock, to make preparations for her Kindergarten classes.

Mr. A. B. Mitchell, of Toronto, has closed his cottage "Sunnyside" at Stony Lake, for the season and with his family, was in the city yesterday on his way home.

### Train and Track.

A trackless trolley has been proposed for use on the streets of Leeds, England.

The Pennsylvania railroad, which maintains a private fire department in each large city it enters, has equipped a number of locomotives with pumps and hose to fight fires with water from their tanks.

Costa Rica has a railroad that now runs through direct from Port Limon, on the Atlantic, to Punta Arenas, on the Pacific, passing through Cartago, San Jose, Orotino, Esparta and other important cities.

### Music Maxims.

It is the tone that makes the music. —Alexander Pope.

Where there is music there can be no harm.—Cervantes.

Music is but wild sounds civilized into time and tune.—Fuller.

Music is the most comprehensive of all the arts. It can express everything. —George Henry Hart.

Music is the only universal language. All nations understand the music of any nation.—Laurence Enderby.

### The Cookbook.

Gingerbread is improved by adding to it, when mixing, a cupful of chopped prunes. Use the juice of the prunes instead of water and mix the dough a little stiffer.

Eggs with cream sauce are nice as a change for breakfast. Boil the eggs hard, remove their shells and slice them. Place them on waferlike slices of moist toast. Pour a cream sauce over them that has been sprinkled with chives. Garnish with a few sprays of parsley and serve.

**Whales in Deep Water.**

It is estimated that a whale when he plunges, as he often does, 4,800 feet down into the sea has to support a pressure of over 200,000 tons, or 127 tons to the square foot.

## DAMES AND DAUGHTERS.

The biggest "captain of industry" in Chicago is a woman, Mrs. Aileen Christopher, who does the brick business of the city.

Mrs. Anita Comfort-Brooks, president of the Gotham club, who initiated the beef boycott in New York, calls her husband, A. Arthur Alfred Brooks, in public by the diminutive Brooksie.

Mrs. Maria W. Coronel de Dominguez is said to be the only railroad promoter of her sex in Mexico. She recently perfected all arrangements for the construction of a railroad from Oaxaca to the port of Salina Cruz, on the isthmus of Tehuantepec, with a branch line to Puerto Angel, on the Pacific coast.

Lady Sarah Wilson, who has visited within the past few years in this country, was in South Africa during the Boer war, on her way to join her husband when she was taken prisoner. She was afterward exchanged for a horse thief. The orders of the Red Cross and St. John of Jerusalem have been conferred upon her.

The Rev. Anna B. Shaw is a graduate of Albion college, Michigan, and later worked her way through the theological department of Boston university by preaching Sundays. On account of her sex the Methodist Episcopal church refused to ordain her, but she was finally given the right to officiate by the Protestant Methodist church.

### Horse Don'ts.

Don't ask mo to "back" with blinds on; I'm afraid to.

Don't let some blockhead drive me that has less sense than I have.

Don't run me down a steep hill, for if anything should give way I might break your neck.

Don't whip me when I get frightened or I will expect it next time and may make you trouble.

Don't trot me up hill, for I have you, the buggy and myself to carry. Try running uphill with a load yourself.

Don't drive me with an "overcheck" on. The sun hurts my eyes, and I can't see where to step. It's inhuman and cruel.

### Tales of Cities.

Caracas, Venezuela, has a population of 80,000, but it is said that there is not a store in the city where a man can buy a suit of ready made clothes.

With a permanent population of 50,000, an immense summer population and some of the largest hotels in the country, Atlantic City, N. J., is so near the ocean that it never had a cellar until an inventive genius recently built one of concrete.

The city council of Madrid has begun work upon the new boulevard, to be called the Gran Via, which has been in project for about twenty-five years. A syndicate composed of French and English capitalists secured the contract for its construction.

### Fly Catches.

For working on the rubber just five minutes for the St. Louis National's Pitcher Rube Geyer, suspended, drew $1,050.

Chick Brandon, turned back to Kansas City by the Pittsburg Pirates, is pitching shutout ball in the American association. 'Twas ever so.

Chief Bender of the Philadelphia Americans gets better all the time. His pitching this season has been the best in his career, and he seems set to go on indefinitely.

Ferguson, old time pitcher, umpiring in the American association, was a hard man for the umpires when he was in the game. Now he is very strict on the players.

**Dynamite.**

Dynamite becomes more dangerous to handle in cold weather, because its nitroglycerin content freezes at from 42 to 46 F.

**The Man in the Moon.**

An old folklore legend confidently asserts that the man in the moon is no other than that ancient Hebrew whom the Jews stoned to death for gathering sticks on the Sabbath day, as recorded in Numbers xv, 32-36.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Buildings, Waterloo, Ont.," will be received at this office until 4.00 p.m. on Wednesday, September 14, 1910, for the work mentioned.

Plans, specifications and forms of contract can be seen and forms of tender obtained on application at the office of Mr. Thomas A. Hastings, Clerk of Works, Postal Station F, Yonge Street, Toronto, at the Post Office, Waterloo, Ont., and at this Department.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary.

### SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS.

ANY PERSON who is the sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts, a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

W. W. CORY,
Deputy of the Minister of the Interior.

# CRIPPEN SHOWS SIGNS OF ANXIETY AS HE LISTENS TO THE EVIDENCE

**Investigation is Continued to-day—Druggist Swears That the Doctor Purchased Deadly Poison From Him—Inspector Dew on Stand.**

**THE GIRL AS A WITNESS**

Special Wire to the Examiner.

LONDON, ENG., SEPT. 8.—As witness after witness told his or her story at the Crippen investigation to-day, the Doctor prisoner's nervousness increased. He twitched visibly when Harold Kirby, a chemist's clerk, told of his sale to Crippen of deadly poison on January 29th. On cross examination by Crippen's counsel, however, Kirby admitted that Crippen frequently purchased the drug, alleging he wanted it as a sedative.

It has been understood that Crippen had hoped to make his defence that his wife died after an unsuccessful operation. During the evidence to-day the Doctor and his fellow defendant and Miss Leneve were overheard more than once discussing the testimony as presented.

The court room was crowded, as usual, among the spectators being titled people and many fashionably dressed women. Two neighbours testified to having seen Miss Leneve wearing clothes and jewels formerly worn by Mrs. Crippen.

Inspector Dew then took the stand and told how Miss Leneve told him when he visited the residence in June that she was Crippen's housekeeper. There is no truth in the story that she has confessed anything, but the authorities will try to use her as a witness.

LONDON, SEPT. 8.—Inspector Dew said that Crippen told him that his wife had an ungovernable temper, and about June left him after a violent quarrel, saying she would not return. He said he told the neighbours his wife was dead, so as to prevent scandal. Regarding Miss Leneve, Inspector Dew said she simply told him that Crippen informed her his wife was dead.

## TWO HUNDRED AND FIFTY DOLLARS STOLEN FROM TRUNK IN LOCAL HOTEL

**The Thief is Alleged to be a Man Who Registered at the King George the Night Previous to the Day on Which the Sum of Money Was Missed.**

**POLICE INVESTIGATED**

Some time yesterday a sum of two hundred and fifty dollars was stolen from the trunk of Mr. Eugene Hurtubise, which was in his room at the King George hotel. Yesterday afternoon Mr. Hurtubise opened his trunk to obtain a padlock and on doing so he discovered that the above-mentioned sum was taken. The police were promptly notified concerning the robbery and a hasty investigation followed, but bore little fruit, as the supposed thief had made good his escape. It was thought that a man who registered there the night before was the one who found and extracted the money from the trunk between twelve and one o'clock when everyone was at dinner. Whoever it was that did the stealing was well up in experience as he used keys in order to open the trunk, and selected an hour when nobody would be in that section of the house. Mr. Hurtubise shut his trunk the night before, and when he went to it yesterday it was locked, but the money was gone.

Nothing will be left undone by the law, and in the course of a short time the culprit may be brought to answer for his actions.

## PRIZE BABY NEARLY LOST LIFE IN A BARREL OF WATER

Special to The Examiner:

ISLAY, SEPT. 5. — What almost proved a sad fatality occurred at the home of Mr. Alex. McFadyen on Monday morning. Their little boy, Master Clifford, who was the winner of the county prize for the finest baby in Lindsay, 1909, fell into a barrel nearly full of water. The probability is that the little fellow had been playing with some sticks in the barrel, and dropped them in, and in his efforts to reach them he tumbled into the water. Just how long he remained in this position is not exactly known, but it was only a short time since he was missing when he was found by his mother, and life seemed to have almost fled. Dr. Ray, of Cambray, was immediately telephoned for, but unfortunately he was absent and Dr. Galloway, of Woodville, was summoned. In the meantime some of the neighbours had gathered and every effort was made to sustain life which seemed at times almost extinct. Dr. Galloway arrived on the scene in a very short time, considering the distance to be covered, and through his skilled efforts the little fellow was after a short time restored to consciousness and finally to his usual health. The escape was a very narrow one, however, as the boy would have been past restoration had he remained in the water only a few seconds longer. The many friends of Mr. and Mrs. McFadyen are glad to know that their baby was rescued from a sad death.

## 65th REGIMENT TO TURN OUT REGARDLESS OF ORDER

Special Wire to The Examiner.

MONTREAL, SEPT. 8.—"My regiment shall take part in the Eucharistic procession Sunday and guard the host on the way to the Cathedral." This was the rather sensational statement of Col. Labelle, commanding the 65th Regiment, mostly French-Canadians. Col. Labelle says he will ask the regiment to volunteer parade, notwithstanding the order of the Militia Department that there shall be no military demonstration.

The committee in charge of the great civic reception to Cardinal Vannutelli to-night have decreed that nobody will be admitted unless in evening dress. It was at first ordered that ladies would be expected in decollete dress, but this has been modified and high necked dresses may be worn. Judging from the tremendous rush for invitations the event bids fair to break the records for any reception ever held here.

His Eminence has fully recovered from the fainting spell of last night's crush.

## OILING CEORGE ST. TO-DAY THAT EXPLAINS ODOUR

"Whew, what's the matter with the sewer?"

"There must be a leak in the gas mains, somewhere."

"Drat those automobiles".

"Is there a skunk in the city?"

"Why don't the Medical Health Officer see that the lanes are cleaned out"?

These were some of the remarks that floated around Peterborough's business section this morning, as business men and their employees made their way to work. A sniff and a look of disgust accompanied every statement as there was something more than remarks floating around on the morning breeze.

The trouble was that some one had struck oil on George street; in other words the work of oiling the chief business thoroughfare was commenced early to-day. So far the chief result has been an odour that would defy a combination of a leaking gas main and a glue factory to equal.

What ever may be the effect upon the street the City Council has certainly gotten itself into bad odour with the public.

## AT A STANDSTILL

MADRID, SPAIN, SEPT. 8.—The refusal of the Premier to withdraw the famous Padlock Bill again brings negotiations between the Spanish Government and the Vatican to a standstill. He stated that the Pope will not attempt to reopen negotiations again, which means that the rupture is extremely serious.

## IS NOT SO GOOD

**Hague Decision Will Hinder Newfoundland in Economic War.**

Special Wire to The Examiner.

LONDON, ENG., SEPT. 8.—To-day's afternoon papers are not quite so enthusiastic about the Hague decision. After calm consideration they agree that while it is a diplomatic victory for Britain and settles a long-standing dispute, it really disarms Newfoundland in an economic campaign against the United States.

## SPECIAL MEETINGS AT SALVATION ARMY HALL

Brigadier Taylor, principal of the Salvation Army Training College, at Toronto, will deliver a lecture at the Salvation Army Barracks to-night upon the subject, "The School of the Prophets."

On Saturday Brigadier Bond, editor of the War Cry, will visit Peterborough, accompanied by Capt. Gadd, the well known musician and Mr. Gray, the artist of the War Cry. On Saturday night Brigadier Bond will give a lecture on "The Natives of Zululand," illustrated by lightning sketches by Artist Gray.

On Sunday afternoon Brigadier Bond will speak on "Illustrated Stories" and in the evening on "Discovered Crime and Criminals." Capt. Gadd will give musical selections at all three services, which promise to be of special interest.

**TEACHER'S NERVES**

Teachers often have the reputation of being cross when the trouble is with the nerves rather than with the disposition. Mr. A. Sutherland, Principal South Bar School, Sydney, N. S., writes: "I was nervous and worried, had indigestion and headache. Doctors failed me. You can depend on me to recommend Dr. A. W. Chase's Nerve Food for I believe it has entirely cured me." Tired brains and feeble nerves are soon restored by this celebrated food cure."

***The Cause***

*of Eye Troubles is usually not disease, but defect in the structure or muscles of the Eye.*

Consider the incessant work of the Eye, the instantaneous and exact adjustment demanded that sight may be always equal, single and ready to every change in position, distance and light. The nerves compel and control the mechanism in these instant adjustments. The mechanism may be defective, that is—

*There may be defects in the structure, or focus of one or both Eyes;*

*The Muscles may be imperfectly balanced, so that both Eyes do not work in harmony;*

*There may be inability to focus for close work;*

*There may be strain through overwork, abuse, poor lights, bright reflections, etc.*

*An examination will tell you just what condition your Eyes are in.*

## GOOD AND EVIL.

The poison found in the body of the wife of "Dr." Crippen, who is charged with being her murderer, was hyoscin, the active principle of a frequently found Canadian plant, popularly known as "henbane." Nearly everybody has seen, if he has not noticed, this plant. It prefers low-lying, damp ground, and can be seen in abundance upon the flats between the water and the banks of the Indian River, near the bridge at Keene, and in other similarly situated places. The plant grows about three feet in height, with pale green stem and with pointed leaves; late in summer it bears an elegant straw-coloured flower, pencilled with purple veins. The whole herbage of the plant is downy, glandular and clammy and exhales a strong fœtid and oppressive smell, almost as bad as the oil on our streets. The plant, whose botanical name is Hyoscyamus Niger, is of the solanneeae, and the Nightshade order, which embraces Atropa Belladonna, (deadly nightshade) and Datura Stramonium, (thorn apple). All these belong to the solanum family, to which also belong the potato and tomato. Thus in the same family, plants can be grown side by side, in the same soil, under the same atmospheric and other conditions, and one becomes a benign, wholesome, and life-sustaining food, while the other becomes a deadly life-destroying poison. The mysterious workings of the alchemy of nature, with such opposed results, have their counterpart in human life. Of members of the same family, reared and trained under the same moral conditions, in the same atmosphere, one becomes a blessing in the world and another may become a blight and a curse. Dr. Crippen, if he is guilty of what is charged, is a type of how natural gifts and talents, neglected, perverted and misused, may be made the deadliest moral bane—gifts and talents, which in his case, properly used and directed, would have made him a respected and useful member of society, a beneficent moral force. Shakspere tells us that "the fault is in ourselves, not in our stars, that we are underlings." In this way we are superior to the plants that perish; in them the chemistry of nature works unchangingly and superior to human control. Our lives are what we will to make them—good or bad, accordingly as we use or misuse, improve or debase, our natural gifts and talents. There is nothing intrinsically bad in the world. The heribane or the nightshade properly used can be employed to alleviate human ills. Our natural propensities and passions, being perverted and misdirected, are capable of infinite evil; properly directed, they can be made meet the divine intention and become a benefit to the race.

PILES Dr. Chase's Ointment is a certain and prompt relief and permanent cure for Itching, Blind, Bleeding and Protruding Piles. You get relief at once. It acts as a poultice, gives instant relief. 60c. a box, at all dealers or Edmanson, Bates & Co., Toronto. Dr. CHASE'S OINTMENT.

# Old Halifax Getting Ready For A Period Of Expansion

HALIFAX, SEPT. 5.—(Special.)—The progress of the times is reaching out to Halifax. The easy-going, pleasure-loving, substantial old Halifax, is tiring of dreaming dreams, is shaking itself and the waking portends possibilities. The awakening is not spontaneous. It is not forced. Halifax never did jump at things hastily. It never will. That is the secret of its solidity.

Fortunes are not made quickly in this city by the sea. But they are made all the same. We are told that our business men do not hustle to their offices in the morning and while this is true we may retort and say they do not hustle to the official assignee. The commercial traveller frets and fumes sometimes at the apparent slowness of his customers, but he generally leaves town with a smile and a good fat order and he is conscious of the fact that the order is worth one hundred cents to the dollar. So he comes again.

But the awakening of Halifax is at hand. Her people are feeling the spirit of discontent. They are discontented at the progress the city is making. The air of the West sometimes blows over Halifax in its progress to the sea and that air is laden with germs—the germs of expansion, of progress, of enterprise. And Halifax is catching the fever, slowly, calmly, but surely.

Halifax is beginning to realize its vast possibilities. She is beginning to look over her assets with a view to realizing. She is arraying them in the limelight and the value of the collection is making her sit up and think.

They look good to her, really good, and she is inclined to call in the neighbours to feast their eyes on the display. Like the enterprising merchant, she says it is no trouble to show the goods, but at the same time would have no objections to conducting a live transaction.

Haligonians are accused of being non-enterprising. That is a slander. Haligonians have always been enterprising. They are enterprising to-day But they are not reckless speculators. They will send their dollars to the other end of the earth providing they feel sure the money will come back again with a goodly turnover. They are doing all that to-day. For the size of the place, for the amount of its wealth, Halifax leads all Canada in this respect.

Halifax bankers were the first to invade the West Indies. Halifax capital cut a big swath in Mexican industries, in British Guiana, Trinidad, Jamaica, Cuba and Portio Rico tramway and electric light enterprises. It is stated that nearly a million of good Halifax gold is going into the Mexican Northern enterprise. Halifax capital is fitting out and sending vessels into the Pacific and Indian Oceans after seals. Indeed, Halifax capital has and is chasing the seal up to almost as near the South Pole as the intrepid explorer has reached.

Perhaps the near by pastures look sterile when compared with the verdure of the distant hills. Be that as it may, the truth is that Halifax is now sizing up the home field and in doing so is being amazed at what has been shipped.

Of course there is a reason for all this. The great development of the West is perhaps the main cause. That steamboats need harbours. The railways mean steamboats, and railways need deep water terminuses and steamboats ned harbours. The railroads must come to Halifax and the steamboats must come to Halifax. In fact they are coming, but Halifax is getting ready to hold out the glad hand and something else. We stand upon our right when we say tha Halifax is the finest harbour in North America. We are within the limit when we declare it to be open all the year round, easy of approach by night or by day, in calm or in storm, and that the combined fleet of Britain can find safe anchorage within its arms That we realize. That we believe all the world knows—or should know And we realize something else. We realize that steamers will not come to the finest harbours in the world if they cannot find the necessary transportation for their passengers and cargoes to the great centres of population. They will not come to us unless we have the proper facilities for handling their cargoes.

Therefore we are making love to the railways. Twenty years or so ago it was announced that the C.P.R. wanted to acquire the I.C.R. We held up our hands in holy horror at the thought, the very thought. To-day, so far as Halifax is concerned, the C.P.R. can have the I.C.R. and welcome. When the C.P.R acquired the D.A.R. a few months ago, we clapped our hands with very joy. Why? Because we have been watching the C.P.R. of late years. We have noted what it has done for other places, no so favourably situated as Halifax. We have come to the conclusion that we must get the C.P.R. into Halifax and we are prepared to extend something more tangible beside the glad hand.

And we want the Grand Trunk Pacific and the Canadian Northern. We believe they want us. So we will see to it that the bride goes not to the brideroom without her dower.

And for the steamships we are not unmindful. We are leaving no stone unturned to impress upon the railway authorities—the Government authorities—the need of dock improvement We are going to enlarge our splendid dry dock so that it will accommodate the largest craft afloat. We are going to dig down good and deep into our jeans. Yes, Halifax will do her share, do the square thing by both railway and steamboat, believing that when they are secured all other needful things will be given unto us.

And we are reaching out for new industries. We believe we have a splendid field for the successful conduct of varied enterprises. As a proof of our earnest I have only to cite the fact that our leading newspapers advocate the giving of a bonus of a million dollars for the establishment of a steel shipbuilding plant anywhere on the shores of Halifax harbour With one of the finest dry docks in the world, and being situated only half an hour's sail from the broad Atlantic the offer should prove something of a tempter.

It is the awakening of Halifax.

W. D. T.

## THE PEOPLE'S CHIMES.

In another part of this issue of the Examiner is found a letter from Rev Canon Davidson, setting forth the present condition of the People's Chimes fund and other significant considerations. Though the idea of chimes, as a purely church matter, originated originally with St. Johns, public spirit and public cooperation, solely from a public and citizens' standpoint gave the chimes project a public and civic and patriotic character. The public sympathized with the widened scope of the undertaking and recognizing its public character, in a practical way, by their contributions, gave special significance and point to the title, "People's Chimes." They will not only be the people' chimes because the liberal contributions to their purchase have made them the public property, but because they will in their results and use become the common property of the people. As the rain falls upon the just and the unjust alike, so will the music of the chimes cheer and delight everybody independently of church affiliations or moral or social standing. The chimes fund has reached $4,130. To provide chimes that will be worthy of the civic character they have assumed, and of their civic home Peterborough, will require a little more than $5,000. We should be able for some such sum to procure a peal of bells that would be unsurpassed in Canada. Peterborough has in the Hydraulic Lift Lock the greatest physical uplift in Canada or the world Would it not be good to have Peterborough enjoy the distinction of having the grandest moral uplift of its kind in the way of the strongest, sweetest and most perfect set of chimes in Canada. This can be done without any great effort or strain. The contributions, so far, consist of comparatively large sums by people of easy means. The great popular element is yet to be heard from, if the chimes are to fittingly sustain the alluring title, "the people's chimes." As everybody will be included in the benefits of the chimes, so should everybody be permitted to share in their provision.

A point whose significance is perhaps not appreciated, perhaps because it has not been obviously presented is this. If the chimes to serve the city were provided, say at the expense of the city treasury, through the Council, the public funds would also have to be used to provide for their accommodation and operation in a manner worthy of their importance. The church authorities of St. Johns will undertake to give place to and provide for the operation of, the bells for all time to come. So that the chimes provided so largely by the liberality of the public, and for the benefit of the entire public, will be forever operated, free of expense to the general public. Their bronze-throated message of cheer, or rejoicing, of jubilation and celebration on all great national and civic occasions, will ring out over the whole city and no one citizen as a part of the great public will be made to incur any expense or assume any responsibility.

## EDITORIAL NOTES.

The "Tory" organs are now endeavouring ,says the Hamilton Times, to create a creed question by circulating the story that Laurier had arranged for a guard of honour to the Popes representative at the Eucharistic Congress, but that Sir Frederick Borden acting upon orders from the Imperial Government, defeated the Premier's object and countermanded the order for the guard. Of course there is not a shadow of truth for this story The alleged action of the Imperial authorities is itself enough to show it to be a falsehood.

The competion of the new Doomsday Book in England will enable us to get a correct idea of how the 77,000,000 acres of land in the United Kingdom is divided. It is believed that 40,000,000 acres are owned by fewer than 2,500 persons. Of the 34,500 acres in England 28,000,000 acres are in the hands of 38,000 persons. In 1895 it was said that in Scotland 1,792,785 acres were held as game forests, which might have been profitably cultivated. This land was assessed at an average of about 18 cents at acre.

## INDIVISIBILITY OF CANADIANS.

(Lethbridge Herald.)

The indivisibility of the people of Canada is something that should be considered and emphasized. A nation cannot stand, and in Canada's case there is absolutely no reason why there should be any division. There has been a tendency in some quarters to make a division between the East and West, with the Great Lakes as the point of division. But there is no sense or reason in any such movement. It is true that in some respects conditions and circumstances are different in the two parts of Canada, and it is also true that often the people of one part do not understand or try to understand those conditions and circumstances obtaining in the other part. But the interests of all are identical. What benefits the people of Nova Scotia directly or indirectly benefits the people of British Columbia. What would help Ontario cannot injure Alberta. The business, social industrial and political interests of all the people of Canada are so closely interwoven that what benefits one benefits all, and what injures one injures all. Differences in interests may appear on the surface, but when probed below the surface to the foundations of the nation's welfare, these differences disappear. A broad Canadianism includes all, whether native born, Britishers, Americans, French, German or Galician, Protestant, Roman Catholic or Greek, agriculturist or manufacturer labourer or capitalist, easterner or westerner. All differences are lost in a common devotion to the British crown and institutions.

## THE McBRIDE EPISODE.

(Montreal Herald.)

It is very evident that what may be called the McBride incident of the Laurier tour has given rise to considerable speculation. British Columbia is Conservative; so is Manitoba. In each case the Legislature and the federal representation are overwhelmingly Conservative. In Manitoba the political opponents of Sir Wilfrid Laurier treated him as an opponent and gave him the cold shoulder. There was only one exception, Mr. Staples, M.P., having played the part of host when his riding was entered, which led to his status being seriously canvassed by his more stiff backed friends. For the rest, Sir Wilfrid accepted the situation as perfectly normal, and in all his Manitoba speeches entered upon a direct controversy with Mr. Roblin concerning the boundary extension dispute. In British Columbia it was very different. Crossing the boundary from Alberta, Sir Wilfrid got a telegram of welcome from the Conservative Premier, Mr. McBride. Six of Mr. McBride's followers in the legislature appeared in person conveying a similar message. The Conservative member for Vancouver, having been overlooked by the municipal, commercial and other reception committees, went up the line to meet the party and entered Vancouver with them. Conservative members were on hand at Prince Rupert, at New Westminster, at Victoria, at Kamloops. And Mr. McBride himself was not merely on hand, but in command at Victoria. He met the boat and welcomed Sir Wilfrid to Victoria . He had caused a large expenditure to be made in preparation. He had a reception, of the most formal type, arranged for the legislative buildings. Not merely did he provide the entertainment; he officiated as host. Small wonder Sir Wilfrid Laurier began his Victoria speech with a pretty compliment to the younger man. It may be a vanity on Mr. McBride's part to believe that he looks enough like Sir Wilfrid to pass with the mob for the same kind of a man, younger, of course, but willing to improve. It may be without calculation, though none thinks so, that he gets himself up to look so much like the Liberal chieftain as to be sometimes mistaken for him. The ruff of gray, curly hair, the smooth face, the long lip, the high collar, the well-fitting clothes, the placid, friendly countenance, they may all be quite accidental resemblances. Only, his admirers do not believe it. They affirm very frankly that Mr. McBride is looking forward; that he accepts the Laurier personality as the secret of the Laurier power; that Mr. Borden has been weighed and found wanting; that Mr. McBride does not see for Mr. Borden's future other than that of defeat, with which he has no desire to be associated. On the theory that there is no Laurier but Laurier and that McBride ought to succeed him when he shall need a successor. Mr. Borden's friends very frankly explain the ardour exhibited by the British Columbia Conservative Premier in doing exactly the opposite of what was done by the Conservative Premier of Manitoba. Moreover, there is no love lost between Mr. McBride and Sir Hibbert Tupper, and Sir Hibbert, not to be outshone, was Sir Wilfrid's host at dinner. It would be worth while to know just what those who were for making Mr. Staples the victim of a heresy trial think of the overt recalcitrancy of Mr. McBride. Whatever they do think, they are not saying anything about it, and, that itself, in all likelihood, will do something to satisfy Mr. McBride of the correctness of his diagnosis. It may not wholly satisfy Mr. Borden.

Your Opportunity

Lot on the north side of McGill Street 40x120 feet to a lane. $165. Be quick if you want this.

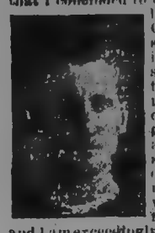
# THE BEST REMEDY

## For Women—Lydia E. Pinkham's Vegetable Compound



Belleville, Ont.—"I was so weak and worn out from a female weakness that I concluded to try Lydia E. Pinkham's Vegetable Compound. I took several bottles of it, and I gained strength so rapidly that it seemed to make a new woman of me. I can do as good a day's work as I ever did. I sincerely bless the day that I made up my mind to take your medicine for female weakness, and I am exceedingly grateful to you for your kind letters, as I certainly profited by them. I give you permission to publish this any time you wish."—Mrs. ALBERT WICKETT, Belleville, Ontario, Canada.

Women everywhere should remember that there is no other remedy known to medicine that will cure female weakness and so successfully carry women through the Change of Life as Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs.

For 30 years it has been curing women from the worst forms of female ills—inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, and nervous prostration.

If you want special advice write for it to Mrs. Pinkham, Lynn, Mass. It is free and always helpful.

# "THE PILLAR OF LIGHT"

By Louis Tracey, (Copyrighted)

(Continued from Wednesday)

Nevertheless, he caught the quick flashes reflected from clouds low, but unbroken. As yet, there was a chance of the incoming tide bringing better weather, and he bent again over the record of the equinoctial gale in 1891. Soon he abandoned this hope. The growing thunder of the reef as the tide advanced gave the first unmistakable warning of what was to come. As a mere matter of sense the reef roared its loudest at half-tide. He understood now that a cable had swept across the Atlantic in an irregular track. However the winds may rage the tides remain steadfast, and the great waves now rushing up from the west were actually harbingers of the fierce blast which had created them.

Of course, the threatened turmoil in no wise disconcerted him. It might be that the rock would remain inaccessible during many days. In that event the girls would take the watch after the lamp was extinguished and they must learn to endure the monotony and discomforts of existence in a storm-bound lighthouse. They would be nervous unquestionably perhaps he had forgotten how nervous—but Brand was a philosopher, and at present he was most taken up with wonderment at the curious blend of circumstances which resulted in their presence on the rock that night.

Ha! A tremor shook the great pillar. He heard without the frenzied shriek of the first repulsed roller, which flung itself on the sleek and rounded wall. Would the girls sleep through the next few hours. Possibly, if awake, they would attribute the vibration of the column to the wind. He trusted it might be so. Shut in as they were, they could not distinguish sounds. Everything to them would be a confused hum, with an occasional shiver as the granite braced its mighty heart to resist the enemy.

But what new note was this in the outer chaos? An ordinary gale shuddered and whistled and chanted its way past the lantern in varying tones. It sang, it piped, it bellowed, it played on giant reeds and crashed with cymbals. Now he looked at the clock, after midnight there was a sustained screech in the voice of the tempest, which he did not remember having heard before. At last the explanation dawned on him. The hurricane was there, a few feet away, shut off from him by mere sheets of glass. The lighthouse thrust its full shaft into this merciless tornado with grim steadfastness, and around its smooth contours poured a volume of unearthly melody which seemed to surge up from the broad base and was flung off into the darkness by the outer sweep of the cornice.

The wind was travelling seventy, eighty, mayhap a hundred miles an hour. Not during all his service, nor in earlier travels through distant lands, had he ever witnessed a storm of such fury. He thought he heard something crack overhead. He looked aloft, but all seemed well. Not until next day did he discover that the wind-vane had been carried away, a wrought-iron shank nearly two inches thick having snapped like a piece of worsted at the place where the tempest had found a fault.

He tried to look out into the heart of the gale. The air was full of flying foam, but the sea was beaten flat. If the growling monster beneath tried to fling a defiant crest at the tornado, the whole mass of water, many tons in weight, was instantly torn from the surface and flung into nothingness. Some of these adventurers, forced up by the reef, hit the lighthouse with greater force than many a cannon-ball fired in battles which have made history. Time after time the splendid structure winced beneath the blow.

If Stephen Brand were ever fated to know fear he was face to face with the ugly phantom then. The granite column would not yield, but it was quite within the bounds of possibility that the entire lantern might be carried away, and he with it.

He thought, with a catching of his breath, of the two girls in the tiny room beneath. For one fleeting instant his mortal eyes gazed into the unseen. But the call of duty restored him. The excessive draught affected the lamp. Its ardor must be checked. With a steady hand he readjusted the little brass screws. They were so superbly indifferent to all this pandemonium. Just little brass screws, doing their work, and heeding naught beside. Suddenly there came to him the triumphant knowledge that the pure white beam of the light was hewing its path through the savage assailant without as calmly and fearlessly as it lit up the ocean wilds on a midsummer night of moonlight and soft zephyrs.

"Thank God for that!" he murmured aloud. "How can a man die better than at his post?"

The ring of iron beneath caught his ears. He turned from the lamp. Constance appeared, pale, with shining eyes. She carried the lantern. Behind her crept Enid, who had been crying; she strove now to check her tears.

"Is this sort of thing normal, or a special performance arranged for our benefit?" said his daughter, with a fine attempt at a smile.

"Oh, dad, I am so frightened!" cried Enid. "Why does it howl so?"

### CHAPTER VI.

### THE MIDDLE WATCH.

It says a good deal for Stephen Brand's courage that he was able to laugh just then, but it is a fine thing for a man, in a moment of supremest danger, to be called on to comfort a weeping woman.

The next minute might be their last—of that he was fully conscious. Even before the girls reached his side he felt a curious lifting movement of the whole frame of the lantern. Steel and glass alike were yielding to the sustained violence of the wind-pressure. Well were they moulded, by men whose conscience need harbour no reproach of dishonest craftsmanship; they were being tested now almost beyond endurance.

Some natures would have found relief in prayer. Gladly would Constance and Enid have sunk on their knees and besought the Master of the Winds to spare them and those at sea. But Brand, believing that a catastrophe was imminent, decided that in order to save the girls' lives he must neither alarm them nor lose an unnecessary instant.

To desert the light—that was impossible personally. If given the least warning, he would spring towards the iron rail that curved by the side of the stairs to the service-room, and take his chance. Otherwise he would go with the lamp. There was no other alternative. The girls must leave him at once.

The laugh with which he greeted their appearance gave him time to scheme.

"I ought to scold you, but I won't" he cried. "Are you plucky enough to descend to the kitchen and make three nice cups of cocoa?"

Just think what it cost him to speak in this bantering way, careless of words, though each additional syllable might mean death to all three.

His request had the exact effect he calculated. For once, Constance was deceived, and looked her surprise. Enid, more volatile, smiled through her tears. So it was not quite as bad as they imagined, this gale. Their father could never be so matter-of-fact in the face of real peril to all of them. Cocoa! Fancy a man giving his thoughts to cocoa whilst they were expecting the lighthouse to be hurled into the English Channel.

He turned again to manipulate the brass screws.

"Now, do not stand there shivering," he said "but harden your hearts and go. Use the oil stove. By the time it is ready—"

Shivering, indeed!"

Constance, of the Viking breed, would let him see that he had no monopoly of the family motto: "Audeo." She, too, could dare.

"Down you go, Enid," she cried. "He shall have his cocoa, poor man."

He looked over his shoulder and caught his daughter glancing at him from the well of the stairs.

"Bad night," he shouted cheerfully and he cheated her quick intelligence a second time.

They were gone. Perchance it was his last sight of them in this life. Three times the stalwart frame-work creaked. Once it moved so perceptibly that the curtain rings jingled. Then he remembered the words of Isaiah:

"For thou hast been a strength to the poor, a strength to the needy in his distress, a refuge from the storm, a shadow from the heat, when the blast of the terrible ones is as a storm against the wall."

The blast of the terrible ones! What a vivid pen-picture of the awesome forces of nature. How long would this tornado continue? Already it must have strewed its path with havoc at sea and on land. His physical senses were elevated to the supernatural. He seemed to acquire abnormal powers of sight and hearing. He could see the trees bending before the wrathful wind, hear the crashing tiles and brickwork as houses were demolished and people hurled to death. But there was no mystery at all, no mental attitude, in quick reaction came the fanciful memory of the hardy old salt who cheered his shipmates during a terrific gale with the trite remark:

"I pity the poor folk ashore on a night like this."

What a curious jumble of emotions jostled in his brain. A step from the sublime to the ridiculous! Not even a step. They were inextricably interwoven, the woof and the warp of things. He recalled the odd expression of an officer who had passed unscathed through the Inferno of Spion Kop.

"I had no sense of fear," said he, "but my teeth began to ache."

Brand, a student, even of himself, discovered that his dominant sensation was one of curiosity.

"If it has to be," said his nervous system, "let it come quickly." He felt like a man lying on the operating table waiting for the chloroform.

Suddenly, the bright flame of the lamp lessened. The use that was his second nature caused him to raise the wicks and admit more draught. Even whilst his deft fingers arranged the complex burner, his ear caught a change in the external din. The shriek of the wind dropped to a thunderous growl. This was a gale, not a tempest. God be praised, the crisis had passed!

The hurricane had lasted thirty-five minutes. A similar tornado sufficed to wreck one-half of the city of St. Louis. This one, as he learnt afterwards, swept around the south of Ireland, created a tidal wave which did great damage to the Scilly Isles, and the headlands of the south coast, yet spent itself somewhere in the North Sea. Dwellers in inland cities were amazed and incredulous when the newspapers spoke of its extraordinary violence. A truth is harder to swallow than a lie, all the time.

Up clattered Enid with the steaming beverage; Constance, the lantern-bearer, providing the rear-guard.

"I do believe it is blowing worse than ever," said Enid, striving desperately to be unconcerned. In reality, the angry wind was no longer able to behead the waves. With a rising tide and the gale assisting, there would soon be a sea worthy of Turner in his maddest mood.

"Good gracious, dad," cried Constance, "how pale you are. And your forehead is wet. What have you been doing?"

Brand hastily mopped his face with a handkerchief.

"During some of the heavy gusts," he explained, "I was compelled to stand on the trimming stage. And—the micrometer valve required adjustment."

She eyed him narrowly. The margin of suspicion was wider.

"There is nothing else wrong?" she asked.

He approached and kissed her ear. "Since when did my little girl begin to doubt me?" he said quietly.

Her eyes filled. Even the hint of a reproach from him was intolerable. For the life of her she could no longer control the flood of terror which welled up beyond restraint.

"Forgive me, dad," she murmured, "but I thought and I still think, that we were and are in a position of the utmost peril. I can't help knowing that it is high-water about two o'clock and it is now only a quarter to one. The worst is not over. Do you think I cannot read your dear face! Dad! if there is danger, don't send us away again."

Tears were streaming down her white cheeks. Enid, holding the tray in speechless bewilderment during this outburst from her proud and self-reliant sister, set it down on the writing-desk with a crash.

"Oh, dear," she wailed, "I don't want any cocoa if we're gug-gug-going to be drowned."

Certainly if Stephen Brand had imagined two minutes earlier, that he was about to laugh long and loudly, in a genuine surrender to an uncontrollable spasm of mirth, he would have feared lest his wits were leaving him. Yet he laughed now until his vision was blurred. And the wonderful relief of it! What a tonic, after the ordeal he had endured!

## BRIEFS FROM THE WIRES.

According to a report submitted to the directors of the Philadelphia Rapid Transit Co., the strike of the conductors and motormen, in the early part of the present year, cost the company $2,300,000.

Several attorneys who were asked to defend some of the men indicted for murder of first degree, in connection with the lynching of Gale Charlton in Newark, Ohio, have refused to do so, saying they were opposed to lynching.

Floating in 30 feet of water in the Long Pond at Centre Island, Toronto, the body of Mrs. Margaret McWillie, widow, 60 years of age, was found by Ralph Gates of the yacht Florence. She has been suffering from nervous troubles.

Shortly after Col. Roosevelt arrived in Milwaukee yesterday he found himself involved in a controversy with Emil Seidel, the socialistic mayor, who has declined to act upon the reception committee which welcomed the colonel to Milwaukee.

The search of Miss Ethel S. Scott of Toronto, and three sisters, to locate her father, who disappeared in that city eighteen years ago, received another setback Tuesday night, when Walter Scott, 114 Winder street, Detroit, convinced the police that he was not the man they sought.

INDIGESTION GOES IN FIVE MINUTES

Heartburn, Dyspepsia, Gas and Other Stomach Misery Vanishes

If what you just ate is souring on your stomach or lies like a lump of lead, refusing to digest, or you belch Gas and Eructate sour, undigested food, or have a feeling of Dizziness, Heartburn, Fulness, Nausea, Bad Taste in mouth and stomach headache—this is Indigestion.

A full case of Pape's Diapepsin costs only 50 cents and will thoroughly cure your out-of-order stomach, and leave sufficient about the house in case some one else in the family may suffer from stomach trouble or Indigestion.

Ask your pharmacist to show you the formula plainly printed on these 50-cent cases, then you will understand why Dyspeptic trouble of all kinds must go, and why they usually relieve sour, out-of-order stomachs or indigestion in five minutes. Diapepsin is harmless and tastes like candy, though each dose contains power sufficient to digest and prepare for assimilation into the blood all the food you eat; besides, it makes you go to the table with a healthy appetite; but, what will please you most, is that you will feel that your stomach and intestines are clean and fresh, and you will not need to resort to laxatives or liver pills for Biliousness or Constipation.

This city will have many Diapepsin cranks, as some people will call them, but you will be cranky about this splendid stomach preparation, too, if you ever try a little for Indigestion or Gastritis or any other stomach misery.

Get some now, this minute, and forever rid yourself of Stomach Trouble and Indigestion.

### Chinese Laundryman Convicted.

Whitby, Sept. 8.—Police Magistrate Harper found Charley Soo of the local Chinese laundry guilty of keeping a disorderly house, as a result of a raid a week ago by Chief Jamieson for opium smoking. The others implicated are George W. Paradis, Oshawa, and E. D. Finlayson, Toronto, as frequenters, and these two, with Emma Ocamb, Toronto, with conspiracy to abduct Edna Frink, Oshawa, were sent up for trial at the next criminal court. All but Finlayson were bailed out.

### Was a Toronto Girl.

Winnipeg, Sept. 8.—Miss Henrietta Valentine, who was drowned at Kenora Monday, was a Toronto girl, formerly with the T. Eaton Co., and moved to the store here in the cash sales department. Her body will be shipped direct to Toronto for interment. Miss Valentine was to have been married shortly.

### Gaynor for Governor.

New York, Sept. 8.—John A. Dix chairman of the Democratic state committee, who has been making a tour of New York State in the interest of "party harmony," said yesterday that he had found considerable sentiment favoring the nomination of Mayor Gaynor for governor.

CARTER'S LITTLE LIVER PILLS

FOR HEADACHE, FOR DIZZINESS, FOR BIOUSNESS, FOR TORPID LIVER, FOR CONSTIPATION, FOR SALLOW SKIN, FOR THE COMPLEXION

Genuine must bear Fac-Simile Signature

CURE'S BACK HEADACHE

Bilious Headache

COMES FROM LIVER DERANGEMENTS WHICH ARE THOROUGHLY OVERCOME BY

DR. CHASE'S KIDNEY-LIVER PILLS

Headache is said to be the most useful pain in the world. It is a sort of fire alarm that warns you of something wrong with some organ of the body.

Most frequently the trouble is indigestion and torpid liver and the pain arises from the poisoned blood passing through the arteries of the brain and head.

There is no cure for bilious headache, torpid liver and indigestion that can be compared to Dr. Chase's Kidney and Liver Pills for prompt and certain results. This has been proven by so many thousands of letters published from time to time that everybody should know it by this time.

Mr. Fred Hinz, Bradhagen, Perth Co., Ont., writes: "I don't like to have my name in the papers, but feel out of justice to suffering humanity I should tell others of the good I obtained from Dr. Chase's Kidney and Liver Pills and Ointment.

"For years I was troubled a great deal with sick headaches and was often so bad that I could not work. Being advised to try Dr. Chase's Kidney and Liver Pills I did so and can say they have brought about a complete cure. From the first I found that one pill cured my headache quickly every time. I was also a victim of itching piles and found Dr. Chase's Ointment the most satisfactory treatment I ever used. It brought relief almost instantly."

You won't be satisfied with mere temporary relief when you know your headache can be completely cured by using Dr. Chase's Kidney and Liver Pills. One pill a dose, 25 cts. a box, all dealers; or Edmanson, Bates & Co., Toronto.

"Eat and Be Merry!"

Stop starving yourself—stop suffering the pangs of indigestion—stop worrying about what you dare and dare not eat.

Eat hearty meals of wholesome food, take

NA-DRU-CO DYSPEPSIA TABLETS

and you'll feel like a new person. Sour stomach—heartburn—occasional indigestion—chronic dyspepsia—all yield quickly to NA-DRU-CO Dyspepsia Tablets. The properly digested food restores your strength, your stomach regains its tone, and soon requires no further aid.

50c. a box. If your druggist has not stocked them yet send 50c. and we will mail them. 37

## A FINE HOTEL

### Visitors to the Newmarket Fair Should Stay at the Forsythe Hotel

Visitors to the Newmarket fair will appreciate the fact that excellent accommodation will be provided for them at the Forsythe hotel, which recently has been taken over by Mr. and Mrs. George Brown, former proprietors of the Chemong Park Hotel. This is an old established house but it has lately been enlarged and refurnished. It now has an excellent service and under the capable management of Mr. and Mrs. Brown, it is bound to attract the travelling public. The dining room has luxurious apointments and modern decorations and will seat one hundred persons. This is a local option hotel, but the choicest cigars and non-intoxicating beverages may be had at the bar.

**THE FEET IN PRISON**

Tightly imprisoned in the modern shoe the feet perspire and the skin is chafed and irritated until it is in anything but a healthy condition. Corns and bunions are formed and walking becomes torture. Possibly you never thought of Dr. Chase's Ointment in this connection but it brings wonderful relief and comfort and almost instantly. Its soothing, healing effects are magical.

## WARSAW ITEMS OF INTEREST

Examiner Special.

WARSAW, SEPT. 7.—Mr. W. H. Clements was at Stony Lake on Thursday.

Mr. H. G. E. Choate, who has been at McCracken's Landing during the past two months, returned home on Tuesday.

The regular monthly meeting of Court Warsaw, No. 220 Canadian Order of Foresters, was held on Tuesday, 6th inst.

Mr. Wm. Batten is spending a few days in Toronto.

## THE EVENING CHIT-CHAT

By Ruth Cameron

Has she been in your guest room at all this summer—the guest non grata?

If you have any guest room to put her in I suspect she has, for she goes everywhere in the course of the season.

Who is this guest non grata?

Well, there are several varieties of her.

Here are a few that you may recognize.

You invite her for the week of August 7-14—that being the only week in which you can conveniently entertain her. She accepts with pleasure, making the slight proviso that, as it suits her plans better, she will come the next week instead—she is sureyou won't mind because you aren't to put yourself out for her, and anyway you are always so accommodating.

A more virulent variety goes even farther than this, and not only dates her invitation but extends it to herself—at least in its definite form. You have remarked, perhaps, in an unwary moment that you would like to have her come and see you if she is ever in your part of the country, and your unwariness is duly punished when you get a note saying that she will be staying right near your summer home next week, and be glad to come and see you for a few days, if convenient.

Although apparently amply supplied with trunk room she never brings more than half the little things she needs. All through her stay you patiently—or impatiently—supply her with stamps, writing paper, fountain pen, rubbers, umbrella, sewing materials and so many other incidentals that it would almost wear out my typewriter to try to enumerate them.

She will never say "which." You have two plans in the air awaiting her choice. You ask her which she prefers. "Either that is agreeable to you," she says. You explain fully that it really is immaterial to you and that you really want to know her preference, but she hides it religiously. You go ahead blindly and choose the wrong thing of course.

She doesn't read or embroider or amuse herself in any way and when you are not doing something to amuse her, she is plainly bored.

She always has numerous friends stopping in the vicinity of your home and regards it as part of her privilege as your guest to have you entertain them frequently.

She sings or plays beautifully and you have counted on enjoying her talent, but she assures you blandly that she left her music at home, and can't sing or play a note without it.

She "never eats" this or that. Of course she insists that you are not to get anything especial for her, but of course you do.

She is late to breakfast and fails to air her room properly.

She attempts—usually this variety is a relative in the most kindly but most exasperating way to make your home on the pattern of hers.

You must try the breakfast food and the brand of lard and the peculiarly efficacious cleaning powder that are used in her home. Your maid must boil the clothes the way her maid does. You must give your children the medicine that helps hers. You must make your shirtwaist by the pattern that she likes somuch.

Did I say she was a variety of the "guest non grata?"

Take it back.

She belongs in a class by herself.

And since my Latin fails me and I don't know the Latin superlative of "non grata," I'll just call it "most non grata."

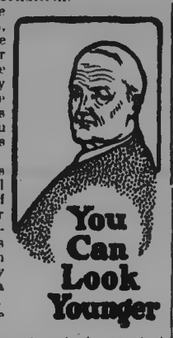
Ruth Cameron

## Baldheads Will Be Scarce When Parisian Sage Is Better Known

### It Keeps Women's Hair Soft and Glossy Says Elizabeth House

No man likes to look older than he is. Every woman on earth absolutely abhors such a condition.

You may be 30 in years, but if you are bald-headed or grey, people will surely take you to be many years older, and you will be helpless to prevent.



Dandruff is the root of all hair evils. If it were not for the little destructive germs working with a persistency worthy of a better cause there would be no baldness.

Parisian Sage, America's greatest hair restorer, will keep you looking young and attractive.

It is guaranteed by Wm. Madill to make hair grow, and stop falling hair; to cure dandruff in two weeks; to stop itching of the scalp almost instantly.

Parisian Sage is the most invigorating, satisfying and pleasantest hair dressing made; it makes the hair soft, luxuriant and handsome; it is especially praised by women who have beautiful hair. Parisian Sage is for sale by Wm. Madill at 50 cents a large bottle, or charges prepaid, from the Canadian makers, Giroux Mfg. Co., Fort Erie, Ont. The girl with the auburn hair is on every bottle.

"I have only used one bottle of Parisian Sage, and, of course, I can not praise it as much as if I had used more, but I find it a good tonic for the hair.

"It keeps the hair soft and glossy, the scalp clean, and makes the hair grow long, and stops falling hair.

"I recommend it to any one as a good tonic."—Elizabeth House, Manchester, Conn.

## WINNERS OF THE SPECIAL PRIZES ON LABOUR DAY

The gymnasium classes for the season of 1910 and 1911 are due to open with the Junior Boys on Wednesday, Sept. 14th, at 4.15 p.m. All Junior Boys are reminded that they will be required to pass a physical examination before being allowed to take part in any floor work.

The Business Boys' class of last year has been divided into two sections this year, the older boys forming what will be known as the Intermediate class, the younger boys being known as business boys.

The Business Boys' class will open Thursday, Sept. 15th at 7 p.m.

The Intermediate class will open Tuesday, Sept. 20th, at 8.15 p.m.

Collegiate Class, Monday, Sept. 19, at 4.15 p.m.

Senior Class will be held every Monday, Wednesday and Friday, commencing Monday, Oct. 3, at 8 p.m.

Special attention will be given to the business men's classes this year. Classes will be held every Tuesday and Thursday at 5.15 and 6.15 p.m., so that every business man will have a chance to take regular systematic exercise.

The medals which were so kindly donated by some of the citizens for the Labour Day Athletic meet were won as follows:

Ald. Hicks, medal for city championship, 100 yards, was won by H. Woods.

Ald. Gillespie's medal for second place, goes to W. Flowers.

Hon. J. R. Stratton's handsome gold ring goes to Roy Holden of Toronto West Ends.

Mr. P. Campbell's medal goes to Chas. Smith of Toronto W. E.

Mr. J. Connal's medal goes to F. Bowes of Toronto W. E.

Mr. W. E. Conway's medal to the first local man to finish goes to R. Robinson of the Otonabee A. C.

## Walked Into The Wrong House And Slept On Sofa—Found Next Morning

As a result of tarrying too long at the flowing bowl, some of the gang in charge of a threshing machine that came to a standstill on Hunter street east on Tuesday night, had some strange experiences, and caused consternation in at least one home. After having been told to move along by the police the machine proceeded on its way, intending to go to the farm of a man by the name of Roberts, in Otonabee. When at Downer's Corners they drew up to a house, thinking it the one where they were due. On being told that it was the wrong place by the man of the house, they started away, but apparently one remained behind. The occupant of the house went to bed again, it being about two o'clock in the morning, and forgot to lock the door. One of the threshers returned and entered. He made himself comfortable on the sofa and slept through until morning. When the lady of the house came down to prepare breakfast she got an awful fright when she saw a strange man sleeping in her dining room. Calling her husband they soon got him away and he left the house in a semi-conscious condition.

## HARVEST FESTIVAL

### Annual Thanksgiving at St. John's Next Thursday Night

The annual harvest Thanksgiving offering of St. John's church will be held next Thursday, September the fifteenth. At the evening service Rve. C. A. Seager, rector of St. Cyprian's church, Toronto, will be the special preacher. Mr. Seager has just recently returned from Vancouver, where he was summoned from Toronto to be the special preacher at the consecration of Bishop de Pencier some weeks ago. Mr. Seager is a man of striking ability and force, and has built up a large congregation in the city of Toronto.

## NEW SYSTEM

### Messrs. J. J. Turner & Sons Have Installed a New Telephoning System in Their Factory

Added to the numerous up-to-date equipments of J. J. Turner & Sons' factory, is a convenient telephone system, which permits the head office to have direct communication with all departments in the building. It is one of the first, if not the first, telephone system of this kind installed in the city. Besides being in close connection with all parts of the establishment, the offices have two lines to the Bell Telephone Central, which allows the employees to transact business with all parts of the city, one line being in use the other one can be put into operation at the same time. The system is controlled by a small key board of ten keys. In speaking to the different parts of the factory all that is necessary to make connection therewith is to press a button, which corresponds to the number of the department, while two separate buttons are set apart for calling Central.

## WEST DURHAM FAIR TO BE HELD AT BOWMANVILLE

West Durham Fair, which will be held at Bowmanville on Tuesday and Wednesday, Sept. 20 and 21, promises to be the greatest and grander than ever. Several changes have been made in the Prize List. Good prizes are being offered in all classes. Special performances in front of the grand stand. Don't fail to attend on Wednesday—the big day of the fair. Send entries early to Secretary J. S. Moorcraft. Special rates on railways. You can't afford to miss Bowmanville Fair—one of the best stock exhibitions in the province.

## DOWNEYVILLE PICNIC

The annual picnic in connection with the congregation of St. Luke's R. C. church, Downeyville, will be held in Hurley's Grove on Wednesday, September 14th. In addition to other attractions, a number of prominent public speakers are invited to be present. Admission to the ground and dinner, 50c., children 25c All are invited. 8d-54-1w

# TRISCUIT

**564 GEORGE STREET**

## New Assistant For St. John's Will Arrive In The City Next Week

At the conclusion of the week-night service at St. John's church last evening, a meeting of the men of the congregation was held. A discussion took place as to the season's work, and it was determined to aggressively push forward the men's work in all its branches. Another meeting will be held in a fortnight's time. Rev. Mr. Carpenter, the new assistent for St. John's will attend largely to this department. Rev. Mr. Carpenter who was lately appointed assistant at St. John's is now on his way from Newfoundland. It was thought that he would have been here for Sunday, but he has been delayed in Montreal. He is now expected about Monday or Tuesday. On his departure from Harbour Grace, he was presented with an affectionate address and a purse of gold. The strongest regret was expressed at his departure. Advices from Newfoundland are to the effect that a strong man has been secured in Mr. Carpenter.

# Let Your New Corset Be A Corset of Proven Worth

**The Kabo Corsets Have Demonstrated Their Style Value And Superior Wearing Qualities**

The wise woman chooses her corset with infinite care. It is the foundation which gives character and distinction to her clothing. She takes no chance with a corset of obscure make which may be good and may not. She buys a corset with a reputation to sustain—one upon which she can absolutely DEPEND to be correct in every detail.

We are showing the newest models of the nationally known Kabo Corset, for which we are the exclusive agents in Peterboro.

Let your new corset be of this distinguished make and you may be assured of the correct outline for your Fall garments.

Kabo corsets follow rigorously fashion's latest dicta, providing the graceful unbroken flow of line demanded by the new costume styles. They are made of strong soft materials flexibly boned, combining the maximum of support with restraint. They include models for all figures.

**Make a Safe Satisfactory Selection of a Kabo Corset**

# FIRE SALE

IN THE BARGAIN ANNEX

## Second Lot of Ribbons

To-morrow, we offer the second and last lot of Fire, Smoke and Water Soiled and Damaged *Ribbons* including Silks and Velvets in all widths, all sorted up according to value and placed on separate tables at shockingly low prices. Yesterday's lot sold very rapidly, hardly lasting throughout the day. Friday will clean up the entire stock of Ribbons which came through the fire. Come early. Many extra lines will be added for Friday's Sale. Saturday's extra will be the balance of the Laces and Embroideries.

**We Have A Request To Make To Our Annex Patrons**

***When your parcel is small you will be surer of not being disappointed by carrying it, as our delivery system is taxed to its utmost capacity owing to the tremendous Fire Sale Rush.***

Cressman's

## OBITUARY

### JAMES REID.

The following from the Lindsay Post refers to the death of the father of Mr. Chas. H. Reid, formerly of the Examiner staff, and well known in Peterboro:

There passed away at Bobcaygeon on Saturday morning last a life long and well known resident of that place and county in the person of Mr. James Reid, after an illness of one month.

Deceased has been in the mining district north of Latchford during the summer months, and started for home about a month ago in company with his son-in-law, Mr. Chas. Newman, and became ill on the train from the effect of eating over-ripe fruit. On arriving at his home in the village he was forced to go to bed from which he never again arose.

There are left to mourn the loss of a kind and devoted father four daughters and three sons. The daughters are Mrs. John Gallaugher, Mrs. Wm. J. Wright and Mrs. Chas. Newman of Bobcaygeon, and Mrs. Chas. L. Dinsmore of Huntsville, Minnesota; Wm. George, of Steelton, Ont., and Charles H., of Simcoe, Ont., who was for a number of years a member of The Post staff. Mr. Reid outlived his wife, Mrs. Jas. Lithgow, sister of James Lithgow, former county warden, eleven years.

### MAUD CAREY.

Mr. J. W. Carey has received word from Toronto to the effect that the second daughter of his brother, Mr. Johnston Carey, passed away there on Tuesday. The deceased, Miss Maud Carey, was brought up in Peterborough and attended the local schools. She will be remembered by many citizens, who will regret to learn of her death. She had been an invalid for a number of years. Mr. J. W. Carey is attending the funeral, which takes places in Toronto this afternoon.

### DAVID DOIG.

The funeral of the late David Doig took place this afternoon from Comstock's undertaking establishment to the Little Lake cemetery for burial and was largely attended. The pall-bearers were Messrs. Thomas Williams, John Mervin, James Murty, Frank Brown, William Taylor and Robert Nicholls. Rev. J. G. Potter officiated at the funeral service.

### Infant Passes Away.

The death occurred last night at 11 o'clock of Mr. and Mrs. William Findlay's youngest child, one year and seven months old, at Campbellford, at Mrs. Thomas Maher's home, Mrs. Findlay's mother. On Tuesday, Mr. Findlay and her child went to Campbellford and yesterday the child became seriously ill, and died from acute indigestion. The father of the child left this morning for that town, where the funeral will be held tomorrow at 2 o'clock.

## MILLINERY OPENINGS

**It is understood that our merchants are to have their Millinery Openings on Thursday, Friday and Saturday next**

1057

## WEDDING BELLS

### WOODBECK—BRYANT.

A quiet, but pretty, wedding took place in Seagrave Village on Wednesday, August 31st, when Miss Etta May, daughter of Mrs. E. Bryant, was united in matrimony to Mr. J. F. Woodbeck of Lassawade, Ont. The event took place at the home of her sister, Mrs. N. Midgley, in the presence of only immediate relatives of the family. The parlour of the home was beautifully decorated with flowers for the occasion. At 4 p.m., to the strains of a wedding march, skilfully played by Miss Gertie Coulter, of Port Perry, the bride entered the parlour, leaning on the arm of her grandfather, and under a floral arch the happy union was consummated by Rev. R. A. Delve, pastor. The bride was attired in cream satin-striped voile, trimmed with all-over lace and applique, and looked charming. The couple were unattended. When congratulations had been tendered, the guests sat down to a sumptuous wedding supper, and a very pleasant evening was spent by all. The happy couple left on Friday for their future home at Lassawade, going by the beautiful Stony Lake route, followed by the best wishes of a large circle of friends for a long and happy career.

### McGREGOR—DIXON.

Last night at 6 o'clock Rev. Dr. Langfeldt united in holy wedlock Wm. Jas. McGregor and Miss Alice Jane Dixon, daughter of Mr. and Mrs. John Dixon, Otonabee. Mr. Fred Dixon acted as best man, and Miss Matilda McGregor was bridesmaid.

### KITNEY—LONG.

The marriage was solemnized last evening at the home of the bride's father in Otonabee, of Minnie Elizabeth Long, youngest daughter of Mr. Charles Long, to Mr. Chas. E. Kitney, also of Otonabee. The ceremony was performed by Rev. J. G. Potter, pastor of St. Andrew's church, in the presence of only the immediate friends and relatives of the contracting parties. After the ceremony, which took place at half past five, luncheon was served and hearty congratulations bestowed on the young couple. Mr. and Mrs. Kitney left on the nine o'clock train for Toronto and points west. The bride and groom received many beautiful and costly prestnts, testifying to the esteem in which they are held. Many gifts came from the Old Country and the far West. The Coldsprings S. S., of which both were members, presented them with silver cutlery. On their return they will reside in Otonabee.

## BIRTHS.

STANLEY.—In Peterborough on Thursday, Sept. 8th, the wife of Mr. Fred Stanley, 360 Water street, of a son.

# LAKEFIELD NEWS ITEMS

**Budget of Interesting Items From Lake Katchewanooka Village**

Mr. C. F. Thompson, of Millbrok, is in the village, the guest of Mr. and Mrs. Clinton Atwood at Ashelworth.

Mr. and Mrs. G. B. Hilliard took in the Masonic excursion from Lindsay to Orillia by Str. Otonabee, last week, returning to Lakefield by train.

Mr. Bruce Ridpath, of Toronto, is paying a few days' visit to his old home in the village.

Mr. G. B. Hilliard, accompanied by his son, Master Geoffrey Hilliard, left for Toronto last Tuesday to pay a visit to the Exhibition.

Miss K. S. Atwood, who has been visiting friends in Millbrook, has gone to East Toronto for a few days to stay with her sister, Mrs. Lingwood.

The latest of our villagers to erect a cottage at Stony Lake is Mr. Wes. Sherin, who has built a summer residence opposite Prof. Stewart's island.

Mr. and Mrs. E. R. Tate and family are spending a few days at their summer cottage, near Burleigh.

Miss Sylva Strickland is visiting Mr. and Mrs. E. R. Tate at Stony Lake.

## WASHING WITHOUT WATER.

**Is Like Trying to Get Rid of Dandruff Without Herpicide.**

Did you ever see any one trying to wash themselves without soap or water?

If you did what would you say of him?

It is every bit as foolish to try to get rid of Dandruff and to prevent Baldness by feeding the germs which cause it, with Cantharides, Vaseline, Glycerine and similar substances which form the principal ingredients of most so-called Hair Growers.

Newbro's Herpicide is successful because it attacks and kills the parasitic germ which feeds on the hair roots.

It is the original and only genuine scalp germicide manufactured.

Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

For sale by McDermid and Jury, druggists; also Payne's drug store. $1 bottles guaranteed.

# FLAG INCIDENT

Special Wire to the Examiner.

MONTREAL, SEPT. 8.—There is a division of the City Council over a flag incident connected with the Eucharistic Congress. It seems that with the Union Jack and Papal ensigns in front of the city hall is a green flag of Ireland, placed there by order of Mayor Guerin, who is a son of Erin. There isn't a French tri-colour in sight from the front of the building and the French members of the Council are sore. A protest made to the Mayor had no effect.

# State Of Peoples' Chimes Fund And Significance Of The Movement

**Letter From Rev. Canon Davidson, Dealing With Interesting and Important Aspects of the Subject.**

To the Editor of The Examiner:

Sir,—A few words seem to be called for as to the present position of the Chimes enterprise.

It is gratifying to be able to announce that the subscription list now amounts to $4,130.00, of which there has been paid in $2,120.00. Of this amount upwards of $900.00 has been contributed by warm hearted former citizens of Peterborough.

We gratefully appreciate the generosity of all contributors, both inside and outside of the city. The subscription list is a remarkable one, an is an eloquent testimony to the broad and kindly spirit of Peterborough. In it are found, associated together in this common effort, the names of men and women of every class and religious body, though the majority of the subscribers are not members of the church in which the bells are to be hung. We do not say that the money has flowed in without effort, but it has been most kindly and ungrudgingly given. There have been comparatively few refusals and countless warm expressions of approval. It seems to be clearly evident, then, that Peterborough citizens generally desire to have a good chime of bells in their city, and that they have no narrow or sectarian prejudices in connection with the matter, which is recognized as one requiring general co-operation.

It is now asked whether the large sum already collected could not be deemed sufficient, and the order given at once. In answer I beg to say that this sum, or even a smaller one, would probably procure achime quite suitable for any particular church, but we have long ago passed out of this stage, and our question must now be "How much is needed to obtain a chime really worthy of the city of Peterborough and for that purpose we certainly have not enough at present. Very large bells are required in order to be heard at any distance when chimed, and as they are to be used to play not only hymn tunes on Sundays but also patriotic and other appropriate melodies on different occasions, a wider range is required. From the attractive offers before us it now looks as if eleven fine bells could be obtained for a little over $5,000. The largest of these would weigh 3,000 pounds, three times the weight of St. John's present bell.

For my own part, in view of the kindliness and public spirit which will always be associated with the Peterborough Bells, I think we ought not to be satisfied even with this, but should go on a little further and secure the very best chimes in Ontario, a joy to our citizens and a credit and attraction to our city. This is a privilege now well within our reach if only other citizens will support the present subscribers. We do not say for a moment that the call is as urgent as perhaps many others, but it is unique and wholly different from any other cause before the town. Here is something which will help to diffuse cheer, brightness and happiness, which will enable the community to give expression to deep feelings and which should generally increase healthy sentiment and enthusiasm among us.

However, we urge no one. It is difficult to see from what quarter the balance required will come, but we can only trust that more public-spirited people will spontaneously come forward. The very smallest contributions will be gladly received by the treasurer, Mr. Wainwright Bank of Ottawa.

Meanwhile the price of bell metal is advancing and present quotations are only offered for a limited time The Chime must be ordered this autumn if we are to have it next spring or early summer.

The decision as to time and size lies, then, with future subscribers and the whole city must await their decision. Certainly generosity of their part will be welcomed as timely aid in the public interest.

I may add that we have written in all directions for advice on this important matter, and have offers from the largest bell founders in England, Germany and the United States. And we welcome further advice from everyone whether a subscriber or not, for many who cannot subscribe are interested and will we hope, derive equal pleasure from the bells.

Yours, etc.,
J. C. DAVIDSON.

# Mr. Stratton's Horses Win More Prizes At Toronto; Four Firsts Yesterday

Hon. Mr. Stratton's horses again distinguished themselves at Toronto Exhibition yesterday by carrying off four first prizes.

In the high stepping class, single, 15.2 and over, the first prize went to one of Mr. Stratton's entries. He also won first in the class for best pair of high steppers, 15.2 and over, in the harness tandems, 15.2 and over and in the high stepping class, single, under 15.2.

The Toronto Globe says, speaking of the Directors' luncheon at the Exhibition:

### Greater Yield Needed.

Mr. J. R. Stratton, speaking as a farmer, congratulated the directors upon the splendid exhibits in all classes, and particularly in the harness horse classes. He pointed out that, compared with the banking and manufacturing interests, the capital invested in farms in Canada was far in advance. One thing, however, needed attention. In Great Britain the farmers produced from thirty-two to thirty-three bushels per acre, while in Canada the average was only from eighteen to twenty bushels per acre. That was a condition of affairs that might be improved, and it presented an opportunity for the Ministers of Agriculture of the Dominion and of the various Provinces to advise and help the farmers so that they could produce the same quantity of grain per acre as they did in Great Britain.

### Equine Competitions.

The grand stand was more than comfortably filled during the afternoon on account of the equine competitions. The feature of the programme was the jumping events, in which several well-known local hunters took part. There were three jumps to be negotiated, and among the successful in the initial stages were such popular favourites as Gold Bar, ridden by Mr. Proctor; Foxglove ridden by Mr. A. Milne; Glenwood, ridden by Mr. R. Davies, and Viceroy ridden by Mr. Sifton. Mr. J. R. Stratton of Peterborough, was a popular winner in the other events. Not only did he carry off the tandem event, but the high steppers also. All the competitions received representative entries, and the spirit of rivalry was maintained till the judge named the winners.

Several splendidly-equipped teams turned out for the tandem competition, and as they formed a procession in front of the grandstand they evoked no little enthusiasm among the spectators. The high-steppers' competition produced excellent quality, and it is questionable if the records of previous years were not surpassed.

# A TRIBUTE TO EFFICIENCY OF THE EXAMINER AS AN ADVERTISING MEDIUM

**Collier Electric Company Show Their Appreciation of What the Examiner Has Done in Building Their Business Up---Advertising Pays Well.**

To the Editor of the Examiner.

Dear Sir,—In view of the fact that the Collier Electric Co., Limited, has become one of the most successful institutions of Peterborough, we feel that we would indeed be most ungrateful were we not to give due credit to the deserving.

From a small struggling concern this company has in less than three years developed into a position of national importance with a flourishing business over the whole Dominion. How has it been accomplished in so short a time? We claim advertizing did it.

As we are spending this year practically $1,000.00 in advertizing space in newspapers and magazines the claim is supported. And we frankly admit that the Examiner taught us the value of advertizing, and proved that every dollar invested in its columns would bring a harvest of plenty.

We believe that any article to be successfully advertised must be meritorious. There must be full value for the price. Yet to attain a sale of 700 Collier Automatic Irons in our home city alone called for something more than simply extra quality in the iron. We give the Examiner credit for the bulk of our success. Our records show dozens of sales directly resulting from your paper.

While presenting to you this unsolicited note of appreciation of your advertizing columns we would also note the fact that such liberal patronage has been accorded a home industry by the citizens of Peterborough. It is a most laudable example. That principle makes a successful city.

Yours appreciatively,
THE COLLIER ELECTRIC CO., Limited.
H. B. COLLIER, Manager.

# INDIAN RIVER NOTES

Examiner Special.

INDIAN RIVER, SEPT. 6—The funeral of the late Mrs. Maurice Meade took place from her residence here on Monday morning last and proceeded to St. Joseph's church, Douro, where the funeral mass was sung by Rev. M. J. McGuirk. The remains were afterwards laid in St. Joseph's cemetery. Mrs. Meade had reached the age of 77 years and had been a life-long resident of Guerin. She was highly respected by all who knew her and has always been a good and charitable neighbour. A slight token of her numberless friends was the large cortege which followed her to the grave.

Mrs. Meade leaves to mourn her loss her husband, four sons and two daughters. The sons are Michael, of Saginaw, James of East City, John and Maurice of Douro, and the daughters are Mrs. John O'Toole, of this place, and Mrs. John Hen, of Asphodel.

Mr. and Mrs. Jeremiah O'Connor, of Seymour, attended the funeral of the latter's aunt Mrs. Maurice Meade.

Miss Maggie O'Grady spent Sunday last with friends here.

Mr. John Sullivan, of Peterborough, spent Sunday last with his parents.

Miss Quinlan, school teacher of No. 12, Dummer, visited her cousin, Miss Hannah Devlin last Sunday.

Miss Hannah Fraser spent last week with friends here.

Mr. James O'Leary is spending a few days with friends in Rochester.

Mr. and Mrs. Michael McMartin spent Sunday last, the guest of Mr. and Mrs. T. Cavanagh.

Mrs. Statton, of Rochester, who has been here since the death of her mother, Mrs. M. Guerin, returned home.

Mrs. John Fitzgerald had the misfortune of getting ten head of cattle killed by the C. P. R., owing to the wind blowing the gate open. Mrs. Fitzgerald lost six of her best cows. They are valued at $400.

# HASTINGS NEWS

Examiner Special.

HASTINGS, SEPT. 3.—The many friends here of Mrs. Thos. Fraser of Outlook, Sask., regret to learn of her death, and express great sympathy for her now sorrowing husband and children. The remains were brought to Hastings for interment, which took place on Wednesday in the Trent Valley cemetery. Mrs. Fraser was at one time a resident of this place.

The Misses Wilson of Edinburgh, Scotland, have sailed for their homeward trip, after an extended visit with friends on this side of the Atlantic.

Miss Alice Learmonth has returned to her home here after spending the summer with friends in the West.

Mrs. Runnels and family, accompanied by Mrs. A. Smith and daughter, have been spending a pleasant holiday, camping at Rice Lake.

Mr. and Mrs. Reid of Peterborough, spent a day recently visiting the latter's sister, Mrs. Wm. Oakman.

Mr. J. Greenley of Campbellford, visited his brother, Mr. Wm. Greenley, town.

Mr. H. Collins has returned from the hospital, Peterborough, where he was undergoing an operation.

Miss Libbie Steele left last week for her home in Belleville, after spending a pleasant holiday with friends in the vicinity.

Mr. Lew Spence of Haileybury, is holidaying at the home of Mr. and and Mrs. C. Huycke.

Mr. J. Stevenson, Sr., is visiting at the home of Mrs. Geo. Brooks, near Toronto.

Mr. and Mrs. Wm. Collins, who have been the guests of Mr. and Mrs. H. Collins, left for their home in Scranton, Pa., during the past week.

Mrs. (Dr.) Edmison and children, are spending a few weeks at her home in Toronto.

Mrs. Nelson Beavis spent the past week with her brother in Toronto.

Mr. and Mrs. Wm. Rice of Warkworth, were in town last week visiting the latter's mother.

Mrs. Orr has returned after visiting friends in Picton, etc.

Miss A. Walsh, who is the guest of her parents, Mr. and Mrs. Roy Fleming, spent the past week in Toronto and vicinity.

Mr. and Mrs. Edmison of Kincardine, have been guests of Mr. and Mrs. (Dr.) Edmison.

Mr. Edmison occupied the pulpit of the Presbyterian Church on Sunday last, taking both services.

Mr. H. Andrews of Havelock, was in town last week.

Mrs. R. Fife and Miss E. Burgess of Norwood, were in this vicinity during the past week.

Mr. and Mrs. Jas. Andrews, Mr. and Mrs. John McNaughton, Mr. and Mrs. Stewart and the Misses Drain, of Norwood, were in town last week.

Miss Annie Christie, Peterborough, visited at the home of Mr. and Mrs. N. Beavis.

Miss Mary McKee has returned from a pleasant outing at Chemong.

# Many Women Overcome

**Even the Papal Legate Has to Be Taken Out Into the Fresh Air—Visitors Kiss the Cardinal's Ring and Then Pass on to Be Received by Prelates and the Cabinet Ministers—Visit to the Jail.**

Montreal, Sept. 8.—A tremendous crowd gathered around the Windsor Hotel last night watching the carriages, cabs, taxis and other conveyances depositing their guests and then passing on to join the gradually growing line extending over several blocks. All eyes were watching for Cardinal Vannutelli, and it was with difficulty the police kept the crowd back as they pushed in on the cordon keeping clear the line from the curb to the main entrance of the hotel. When the doors were open the crush became terrible, all pressing toward the door. The heat and pressure became so great that many women had to be passed out by the windows. About 10.30 the cardinal himself was partly overcome, and he had to go outside for a breath of air, returning later and staying beyond the time set for the close of the reception, 11 o'clock.

The cardinal sat surrounded by his suite and the bishops. As the crowd came in they knelt down one by one and kissed the ring of the representative of his holiness the Pope. Then they passed on to be greeted in turn by the Secretary of State, Hon. Chas. Murphy, Archbishop Bruchesi of Montreal, Sir Richard Cartwright, Hon. L. P. Brodeur, Hon. Sydney Fisher and Sir Frederick Borden were also present. Over the door through which the people passed before the cardinal were the Union Jack and the papal colors.

Amid the pomp and splendor of the Eucharistic proceedings, the "little ones" of the community are not forgotten. Archbishop Bruchesi is renowned throughout Canada for many virtues, but for none more than the care and solicitude he has always shown for those unfortunates who at times fill the wards of the jail at Montreal. Twice a year his grace visits this institution.

It surprised none, therefore, when the jail was scheduled yesterday as the first point of call for the cardinal and suite. In preparation for the event the men inmates were gathered in the chapel of the institution, and at 7.30 His Eminence Cardinal Vannutelli, assisted by Archbishop Bruchesi and Mgr. Tampiere, said mass. The distinguished party were received by Sheriff Lemieux and Governor Vallee.

After mass, his eminence addressed the inmates, his kind words being interpreted by his grace of Montreal. He had come, said the cardinal, at the invitation of the archbishop to speak to them. All men are brothers in Jesus Christ, and no man lived who could say he was without fault. He had come to them, blessing them and acting for the holy father, and in the name of Him who said: "He who visits one of those in prison visits Me." Those listening to him could not be present at the grand ceremonies outside, but they could be present in spirit. All men are prisoners on earth until the heavenly Father released them from the valley of tears.

The appropriate words of the distinguished visitor greatly moved those to whom they were addressed.

### To Suspend Gold Coinage.

Washington, Sept. 8.—Gold coinage will be suspended in the United States for an indefinite period if present plans are adopted by the Treasury Department. By the substitution of gold certificates for all bullion turned into the mint $300,000 to $500,000 a year will be saved. It has been found that foreign markets to save expense to themselves use U. S. gold to settle commercial balances.

### Premier Home Again.

Ottawa, Sept. 8.—Sir Wilfrid Laurier returned to Ottawa yesterday afternoon, having concluded his political tour. Addresses in French and English were presented to him by the Liberal Association. On Saturday he goes to Montreal, to attend the Eucharistic Congress.

### An American Scheme.

Washington, Sept. 8.—A member of a well-known London firm says that the order compelling foreign manufacturers to deposit samples of goods in advance of shipments was part of an American textile manufacturing ring's attempt to pirate British designs and coloring.

### Fearful Record of Crime.

Rome, Sept. 8.—One of the most startling reigns of crime in the history of the Black Hand in Italy has come to light in the investigation into the murder at Pallaro, Calabria, of Policeman Guiseppe Rovolino, his wife and six children. Official figures given out yesterday show that in July and August there were 41 murders in the Pallaro district, 78 woundings, 30 bomb explosions, six kidnappings, and innumerable blackmailings.

# Britain Wins Out

**Arbitration at The Hague Results In an Award Which Says That the Three-Mile Limit Must Be Based on Headlands—Fishing Regulations Need Not Be Concurred In by the United States.**

The Hague, Sept. 8.—In the gloomy little chamber of the permanent arbitration court, five judges, who since June 1 have considered the Newfoundland fisheries dispute between Great Britain and the United States, pronounced yesterday afternoon their verdict. The decision gives neither principal a clear cut award, but of the seven questions decided, the tribunal supports the United States in five and Great Britain in the other two.

This decision determines finally the disputes arising from the British-American treaty of 1818, which have caused continuous diplomatic controversies.

The British are pleased with the award because the three-mile limit is based on headlands instead of following the sinuousities of the coast, and in saving the sovereignty by having confirmed Great Britain's right to make reasonable fisheries regulations without the concurrence of the United States. These points are regarded as the most important.

Americans here are satisfied with the verdict, but on question No. 1, the United States has raised certain questions of equity, which will be submitted to a special commission.

This point, upon which Great Britain is also sustained, embodied the question of whether any local law adopted by a British colony must be submitted for approval to any foreign power having a treaty on a similar subject with the Imperial Government.

The provisions of the award apply not only to future legislation by the Imperial Government and the colonies, but require that the existing statutes and regulations to which the Americans have objected be submitted to a commission which shall judge of their reasonableness, necessity and fairness laid down by the tribunal.

In connection with its conclusion that the reasonableness of the fishing regulations must be determined through expert information, the tribunal directs the appointment of a commission of specialists, and calls upon Great Britain and the United States to designate their commissioners within one month, and appoints as a third commissioner Dr. Hook, scientific adviser of fisheries of the Netherlands.

The court was unanimous on all questions except the fifth, as to which Luis Drago, the member from the Argentine Republic, gave a dissenting opinion, largely supporting American contentions.

The court finds that the claims of Great Britain to a right to prohibit American vessels from employing foreigners, and to impose lighthouse, customs and other duties, are unauthorized by the treaty of 1818.

The tribunal finds that the regulation of the manner, time and implements of fishing which Great Britain or Newfoundland enforces must be reasonable and appropriate, but Great Britain cannot be the sole judge of their reasonableness. In case of disagreement the question must be determined by an impartial tribunal.

On question six, which presented the claim of Great Britain to the right to exclude fishermen from the bays and harbors on the treaty coasts of Newfoundland and the Magdalen Islands, the tribunal declares without qualification in favor of the United States.

On question five, which was decided adversely to the United States, the court followed the strict letter of the British-American treaty, whereby America renounced the right to fish in any bays on non-treaty coasts. The court holds that this renunciation applied to all bays, irrespective of their size, instead of to small bays only, as was contended by the Americans.

Regarding point one, the tribunal holds that the right of Great Britain to make fishing regulations without the consent of America, is inherent in the former's sovereignty, but the exercise of this right must not violate the treaty of 1818 or be so framed as to give the local fishermen an advantage over the Americans.

### Satisfaction at Ottawa.

Ottawa, Sept. 8.—The decision in the fisheries case at The Hague is generally regarded here as a distinct victory for the British case.

The establishment of the claim of complete autonomy in framing regulations, so long denied by the United States, is regarded with extreme satisfaction.

In the absence of an official intimation from Hon. A. B. Aylesworth, J. S. Ewart, K.C., Canadian counsel in the case, would express no general opinion on the award. Mr. Ewart spent 18 months in preparing the case and is openly disappointed at the failure of the tribunal to unanimously define the meaning of the word "bay," and expressed a hope that the next award might throw light upon the decision in that regard.

Good, Better or Best?
(A VITAL DIFFERENCE IN BREADS

QUALITY you know is comparative. Just as much so in bread, as in woolens or linens.

If you make bread at all you naturally want it to be good—as good as, or better than your neighbor's.

But is your bread as good as it ought to be? Does it furnish its full quantum of health and strength? Is it nutritious as well as delicious?

Ordinary flour makes fairly good looking bread. But if you care for *food value*, for nutrition, for digestibility, for bone and muscle and blood building quality, you will want a flour rich in the highest quality of *gluten*. You will want the flour that makes bread not only good-to-look-at, but also makes it strength-producing, health-producing.

But where can you get such flour and how can you tell it from the kind that isn't nourishing?

The safe way is to get OGILVIE'S "ROYAL HOUSEHOLD". Then you *can't* make a mistake.

"ROYAL HOUSEHOLD" is the *finest flour in the world* and makes the best bread in the world.

And it is just as good for Pastry as it is for Bread. It is the one flour which has proved an unqualified success for every household purpose. And its absolute uniformity guarantees you against failure—

ROYAL HOUSEHOLD FLOUR isn't just ordinary wheat sent to an ordinary mill and ground by the ordinary process. It is Manitoba Red Fyfe Wheat which is especially rich in high quality gluten, scientifically milled and subjected to scientific chemical tests as well as baking tests before it comes to you in sack or barrel, etc.

No wonder "ROYAL HOUSEHOLD" makes the finest and most nourishing bread. No wonder it makes the most delicious and healthful pies, cakes, biscuits, muffins, rolls.

Bread made from ROYAL HOUSEHOLD FLOUR is *vastly* more nourishing than bread made from ordinary flour. Also it is lighter, flakier, more delicious as well as more nutritious.

Order "ROYAL HOUSEHOLD" at once. Don't delay. The sooner you commence using this finest of all flours the better for your family.

# Faith Cure Discussed

**Bishop Worrell's Suggestion That Another Session of the Anglican Congress Be Held Five Years Hence Is Unanimously Adopted—Healing as a Function of Clergy Arouses Difference of Opinion**

Halifax, Sept. 8.—His Lordship of Toronto, Bishop Sweeny, had a large contract proposed to him yesterday afternoon during the board of trade excursion around the harbor given to those attending the Church of England Congress on board the "Lady Laurier." Bishop Worrell submitted a resolution, which was unanimously adopted, that a committee be appointed by the primate to prepare for another congress to be held five years hence. It was generally agreed, and added as a rider that the next congress be held in Toronto, and all who spoke desired that St. Alban's Cathedral be ready for dedication then, as Halifax Cathedral has been on this occasion. A wealthy diocese like Toronto should have no difficulty, it was believed, when such a comparatively small place as Halifax, with its fifty-five thousand, had succeeded.

The closing mass meeting in the cathedral last night was addressed by Rev. Paterson Smyth, on the call to Bible study, Bishop Brent on the call to prayer and Bishop Ingram on the call to service.

The ministry of healing occupied section A during the morning. There were decided differences of opinion, in the absence of experience. A few who had had results, which the medical men questioned, were positive as to the merits of the Emanuel movement. Bishop Perrin, who presided, declared himself in favor of the introduction of an office for the unction of the sick. Rev. Lyman Pierson, Northampton, Mass., was the most enthusiastic supporter. He thought healing might be restored to the ministry. He did not carry the meeting very far with him, and the paper contributed by Sir Dyce Duckworth, St. Bartholomew's Hospital, read by Rev. F. S. Smith, depreciated the whole business, but evidently, as the chairman said, under a misapprehension.

### Paid Price of Pessimism.

Winnipeg, Sept. 8.—Up to the present 9,500 farm laborers have been brought into the west from eastern provinces by the C.P.R. Up to this time last year the number exceeded 20,000. The cause of the falling off is attributed by the C.P.R. officials to the fact that farmers, during the early part of the season, estimated that their crops this year would not be up to the standard of other years. On these grounds they did not make application early in the season for men.

It is estimated that 10,000 men and more are needed in order that the wheat growers may have sufficient help in completing the harvesting of the crops.

### GREAT ARTIST DIES.

**Holman Hunt Passes Away at an Advanced Age.**

London, Sept. 8.—William Holman Hunt, celebrated painter, and one of the three founders of the Pre-Raphaelite movement, died here yesterday, aged 83. Holman Hunt began exhibiting his pictures in 1846. Many of the greatest of English paintings are credited to his brush. He received many decorations, among them the Order of Merit.

Toronto, Sept. 8.—The late Holman Hunt's great picture "The Light of the World," was exhibited in Toronto in the O.S.A. gallery several years ago. This painting, which had been recently finished, was an enlarged replica of the original painted in 1853-54, while the artist was still a member of that unique band "The Pre-Raphaelite Brotherhood," and it showed all the charm, as well as all the defects of their theories on art. It was freighted with allegory in its smallest detail most of it quite hidden from ordinary mortals. The picture, "The Shadow of Death," now at the gallery of the Toronto Exhibition, is another example of the artist's peculiar mysticism and mannerisms, one of the theories of Pre-Raphaelites being that every object must be painted with the greatest truth and fidelity to nature, whether important or unimportant. Combined with this was an unconventional realism in the treatment of imaginative subjects.

When an old man of 78, Holman Hunt exhibited his last picture "The Lady of Shalott." He was ranked as one of the foremost painters of religious subjects.

### Attacked by a Lion.

St. John, N.B., Sept. 8.—Great excitement was caused in the Feraris wild animal show tent during the last performance Tuesday night. Prof. Clark was engaged in doing his act in the cage of lions, when one of them turned savagely on him, inflicting painful injuries on one of his arms. He displayed great pluck, firing off his revolver, containing blank cartridges, several times in the face of the infuriated animal.

### A Cloak for Smuggling.

Windsor, Sept. 8.—Windsor will likely impose a very heavy license on Chinese laundries in the city. Many laundries are believed to be nothing less than places of refuge for birds of passage awaiting an opportunity to be smuggled into the United States at this point.

# IN THE WORLD OF SPORT

## The Crack Calgary Team May Play in Peterborough

The Calgary team which is making such a fine showing in the People's Shield competition at Toronto, may be seen here in a game against the Canadian General Electric team, champions of the Midland League, next week. The Electricians are thinking over the matter, and if they get any encouragement from the sporting fraternity will arrange the game. It would be necessary to entertain the visitors during their stay in Peterborough, and if the C.G.E. men secure some assistance in this they will bring the Westerners here. The Calgary team are the cleverest exponents of the soccer game that have been seen in Canada for some time and their playing would undoubtedly be a revelation to local followers of the game. It is to be hoped that the game may be arranged.

## Thirteen Is Hoodoo All Right Ask C. G. E. Soccer Team

Is there anything in that unlucky "13" theory? Ask Manager Bill Milburn of the C.G.E. soccer team.

"It's no wonder we lost in Toronto," remarks the Electricians' manager. "It was our 13th game, 13 of us went up in the train together, 13 sat down to dinner before the game and we had 13 men in uniform on the field."

## Sam Langford Hands Bad Trimming To Joe Jeannette

Boston, Sept. 7.—Sam Langford, the short, dusky gladiator, defeated his old-time rival, Joe Jeannette, in a 15-round battle last night at the Armoury A. C. From the second that Referee Charley White called "time" it was a real fight. Both men have met so often that this was about the last time the public would fall, so they wanted to make it a decisive fight.

Jeannette had thirteen pounds advantage over his short opponent, but that made no difference to Sam. He went after his tall rival like a wildcat and gave him the worst trimming he received in many years.

Repeatedly Langford would shoot over his terrible left to Jeannette's kidneys and then shift his right to the jaw. Jeannette broke ground several times, but he was game to come up looking for more. Langford really got tired slamming Jeannette.

In the tenth mixing he caught Jeannette off his guard and let loose both fists. Like piston rods they kept boring in on Jeannette's body and the crowd expected to see the big fellow topple over. He staggered around the ring with Langford right after him. "Bang" would go Sam's right and and Jeannette's head would jolt back like a shot. Then the terrible left would reach the stomach and Jeannette began to bang out the distress signals. He took a terrible beating in this session and all the steam was lacking from his punches in the next few rounds.

When they toed the mark Langford opened hostilities by a lightning left jab that reached the mark. Jeannette retaliated and both got wary. In the next round Langford started his play for the body. He got in some deadly wallops and riled Jeannette so much that he missed landing some mighty swings.

For the next seven rounds Langford kept up his pitiless body-punching, while Jeannette played mostly for the face with a stomach punch thrown in now and then.

After Jeannette got his beating in the tenth he just fought to stay the distance. At every opportunity he grabbed hold of Langford and hung on until the referee was forced to separate them.

In the twelfth Langford started out to finish his man. Jeannette seemed to get a slight lease of life and for a minute they mixed up in furious fashion. Jeannette was the first to quit and he dashed into a clinch. The thirteenth and fourteenth were all Langford's.

In the latter he caught Jeannette flush on the jaw and the big fellow's head rocked for a moment. But he tried to fight back and managed to stay the limit. The final mixing was a corker. Langford got both hands in play and his gloves seemed to beat a steady tattoo on Jeannette's body. From face to face they moved in lightning style while the beaten man was doing his best to save himself from punishment.

A second before the bell rang Langford smashed Jeannette once more on the jaw and the big fellow slowly tottered. The bell clanged, his seconds jumped into the ring, and what looked to be a possible knock-out was averted.

### RUGBY

The Peterborough Rugby Club will have the first practice of the season at Riverside Park on Saturday afternoon at 3.30 o'clock. Every player who intends to play the game this year is expected to be out and in uniform. If the club is to accomplish anything this season it will be necessary to get down to hard work early in the season and not put off the practice until the schedule is arranged, and the date of the first game only a few days away. Furthermore, there is no use of coming to practice in a high collar and a pair of patent leather pumps.

**A Public Funeral for Minister.**

Fort William, Sept. 8.—A public funeral was held here yesterday morning in Wesley Methodist Church over the remains of Rev. W. R. Millyard, president of the London Conference, who died here Tuesday while on his way home from the general conference.

**Called to Windsor.**

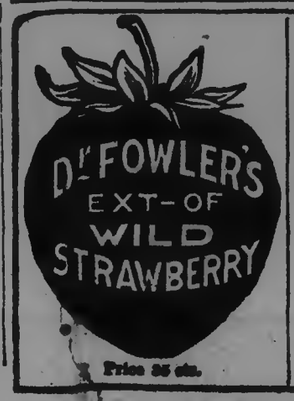
Windsor, Sept. 8.—Rev. Arthur Carlisle, rector of Holy Trinity Church, Lucan, has accepted a call to All Saints' Church in Windsor, to succeed Rev. F. A. H. Chadwick, who went to Vancouver a short time ago.

**Floods In Japan.**

Tokio, Sept. 8.—Serious floods threaten the cities of Osaka and Kobe on the Island of Hondo. River banks are collapsing, and much damage is probable. High water also is doing serious damage in the northern part of Main Island.

**Will Be Tried as Spy.**

Portsmouth, Sept. 8.—A warrant was issued yesterday against Lieut. Helm of the 21st Nasau (German) Regiment of Pioneers, who is alleged to be a German spy. He will be tried by a civil court, under the official secrets act.



Price 35 cts.

### BRAKEMAN BLAMED.

**Witnesses at Durant Inquest Say Lights Were Not On.**

Durand, Mich., Sept. 8.—The inquest into the wreck on the Grand Trunk at Duffield, four miles east of here, on Aug. 25, in which nine passengers, many of them Canadians, lost their lives, was resumed here yesterday. Both the state and the railway company were represented by an imposing array of legal talent.

Attorney-General Franz Kuhn, Deputy Attorney-General Chase, and all the members of the Michigan Railway Commission were in attendance for the people, while Harrison Geer, general counsel for the Grand Trunk, and a host of lesser officials, were on hand to look after the railway's interests.

Twenty-seven witnesses are yet to be examined, and, although both sides are anxious to finish, but ten of these were heard up to 6 o'clock, when an adjournment was taken until this morning.

Yesterday's testimony could hardly be considered as helping the railway's case; rather was it weakened, because of the fact that mature and disinterested witnesses stated positively that no tail lights were shown by No. 14 when she pulled out of Durand on the night of Aug. 24.

One witness, Herbert Bixby of Flint, who was a passenger on No. 14, testified that when the train came to a stop he put his head out of the window to see what was delaying it. While looking he saw No. 4 start out from Durand station, and took his head in just as the crash came. He heard no torpedo explode.

Commissioner Scully, in cross-examination of several witnesses, started out on a new tack, by demanding of those who testified, as to whether their expenses while at Durand were not being paid by the Grand Trunk. Miss Hazel Felton admitted that she "understood the company would take care of all that."

Samuel Hawkinson of Palisade, Mich., gave some rather important evidence. He was on train 14, and when it stopped for repairs to the engine Hawkinson got out and sat on the bank near by. He saw Brakeman Graham go some 350 feet back with a red lantern in his hand, but said no attempt was made to signal with it.

"He just stood still," the witness said. When No. 4 was a short distance away the red light was waved a few times frantically, and then the train swept by and the collision followed. Hawkinson was of the opinion that if the engineer of the on-coming train had shut off steam as soon as he caught sight of the danger signal, he might have avoided hitting No. 14 ahead. Witness saw only one fire extinguisher on the ground, and that could not be used, being out of order.

A. B. Emmons, another traveler, said he was sure No. 14 carried no tail lights, as he had watched her pull out of the station here and the absence of lights excited his interest. Later, when he heard of the wreck he recalled the absence of rear lights.

Charles Libbey, a gate tender for the Grand Trunk here, testified to having seen No. 14 pull out with the usual tail lights "sitting on the rear platform, instead of being on the hooks at the side of the car, as they should have been."

**Putting Screws on Contractors.**

Albany, N.Y., Sept. 8.—Admitting that at least fifty per cent. of the good roads contracts had been raised during the administration of Frederick Skene as state engineer and surveyor in 1907 and 1908, W. T. Jerome, counsel for Skene, in his address yesterday to the jury trying Skene on charges of grand larceny, contended that C. F. O'Neil was made confidential assistant to Skene by the power of Tammany Hall for the purpose of "putting the screws to contractors."

**Queen's is Expanding.**

Kingston, Sept. 8.—Queen's University will open September 28, and it is expected that 1,700 students will register. An attendance of 2,000 is looked for in three years. The staffs of the various faculties have been increased, but several assistants are necessary in arts. Labor strikes prevent the opening of the chemistry building this season.

Suffering from a fractured skull, James Campsall, a miner, is in the General Hospital, and will likely die. While at work in the Feldspar Mine at Verona, a piece of rock fell on his head.

**Looks Black for Crippen.**

London, Sept. 8.—Ethel Leneve has confessed to all that she knows concerning the fate of Belle Elmore Crippen. When the preliminary hearing of the prisoners is continued, Miss Leneve's confession, which is in affidavit form, will be presented as the principal evidence of the prosecution. It is understood that Mr. Thomas Humphreys, who is conducting the prosecution, will then consent to have the girl released on bail, provided she can find a bondsman.

When the charge of murder against the girl was reduced to one of being an accessory after the fact, it became evident that Miss Leneve was being approached. If, as now seems certain, she consents to turn King's evidence, she will escape with nominal punishment. If, however she should be found guilty of being an accessory after the fact, she would be liable to be hanged, though the sentence in such case is usually twenty years.

With the girl's testimony thrown in to the balance against him, the case looks black for Crippen.

### MARKET REPORTS.

NEW YORK, Sept. 7.—Butter, firmer; receipts, 18,055. Creamery specials, 32c to 32½c; extras, 31c.

Cheese—Unsettled; unchanged; receipts, 7598.

Eggs—Firmer; receipts, 20,212; state, Pennsylvania and nearby hennery, white, 30c to 34c; do., gathered white, 27c to 30c; do., hennery, brown, 28c to 30c; do., gathered brown, 26c to 28c; fresh gathered, extra first, 25c to 26c; do., first, 23c to 24c; do., seconds, 21c to 22c.

### CATTLE MARKETS.

**Hogs 10c to 20c Lower at Buffalo—Cattle Quiet.**

NEW YORK, Sept. 7.—London and Liverpool cables quote American cattle steady at 12¾c to 15c per pound, dressed weight; refrigerator beef steady, at 10¾c to 10⅞c per pound.

**Montreal Live Stock.**

MONTREAL, Sept. 7.—(Special.)—At the Canadian Pacific live stock market this morning the offerings of live stock were 1300 cattle, 500 sheep and lambs, 1325 hogs and 200 calves. Prices have declined fully 1½c per pound since Monday. Choice steers sold at 5½c; good at 5c to 5¼c; fair at 4½c to 4¾c, and common at 4c to 4⅛c per pound. Cows brought from 4c to 4½c, and bulls of medium quality sold at 3¾c to 3¾c per pound.

On account of the increased receipts of hogs at this market, a weaker feeling prevailed, and prices declined 25c per 100 lbs. Sales of selected lots were made at $9 to $9.25 per 100 lbs., weighed off cars. The market for sheep was also weaker, and prices ruled lower under a fair demand, at 3½c to 4c per lb. Lambs were steady, and sold well at 5½c to 6c per lb. The trade in calves was active at prices ranging from $3 to $12 each, as to size and quality.

At the Montreal Stock Yards west end market the receipts of live stock were 825 cattle, 425 sheep and lambs, 1,125 hogs and 235 calves. Prices realized were much the same as those quoted above, with the exception of hogs, which were stronger and 25c per 100 lbs. higher than Monday, with sales of selected lots at $9.50 per 100 lbs., weighed off cars.

**East Buffalo Cattle Market.**

EAST BUFFALO, Sept. 7.—Cattle — Receipts, 100 head; quiet, prices unchanged.

Veals—Receipts, 150 head; active and steady, $4.50 to $10.50.

Hogs—Receipts, 3300 head; active; pigs, steady; others, 10c to 20c lower; heavy and mixed, $10 to $10.10; yorkers, $10.10 to $10.20; pigs, $10.15 to $10.30; roughs, $8.50 to $8.75; stags, $6.50 to $7.50; dairies, $9.75 to $10.15.

Sheep and Lambs—Receipts, 600 head; active ewes, 10c; lambs, 15c to 25c higher; lambs, $5 to $7.15; ewes, $4 to $4.50.

**New York Live Stock.**

NEW YORK, Sept. 7.—Beeves—Receipts, 1800; steers, slow, steady; bulls, easier; cows, steady; steers, $5.50 to $7.50; oxen, $5; cows, $2.50 to $5; bulls, $3.50 to $5; dressed beef, slow, 8c to 12c. Exports of cattle, 100 sheep and 1050 quarters of beef.

Calves—Receipts, 1217; veals, steady; grassers and buttermilks, steady; westerns, easy; veals, 8c to 11c; culls, $6 to $7.50; grassers and buttermilks, $4 to $5; westerns, $5 to $7; dressed calves, steady; city dressed veals, 14½c to 17c; country dressed, 10c to 15c.

Sheep and Lambs—Receipts, 9700; sheep, steady; lambs, steady to weak; five cars unsold; sheep, $3 to $4.50; culls, $2.50; lambs, $6 to $7.25; culls, $5.

Hogs—Receipts, 5150; steady, at $9.70 to $10 for state hogs.

**Chicago Live Stock.**

CHICAGO, Sept. 7.—Cattle—Receipts, 13,000; market steady; beeves, $3.30 to $8.40; Texas steers, $3.75 to $6; western steers, $4.50 to $7.20; stockers and feeders, $4 to $6.20; cows and heifers, $3.40 to $6.60; calves, $7 to $9.25.

Hogs—Receipts, 21,000; market weak to 15c lower; light, $9.25 to $9.60; mixed, $9.40 to $9.75; heavy, $9.75 to $9.85; roughs, $9.00 to $9.75; good to choice, heavy, $9.80 to $9.60; pigs, $8.65 to $9.60; bulk of sales, $9.30 to $9.50.

Sheep and Lambs—Receipts, 25,000; market steady; native, $2.85 to $4.60; western, $3.25 to $4.50; yearlings, $4.75 to $5.75; lambs, native, $5.25 to $7.50; western, $5.25 to $7.05.

**A Standard of Pronunciation.**

London, Sept. 8.—At the British Association Wesley Mills, formerly of McGill, expressed the opinion that some standard pronunciation should be established, particularly with regard to the use of the vowel and the vowel's relation to certain consonants.

A standard might be registered on a gramaphone, with an imperial body making recommendations on the subject. His views met with no acceptance.

**Supposed Painter Was Wealthy.**

Sterling, Colo., Sept. 8.—That Frank Nichols of Momence, Ill., a member of a crew of painters at work on the Burlington roundhouse here, was not the humble craftsman he pretended to be, but a wealthy man studying sociological problems, came to light through a search of the man's effects after he had been killed by a fall from a ladder on which he was at work.

**Fatal Wreck on Great Northern.**

Kalispell, Mont., Sept. 8.—Two persons were killed, fifteen were seriously injured, five perhaps fatally, and twenty others suffered minor injuries in the wreck of an eastbound Burlington train on the Great Northern yesterday at Corama, 20 miles east of Kalispell. The train was en route from Seattle to Kansas City.

**Accident on Interurban.**

Mansfield, Ohio, Sept. 8.—Twenty passengers were injured, some seriously, when an interurban car on the Cleveland and Southwestern road jumped the track and turned on its side at the city line yesterday. The car was traveling at 40 miles an hour.

**Still in the Running.**

Great Caesar crossed the Hellespont,
A river small, though wet.
Great Caesar now is dead and gone,
But the Hellespont's there yet.
—Chicago News.

PHOSPHONOL

THE

Electric Restorer for Men

Restores every nerve in the body to its proper tension; restores vim and vitality. Premature decay and all sexual weakness averted at once. Phosphonol will make you a new man. Price $3.00 a box, or two for $5.00. Mailed to any address on receipt of price. The Scobell Drug Co., St. Catharines, Ont

**Motor Boat Victims Found.**

Brockville, Sept. 8.—The bodies of J. J. Letoile and N. C. Brander, the victims of Tuesday's motor boat accident, were taken from the St. Lawrence yesterday afternoon, in close proximity to where the craft foundered in the gale. Letoile's body will be shipped to Ottawa, and Brander's to St. Paul, Minn.

Inspector Smith of the Thiel Agency has arrived in town to take up the unfinished work of Detective Letoile in the matter of the contemplated prosecutions arising out of the riot at the G.T.R. depot during the strike.

**Denounced His Parishioner.**

Poughkeepsie, N.Y., Sept. 8.—That Rev. W. H. Hubbard, former pastor of the fashionable Mill street Baptist Church of this city, was well within his rights when he denounced from the pulpit Mrs. Helen H. Haggart, a wealthy member of his congregation for permitting her children to dance and play cards, was the decision of the Central Hudson Baptist Association yesterday.

Leading members of the church say they will withdraw and start another church if the trustees obey the mandate of the Baptist Association.

**Shot the Burglar.**

New York, Sept. 8.—About to clamber through a window, which he had just opened, into a down town flat early yesterday morning, a burglar was shot and instantly killed, falling part way into the room. John Guasalo, who with his brother-in-law, occupied the flat, handled the gun.

**Mackenzie King at The Hague.**

The Hague, Sept. 8.—The International Congress of Social and Industrial Insurance is in session here W. L. Mackenzie King, Canadian Minister of Labor, is the representative from Canada.

**Altitude and Labor.**

It has been found in Switzerland that in building a railway laborers can work only one-third as long at a height of 10,000 feet as a mile lower.

**A Golden Bath.**

Mme. du Barry when at the zenith of her power had a bath so constructed that on touching a tap a cascade of golden louis from a reservoir that was always kept well filled mingled with the flow of scented water. This device was fashioned, it is said, to represent the legend of Danae.

**His Other Name.**

The candidate for the place of coachman had been weighed and was not wanting, according to his new mistress' lights. Then the question of his name, which was Patrick, came up. The mistress objected to it in her heart, so she explained that it was her custom always to call her coachman by his family name. Had he any objections?

"Not the slightest, ma'am."

"What is your last name, Patrick?"

"Fitzpatrick, ma'am."

**Anchored.**

A little chap four years of age met with the misfortune to have his hat blown into the river. When he reached home his father said to him:

"It's a wonder you didn't blow overboard too."

"I couldn't," was the quick response. "I was fastened to my feet!"

**The Hurry or the Halt.**

"Been having more trouble with your automobile?"

"Yes," replied Mr. Chuggins.

"Were you arrested for speeding?"

"No. That was yesterday. Today I was arrested for blocking traffic."—Washington Star.

**Last Longings of Summer.**

Oh, for a cake of ice as large as any berg afloat!
Oh, for a lake of lemonade that might sustain a boat!
Oh, for a wind of frosty tang from off a glacier chill!
Oh, for a champagne at cooling shores and a friend to pay the bill!
—Philadelphia Ledger.

Dr. de Van's Female Pills

A reliable regulator, never fails. While these pills are exceedingly powerful in regulating the generative portion of the female system, they are strictly safe to use. Refuse all cheap imitations. Dr. de Van's are sold at $5.00 a box, or three for $10.00. Mailed to any address. The Scobell Drug Co., St. Catharines, Ont.

Miss Mary Allen is visiting friends in Wooler, Ont.

Mr. Roger Young of Vancouver, is visiting friends here.

Mr. Robert Garvey of Cranbrook, B.C., is spending a few days at his home here.

## A ROMANCE IN SIGHT.

**Started by the Unmasking of the Pair of Frauds.**

Not until boarding houses cease to exist will all their romances be written. Shabby romances, some of them are, like that of the young woman who got so tired of being called "poor thing" because she received no invitations and had to eat all her meals at the boarding house table that she took to eating alone once in awhile at a cheap restaurant and then brazenly lying about the friends who had invited her to dinner.

There was a young man in that house who never went anywhere either. The first night the girl stayed out life's desolation nearly overpowered him. "Even that poor little white faced soul has made friends who want her," he said. "Nobody wants me. I'm no good on earth."

Then on rare occasions his place at the table was vacant. "New friends?" asked the landlady.

"Yes," fled the young man.

One night the man and the girl met in a twenty-five cent restaurant. They blushed; they feinted; they finally confessed.

"We're a pair of frauds," said the girl. "It's awful to think that tonight when we go home we will have to swear that we have been dining with friends."

"Well," said the young man, "ain't we?"—New York Press.

## SHE WAS AGGRESSIVE.

**Lucky For the Little Man He Was Not Her Husband.**

The lady in the offside corner of the tramcar possessed a truculent air and a discolored eye.

"Funny thing any one can't take a penny ride without everybody glarin' at 'em," she remarked, fixing a small gentleman wearing gray whiskers and a somewhat rusty top hat with her normal optic.

The small gentleman suddenly became interested in a soap advertisement.

"If any one can't 'ave a black eye without Tom, Dick and Harry askin' questions things are comin' to a pretty pass," continued the lady.

Silence, allied with soap advertisement study, though eminently discreet, was ineffective.

"You I'm a-talkin' to." The lady prodded the small gentleman's knee with her umbrella. "Bin settin' there this last ten minutes, you 'ave, wonderin' if my 'usban' gives it to me. If it'll ease yer mind, 'e did. Is there anything else?"

"Madam," the small gentleman commenced. "had I been your husband"—

"I should 'a' got off at th' cemetery with a wreath instead o' goin' ter the 'orsepital with a visitor's ticket," snapped the lady, "and the wreath wouldn't 'a' been expensive either." — London Ideas.

**He Knew.**

"Can't you make a cake without referring to a cookbook?"

"I have to see what ingredients to use."

"Well, don't use ingredients! I prefer currants!"—Spokane Spokesman-Review.

**The Dramatic Situation.**

Where is the play of Shakespeare's day?
Why fades the footlights' magic flame?
Alas, the light grows cold and gray,
And tarnished lies a Garrick's name.
And moving pictures, so they say,
May even film the Hall of Fame!
—Cleveland Plain Dealer.

**Electric Restorer for Men** restores every nerve in the body to its proper tension; restores vim and vitality. Premature decay and all sexual weakness averted at once. # Degrees Are Conferred

**Bishops at Bicentenary at Halifax Declare That Protestantism Has Been First Christian Return to Sound Methods of Thinking — Several Prelates Are Recipients of Degrees at King's College.**

Halifax, Sept. 9.—"Balmoral Castle, —I have read with much satisfaction the telegram which you have sent me on behalf of the Church of England in Canada, holding congress in Halifax, and I thank you most warmly for the assurance of loyalty to my throne, to which it gives expression.

(Sgd.) "George R.I."

This telegram was received at the conclusion of the luncheon given in Edge Hill College for Girls, at Windsor yesterday, to the members of the church congress, who went to attend the special convocation of King's College.

The reports of some of the speeches at the Montreal congress have aroused criticism, especially the statement that one-half of the Church of England was occupied with agnostics and politics, and the other half was going over to Rome as fast as it could.

"Not a word of truth in it," said one indignant Canadian bishop, not long elevated. The Bishop of London was seen but he laughingly put it aside as unworthy of serious notice. "It was Bishop Creighton, who was a much better scholar than I can profess to be," he remarked, "who said the reformation was a return to sound learning, and it will be found to be so. I heartily agree with him."

Dr. Ingram, perhaps, bore the matter in mind, for in his address after convocation, said: "We are not ashamed of the truths of the Church of England," was one of three points he dwelt upon. "I think I saw in the papers something about the Church of England going back to Rome. I couldn't help smiling. There is about as much chance of the church going back to Rome as there is of it going back to the Druids."

He thought there was more and more a turning of the sections of the church to each other, and they were learning to teach the great catholic, not Roman Catholic, truths.

After luncheon, Bishop Worrell called on Bishop Perrin of British Columbia, who made a strong appeal for holding the general synod in the west as soon as possible.

A petition has been circulated and largely signed, asking that next year's synod be held in Victoria. Dr. Perrin was positive that after the opening of the Panama Canal the Pacific coast would become the centre of Canadian life.

Canon Powell, formerly of North Toronto, the new president of King's College, looked the youngest man in the room, and a more picturesque ceremony than the convocation proceedings has never been enacted. A commencement had just been made, when the whole audience rose, and the aged Archbishop of Ottawa, clothed in purple and scarlet, crowned with his great mitre, and preceded by his cross-bearer, came in. This venerable prelate presently kneeled before the youthful array of color, in which scarlet predominated.

Degrees were conferred on Bishop Lawrence of Massachusetts, in absentia; Bishop Alfred Harding, Washington; Bishop Brent, Philippine Islands; Chaplain-General Taylor Smith, Archbishop Matheson, primate of all Canada; Bishop Perrin, British Columbia; Hon. Edward Lyttelton, headmaster of Eton, in absentia; Archbishop Hamilton of Ottawa; the Bishops of London and Glasgow.

Two of the degrees conferred were of interest to Ontario people. Hubert Carlton was described as a leader of men, and Canon Powell referred to the fact that he had been of the same year at Trinity College. Th degree of most unusual interest was that conferred on Mrs. Willoughby Cummings and she was heartily cheered.

### IS JAMES SPEAKING?

**Harvard Professor Said to Have Sent Spirit Message.**

Boston, Sept. 9.—William James, the former Harvard professor and distinguished scientist and psychic expert, has sent a message to his friends from the spirit world, it was asserted yesterday by M. S. Ayer, founder of the First Spiritual Temple of Boston, who conducted the seance at his country home at Harwichport, Mass.

Mr. Ayer says that the message was received through a well-known spiritualistic medium at a seance held at his cottage at Harwichport, on Monday evening. The message given out by Mr. Ayer is:

"I am at peace, at peace (here some words could not be distinguished) with myself and all mankind. I have awakened to a life far beyond my highest expectation while a denizen of earth. Tell my brothers that I will transmit a message through this instrument that will prove my individuality, when I can manifest more clearly than at this time.

"I did not realize how difficult it would be to manifest from this plane of life to the mortal plane. There is much, very much, for me to learn and many conditions to overcome."

The seance, says Mr. Ayer, was under the auspices of the Temple Band of Spirits. Mr. Ayer refused to tell the name of the medium or to reveal the names of those present.

Henry James, jr., son of Prof. James, says that he knows nothing of any message having been received from his father.

### May Lose Both Hands.

Prescott, Sept. 9.—An awful accident happened to Fred. La Mere at 2.30 Wednesday afternoon, as a result of which he will lose the use of both hands.

He was working in the hold of a grain vessel at the elevator, guiding the big scoop. The ropes caught, and in shaking them loose he put himself in such a position that if he let go it would mean instant death, and if he hung on he would be drawn into the pulley block.

He hung on and had his right hand cut off diagonally across the palm, barely leaving the trunk, and part of the thumb and first and second fingers of the left hand, the third finger badly pinched and torn, but not severed. He was taken to the Ogdensburg Hospital.

### Harnessing Wind and Sun.

London, Sept. 9.—Prof. Fessenden at the British Association meetings outlined the possibilities of harnessing the wind and sun, in order to produce electrical energy.

He said a number of windmills round the coast could give power enough to run all the railways, factories and electric light stations in Great Britain, but he thought, humorously, with solar energy Britain could not do quite so well.

Sir W. White doubted the practicability of the scheme.

### Objects to Senator's Company.

Freeport, Ill., Sept. 9.—Col. Roosevelt refused flatly to attend the banquet tendered last night by the Hamilton Club, Chicago, unless Senator Lorimer is excluded. He demanded that a telegram to that effect be sent to the Senator. Roosevelt said that he would feel the same about the presence of Senator Lorimer that he would feel if members of the Illinois Legislature, who are involved in the graft investigation, should be present.

### Newfoundland is Satisfied.

St. John's, Nfld., Sept. 9.—The decision of the international court of arbitration on the Newfoundland fisheries dispute is looked upon here as a substantial victory for the colony. The winning of point one by Great Britain means, it is pointed out, that Newfoundland will have full power to control all fishery legislation, and make the American fishermen subject thereto.

### Prepare to Gobble Panama.

Panama, Sept. 9.—In an interview yesterday, Richard O. Marsh, charge d'affaires of the U. S. Legation at Panama, intimated that if the Panama Government should ignore the wishes of Washington, the United States would be compelled to occupy or annex the Republic of Panama.

# Society Is Attacked

**All Catholic Montreal Turns Out to Civic Function to Catch Sight of the Papal Legate—Cardinal Gibbons of Baltimore Wants the Next Eucharistic Congress at New York City—Visit to Italians.**

Montreal, Sept. 9.—One of the most interesting meetings of the congress was that at which Rev. Father Vaughan, Miss Sadlier and others addressed the women yesterday. The hour scheduled was 2.30 p.m., but for an hour and a half prior to that time the ladies began to pour in.

Admission was by ticket, and hundreds were disappointed in not being able to secure the desired parchment. Brothers of the Christian schools performed the no easy task of collecting the tickets of the on-coming women, but so patient and courteous were the guardians of the inner precincts that things ran on smoothly, despite the eagerness of the ladies. Father Vaughan is easily one of the chief attractions of the congress, and the desire to hear him is almost as keen as that with which the thousands seeks for a glimpse of the greater ecclesiastics now gathered.

The fact that the meeting was under the auspices of the weaker sex was guarantee for the tastefulness of its environment. The pretty platform was draped with the papal flag, and

CARDINAL GIBBONS.

potted ferns and foliage adorned the footlights. Whil the seating was in progress the ladies, true to their reputation, chatted incessantly and tried to squeeze themselves into every available cogn of vantage.

When the meeting opened the platform contained a goodly number of churchmen, amongst whom were several bishops and archbishops, wearing their long red cloaks, and adding to the picturesqueness of the scene. In the audience were many of the visiting and resident priests and members of the different teaching communities, the black garb and quaint headdress of the sisters making striking though sombre notes amongst the brighter dresses and becoming coiffures of the ladies who composed the greater part of the audience.

Some of the things that Father Vaughan said were: "We are living in a day when high ideals are yielding to the pressure of creature comforts, when principle is being exchanged for expediency; in a day when self-sacrificing Catholicism is being bartered for self-centered materialism, and the Christian sense of sin is regarded as a bygone superstition, in a day when it matters not what you believe, but only what you do, and when you may do what you like, provided you are not found out, in a day when the relationship between the sexes takes one back to pagan times, while the garbage over which they gloat is more foul and loathing than the stuff about which they chatter; in a day when there is no empty place but in the cradle, no room in which to move but the churches.

"In a word, the cleavage to-day, as in no previous time since the dawn of Christianity, is between God and mammon, or, shall I say in language more definite, between Catholicism and agnosticism, if not materialism."

If numbers and enthusiasm are tests of loyalty, then was the reception of the Pope's legate at the City Hall last night one of the most loyal that can be grasped by even the most vivid imagination. The hour appointed was 8.30 o'clock, but long before that time the square and avenue surrounding the great civic institution presented an appearance comparable to nothing but a sea of living humanity.

Cardinal Gibbons, who arrived yesterday from Baltimore, Md., was present during the first part of the evening and, leaving early, was escorted by police and uniformed officers down one of the grand stairways. At first the cardinal was not recognized, red caps and crimson cloaks are so common in Montreal just now, but when someone whispered "There's Cardinal Gibbons" the whisper went round, and a cheer for America's Cardinal was given.

Mgr. Gibbons extends an invitation to the Eucharistic Congress to visit New York City when it next meets.

A sight probably never before witnessed by those who were present in the vicinity of St. James' Church yesterday morning, was that of fully three thousand members of religious orders, who filled the church at the solemn mass said for their special benefit. Curious to many, though not to Montreal, must have been the numerous black robed and white bonneted sisters of charity, the grey-gowned nuns of the Hotel Dieu, the brown-garbed Franciscan, with the cord of St. Francis [illegible] his habit and the sandals alone covering the bare feet.

The seminary, in their picturesque cloak and round hat, were out in force, so too were the secular priests from all over the American continent.

From the sanctuary the papal legate addressed the multitude, every ear being bent to receive his message. His grace of Montreal also added encouraging words of appreciation and encouragement. The sanctuary was a scene of beauty, the gorgeous scarlet and gold of the vestments and the costly appointments of the altar being in strong contrast with the sombre garbed congregation, who feasted on its beauty.

There was a very successful demonstration yesterday at the church of the Italian colony, Dorchester street east, some 2,000 sons and daughters of sunny Italy gathered to do honor to the Pope's legate. Cardinal Vannutelli was moved to tears as a little school girl presented a bouquet.

His eminence, speaking in Italian, declared that at no recent eucharistic congress held in the old world, had the Pope's representative been received with such open-handed enthusiasm as has been the case since the legate landed on Canadian shores.

### BRIEFS FROM THE WIRES.

Three men lost their lives in a fire on the U. S. battleship North Dakota off Fort Monroe.

Harry Brundage, a St. John, N.B., boy, was shot and killed while looking into a shooting gallery.

W. H. Hearst has called on Col. Roosevelt to wage war on the Republican bosses in New York.

The town of Lebeau, North Dakota, was entirely destroyed by fire yesterday. The loss is $150,000.

Hon. George P. Graham expects to arrive in Toronto in time to attend the Provincial Liberals' meeting.

David Horn, chief grain inspector at Winnipeg, has resigned to take the management of an elevator at Port Arthur.

Edward Mason, a Boston crook, who was landed by the Montreal police some time ago robbing departmental stores in conjunction with some pals, was sent down for seven years.

As the result of charges made against them, the entire police force of Kamloops have resigned. Alleged blackmail and charges of grafting in connection with Chinese gambling dens were the causes of the trouble.

### Two Captains Have Typhoid.

London, Sept. 9.—(C.A.P. Cable.)—In concluding his address to the Queen's Own Rifles of Toronto, at Winchester, the Duke of Connaught said:

"In his Majesty's name, I assure you of the very great pleasure and satisfaction it has been to him to know that you have been the first of his troops from over the seas to take part with his regular troops in peace manoeuvres. I wish you every success here and hope you will have a happy return to Canada, to be welcomed with open arms there."

Captains Pellatt and Kirkpatrick have developed typhoid fever, contracted, it is supposed, at Quebec.

### Flew by Compass.

Paris, Sept. 9.—Lieut. Bellanger of the army aviation corps flew by compass through dense clouds yesterday in a monoplane from Issy to Formerie in Oise where he reported for duty in connection with the approaching army manoeuvres on the plains of Picardy.

The Cause
of Eye Troubles is usually not disease, but defect in the structure or muscles of the Eye.
Consider the incessant work of the Eye, the instantaneous and exact adjustment demanded that sight may be always equal, single and ready to every change in position, distance and light. The nerves compel and control the mechanism in these instant adjustments. The mechanism may be defective, that is—
There may be defects in the structure, or focus of one or both Eyes;
The Muscles may be imperfectly balanced, so that both Eyes do not work in harmony;
There may be inability to focus for close work;
There may be strain through overwork, abuse, poor lights, bright reflections, etc.
An examination will tell you just what condition your Eyes are in.

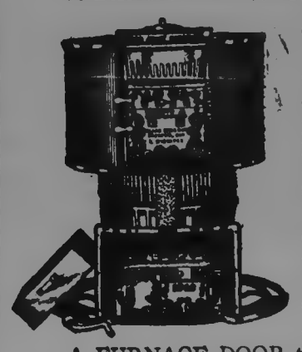
# HECLA FURNACE

## —And The Little Things That Mean So Much to You

We are not going to talk about the big features of the "Hecla"—the FUSED JOINTS, that keep the house free of gas and smoke—or the STEEL RIBBED FIREPOT, that saves one ton of coal in seven.

The talk is of little things that our 30 years experience has perfected.



A LARGE DOOR, big enough to take the biggest shovel of coal or chunk of wood.

A DUST FLUE, that actually carries off all dust so that you don't look as if you had fallen in the flour barrel after you shake the furnace.

A DAMPER REGULATOR, by which you can regulate the drafts and checks without going into the cellar.

A FURNACE DOOR that really locks, and locks airtight. INDIVIDUAL GRATE BARS that enable you to clean your fire without getting down on your knees with a poker.

There are many other big and little things about the "Hecla" that should be familiar to every man who is going to put in a new furnace this year.

They are all illustrated and described in our new furnace book, "Hecla Heated Homes."

Let us send you a free copy. 106

# "THE PILLAR OF LIGHT"

By Louis Tracey, (Copyrighted)

(Continued from Thursday)

It chanced, just then, that an emancipated wave embraced the granite column, hit the cornice, and deluged the lantern, its disintegrated mass striking the glass with force enough to break any ordinary window. The astounded girls could not refuse the evidence of eyes and ears. Here was the frantic sea leaping to a height of one hundred and forty feet and more, yet their father was treating the incident as the merriest joke of many a month.

No better cure for their hysteria could be contrived. Brand was obviously not acting. The hearty pulsations of laughter had restored his ruddy colour. Evidently they were alarmed about nothing.

"Here, Enid, drink your parting cup," he cried at last. "Have no fear. It is only the dochan doris before another feast."

Feeling somewhat ashamed of themselves, though smiling very wistfully, they obeyed him. He sipped his cocoa with real monchalance. Another wave turned a somersault over the lantern. Brand's only anxiety was to blow at the steaming liquid and cool it sufficiently.

Yet he was watching them and hammering out the right course to adopt. He alone understood that, to the novice, the amazing ordeal from which the lighthouse had successfully emerged was as naught compared with the thunderous blows of the waves, the astounding reverberations of the hollow pillar, the continuous deluge of spray striking the lantern, which the infuriated sea would inflict on them.

To urge any further effort to sleep was folly. They must remain with him and be comforted.

Being reasonable girls, of fine spirit under conditions less benumbing, it was better that they should grasp the facts accurately. They would be timid of course, just as people are timid during their first attempt to walk 'twixt rock and cataract at the Falls of Niagara, but they would have confidence in their guide and endure the surrounding pandemonium.

"Here's to you, Enid. Still we live," he cried, and drained his cup.

"I sup-pup-pose so," she stammered.

"Better sup up your cocoa," said Constance. "Now I am quits with you for this afternoon."

"I'll tell you what," went on Brand confidentially. "In that locker you will find a couple of stout pilot-coats. Put them on. As I cannot persuade you to leave me you must sit down, and it is cold in here. Moreover, for the first time in twenty-one years I will smoke on duty. I have earned a little relaxation of the law."

Out of the corner of his eye he saw that Constance, if not Enid, had not missed the subtle hint in his words. But she was quite normal again. She gave no sign; helped her sister into the heavy reefer, and made herself quite comfortable in turn.

"Neither of you will ever regret tonight's experience—when it is nicely over," he said. "You are like a couple of recruits in their first battle."

"I am sure—" began Enid.

A huge wave, containing several hundred tons of water, smote the lighthouse, and cavorted over their heads. The house that was founded upon a rock fell not, but it shook through all its iron-bound tiers, and the mpty cups danced on their saucers.

Not another word could Enid utter. She was paralyzed.

"That fellow—arrived—in the nick of time—to emphasize my remarks," said Brand, lighting his pipe.

"This is your baptism of fire, if I may strain a metaphor. But you are far better situated than the soldier. He gets scared out of his wits by big guns, which are comparatively harmless, and when he has been well pounded for an hour or so, he advances quite blithely to meet the almost silent hail of dangerous bullets. So, you see, in his case, ignorance is bliss."

"Are we in bliss?" demanded Constance.

"You have been. The lighthouse has out-faced a hurricane such as has not visited England before in my lifetime. It is over. The wind has dropped to a No. 10 gale, and we have not lost even a bit of skin to my knowledge. Now the cannonade is beginning. Certainly, we may have the glass broken, by a rare accident, but no worse fate can befall us."

A heady thud was followed by a deluge without. They heard the water pouring off the gallery.

Constance leaned forward, with hands on knees. Her large eyes looked into his.

"This time, dad, you are not choosing your words," she said.

"I am sorry you should think that" was the reply. "I selected each phrase with singular care. Never be misled by the apparent ease of a speaker. The best impromptu is prepared beforehand."

"You dear old humbug," she cried.

Now the quiet deadliness of the scene which followed the reappearance of Enid and herself from their bedroom was manifest to her. Enid, too, was looking from one to the other in eagerness, striving to grasp the essentials of an episode rapidly grouping its details into sequence. Brand knew that if he parried his daughters' questionings they would be on their knees by his side forthwith, and he wished to avoid any further excitement.

"Please attend, both of you," he growled, with mock severity. "I am going to tell you something that will console you."

His voice was drowned by some part of the Atlantic whirling over the lantern.

"This kind of thing does not go on all the time," he continued. "Otherwise we should have five hours of spasmodic conversation. As soon as the tide rises sufficiently to gain an uninterrupted run across the reef we will have at least two hours of comparative quiet. About four o'clock there will be a second edition for an hour or so. I suppose that any suggestion of bed—"

"Will be scouted," exclaimed Enid.

"A nice pair of beauties you will be in the morning," he grumbled artfully.

Not even Constance was proof against this new burthen of woe. She glanced around.

"You say that," she cried, "knowing that the nearest looking-glass is yards away."

He pointed with his pipe.

"In the second drawer of the desk you will find a heliograph. It is only a toy, but will justify me."

They ran together, and found the little circular mirror. The next wave passed unheeded. Smiling, he went up to the lamp. Even yet there was hope they might go to bed when the respite came.

After much talk of disordered hair, wan cheeks, rings round the eyes, cracked lips, and other outrageous defects which a pretty woman mourns when discovered from her dressing-table, Constance called him.

"Here is a queer thing," she said. "Have you heard any steamer hooting?"

"No," he answered. Bending between the two of them he saw that the pointer of the auriscope bore due southwest, though the last siren of which they had any knowledge sounded from the opposite direction.

He picked up a little trumpet resembling the horn of a motor-car.

"I use this for tests," he explained. Its tiny vibrator quickly brought the needle round towards his hand.

"It is improbable in the highest degree that any steamer is near enough to affect the auriscope," he said. "On a night like this they give the coast a wide berth."

He quitted them again. The girls, having nothing better to do, watched the dial to see if any change occurred. He heard them use the small trumpet three times. Then Enid sang out:

"Oh, do come, dad. It goes back to the southwest regularly."

He joined in the watch. The needle was pointing north in obedience to the sound-waves created in the room. Suddenly, it swung round nearly half the circumference of the dial.

"Hush;" he said. They listened intently, but the roar of wind and water was too deafening. They could hear naught else. He went to the southwest point of the glass dome but the lantern was so blurred with rivulets of water that he could see nothing save a tawny vastness where the light fell on the flying spindrift.

To make sure, he tested the auriscope again, and with the same result.

"A vessel is approaching from the southwest," he announced, gravely.

"Evidently she is whistling for help. I hope she will not attempt to approach too near the reef. I must have a look out."

He put on his oilskin coat and tied the strings of a sou'wester firmly beneath his chin.

The small door of the lantern opened towards the Bay, so he had no difficulty in gaining the gallery. The girls watched him forcing his way against the wind until he was facing it and gazing in the direction of the Scilly Isles.

"Perhaps some poor ship is in danger, Connie," whispered Enid. "It makes me feel quite selfish. Here was I, thinking of nothing but my own peril, yet that little machine there was faithfully doing its duty."

"It was not alone in its self-abandonment. We shall never know, dearest, how much father suffered when he sent us off with a jest on his lips. I am sure he thought the lantern would be blown away."

"And he with it! Oh, Connie!"

"Yes. He believed, if that awful thing took place whilst we were below, we might escape. I can see it all now. I had the vaguest sort of suspicion, but he hoodwinked me."

"Had we known we would not have left him," cried Enid, passionately.

"Yes, we would. Think of him, sticking to his post. Was it for us to disobey?"

Overcome by their feelings, they stood in silence for a little while. Through the thick glass they could dimly distinguish Brand's figure. A great wave assailed the lantern and Enid screamed loudly.

"Don't dear," cried Constance, shrilly. "Father would not remain there if it were dangerous."

Nevertheless, they both breathed more freely when they saw him again, an indeterminate shape against the luminous gloom.

Constance felt that she must speak. The sound of her voice beget confidence.

"I have never really understood dad until to-night," she said. "What an ennobling thing is a sense of duty. He would die here quite calmly. Enid, yet he would avoid the least risk out there. That would be endangering his trust. Oh, I am glad we are here. I have never lived before this hour."

Enid stole a wondering glance at her sister. The girl seemed to be gazing into depths immeasurable. Afterwards the words came back to her mind: "That would be endangering his trust."

Brand faced the gale a full five minutes. He returned hastily.

"There is a big steamer heading this way—a liner, I fancy," he gasped, half choked with spray. "I fear she is disabled. She is firing rockets and I suppose her siren is going constantly, though I cannot hear it."

He ran to the room beneath. Flushed with this new excitement, the girls donned their oilskin coats and arranged their sou'westers. When he hurried up the stairs he was carrying four rockets. He noted their preparations.

"Don't come out until I have fired the alarm signal," he shouted, "and tie your dresses tightly around your knees."

They heard the loud hissing of the rockets, and the four reports travelled dully from the sky. Three white starbursts and one red told the Land's End coast-guards that a ship in need of help was near the Gulf Rock. Probably they had already seen the vessel's signals. In any event they would not miss the display from the lighthouse.

Walking with difficulty, the girls crept out on to the balcony.

Brand had already gone to the windward side. The first rush of the gale made them breathless, yet they persevered and reached him. They were greeted by a climber, but their father, with a hand on their shoulders, pressed them down, and the spray crashed against the lantern behind them. He knew they would take no harm. When the vessel passed, their boots and stockings would be soaked. Then he could insist that they should go to bed.

(To be continued)

# Nervous Headache

AND MUSCULAR RHEUMATISM DISAPPEARED WHEN THE NERVES WERE RESTORED BY

## DR. CHASE'S NERVE FOOD

Feeble, wasted, starved nerves often make their condition known by nervous headaches. This was one of the first and most marked symptoms.

If you are at all subject to rheumatism you have noticed how much worse it gets when the system gets run down.

Both nervous headache and muscular rheumatism disappear when Dr. Chase's Nerve Food is used to rebuild and revitalize the wasted and weakened body.

Mr. James Riley, moulder for the Waterous Engine Co., 46 Jarvis St., Brantford, Ont., writes: "I suffered for years with muscular rheumatism and as I also had frequent and severe attacks of nervous headache I concluded that the trouble came from the nerves and began using Dr. Chase's Nerve Food. As I continued this treatment the rheumatism was gradually driven out of the system, my nerves got stronger and steadier and the headaches disappeared. I consider Dr. Chase's Nerve Food a splendid nerve regulator and healthbuilder."

You cannot possibly make a mistake in using Dr. Chase's Nerve Food when the nervous system gets run down, for, by forming new, rich, blood this great food cure builds up the nerve cells as nothing else can.

When you have made up your mind to test this treatment, go at it in earnest and keep at it regularly until you feel again the joy of health and vigour.

50 cents a box, 6 for $2.50, all dealers; or Edmanson, Bates & Co., Toronto. Write for free copy of Dr. Recipes.

# SELLING CHEESE IN ONTARIO AND QUEBEC

From Farm and Dairy.

It would be difficult to imagine a more unsatisfactory method of selling cheese, both as concerns makers and patrons, than that which is practised throughout Ontario and the greater part of Quebec. The cheese is graded by the buyer after it has left the hands of the maker and, as practised, the grading is more apt to depend upon the state of the market than upon the quality of the cheese. Quebec makers have led the way in bringing about a reformation in this matter. Some of them now sell their cheese cooperatively.

Under the system as obtains in Ontario, the maker gets various grades for what he knows to be the same quality of cheese. He is at a loss to know what is wanted. The system grading is demoralizing, so far as the maker is concerned. His second class cheese on a rising market sells for finest. On a slow market or upon a falling one, cheese of the same quality is graded for a cut in price; it then follows that the maker thinks himself cheated.

Under the new system, as is now current in Quebec, members of the co-operative society of cheese makers have their cheese graded by a government official. Uniform grading is the result. Makers are thereby encouraged to make better cheese and they know full well that a rising market will not in the least smooth over any deficiency. Members of the society are well pleased with the success of cooperative selling. The membership in the society is increasing.

**FERROVIM**
TRADE MARK

A TONIC FOR ALL.

It makes new blood
It invigorates
It strengthens
It builds
BONE AND MUSCLE

Used with the greatest advantage by all weak people. Ferrovim fattens, makes pallid cheeks into rosy ones.

Davis & Lawrence Co., Montreal.

# The Logical Cure for Sick Headache.

It is a mistake to endure a headache as a necessary affliction. It is equally a mistake to doctor it as simply a headache, for though you may relieve, you cannot cure it that way.

Only in rare cases is a headache caused by anything wrong with the head itself. *The trouble lies in some impurity of the blood that irritates the delicate network of nerves and causes the ache.* That is why every pulsation pouring in more blood, is so plainly felt.

Lessening the flow of blood to the head by means of a tight compress, an ice-bag, or some drug that acts on the heart and reduces the pulsations, sometimes gives temporary relief. But these measures have absolutely no effect on the blood impurity which was the cause of the whole trouble.

In practically every case this blood impurity would be removed from the system by the bowels, kidneys, skin or lungs, if these were all working right. It is the inactivity of one or more of them that allows the poisons to accumulate in the blood, and the *headache is simply a symptom or warning that things are not right.*

The way to put them right—to cure the root of the whole matter—is to take **Dr. Morse's Indian Root Pills.** They act directly on the bowels, regulating them—on the kidneys, strengthening and stimulating them—on the skin, opening up the pores—and on the lungs, clearing the delicate membrane of any mucus which may have collected.

When these four great eliminating organs get working properly again all impurities are quickly taken out of the blood, and the unpleasant symptoms, of which the headache is one, disappear—not simply relieved, but cured.

You can take **Dr. Morse's Indian Root Pills** with confidence, for they have a record of over half a century of remarkable cures.

Rev. A. L. Bowers, of Bristol, Tenn., tells how they cured him:

"I want you to know how much good your Indian Root Pills have done for me. I was troubled with terrible headaches and biliousness. I tried several doctors but they did me no good, and for fourteen years I suffered. The use of your pills has made a cure in my case."

## HAVELOCK HAPPENINGS

Examiner Special.

HAVELOCK, SEPT. 7.—Mrs. Wm. Webster and children, Misses Muriel and Dorothy of Winnipeg, Man., are the guests of Mrs. W. B. Ritchie.

Mr. and Mrs. J. W. Bryans spent Tuesday last at Trent River the guests of Mr. and Mrs. Joseph Knox.

Mr. W. Richardson of Norwood, was in town last week on business.

Mr. and Mrs. Chas. Armstrong have returned home from a short vacation at Mount Julian.

Miss Chase of Peterborough, was in town last Monday en route to Tweed.

Mr. Ben Gibson of Hastings, was in town last week.

Most of the Havelock families who have been camping at Trent River during the summer months, have returned to town again, as follows: The Bennetts, Roses, Wright, Squires, Dunke, McMaster and Brennans.

Mr. and Mrs. John Belleehem visited friends at Peterborough last week.

Mrs. Grimason and Miss Effie Fowler of Peterborough are the guests of their brother, Mr. Jas. E. Fowler.

Mr. Wm. Andrews spent Tuesday and Wednesday last at Toronto.

Miss Alice Haig of town, has been engaged by Mr. Dean, as waitress in the lunch counter at the C.P.R. station here.

Miss Eva Lancaster spent last week in Toronto, with the Misses Moffatt.

Miss Anna Bryans is spending a few days at Toronto, the guest of Mrs. Norman Mutch, 602 Shaw street.

Miss Leta Herrington is visiting friends at Toronto.

Miss Sawyer and daughter, Ethel, spent last week in Toronto.

We are glad to report Mr. Edward Aldrey rapidly recovering from his recent operation.

Mrs. A. E. McGuire and Miss M. have returned from an extended trip out West, when she visited her sister Mrs. (Dr.) Hourican at Regina, Sask.

Mr. Newman of Perth, was in town last week.

Miss Annie McIntyre has returned home from an extended vacation with her sister, Mrs. Cromar, at North Bay.

Miss Kennedy of West Toronto, is the guest of her cousin, Miss Olive Rose.

Mr. Jack Rattan of Trent Bridge has been engaged as clerk in Mr. Jas. Watson's departmental store.

Mr. and Mrs. Walterhowse, who have been camping at Trent Bridge, have returned to their home at Toronto.

Rev. and Mrs. Pickford of Norwood, were in town last week.

Master Vernon Chapman of West Toronto, was in town last week, the guest of Mr. B. McBurney.

Mrs. Smith, who for the past two months, has been the guest of her daughter-in-law, Mrs. Oscar Hicks, returned to her home at Toronto on Wednesday last.

Mr. Fred Gene returned to his home at Toronto on Tuesday last, after enjoying a month's vocation at Trent River, the guest of Mrs. John Christie.

Mrs. D. L. Somerville returned to her home at Bethany on Wednesday last, after an extended visit in town with her parents, Mr. and Mrs. Jas. Watson.

Mr. Oscar Hicks, of Goderich was home for a few days last week.

Miss Lillie McLaughlin, of Norwood, was the guest of her aunt, Mrs. Oscar Hicks, last week.

Mr. Jas. Thompson, M.P.P., was in Peterborough on Tuesday last.

Mrs. C. D. Succee and daughter, Viola, of Peterborough, is the guest of Mrs. H. Falkner.

Mr. L. Barrie, of Buffalo, is the guest of his sister, Mrs. J. E. Fowler.

Mrs. Holcombe, of town, is spending a few days at Toronto, the guest of her son.

Mr. Earl Lancaster, of Port Hope, was in town on Sunday.

Mr. Arthur Gabriel, of Toronto, is the guest of Mr. R. J. Graham.

Mr. Burkell, of Toronto, is visiting friends in town.

Mr. Conklin, of Toronto, is the guest of Mr. and Mrs. Ghent.

Mr. and Mrs. Dr. Thompson are visiting friends in Omemee.

Miss J. Butters is the guest of Mrs. Anderson.

Mr. V. Foley, of Peterborough, is the guest of his parents, Mr. and Mrs. M. Foley.

Mr. Harry Buchanan, of Toronto, is visiting his parents, Mr. and Mrs. G. Buchanan.

Mr. F. Wiseman, of Niagara, is the guest of Mr. Harry Buchanan.

Dr. Gardener was in town last week.

CARTER'S LITTLE LIVER PILLS.
CURE
Sick Headache and relieves all the troubles incident to a disordered condition of the system, such as Dizziness, Nausea, Drowsiness, Distress after eating, Pain in the Side, &c. While they most remarkable success has been shown in curing
SICK
Headache, yet Carter's Little Liver Pills are equally valuable in Constipation, curing and preventing this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cured
HEAD
Ache they would be almost priceless to those who suffer from this distressing complaint; but fortunately their goodness does not end here, and those who once try them will find these little pills valuable in so many ways that they will not be willing to do without them. But after all sick head
ACHE
is the bane of so many lives that here is where we make our boast. Our pills cure it while others do not.
Carter's Little Liver Pills are very small and very easy to take. One or two pills make a dose. They are strictly vegetable and do not gripe or purge, but by their gentle action please all who use them. In vials at 25 cents; five for $1. Sold everywhere, or sent by mail.
CARTER MEDICINE CO., NEW YORK.
Small Pill. Small Dose. Small Price.

## A Godsend to Sickly Children

Mr. N. L. Duffee, of Helena, Ala., the thankful father of a little baby girl who was made healthy and fat after she was not expected to live, writes: "Duffy's Pure Malt Whiskey is the finest of medicines. I have a girl baby, now 5 months old, who until she was 2 months old we hardly saw any chance of raising her. At that time I procured a bottle of Duffy's Pure Malt Whiskey and gave her a few drops at a time. Now she is acknowledged to be the finest looking baby in town. Baby is still growing as fat as a little pig."

**Duffy's Pure Malt Whiskey** can be safely given to children, no matter what age in small doses. It is just the right thing for them when they have coughs, colds or any throat or stomach troubles that are so prevalent with the children. It is an absolutely pure, gentle and invigorating stimulant and tonic. It is invaluable for overworked men and delicate women.

All druggists, grocers and dealers, or direct $1.25 a large bottle. Refuse substitutes and imitations; they are impure and dangerous.

The Duffy Malt Whiskey Co., Rochester, N. Y.

"Do not fail to visit our booth when at the Canadian National Exhibition. All are welcome."

F. J. R. Mitchell Distributor

Miss B. Rose, of town, is spending a few days at Toronto.

Miss E. McGill, of town, is visiting friends at Toronto.

Mr. G. Andrews, of Norwood, was in town last week.

Miss Ha Sawyers has returned to her home after spending the last month with friends at Rosseau.

Miss L. McNicholl has returned home, after visiting friends in Peterborough.

Mrs. I. Curtin, who has been suffering with a diseased leg, had it amputated by Dr. Holderoft at Mrs. Smith's private hospital.

Mrs. Black and children have returned home after an extended visit with friends at Kingston.

Mr. and Mrs. Ward Patterson have returned after spending a few days at Detroit.

Miss G. Riley was in Smith last week.

Miss Barnett, of Peterborough, is the guest of her brother, Mr. Wm. Barnett.

Mr. Pratt, of Smith's Falls, was in town last week.

Mrs. Howe has returned home after visiting friends at Smith Falls.

James Paget, of West Toronto, was in town over Sunday.

Miss Loretta Bennett, of town, is visiting friends at Peterborough.

Mrs. Webb and daughter Lilian are visiting friends at Hamilton.

WHY SLEEP IS NECESSARY

During sleep nature restores the cells and tissues wasted by the activities of life. Without sleep physical bankruptcy is quick and certain. Mrs. J. Derocher, 485 Bothune street, Peterborough, Ont., writes: "I can say for a certainty that Dr. A. W. Chase's Nerve Food is a splendid medicine, for, besides steadying the nerves it built up my system wonderfully and enabled me to sleep and eat well."

## AT THE CANADIAN NATIONAL EXHIBITION

From Farm and Dairy.

Visitors to the great Canadian National Exhibition at Toronto this year, as usual, found much to entertain and instruct them. The educational features, so far as agriculture was concerned, were, perhaps, ahead of anything ever before attempted at Toronto. In addition to the usual features, such as the various exhibits of live stock, fruit, vegetables, dairy products, and so forth, there were exhibits of great educational value, which were arranged under the direction of the Ontario Department of Agriculture.

These included displays from the Ontario Agricultural College, showing the results of drainage work and experiments with field crops and corn, and tobacco from Essex County. The Director of Dairy Instruction had on exhibition samples of milk, which showed the effect of cow hairs, straw, hay, flies, dust and so forth, that had been placed therein. In each case the resultant product was repulsive and disgusting to that extent where anyone who gave thought to the matter on seeing the display, would never again allow milk to become contaminated with these things, if at all possible to avoid it. The Fruit Branch had a fine display of fruit, showing the great perfection to which a wide variety of fruits can be grown in Ontario. The grain and sheaf exhibits in connection with the field crops competition, were very tastefully arranged, and attracted much attention.

British Columbia had a very fine display of her fruit. Alberta had on display grains and other products from that province. The West Indies were represented by a very interesting and attractive exhibit of her fruit, vegetable and nut products, as produced on the several isles of the West Indies.

INFORMATION ON COW TESTING

The Dominion Department of Agriculture were represented in the Dairy Building by officials of the Dairy and Cold Storage Branch—those in charge of cow testing. Many enquiries about cow testing work were answered, and many farmers were made acquainted with this great work through the display made by the Department.

The dairy cattle exhibits, with the exception of the Guernseys and grades, are reported elsewhere. The Guernseys were all shown by The Trethewey Model Farm, Weston, Ont. These cattle are a fine lot, and were much admired by those who passed through the stables.

The beef cattle exhibits, especially the Shorthorns, were well up to the standard. There was keen competition in the Shorthorn classes, where representatives from two great western herds—those of Sir Wm. Van Horne, and H. L. Emmert, East Selkirk, Man.,—met the old and well-established herds of the Red, White and Roan from Ontario herds.

HORSES

In heavy horses, the main exhibit, as usual, was with the Clydesdales. These were not as strong as they have been in previous years, so far as the aged stuff was concerned, the younger classes were well filled with a very choice lot of stuff. The principal winnings were made by Graham Bros., Claremont, Ont. Their aged stallion, Mikado, was of a right fleshy sort, a good mover, and of fine quality, though of upstanding type. There was only a small showing of Shires, while Percherons were represented by three main exhibitors; two or three others exhibited individuals. The light horses and harness classes, each and all, were well represented.

The weather on several days of the fair was anything but favorable. Rain fell in torrents, at times, yet notwithstanding it, the people came in crowds and the attendance was well up to the average, if not in advance of previous years.

Word From Br'er Williams.

"De voice what is cryin' in the wilderness in dis day an' time is advertisin' real estate—stakin' off lan' fer mansions on earf—an' ef de voice is only loud 'nuff it's sho' ter ketch de crowd."—Atlanta Constitution.

The Cooking School Girl.

It would seem that her luck is hard,
I know I have wondered oft
Why her biscuits are always hard
While her jellies are always soft.
—Lippincott's.

An Early Bear.

Nebuchadnezzar was eating grass.

"Probably this will start a crop scare and send the market down," he cried.

Proudly he saw he had done more damage in a limited area than the bugs.—New York Sun.

SEALED TENDERS addressed to the undersigned, endorsed "Tender for Reconstruction of Wharf at Lakeport, Ont.," will be received at this office until 4.00 p.m., on Tuesday, October 4, 1910, for the reconstruction of the wharf at Lakeport, County of Northumberland, Ont.

Plans, specifications and forms of contract can be seen and forms of tender obtained at this Department, the office of J. G. Sing, Esq., District Engineer, Confederation Life Building, Toronto, Ont., and on application to the Postmaster at Lakeport, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works for the sum of sixteen hundred ($1,600.00) dollars, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, September 6, 1910.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Extension to Breakwater at Wiarton, Ont.," will be received at this office until 4.00 p.m., on Tuesday, September 13, 1910, for the construction of an extension to the breakwater in Colpoy's Bay, at Wiarton, Bruce Co., Ont.

Plans, Specifications and forms of contract can be seen and forms of tender obtained at this Department, and at the offices of J. G. Sing, Esq., District Engineer, Confederation Life Building, Toronto, Ont.; H. J. Lamb, Esq., District Engineer, London, Ont., and on application to the postmaster at Wiarton, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Honourable the Minister of Public Works, for the sum of two thousand two hundred ($2,200.00) dollars, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, August 12, 1910.

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS.

ANY PERSON who is the sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts, a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price $3 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

# BOYS' CAMPAIGN ! !

## $$ BOYS $$

This is a heart-to-heart talk with Boys about selling the Examiner, and how it may act as a stepping-stone to a successful business career in after years.

BOYS, do you recognize the fact that this little business offers you an opportunity to

## Make 100 per cent.

or in other words, to double the money invested in selling the EXAMINER to transient buyers.

### Here's How It's Done

BUY the EXAMINER at one cent each and sell it for two cents each; in the case of weekly patrons, they pay six cents per week and receive 10 cts. from the subscriber, thus making a profit of 62 2-3 per cent.

DO you know of any business in the city that pays such profits with as little chance for bad debts?

IT only requires a Boy to HUSTLE, the same thing that is required when he gets into a bigger business world.

OF course we do not mean to say that the Boy, to become a successful business man, must be a newsboy, but we do say, the successful newsboy has gained an experience that is of much service to him in after years.

## Climbing Steadily

THE Street Sales of the Examiner are climbing steadily and have touched by far the highest point in the history of the paper.

This result has increased the value of the Examiner as an advertising medium. In the city and in the districts outside the city limits, the increase in circulation is most gratifying, and credit is due to the pushing newsboys for their good work in bringing in new subscribers.

## Persistency Draws Good Wages

Enough persistency in Boys is necessary to draw good wages, and this quality gives the biggest awards to the Boys who stick to business.

TO know how to KEEP ON is important in selling papers. It is the secret of the boy who is called "fortunate."

THERE are a number of Boys in Peterborough making four and five dollars per week, not necessarily selling the Examiner, but some make three dollars per week selling the Examiner exclusively.

## Use Spare Time Usefully

GET in the game. It won't hurt you, but will give you a right start. You will have money of your own to save or buy useful needs with.

BOYS! Take your spare time between four and six o'clock and see what success you will have between now and 'Xmas.

The delivery of the Examiner is under strict and constant supervision. Yet irregularities will creep in, because carrier boys make mistakes like all other people.

Subscribers are invited to complain PROMPTLY. Complaints are welcomed when there is a reason for them. They will be given prompt attention.

## MAKE MONEY

## SELLING THE

## EXAMINER

*Boys, figure this proposition out for yourselves. Be Ambitious. Good Newsboys are taken care of and recommended for future positions*

# COMPLAINTS IN CONNECTION WITH BABCOCK MILK TEST

From Farm and Dairy.

During the past two or three years, numerous complaints have been received respecting the inaccuracy of the glassware in connection with the Babcock milk test. A prominent creamery owner sent in to the Department of Agriculture, Ottawa, a 50 per cent. cream test bottle in which the marking showed an error of 10 per cent. The Chief of the Dairy Division and other members of the staff connected with the cow testing work, have found a large number of test bottles with incorrect graduation, the error in some cases being as much as 6 per cent. The Dairymen's Association of Western Ontario have by resolution asked for legislation to provide protection against the injustice which may arise from the use of this inaccurate glassware.

In view of these facts, the Minister asked Parliament at the last session to pass a law for the proper regulation of this important matter. The law is based on the same principle as that which relates to the inspection of weights and measures. The full text of the 'Milk Test Act' and the regulations thereunder were reproduced for general information in Farm and Dairy, April 14th. Those wishing a copy of the full text of the Act may have same on application to the Dairy Commissioner, Ottawa. The Act comes into force on January 1, 1911.

The chief Inspector of Weights and Measures, Standards Branch, Department of Inland Revenue, has intimated that he will be in a position to receive glassware for verification at any time after October 1 next. This will give ample time to have all test bottles and pipettes now in use verified before January 1, 1911, after which date no unauthorized test bottles or pipettes may be used.

REGULATIONS

The more important regulations as they now stand in this connection follow:

All test bottles, pipettes, or measuring glasses, used in connection with the testing of milk or cream, except skim-milk bottles and the tubes used in connection with the apparatus known as the 'Oil Test Churn,' shall be forwarded, *charges prepaid*, to the Standards Branch, Department of Inland Revenue, Ottawa, for the purpose of verification.

All glassware sent for verification shall be received at the owner's risk.

All glassware sent for verification must be perfectly clean on both the inside and outside surfaces.

The Chief Inspector of Weights and Measures shall cause each bottle, pipette or measuring glass that is found correct within an error of one-tenth per cent. plus or minus, to be ineffaceably marked with the outline of a crown, having within it the initial letter of the reigning sovereign, and any such glassware not being found correct within the error herein specified, he shall cause to be destroyed without compensation to the owners thereof.

The fee for the verification of milk test glassware shall be five cents for each test bottle, pipette or measuring glass, which amount shall be forwarded to the Standards Branch, Department of Inland Revenue, Ottawa, with each consignment of glassware to be verified.

Any person who violates any of the provisions of The Milk Test Act or the regulations made thereunder, shall be liable, on summary conviction thereof, to a fine not exceeding $50 for each offence.

# MARKETING IS ONLY SERIOUS PROPOSITION

From Farm and Dairy.

*F. and H. P. Langdon, Frankford Co., N.Y.*

After careful attention has been given to the problems of seed sowing, growing of plants, transplanting, moving to the field, fertilizing and caring for tomatoes during the growing period the marketing is the only serious proposition left to face. It would seem that one who can grow a fancy crop would need but little instruction on harvesting and marketing it. As different individuals, however, have different methods an exchange of ideas may be profitable.

We pick our tomatoes when about half ripe or when of a yellowish red for sorting and shipping in from one to three days. If they are allowed to fully ripen on the vines they might crack more or less, and would be too soft for safe shipping. They are emptied from picking baskets into "shippers' bushel" baskets in the field and are drawn to the packing shed on platform spring wagons.

They are then emptied on to the ground in the shade to cool and color for sorting. Seven-eighths bushel baskets holding 50 pounds net, with slatted, hoop-rim covers, are used for shipping. The baskets are papered placing the tomatoes closely together stem side down with stems removed so they will not puncture the other fruit.

We pack as solidly as possible. We fill the baskets level full, fasten on the cover with the cross slat and they will ship safely.

When packing we reject all rough or affected fruit, and put most of the largest and best fruit at and near the bottom with most of the smaller and medium sizes at the top. This surprises the purchaser and makes a favorable impression on him. When using the last of the fruit it influences the customer to think of getting another basket as good. It is unwise to put in a basket what you would not be willing to buy at your selling price.

MARKETING THE CROP

If a city wholesaler is not within reach a retail demand must be created where such is possible. We have a list of about 200 Adirondack hotels, camps, grocers and pedlars to whom we send a postcard price list every Saturday. These postals are printed by us with a rubber type postal press, and quotations changed weekly according to our supply and the demand. We do not try to compete with market prices. We cannot and keep good our guarantee of satisfaction with our goods.

These postals are made as catchy as possible, one day reading like this: "*They* say 'If it's from Langdon's, it's all right.' *We* say, 'If by mistake it is not right we will make it right.'" To-day, Aug. 15, they read, "Tomatoes, those fancy red ones, in better supply this week, only $3.00 per bkt., U. C. top, U. C. all. Send on your order for a nice basket."

Another point—if mistakes are made, as they are sometimes, if shipments are damaged by the express company, or for any reason the fruit is damaged, it is well to meet the customers more than half way and then take a good large dose of the Golden Rule.

This, in a few words, is the way by which we have built up and hold a good demand for tomatoes at from $1.00 for first early to $1.50 later in the season when tomatoes are selling in Utica at 50 cents a bushel or less. From two acres of our Northern Adirondack Earliana we sold 400 fifty pound baskets for $900.00 last year.

## Dr. de Van's French Female Pills—The Wife's Friend

A reliable regulator; never fails. While these pills are exceedingly powerful in regulating the generative portion of the female system, they are strictly safe to use. Refuse all cheap imitations. Dr. de Van's are sold at $5.00 a box, or three for $10.00. Mailed to any address. The Scobell Drug Co., St. Catharines, Ont.

**Garters in China.**

In China the natives tie the bottoms of their trousers closely around their ankles and so do not need garters. They have a fondness for American garters, however, but wear them on the outside as ornaments.

**Character.**

Character is not cut in marble—it is not something solid and unalterable. It is something living and changing and may become diseased as our bodies do. —George Eliot.

**Conscience.**

In the commission of evil another is but one witness against thee; thou art a thousand against thyself. Another thou mayest avoid—thyself thou canst not.—Quarles.

It is better to suffer wrong than to do it, and happier to be sometimes cheated than not to trust.—Johnson.

**A Weary Celebrity.**

When Mrs. Roger A. Pryor was a young woman living in Charlotteville, Va., visiting authors seldom reached the beautiful university town. "Thackeray, Dickens and Miss Martineau passed us by," says Mrs. Pryor in her book entitled "My Day—Reminiscences of a Long Life." But Frederika Bremer condescended to spend a night with her compatriot. Baron Schele de Vere of the university faculty, on her way to the south.

Schele de Vere invited a choice company to spend the one evening Miss Bremer granted him. Her works were extremely popular with the university circle, and every one was on tiptoe of pleased anticipation.

While the waiting company eagerly expected her the door opened—not for Miss Bremer, but for her companion, who announced:

"Miss Bremer, she beg excuse. She ver' tired and must sleep. If she come she gape in your noses."

**Funerals in England.**

At the time of Queen Victoria's funeral a writer in the Undertakers' Journal complained that, while royal burials were still conducted in an impressive manner, a sad lack of ceremonial distinguished the funerals of the nobility. "Item after item has been abandoned, idea after idea has been dropped, each meaning a distinct loss to our business. An undertaker in the west end, referring to the recent death of a noble lord, confided to me: 'Forty years ago I buried a member of that family, and the funeral bill came to £1,250 ($6,250). Ten years later I buried another, when it came to just over £700 ($3,500). Fifteen years ago I buried a third, at a cost of £320 ($1,600), but the bill for this one did not reach £75 ($375).'"

**Origin of a Famous Saying.**

Euclid, who is sometimes called the father of mathematics, taught this subject in the famous school at Alexandria. Being asked one day by the king of Egypt (Ptolemy Soter) whether he could not teach him the science in a shorter way, Euclid answered in words that have been memorable ever since, "Sire, there is no royal road to learning." Not many scraps of conversation have lived, as this reply has, for 2,200 years.

**Luck.**

Tommy—Pop, what is luck?

Tommy's Pop—Luck, my son, is what comes to a man who has the opportunity of buying something for a mere song, but who can't sing.—Philadelphia Record.

**A Bird in the Hand.**

A woman is a person who would rather have her husband at home o' nights than in the Hall of Fame.—Galveston News.

# EDSON

# ALBERTA

## THE COMING CITY OF WESTERN CANADA

### One of the Most Important Divisional Points on the Grand Trunk Pacific Railway

### The Coming Railway, Manufacturing, Mining, Agricultural, Coal and Commercial Centre of Western Canada.

## *A FEW FACTS WHY "EDSON"*

is a very important divisional point on the Grand Trunk Pacific Railway. All railway lines are divided into divisions. The C.P.R. has among many others, its Central Division, Prairie Division, Mountain Division and Pacific Division, and has created such cities as Fort William, Winnipeg, Calgary, Revelstoke and Vancouver. The Prairie Division of the C. P. R. begins at Winnipeg and ends at Calgary.

The Prairie Division of the Grand Trunk Pacific Ry. begins at Winnipeg and ends at **EDSON.** Calgary to-day is a large and prosperous city of some forty thousand (40,000) population. Ten years ago Calgary was rarely heard of. **EDSON** being equally situated on the railway lines to Calgary, is destined to become as great a city as Calgary.

### Unequalled Farm Lands North of EDSON

is situated the grand "prairie country" of the **PEACE RIVER,** which is known far and wide as the last available stretches of unbroken prairie farm lands. The railroad will be built into this country from **EDSON** at an early date. This alone will necessitate **EDSON** becoming one of the important manufacturing and distributing points of the West and will add untold thousands of property values.

### *Extensive Coal Fields near Edson*

South of **EDSON** about 30 miles are situated very valuable and extensive coal deposits. Mining corporations are investing large sums in developing this wonderful district, and the railroad will be built from **EDSON** to the mines if possible this year. The Yellowhead Coal Company are investing large sums just south of the city in developing their mines and hold contracts from the Grand Trunk Pacific Railway, for their general supply of coal for that district.

### *Wonderful Timber Belt*

West and northwest of **EDSON** are to be found vast timber areas, and as the facilities for transportation and power are unexcelled, **EDSON** will become the chief lumbering city of that part of the West. A sawmill is now being built just north of the city.

### *EDSON Has Great Assets*

**Which will make it one of the Greatest Cities in Western Canada**

### The Grand Trunk Pacific Railway

are now building round houses, shops, etc., at **EDSON,** and besides being a western terminus of the prairie division, it is also the eastern terminus of the mountain division, and eventually will be a great, if not greater, divisional point than Calgary.

### Business Houses, Banks, Manufacturers, Etc.

have locations already purchased in **EDSON** and considerable building is now going on. Capitalists are evincing keen interest in this new coming western city of **EDSON.**

### *EDSON'S RAPID GROWTH*

We predict that **EDSON** with its many natural resources and advantages, will become a city of thousands within a very short time and lots bought to-day in **EDSON** will be selling at several times the present price in a short time. **The time to buy lots in EDSON is now.**

Ten years ago business and residential lots could be bought in Calgary at prices ranging from $50 to $200, and the selfsame lots have sold since for $5,000 and up to $20,000. Now if **EDSON'S** location is equal to that of Calgary, what better assurance would you want for a safe investment of your money? A few years will see **EDSON** property values equal to those of Calgary.

### What Does This Mean To You?

It means nothing, unless you participate in the profits, and you can do this only by buying real estate in this young and vigorous western Canadian city. The time to buy is when the new city has passed through a seasoning stage, where it is in a formative period with its natural resources and where strategical position assures the building up of a big city.

**These few facts** are sufficient to convince the most sceptical of the immense possibilities of the great future growth of **EDSON** and it will only be the matter of a few weeks until the choice lots and locations will be bought up by the men who not only thought but acted quickly.

### Our Lots Are Nicely Located

adjoining the business section, and are all high, dry and level, and the city is rapidly growing towards this direction. The present prices for a limited time are:

## FOR LOTS IN INDUSTRIAL EDSON $60 TO $125

On Monthly Payments, or 5 Per Cent. Discount for Cash

## *THESE PRICES ARE FOR A SHORT TIME ONLY.*

**A few dollars invested in this coming city will make you independent in the future. Do not miss your opportunity. You should know about the last great West. Information and full particulars sent on receipt of a card. Telephone 8-1-9. Open Evenings**

## CANADIAN WEST LAND AND DEVELOPMENT COMPANY

Peterborough Office, 397 George St., Corner Hunter, Upstairs

**The Barber's Idea.**

Bentley had been out late the night before, or, rather, he had stayed in late in a little affair, and about all he had left to show for it in the morning was an old fashioned away-from-home-made headache. In hope of relief he had sought his old friend, the barber, and the latter had been busy on Bentley's head and face for the past hour.

"By Jove, Karl," said Bentley as the barber rubbed the top of his head, "that feels mighty good. I can tell you. The man who invented massage was not only a genius, but a benefactor to the whole human race. They ought to put up a statue to him. There's nothing like it when a fellow feels seedy. There's only one trouble about it."

"Vot iss it?" asked Karl, hoping that perhaps he might overcome the difficulty.

"Why, it's all on the outside," said Bentley. "If there were only some apparatus that would enable you to get inside a fellow's head and clear out the pains of the morning after, what a blessing it would be."

"Vell," said Karl, "I t'ink that maybe some day dose vacuum cleaner fellers vill do dot already. Vot?"—Harper's Weekly.

**The Practical Goat.**

M. Jules Renard was the mayor of Corbigny, in the Nievre. Every Sunday he contributed to the Journal de Clamecy, and this is the sort of things he used to give the peasants. Writing of the Journal Officiel, posted up on the wall of the mairie and which no one ever reads, he said:

"I had forgotten the goats. One of them never misses a number. Standing on its hind legs, with its front legs resting on the poster, it moves its horns and beard from right to left, like an old woman reading. When it has finished reading, as the official sheet has an appetizing smell of fresh paste, the goat eats it. After nourishing the mind one must feed the body. Thus nothing is lost in the commune. What a pity that all novel readers have not the stomach of this practical goat! They might then eat the books they had read, buy more, and so the man of letters would in the end be able to eat in his turn."—Paris Letter to London Globe.

**The ff in ffarington.**

The spelling of the ancient name ffarington with the small "f" found in old manuscripts is merely the retention of the old form of capital "F." Deeds of conveyance in the time of George II. and III. recite, "George of Great Britain ffrance and Ireland king," etc. The form could not therefore be due to ignorance, as has been said, for in days when gentlemen of estate were gentlemen of quality such a spelling in deeds could hardly arise from lack of a knowledge of spelling. The ffarington of Worden Hall, Lancashire, prefer, like several other well known families, including the Folkes and Frenches, to retain the archaic capital "F." The family trace their descent from Hugo de Meolis, who came to England with the Conqueror, and they have been associated for generations with the court, army and church and with public life.—London Court Journal.

**A Persian Hotel.**

Some years ago an effort was made to establish a European hotel at the junction of the two most traveled roads of Persia. Each room of this hotel contained some articles which I at least have never found in any hotel in either Europe or America. Among them were a nightcap, a hairbrush and a toothbrush. Perhaps it was on account of this extravagance that the scheme failed. An American missionary as he was leaving this hotel one morning was asked by a servant what he had done with the hotel hairbrush. This dignified man in clerical attire with his wife and children was prevented from leaving the hotel until it was ascertained that he had spoken the truth when he said that he threw the brush under the bed to scare away a cat.—Mrs. Colquhoun in Los Angeles Times.

**Fifty Men and One Elephant.**

Interesting tests were recently made in London to determine the respective pulling power of horses, men and elephants. Two horses weighing 1,600 pounds each, together pulled 3,750 pounds, or 550 pounds more than their combined weight. One elephant, pounds each together pulled 3,750 pounds, or 3,250 pounds less than its weight. Fifty men, aggregating 7,500 pounds in weight, pulled 8,750 pounds, or just as much as the single elephant, but, like the horses, they pulled more than their own weight. One hundred men pulled 12,900 pounds.—St. Louis Republic.

**Difference Defined.**

Mrs. Muchwed (reading paper)—Can you tell me the difference between a visit and a visitation? Mr. Muchwed (dryly)—A visitation, my dear, if one may judge by the spelling, is something longer than a visit. For instance, when your mother comes to see us it would be correct to call it a visitation.

**The Adirondacks.**

There are no venomous snakes or beasts in all of the great Adirondack forest section, although there are deer in abundance, eagles, pheasants, bears and beavers.

**Lung Cells.**

One hundred and seventy-five million cells are in the lungs, which would cover a surface thirty times greater than the human body.

**He Says In His Report That a More Efficient Organization of the Staff Is Advisable and Mobilization Should Be Studied — Petawawa Is the Best Camp of Its Sort In the British Empire.**

Ottawa, Sept. 9.—One of the pieces of work which awaited Sir Wilfrid Laurier on his return to the capital was to confer with Sir Frederick Borden on the subject of Gen. Sir John French's report on the Canadian militia. The Minister of Militia has been withholding the report from publication, on the ground that so important a document must pass before the Premier's eye before being made public. Yesterday the document was placed in the Premier's hands and the objection to publication disappears.

The report made by the Imperial inspector-general on the whole approves of the retention of the voluntary system for Canada. Sir John French also approves the numbers aimed at by the existing Canadian system, namely a first line of 100,000, with provision for the ultimate organization of a second line also 100,000 strong. With this as his basis, he makes a number of suggestions and criticisms.

Peace organization practically identical with that which should obtain in war time summarizes the needs of the Canadian militia, as presented in the report. The necessity for a large increase in the staff organization and the preparation of efficient plans of prompt mobilization are among the most important points brought out. The fondness of the city corps for ceremonial rather than the practical business of war is adversely commented upon, and in this connection the length of the annual camp training, especially for the cavalry, is declared to be quite inadequate to the production of efficient soldiers.

Prompt mobilization being of the utmost necessity in modern warfare, the general recommends in the mobilization staff alone an increase of ten or twelve officers, at headquarters and in the different districts, that plans may be worked out in minutest detail.

The lack of efficient officers in all branches of the service comes in for severe criticism. The general finds the standards set all right, but too much laxity in the reinforcement of these requirements. More attention should be paid to the training of the junior officers in the work of their sub-units.

The attendance both of officers and men at camp is found to be lamentably lax. Public opinion should back up the headquarters' staff in exacting as high a standard of military duty as that exacted by a business man from his employes.

The haphazard way in which new corps are formed is commented on, by which the individual preferences of the promoters of the new corps determined the arm of the service to which they should belong. This has produced a badly unbalanced militia force. The proportion of infantry is too large. The proportion of field artillery should be five guns to each thousand men, instead of two as at present. Each county should, he says, furnish a proportion of each arm of the service, instead of specializing. In regard to the cavalry, the necessity of an efficient "remount staff," to look after the supply of horses, is noted.

Decentralization of the mobilization stores to the individual corps and subdivisions, is urged, as also the necessity of ample reserves of ammunition, which should be interchangeable with that used in other parts of the Empire.

In the matter of armament, Gen. French recommends the howitzer, a short gun, throwing a 60 to 100-pound shell almost vertically upon the enemies hidden by hills or trenches, as more suitable for eastern Canada than the "Long Tom," which is adapted to direct fire. Some of the heavy artillery should be converted into howitzer batteries.

For the west the problem is different, and the general recommends the development of a force of mounted rifles, field artillery and infantry in the principal towns. There should be 16 days' training for the mounted men.

Petawawa Camp is declared to be the best training ground in the Empire, and a similar central training ground is suggested for the west. The cadet movement comes in for high approval. The administrative services are also commended.

### No Injury to Crops.

Brandon, Man., Sept. 9.—After one solid week of showers, each following in quick succession, the weather has cleared and the first warm sunshine since Sept. 1, was seen yesterday. By Monday next threshing operations will be resumed. Supt. Murray of the experimental farm, said that, while the grain was pretty well soaked, they did not anticipate any real injury.

### In Solitary Confinement.

Atlanta, Ga., Sept. 9.—The fact that Charles W. Morse, the banker confined in the federal penitentiary, was put in solitary confinement for two days last May for infraction of the rules, was made public here yesterday by Warden Meyer. He said that Morse's offence was a polite, but positive, refusal to tell from what source he received $4t in money.

### Mackenzie King Honored.

London, Sept. 9.—Hon. Mackenzie King has been appointed one of the vice-presidents of the permanent international committee on social insurance.

### "T. P." Coming.

London, Sept. 9.—T. P. O'Connor sails on the Baltic to tour Canada on behalf of the Irish party funds.

### Canadians for Texas.

Austin, Texas, Sept. 9.—The biggest influx of homeseekers ever handled by the railroads in September entered Texas Wednesday. They occupied six special trains. These car coaches were filled with farmers from Canada who are making new locations.

### New York Dairy Market.

NEW YORK, Sept. 8.—Butter, firm; receipts, 10,619; state dairy, common to finest, 23c to 29c; process, second to specials, 22½c to 27½c; factory, June make, 23½c to 24c; current make, 22c to 23c.

Cheese—Steady; unchanged; receipts, 2380.

Eggs—Firm; receipts, 15,003; state, Pennsylvania and nearby hennery, white, 31c to 35c.; do., gathered, white, 28c to 32c.

## CATTLE MARKETS.

**Hogs Lower at Buffalo—Old Country Prices Unchanged.**

NEW YORK, Sept. 8.—London and Liverpool cables quote American cattle steady at 12¼c to 15c per pound, dressed weight; refrigerator beef steady, at 10½c to 10¾c per pound.

### Toronto Live Stock.

TORONTO, Sept. 8.—The railways reported 136 carloads at the City Market on Wednesday and Thursday, comprising 1808 cattle, 2460 hogs, 3051 sheep and lambs, 211 calves.

**Butchers.**

Choice picked lots, of which there were few, not more than a load all told, sold at $5.30 to $6.15; loads of good, $5.60 to $5.85; medium, $5.15 to $5.40; common, $4.90 to $5.10; inferior, $4 to $4.25; cows, $3 to $5, and 2 choice cows, good enough to export, at $5.50; canners sold at $2 to $2.50 per cwt.

**Stockers and Feeders.**

Harry Murby reports the trade for feeders as being brisk, and more choice steers around 900 to 1000 lbs. each would have sold. The stockers trade, that is, light weight steers around 600 to 700 lbs., was not as good as it might be, and several loads of this class were left unsold in the dealers' hands. Prospects point to a slightly easier trade this coming week, as the presence of a lot of farmer visitors at the market, who are attending the exhibition, had a tendency to inflate prices for the day. Mr. Murby bought 100 cattle as follows: Best steers, 900 to 1000 lbs. each, $5 to $5.40; best steers, 800 to 900 lbs. each, $4.85 to $5.35; best stockers, 600 to 700 lbs. each, $4 to $4.50.

**Milkers and Springers.**

Receipts of cows were fairly large, and the market, as strong as at any time this season. Prices ranged from $45 to $65 and a few as high as $70 and $75, white two of extra quality brought $94 each.

**Veal Calves.**

Two hundred and eleven calves sold at prices ranging from $4 to $7.50, with a very few at $8 per cwt.

**Sheep and Lambs.**

Sheep were unchanged at $4 to $4.75 for ewes, and $3 to $3.50 for rams. Lambs sold from $6.85 to $6.20, the average price being $6 per cwt.

**Hogs.**

Receipts from all sources were 2460 for the two days. Prices were unchanged at $9 for selects fed and watered, and $8.65 to drovers for hogs f.o.b. cars at country points.

### East Buffalo Cattle Market.

EAST BUFFALO, Sept. 8.—Cattle—Receipts, 100 head; active and steady; slow on common; prices, unchanged.

Veals—Receipts, 200 head; active and steady, $6.50 to $10.50.

Hogs—Receipts, 2900 head; slow, 10c to 12c lower; heavy, $9.70 to $9.90; mixed, $9.90 to $9.95; yorkers, $9.80 to $10.10; pigs, $9.90 to $10; roughs, $8.40 to $8.60; stags, $6.50 to $7.25.

Sheep and Lambs—Receipts, 2000 head; slow; yearlings and mixed, steady; wethers, 15c to 25c lower; lambs, $6 to $7; yearlings, $5.25 to $5.50; wethers, $4.50 to $4.75; ewes, $4 to $4.25; mixed sheep, $2 to $4.50.

### New York Live Stock.

NEW YORK, Sept. 8.—Beeves—Receipts, 1821. Feeling, nominally steady; dressed beef, quiet, at 8½c to 12c for native sides; Texas beef, 8c to 9c. No exports.

Calves—Receipts, 200 head; steady; veals, $8 to $11; culls, $5 to $7; prime and choice western calves, $7 to $8; no grassers; city dressed veals, steady, at 14½c to 17c per lb., country dressed, 10c to 15c.

Sheep and Lambs—Receipts, 6453; sheep, steady; lambs, slow; choice, steady; offers a fraction lower; sheep, $3 to $4.60; culls, $2 to $2.50; lambs, $6 to $7.30; culls, $5.

Hogs—Receipts, 688; market, steady. State and Pennsylvania hogs, sold at $9.80 to $10.

### Chicago Live Stock.

CHICAGO, Sept. 8.—Cattle—Receipts 6800; market steady; beeves, $4.80 to $8.40; Texas steers, $3.75 to $6; western steers, $4.50 to $7.20; stockers and feeders, $4 to $6.25; cows and heifers, $2.40 to $6.50; calves, $7 to $9.25.

Hogs—Receipts 14,000; market slow and weak; light, $9.15 to $9.75; mixed, $8.60 to $9.60; heavy, $8.30 to $9.35; roughs, $8.30 to $8.55; good to choice heavy, $8.65 to $9.35; pigs, $8.30 to $9.40; bulk of sales, $8.65 to $9.20.

Sheep—Receipts 35,000; market weak; natives, $2.85 to $4.45; westerns, $3.25 to $4.50; yearlings, $4.75 to $5.75; lambs, native, $5.25 to $7; western, $5.25 to $7.

### Cheese Markets.

BROCKVILLE, Sept. 8.—At the regular weekly meeting of the Brockville Cheese Board to-day, 2745 boxes were registered, 2130 colored, balance white, 10 9-16c bid; no sales.

### Incendiarism Suspected.

Princeton, Sept. 9.—At an early hour yesterday fire broke out in an unoccupied building owned by Mr. W. H. Wells. Despite the efforts of the fire brigade this building was destroyed, together with the residence of Mr. and Mrs. Cheesewright. The Bank of Hamilton was almost burned. The buildings are partially covered by insurance. The fire is supposed to be the work of an incendiary.

### Recalls Phoenix Park Murder.

Dublin, Sept. 9.—James FitzHarris, known as "Skin the Goat," who drove the cab containing the assassins of Lord Frederick Cavendish and T. H. Burke to the scene of the crime in Phoenix Park, May 6, 1882, died in the workhouse yesterday.

### Higher Still, and Higher.

Paris, Sept. 9.—George Shavez, the French aviator, broke the world's record for height yesterday, rising in a monoplane 8,792 feet. The best previous record was made by Leon Morane, whose mark was 8,471, made on Sept. 3, at Deauville.

### Transcontinental for Australia.

Melbourne, Sept. 9.—Hon. Mr. Fisher, in delivering his budget speech announced the construction of a great transcontinental railway, to cost $200,000,000. Incidentally, he extended a cordial welcome to British immigrants.

### Has No Grog Tub.

London, Sept. 9.—The Niobe, like the Rainbow, does not possess a grog tub. Engineer Lieut. E. C. Bartlett for special service, has been acting engineer, Sub-Lieut. H. J. M. Henry has been appointed to the Niobe.

### Pressing Need for Workers.

London, Sept. 9.—Rev. Douglas Ellison of Regina has sent a pressing letter asking for workers, and pointing out the difficulty the archbishop's council is encountering in finding men who can go immediately.

### Locke on the Empire.

London, Sept. 9.—At the librarians' conference in Exeter, Dr. Locke of Toronto made an interesting speech on "The Empire," urging that Canada should be more closely allied to the Mother Country.

### A $60,000 Wedding Dress.

Newport, R.I., Sept. 9.—A mere trifle of $60,000 for a wedding dress is by no means an extraordinary expenditure, according to Miss Irene Sherman, who will become the bride of Lawrence L. Gillespie to-day. She is the daughter of Mr. and Mrs. W. Watts Sherman of Ochre Point, leading members of the millionaire set, and her wedding will be one of the events of the waning season here.

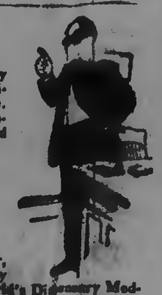
The wonderful dress is made in princess style of ivory satin aurore, with a profusion of almost priceless Mechlin lace. She has already received wedding presents valued at upwards of a million dollars.

### Gasoline Exploded in Boathouse.

Windsor, Sept. 9.—As the result of a gasoline explosion in a boathouse Wednesday night, a launch owned by William Humphries and Clark Deneau was badly damaged by fire, and several members of a boating party narrowly escaped serious injury.

Deneau and Humphries were making some repairs to the launch preparatory to taking it out on the river, when the explosion occurred. Two members of the party were scorched by the flames and saved themselves by plunging into the river. The fire department extinguished the flames.

*When You Think*



Of the pain which many women experience with every month it makes the gentleness and kindness always associated with womanhood seem to be almost a miracle. While in general no woman revels against what she regards as a natural necessity there is no woman who would not gladly be free from this recurring period of pain.

*Dr. Pierce's Favorite Prescription makes weak women strong and sick women well, and gives them freedom from pain. It establishes regularity, subdues inflammation, heals ulceration and cures female weakness.*

Sick women are invited to consult Dr. Pierce by letter, free. All correspondence strictly private and sacredly confidential. Write without fear and without fee to World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.

If you want a book that tells all about women's diseases, and how to cure them at home, send 21 one-cent stamps to Dr. Pierce to pay cost of mailing only. Then he will send you a free copy of his great thousand-page illustrated Common Sense Medical Adviser—revised, up-to-date edition, in paper covers. In handsome cloth-binding 31 stamps.

## THE SUMMER POPULATION OF STONY LAKE IS AT LEAST 5,000 203 COTTAGES ARE THERE NOW

**Some Interesting Figures Supplied the Examiner by Mr. Geo. Cochrane, High County Constable, Who Can Count Fifty-one Cottages From His Summer Home.**

### LITTLE KNOWN STATISTICS

It may surprise most Peterborough people to know that there are over two hundred—to be exact, there are two hundred and three cottages at Stony Lake. This large figure may cause some surprise, but Mr. Geo. Cochrane, High County Constable, has gone into the statistics and counted the cottages and the informa on comes from him. It is remarkable that even among the people who spend every summer at Stony Lake there is scarcely one who has been able to guess anything like the correct number. Most of the estimates are away under the correct mark. One lady who has spent many summers at the lake guessed that there might be twenty-five. The captain of one of the Stony lake fleet said one hundred and fifty, but most of the guesses were below that figure.

Mr. Cochrane, from his cottage, Crown Point, on Eaglemount , can count no less than fifty-one cottages, so that that number at least, is under his official vision and the inmates must preserve law and order. From no other point on the lake can so many cottages be seen.

Mr. Cochrane has carried his conclusions still further. Giving to each cottage an average of fifteen people per year, including vi itors, a most conservative estimate, he points out that there are at least 3,000 in the cottages of Stony Lake, each season. Add to this the population of the boarding houses and hotels and the people brought by excursions and the result shows that on an average day in the height of the season the summer population of the gem of the Kawartha chain is at 5,000.

### WILL NOT STOP THE REGIMENT

OTTAWA, SEPT. 9. — After a conference between Hon. L. P. Brodeur and Sir Frederick Borden, the Minister of Militia, it was decided that the government would not try to stop the participation by the 65th Regiment in the Eucharistic parade Sunday. Hon. Mr. Brodeur pointed out that the Regiment always took part in the fete Dieu.

### RAT SAVES MAN'S LIFE

NEW YORK, Sept. 7th.—If Frank Ribble had not paused in retiring to bed Friday night to help to catch a rat he might not have been living yesterday to tell how Isaac Kymet's farmhouse in Branchville, N.J., had taken fire.

Frank carried a lighted kerosene lamp to his room in the Kymer house. Somebody cried "A rat! Come everybody!" Frank set the lamp down and ran to answer the call. But he never saw the rat, for as he reached the ground floor he heard his lamp explode. He hurried back with the Kymers and found his room ablaze.

Neighbors formed a bucket brigade and the house was saved.

### MILITIA ORDERS

Headquarters, Peterborough,
Sept. 8th, 1910.

Orders by the Officer Commanding 57th Regiment, Peterborough Rangers—

The regiment will parade for drill, in drill order, at the Armouries, at 8 p.m. on Monday, Sept. 12th, 1910.

D. WALKER,
Capt.-Adjt.

**Ohio Farmer Anticipates War With Japan, and Believes He Could Gain Advancement**

Examiner Special.

WASHINGTON, Sept. 7th.—The application of Joseph Allen ,a wealthy retired farmer of Westchester, O., eighty-eight years old, for enlistment in the navy has been forwarded to the Navy Department by Lieut. Carlos Bean, recruiting officer at Cincinnati, O.

Mr. Allen was said to be anxious to serve his country in anticipation of a war with Japan. He was willing to start as an apprentice seaman, hoping to work his way along through various ratings in years to come. His services have been declined by the department.

### ROMANCE COST $10,000

**Farmer Casberg, Who Advertised for Wife, Got Costly One**

Examiner Special.

SIOUX FALLS, S. Dak., Sept. 7th.—Marin Casberg, a Deuel County farmer who is rated as being worth about $50,000, wanted a wife, and instead of singling out and paying court to some of the fine women of Deuel County he advertised in a matrimonial paper. A Chicago woman answered the advertisement and in due time they were married.

Trouble arose and resulted in a separation after Casberg had paid her the sum of $5,000 on condition that she would remain away. A few weeks ago the woman, having learned that Casberg was much richer than she supposed at the time of accepting the $5,000, instituted an action for alimony and support. Casberg then paid the woman an additional $1,500 and her attorney $500, and she was given a divorce.

To date Casberg's eventful although belated voyage on the matrimonial sea has cost him about $10,000.

**Ferry Reported to Have Sunk in Lake Michigan With Engine and Entire Train on Board—Crew Saved by Other Boat.**

### LOSS HALF MILLION

Special Wire to the Examiner.

SAULT STE MARIE, ONT, SEPT. 9—Wireless messages have been picked up to the effect that the Pere-Marquette car ferry, No. 18, sank in Lake Michigan during the terrific gale last night, with a train and cargo aboard. It is gathered that the passengers and crew of seventy-five persons, were saved by a sister ferry, but there is great anxiety here. The loss is said to be half a million of dollars at least.

A later despatch says: It is feared now that the sinking of the Pere Marquette car ferry in Lake Michigan means one of the most disastrous occurrences in the history of navigation on the great lakes.

**Many Lives Lost.**

Wireless messages from mid-lake to Ludington, Mich., and other points, and transmitted here, indicate that in all probability thirty-nine of the passengers and crew lost their lives. One report says that all officers and crew were drowned, except F. J. Young, chief steward, James Fay, cook, and Seymour Cochrane, passenger. Another story says that the disaster took place twenty miles from Cheboygan, and that all but seven were picked up by a sister ferry. The gale was the fiercest in the memory of Lake Michigan sailors.

### OPENING OF SEASON

Do not forget the opening of the theatrical season to-morrow, (Saturday), at the Grand Opera House, when that great comedy success, "Ole Olson," will ba presented. One matinee only, at 2.30 p.m. Prices—Children 15c., adults 25c. Also at night at 7.30. Prices—25c., 35c., 50c. and 75c. Private box seats $1.00. Gallery 15c.

### WEST INDIANS AS DOMESTICS

**Steamer Kenora Arrives With Many Passengers For Ontario Cities**

NEW YORK, SEPT. 9.—The steamer Kenora is here with a large contingent of West Indian girls on board. They are bound for various Ontario cities where their services are in demand for domestic work.

### 15,000 CHILDREN

**Take Part in Parade to St. James' Cathedral, Montreal.**

Special Wire to The Examiner.

MONTREAL, SEPT. 9.—Fifteen thousand school children assembled this afternoon and marched to St. James' Cathedral and received blessing fro mthe Cardinal Legate. The weather has improved.

### PETERBOROUGH MAN IN DOUBLE "KNOT"

**Mr. Chester Kemp, One of the Principals in Interesting Edmonton Social Event**

(From Edmonton Journal)

A double wedding, in which two popular Edmonton couples were the principles, took place at 6.30 this morning in All Saints church, when Chester Kemp, who is in business at Edson, was married to Miss Florence Urquhart; and Walter Campbell was married to Miss Ethel Urquhart, both brides being daughters of F. Urquhart.

Mr. Kemp is a former resident of Peterborough and has many friends here.

**BIRTHS.**

CRAWFORD.—At Toronto, on Sept. 5th, 1910, the wife of Mr. Jos. Crawford, 61 Millicent street, of a daughter.

## WAS HEAVILY FINED FOR ASSAULTING WILLIAM WALLACE BY INFLICTING A WOUND THAT NEEDED FOUR STITCHES

### THE LAWNS HAVE BEEN JUDGED

The annual judging of lawns in the contest under the auspices of the Peterborough Horticultural Society took place yesterday afternoon, when some twenty different premises were inspected. The expert secured to act as judge, Mr. E. F. Collins, Suprintendent of Allan gardens, Toronto, made a careful inspection. The results will likely be given in tomorrow's Examiner.

### SASKATOON

There's a town that's coming strong,
Saskatoon.
And it's coming right along—
Coming soon;
There, the summer winds are low,
Where the summer roses blow;
You can stand and see it grow—
Saskatoon.

... valley, O, so fair,
Saskatoon,
All the railways now are there,
Saskatoon;
Sunny skies and fields of gold,
Land you'd like to have and hold,
... to have your fortune told,
Saskatoon.

Pearl, then, of a Promised Land,
Saskatoon.
Shimmering, chinook-wind-formed,
Saskatoon.
Fairest land from sea to sea,
Land of opportunity,
"One best bet," take that from me,
Saskatoon.

—Cy Warman.

From Saskatoon-Saskatchewan Land Corporation L'td., Toronto:

**KID GLOVES**

**T. C. Elliott opens this Fall, one of the largest Kid Glove Departments in Peterborough. All the best makes are shown—all shades**

**Saturday Last Wallace Was Struck by What He Thought, a Pair of Climbing Spurs—Taken to Hospital Where Cut Was Attended To—Defendant Pleaded Guilty.**

### INFORMANT'S EVIDENCE

The man who struck William Wallace in the Montgomery House bar last Saturday evening made atonement for his action by paying forty dollars and fifty cents, which sum includes the amount necessary to pay the doctor and hospital expenses. Wallace was the only one to give evidence and testified as follows:

"I was in the bar on Saturday with a friend. We had two drinks of beer and I was not drunk. I treated the defendant and we drank together, after which we exchanged jokes. The defendant said he didn't like me and in return I said I don't like you, and you're not much. I was about to turn from drinking my beer when I was struck with something that caused the blood to flow freely from a cut over the right eye. The doctor was called and four stitches were necessary to close the wound. I was taken to the hospital where the doctor called twice to see me. He told me that the skull was fractured. I noticed a pair of spurs used for climbing poles over the defendant's shoulder and I am not sure whether he struck me with them or not.

His Worship Magistrate Dumble considered it a very serious offence and imposed the above fine. Mr. A. P. Poussette, K.C., acted for the defendant and Crown Attorney Wood prosecuted.

## RECKLESS AVIATING

**New Crime on the Calendar of the Paris Police Court Now—Aeroplane Smashed Some Electric Lights**

### NEW LAWS NEEDED

Special Wire to the Examiner.

PARIS, FRANCE, SEPT. 9—"Reckless aeroplaning" is the latest crime on the calendar of the police court here. The defendant this morning was an aviator named Pariot, who swooped down and into some electric lights, smashing several. The Magistrate trying the case, could not find laws to cover the case and new ones must be framed. As French airship builders expect to sell eleven thousand machines within a year, the necessity for drastic regulations is great.

## THIS SCOUT IS DISGRACED

**The Leader of the Montreal Boy Scouts is Sentenced to Six Months' Imprisonment and Deportation.**

### INDECENT PRACTICES

Special Wire to The Examiner.

MONTREAL, SEPT. 9. There was a sensation here this morning when Judge Weir sentenced Cuthbert Singleton, the scout master of local Boy Scouts to six months' imprisonment and deportation immediately for grossly indecent practices with boys in his charge. Singleton came from England here only a month ago.

**3,500 TONS OF BLOOD.**

**Scientists say that this amount of blood is purified by the liver and kidneys of a human being in a year. Is it any wonder that they get tired and sluggish and require the assistance of Dr. Chase's Kidney and Liver Pills to arouse them to action and to restore their vigour.**

## HAD TO BE POSTPONED

**Outdoor Celebration of Pontifical High Mass at Montreal This Morning Was Prevented By Rain**

### 100,000 DISAPPOINTED

Special Wire to The Examiner.

MONTREAL, SEPT. 9.—All preparations made here for the celebration of high pontifical mass in Fletcher's field, under the shelter of Mount Royal, this morning, came to naught. A great cross had been erected, with embellishments of angels and thrones for the Cardinals, Vannutelli and Logue. It was expected that one hundred thousand people would attend and thirty thousand school children, after training for weeks, to sing. But the rain came in torrents, commencing at midnight till late this morning. It may be held to-morrow. In the meantime mass will be celebrated in some of the larger cathedrals.

## DOCTORS FEAR DREAD SCOURGE

**Hamilton People are Very Much Alarmed at the Rapid Spread of the Disease in That City —Horses Placarded**

### PITIFUL COURT SCENE

Special Wire to the Examiner.

HAMILTON, SEPT. 9.—This city is very much alarmed over the existence of infantile paralysis, which doctors say they are unable to prevent. Three adults a number of children have died within the last few days. There are over a hundred cases now. The Health Department are placarding all houses where the disease exists.

There was a pitiful scene in the police court this morning, when pretty little golden haired daughter of Mrs. Geo. Shafer clung to her mother's skirts, when she was sent down for a week for shop lifting. They had to force the child's hands to let go.

## FAREWELL WAS SAID

**Mr. D. Hughes Charles the Guest of Honour at an Enjoyable Affair at Residence of Mr. W. R. Morris.**

### GOING TO MONTREAL

A very enjoyable affair took place at the residence of Mr. W. R. Morris last evening, when Mr. D. Hughes-Charles, who is leaving shortly for Montreal to take up residence, was the guest of honour at a card party, at which about forty guests were present. The evening was most pleasantly spent in cards and music. Many regrets at Mr. Hughes-Charles' departure from the city, were expressed.

**T. C. Elliott, 392 George Street.**

## "PARTY NOT DEAD YET"

**Says Hon. Geo. W. Ross in Opening the Ontario Reform Association in Toronto This Morning.**

### PRESIDENT RE-ELECTED

Special Wire to The Examiner.

TORONTO, SEPT. 9.—"The Liberal party in Ontario is not dead," declared Hon. Geo. W. Ross in opening the meeting of the Ontario Reform Association this morning. The association listened to several enthusiastic and encouraging speakers, including Hon. George R. Graham, who is just back from the west. Contrary to expectations, Mr. H. M. Mowat again accepted the presidency. Prominent Liberals from all over the province were present.

## MIDWAY AT EXHIBITION

**"The Pike Will Be Feature of Peterborough's Big Fair Next Week —Plenty of Amusement For Young and Old in Sight**

### THE ATTRACTIONS

A big feature of Peterborough's Industrial Exhibition the last three days of next week will be the Midway, on which there will be much more than the usual number of attractions. There is no department that the average man or woman takes more interest in than the Midway, and realizing this the directors of the Exhibition have encouraged attractions to come here for the Fair. The big merry-go-round now at the Toronto Exhibition will be here next week, as well as other amusement features from the Canadian National.

## WINNERS OF PRIZES IN THE REGIMENTAL RIFLE MATCH

The winners of the prizes in the 57th regimental rifle matches at Omemee, September 5th, 1910, are as follows:

1st prize, $6.00—Pte. E. Manley.

2nd prize, $5.00—Pte. A. M. Brumwell.

3rd prize, $4.00—Corp. J. F. E. Cobichon.

4th prize to 8th prize, each $3.00—Pte. P. Legrow, Pte. G. D. Hazlett, Bugler B. Mills, Bugler East, I. M. Sgt Edwards.

9th to 16th prizes, each $2.00—Pte. J. P. Simmons, Sgt. J. Elliott, Pte. J. E. Manley, Sgt. B. Halpin, Pte. J. Drummond, Pte. F. Dixon, Pte. H. Griffin, Corp. J. A. Brumwell.

17th to 28th prizes, each, $1.50—Bugler Hanwell, Corp. H. Simmonds, Sgt. F. F. Brown, Sgt. H. Hanwell, Sgt. Brightman, Pte. J. Gamble, Col. Sgt. H. Smith, Col. Sgt. Levalls, Pte. V. Henry, Sgt. Playford, Sgt. W. I. Mitchell, Pte. H. Huntly.

29th to 44th prizes, each $1.00—Col. Sgt. Soncee, Sgt. Sharpe, Pte. J. Moore, Pte. Spillsbury, Pte. C. Taylor, Pte. L. Ingram, Pte. R. Chatten, Pte. L. Gurney, Pte. W. Rusk, Pte. R Brock, Bugler E. R. Bowie, Pte. C. Barlett, Corp. M. Gurney, Buglers A. Phillips and B. Russell and Pte. W. Lewington.

### SPLENDID PICTURE

**Princess Has Novel Film Showing Features of Cowboy Life**

The Princess has a picture of especial interest just now that is well worth seeing. It depicts scenes of ranch life in the great south west, and shows the world's champion riders and rope throwers at work. It is one of the most stirring and exciting pictures that has ever been shown in Peterborough, and in addition to its lively nature, is marked by its clearness and life-like realism.

## Confectioners Complain That Oil On George Street Has Resulted In Much Damage To Their Stock

There is indigestion on the part of many George street business men, more especially the confectioners and fruit dealers over the oiling of the thoroughfare, and they are loud in their complaints about the disagreeable odour and the effect it has upon their wares.

"Why, half a dozen people have brought back cakes to me," remarked one well-known confectioner to the Examiner last night." They said they could not eat them, so badly were they favoured by the odour from the oil. It is an outrage that they should put such stuff on the streets."

The reporter advanced the argument that Toronto has tried the oil system and found it a success.

"Well, they don't use oil like that" was the reply.

That the odour has so affected the pastry in the George street stores so as to render the products unedible, can be testified to by many a household. It is not hearsay evidence if all, as the homes of two members of the Examiner staff pastry purchased in down-town stores could not be eaten because of the taste of the oil. As a newspaper man is known for his ability to eat anything with ostrich-like activity, one can form an idea how badly the articles in question were affected.

## Omemee Man Complains Of Visit Of The 57th Regiment

A local member of the 57th Regiment has received the following letter from Omemee, in regard of the visit of the Regiment:

In the name of the people of Omemee.

Dear Sir—I would like to put an ad. in your valuable paper about Peterborough sports, such as volunteers. We would like to ask you to have Peterborough people to keep their sports at home, and let them enjoy their fun, such as they call it. We would rather be thankful and appreciate it if they kept those sports at home for themselves, because we don't enjoy such a sport, especially if people can't behave themselves. It's better to have them stay at home and if it should happen that they should come, we would have to take different measures to prevent such fun. We were very much surprised that a place like Peterborough can't bring up people to better manners than that such as they showed here. It is really a disgrace to the Government.

A CITIZEN OF OMEMEE.

**BIRTHS.**

PILLSWORTH — In Peterborough, on Friday, Sept. 9, 1910, the wife of Mr. F. D. Pillsworth, of a daughter.

## ROYAL BANK CONTROLS THE UNION BANK NOW

The deal which makes the Royal Bank easily the third largest in Canada, with assets of over $90,000,000, was ratified by the Union Bank of Halifax holders yesterday and the Royal Bank shareholders to-day.

The absorption of the Union Bank is now complete, giving the Royal a chain of branches from the Atlantic to the Pacific, and no less than 15 branches in the West Indies.

The Royal Bank holders held their meeting in Montreal at noon to-day.

The purchase of the Union Bank's assets was unanimously approved.

The next step will be to obtain the approval of the Governor-in-Council of the sale and purchase, which it is expected will take effect on the 1st of November next.

## Man Wakes Up To Find Burglars In The Room

Special Wire to the Examiner.

TORONTO, SEPT. 9.—Awakened out of a sound sleep at four o'clock this morning, A. Andrews, of 95 Robert street, found himself confronted by two burglars with flashing revolvers. They demanded his trousers and extracted $17 from the pockets and then searched for more. Mrs. Andrews slipped her rings from her fingers and hid them. [illegible] the intruders were alarmed and decamped. The police are [illegible]

### LA PRESSE.

La Presse, published in Montreal, celebrated its 25th anniversary by the issue of a splendid edition of 96 pages. This is no unique exhibition of our contemporary's enterprise, for every day La Presse springs surprises upon its less enterprising competitors. La Presse is the foremost newspaper of Canada, in the way of enterprise, and result. It is alive without being "yelow" and in its daily record of events, touches every phase of news interest, that can appeal to the largest constituency of readers, enjoyed by any Canadian newspaper. While every issue is full of life and interest, La Presse's anniversary number was a triumph of newspaper enterprise, in matter, artistic illustration and happy choice and comprehensive treatment of special subjects.

### EAST IS WEST AND WEST IS EAST

Sir Wilfrid Laurier, Premier of Canada, has returned to Ottawa after a two-months' tour of the Canadian West. Sir Wilfrid Laurier in the course of his career, as a statesman, and especially since he has been charged with the responsibility of power, has done much to advance the material progress, and the unity of the Dominion. And he has done a most important work in this way by his recent tour. Canada is geographically composed of diverse elements as to natural capabilities and situation. It is also composed of diverse races with, naturally, diverse ideas and aspirations. Much of Sir Wilfrid's work has been to remove geographic disabilities by providing compensating transportation facilities; and his personal observation of the needs of the West in this regard will better equip him for dealing with the problems still to be solved. All his public life Sir Wilfrid has striven for the harmony and unity of the people of the Dominion. He has preached the doctrine in the West and to receptive ears for his warm welcomes have been popular and not partizan. He was the Premier of Canada, taking counsel with the people of Canada. Thanks to his visit and his utterances, East and West have become more and more mere geographical expressions. The Dominion has been brought to see more and more that its interests are common and that its aims are ambitions and strivings should be the same.

On his return to Ottawa Sir Wilfrid will place before the several Departments concerned, the many matters brought to his attention which will form the basis, in many cases, of legislation this session.

### SIR WILFRID'S TRIBUTE TO BRITAIN.

Speaking at Fernie, B.C., on his recent tour Sir Wilfrid Laurier said, regarding the benefit of British connection and predominance in political matters:

"It is our proud privilege that we are living under British institutions. I have said many times, and I repeat again, that the British institutions under which we live are the best that have ever been devised for the government of man. We are a monarchy and we are at the same time a democracy. We are the subjects of the King, but we know that the King himself, like the humblest of his subjects, is subject to the law, and that he is himself the first to give an example of submission to the law, and in this part of the vast domain of His Majesty in Canada we are proud to maintain ourselves under the British flag and to say that whilst we are Canadians we are also British subjects to the core. (Applause.)

"Those regards Canadians and other members of the imperial family enjoy real liberty, the real essence and spirit of liberty. In the United States there is boast of liberty, according to a rigid written code, the letter of liberty. Yet there exist conditions under the constitution of the United States that establish a practically autocratic form of Government, in which the theory of responsible representation is ignored. The President of the United States is supreme during his term of office of four years. He appoints his own cabinet and is responsible in no direct way, like the first minister of Canada to the electors, either through Parliament, or otherwise, to the people he is supposed to represent. He need not, as our prime minister must do possess the confidence of the popular chamber. The majority of Congress may withhold their confidence, yet the President is not thereby constitutionally, though he may be, morally and personally, affected. In Canada and British countries the people rule and must at all times have their wishes met. If the people, through their representatives at any time expres want of confidence in a government, out the government goes. We enjoy real liberty. We govern ourselves, through a cabinet, which must do as we say, or get out of the way.

### EDITORIAL NOTES.

The Hague Tribunal seems to be in league with the Lord's Day Alliance. The United States questioned Newfoundland's power to pass laws prohibiting Sunday fishing, but the Tribunal has upheld this right.

Mr. Borden being unable, apparently, to prevent "the expenditure of 200 million dollars" in the Transcontinental railway, should go to Australia and sound a note warning. Australia proopses to build a transcontinental railway at a cost of 200 million dollars.

The Toronto News emphasizes both the desire and the necessity of helping Mr. Borden out, when it features his platitude expressed at the National Exhibition that "both provincial and federal governments must bestir themselves to promote the interests of the basic industry," as a "notable incident of the day."

Why not submit the question of the right of municipalities to own their own streets to the Hague Tribunal? Its recent decision has established the right of Newfoundland to control its own seaboard and harbours. In Ontario all sorts of corporations have their grip on our streets, upon which they work their will at will. They plant hideous poles where no poles should be; they slash and destroy street shade trees ruthlessly and without regard to symmetry or possibilities of future satisfactory growth, and generally act as if they owned the streets and as if the people were mere tenants at will. By all means give the Hague Tribunal or some other tribunal a chance to do justice.

### RURAL MAIL DELIVERY.

(Toronto Star)

Admissions from Opposition sources as to the success of rural mail delivery in Canada have generally been more or less grudging. "Not as good as the United States' system" has been the complaint of Ottawa critics, who would have almost wept for anguish if Canada had been given the deficit-producing system in question. "The best which the population will justify" has been Mr. Lemieux's motto, and how well he has lived up to it is indicated by the remarks of General Degraw at the Exhibition directors' luncheon.

Canada had gone into rural mail delivery in a more systematic and businesslike way, said General Degraw. The States had paralleled and duplicated lines in a hurry to give a district what it wanted, but the Ottawa Government avoided these disadvantages, and wise men were carrying out the Canadian policy.

From one of the assistant Postmasters-General of the United States, this warm tribute comes gracefully. It is another feather for the cap of one of the Dominion's most capable departmental administrators.

### THE WORLD'S COAL.

(London Advertiser.)

Statistical information as to the production, consumption, imports and exports of coal in the British empire and the principal foreign countries is furnished in the British Board of Trade's "Coal Tables for 1908-09." The chief coal-producing countries of the world are the United States, the United Kingdom, Germany, France, and Belgium, and the production for one year named is thus distributed in tons of 2,240 pounds:

| | |
|---|---|
| United States | 380,336,000 |
| United Kingdom | 263,774,000 |
| Germany | 146,507,000 |
| France | 36,654,000 |
| Belgium | 23,182,000 |

The United States shows the greatest increase in production in the last four years, namely, 21,000,000 tons. Great Britain and Germany coming next, with about 12,000,000 tons each. British India is the greatest coal producer in the empire outside of the United Kingdom, Australia being second, and Canada a close third. The output of India is increasing at a much faster rate than that of any of the overseas dominions. For the year 1908 the production of the outlying parts of the empire was:

| | Tons. |
|---|---|
| British India | 12,770,000 |
| Australia | 10,194,000 |
| Canada | 9,270,000 |
| South Africa | 4,938,000 |
| New Zealand | 1,861,000 |

India's output in the last three years has increased by 3,000,000 tons; Australia's by 1,500,000 tons; Canada's 1,000,000 tons, New Zealand's by 130,000 tons, and Africa's by 80,000 tons.

In Canada the average value of coal at the pit's mouth was 10s. 8d. per ton, or more than double that of India, while the Australian price was midway between the two extremes, 7s. 4½d. India's price increased during the last three years was, however, greater than that of any of the colonies.

### THE BLUNDER AT ORILLIA.

(Toronto Star.)

There is no more serious aspect to the dismissal of Dr. Beaton from the superintendency of the Orillia Hospital for the Weak-Minded than the report that he was told that the Ontario Government was prepared to "treat him right" if he signed without protest the ready-prepared resignation which was handed to him by one of Mr. Hanna's officials. The threat which is alleged to have been implied that he would receive no retiring allowance should he complain of the Government's harshness, is one unworthy of the lofty professions of Sir James Whitney and his colleagues.

When comment was first made upon the dismissal of Dr. Beaton, a number of papers hesitated to take up his cudgels because, as they pointed out, he had resigned. The Hamilton Herald, for instance, argued that the resignation was a confession, and came to the conclusion that if Dr. Beaton had been seriously wronged he would have refused to resign, and challenged the Government to dismiss him. But the report as to the treat-you-right" intimation puts another face on the matter. It explains the silence of Dr. Beaton, since he knew, or thought he knew, that vengeance would be taken upon him if he made a protest. The Government's hostility was further brought home to him by the department's act of petty meanness in suddenly cutting off his supplies, the doctor having been refused, it is said, the privilege of buying even a little meat and coffee from the institution on the day of his ejection.

It seems as if the Government will be able to congratulate itself upon having made vacancies for two of its active supporters by dismissing one inactive political opponent. For Dr. Rollins, the medical man upon whom the hospital must otherwise depend, is said to have had but little experience in the treatment of mental diseases. Attention is drawn to the fact that while Dr. Beaton was ostensibly dismissed on account of age, Dr. Rollins, who is a recent appointee, is sixty-six. And now Dr. Rollins is to have another doctor to assist him.

The Star has already pointed out that there might be little complaint had Mr. Downey been appointed by the Government to some post for which his abilities would qualify him, a post not necessarily inferior, but certainly different, to his present one. If such a course had been taken, and if his appointment had not involved the harsh and revengeful dismissal of a faithful Provincial servant without cause, but little objection would have been heard from the Liberals of the Province.

## How East And West Keep In Touch Through Home Loyalty of Easterners

A significant feature of the visit of the Laurier party to the West has been the manifestation of interest by those who chose to emphasize the fact that they came from Eastern Canada. At Moose Jaw Mr. Graham and Mr. Pardee were guests of a Canadian Club whose members were nearly all from the East. At Edmonton Mr. Graham was dined by Ontario old boys, Mr. Macdonald by friends from the Maritime Provinces. There were other such reminders at Calgary and at Medicine Hat. Somebody calculated that there were more than three hundred from one Eastern Ontario county in Edmonton. At all sorts of unexpected places a little knot of former Quebec people made their presence in the West known to Sir Wilfrid, and the other members of the party had similar visits from former compatriots, who desired by this means to get back into touch with Ontario or Nova Scotia. It is easy for even the transient visitor to discover how much the influence of men from old Canada counts for in new Canada. Whatever the influx of other populations may be, it is the Canadians who dominate. It is amazing what numbers have been contributed by single Ontario counties, as the counties of Huron and Bruce, for example. From Winnipeg to Prince Rupert they have gone in and made their mark.

What is rather distressing is to note that, purely for the want of continued intellectual association, there is a tendency for the West to lose touch with the East. The newer elements, of course, the people from the States, from Great Britain, from Europe, have never been in touch with Eastern Canada, have no natural sympathy with it, no knowledge of its past, no understanding of what it has born and suffered. The ready, simple course is to envisage the peculiar interests of the West as antagonistic to certain interests of the East. That frame of mind once reached, impatience, suspicion, aversion, distrust, soon follow, and finally something very near to hostility. West of a given point on the prairie there is to be met with an attitude, more or less permanent, of that hostility towards Eastern Canada.

Alongside this is to be noted the fact that, West of Winnipeg—and even there—the newspapers contain very little Canadian news. People have got quite out of the way of looking for it. The men who went out as pioneers do not have to form day to day the news of their home country which would enable them to keep in touch, to retain association, to maintain sympathy. It puzzles a traveller from the Canadian East, who can find no news of Ontario or Quebec in the daily paper, to find the place of honour held by some padded account of a railway squabble in the vicinity of Cincinnati.

But it must be said that the grievance suggests the explanation and the remedy. A newspaper is an enterprise, making use of such conveniences as it can obtain. The American news associations, stretching across the continent, reach to the doors of the Canadian West at St. Paul, at Spokane, at Seattle. Clear across to the Atlantic, and south to the Gulf of Mexico, without a break in the chain, these cities are linked up with other seats of news supply in the States. On our side, there is the long break occasioned by the rocky barrenness of the north shores of Lake Huron and Georgian Bay. The East ends at Sudbury; the West begins at Port Arthur; and they are almost beyond call of each other. Not quite, for there is the telegraph, but the telegraph is so expensive that, as they are now, mostly relying upon individual resources, and organization, the newspapers cannot afford the luxury of news from the old homes of their readers. Similarly, it is possible for vigorous development to be going on in British Columbia, for towns to arise, for thousands of people to live in them, for great business to be done there, for new mining enterprises to get well under way for railway schemes to reach the point of fruition and the East get no hint of it all.

Perhaps, this is all very normal, and all very right. But on the other while it might be wise and politic to bridge that rock area which separates East from West so (relatively) effectively. The way would seem to lie on the organization of a Canadian news service in such wise that, for a moderate sum the Western papers could get for presentation to their readers a few thousand words of Canadien news each day. The Dominion and Provincial treasuries might have to contribute something for a while to get such an organization going, but if it is desirable to develop and maintain a solidarity of Canadian national spirit from ocean to ocean the expenditure would be many times justified.

## MAKE THIS TEST

**How to Tell if Your Hair is Diseased.**

Even if you have a luxuriant head of hair, you may want to know whether it is in a healthy condition or not. 98 p.c. of the people need a hair tonic.

Pull a hair out of your head, if the bulb at the end of the root is white and shrunken, it proves that the hair is diseased, and requires prompt treatment if its loss would be avoided. If the bulb is pink and full, the hair is healthy.

We want everyone whose hair requires treatment to try Rexall "93" Hair Tonic. We promise that it shall not cost anything if it does not give satisfactory results. It is designed to overcome dandruff, relieve scalp irritation, to stimulate the hair roots, tighten the hair already in the head, grow hair and cure baldness.

It is because of what Rexall "93" Hair Tonic has done and our sincere faith in its goodness that we want you to try it at our risk. Two sizes, 50c. and $1.00. Sold only at our store,—The Rexall Store. McDermid and Jury, druggists.

## LATE MRS. LIVICK'S TESTAMENTARY GIFTS

It sometimes does not need much wisdom to amass money, but a great deal of wisdom is needed to make the best uses of it, to judiciously conform in its disposition to the approval of the divine source for whom money is held as a trust. A Peterborough lady has apparently been discreet in the disposition of the wealth with which she was entrusted. Mrs. John Levick the last member of the Clotworthy family, died recently, and in the disposition of her means, through her will, did not, apparently, forget her friends, nor neglect them in favour of charitable institutions. By her will Mrs. Levick bequeathed $500 to Mrs. John Barclay, 583 George street; $500.00 to Mrs. W. Quinn, 265 Burnham street; $500.00 to Mrs. Connors, Douro; $1,000 to Mrs. Anderson, Hazlitt street; $500 to Rev. Robert Pogue, 19 Scott street; $1,000 to the Presbyterian Mission Fund; $500 to the Children's Aid Society, and $500 to the Peterborough Protestant Home. The residue of the estate is left in the hands of executors of her will, Messrs. E. A. Peck and Wm. Porter, to be devoted, at their discretion, to charitable uses.

## WARM CONTEST FOR HALL CUP AT THE EXHIBITION

The soccer fans will find something to interest them at the Peterborough Industrial Exhibition, as there will be a warm contest for the Hall cup. The Canadian General Electric team, champions of the Midland League, have entered for the competition, and it is expected that the St. James' church team will also be represented, while Havelock may send a team. Some good football will be handed out.

## MILLBROOK AND LINDSAY TENNIS CLUBS TO PLAY

A most interesting series of tennis matches will be played to-morrow afternoon. The Millbrook and Lindsay tennis clubs will be here with some crack players. The following programme has been laid out, giving the names of the home players for each event only, as the opponents' names in these events are not known yet:

10 a.m., Y. M. C. A. courts, singles, Mr. Richardson.

11 a.m., Y.M.C.A. courts singles, Dr. McPherson.

From 10 to 12 a.m., the visiting ladies will play off their singles at the Golf Club courts; all the afternoon events will be played off at the Peterborough Golf and Country Club courts 2 p. m., men's singles, Mr. Landry, vs.—

2 p.m., men's singles, Mr. Burnett, vs.—

2.45 p.m., men's singles, Mr. Kerr vs.—

2.45 p.m., men's singles, Mr. Sandy Hall, vs.—

3.30 p.m., men's doubles, Messrs. Cluxton and Richardson, vs.—

3.30 p.m., mixed doubles, Mr. Sandy Hall and Miss A. Hall vs.—

4.30 p.m., men's doubles, Messrs. Dr. McPherson and Myers vs.—

4.30 p.m., mixed doubles, Mr. Landry and Miss M. Burnett vs.—

5.30 p.m., men's doubles, Messrs. Kerr and Burnett vs.—

5.30 p.m., mixed doubles, Mr. Henderson and Miss Dean vs.—

A kind invitation has ben extended by the President of the Peterborough Golf and Country Club to members of the other Tennis clubs interested, to witness these matches

## Peterborough Players Were Among All Stars At Belleville

The Toronto Star says: If there is one feature of amateur ball in the country which amuses and tickles Toronto ball players it is the intense rivalry in many districts which induces the managers of teams to hike to Toronto in quest of ball players to help them trim rival towns or teams or win final games. An incident which happened this week is a sample. In the Belleville League G.T.R. and Park Nines tied, and there was blood on the moon for the final. E. D. O'Flynn, manager of the Park Nines, hiked to Toronto in search of ball players, while the sponsor of the rival nine journeyed to Kingston and Peterborough for ball tossers of renown.

When the teams lined up to play the final game Park Nines had four Belleville men and G.T.R's only two. Here is how they lined out:

Park Nine—McDonald (Royal Oaks) p.; McWhirter (Royal Oaks), c.; Geron (Belleville), 1b.; Wiedman (Toronto) ,2b.; Connell (Belleville), 3b.; O'Reilly (Toronto), s.s.; Turpin (Cobourg), r.f.; Connolly (Belleville), c.f.; Brennan (Belleville), l.f.

G.T.R.—Quinlan (Peterborough), p.; Brown (Kingston), c.; O'Brien (Peterborough), 1b.; Laird (Kingston), 2b.; Sanders (Kingston), 3b.; Brown (Belleville), s.s.; La Fleur (Trenton), r.f.; Gartton (Kingston), c.f.; O'Neill (Belleville), l.f.

O'Flynn's hand-picked Toronto and Cobourg bunch were too strong at the bat for the Kingston-Belleville-Peterborough-Trenton outfit. They walloped Quinlan for 14 hits, while McDonald allowed only seven bingles. The Park Nine outfit, however, had seven errors, while the railroaders only had four. The Park Nines' errors in the second and third innings gave the Railroaders a 6 to 0 lead, but they steadied down and played real ball to the end of the piece and walloped it all over the lot. The Toronto boys surely did play good ball, and Dick Turpin smacked the ball so hard it came back looking like an egg. Score by innings:

| | R. | H. | E. |
|---|---|---|---|
| G.T.R. .... .... .. | 0 | 4 | 2 |
| Park Nine .. .. .. .. | 7 | 14 | 7 |

## Horse Races At The Exhibition Will Surpass All Other Years

The second and third days of the Peterborough Industrial Exhibition will have the best programmes of races that have ever been held throughout this county. The Fair officials are putting forth every effort to make this feature the best. The directors in charge of the speeding in the ring are Messrs. Denison, Jones and King.

The following is the list of races and rules governing each.

**Friday, Sept. 16th.**
Two O'clock.

1—Trot or Pace—2.30 Class, prize $300.00. One mile heats, 3 in 5. Entrance, 5 per cent., and 5 per cent. additional for winners.

2—Trot or Pace—2.22 Class, prize $150.00. One mile heats, 3 in 5. Entrance, 5 per cent., and 5 per cent. additional for winners.

**Saturday, Sept. 17th.**

1—Trot or Pace — 2.30 Class, prize $150.00. One mile heats, 3 in 5. Entrance, 5 per cent., and 5 per cent. additional for winners.

2—Trot or Pace — Free for All, prize $200.00. One mile heats, 3 in 5. Entrance, 5 per cent, and 5 per cent. additional for winners.

3—Running Race, prize $125.00. One mile heats, 2 out of 3. Five to enter, 4 to start. Entrance, 5 per cent., and 5 per cent additional from winners.

Horses eligible on 1st September, 1910. No horse entitled to more than one division of prize. Usual weather conditions. Right to change order of races reserved. Hopples allowed. National Trotting Association Rules to govern. Trotters allowed 4 seconds. Five to enter; four to start.

Entries to be made with the Secretary on or before September 15th, 1910. This rule will be strictly enforced. The Secretary will be at R. Denne's store up to 10 p.m., on the 15th, to receive entries.

All prizes will be divided 50 per cent., 25 per cent., 15 per cent. and 10 per cent., except Running Race, which will be divided 60 per cent., 25 per cent., and 15 per cent.

**Why not paint your house this fall?**

You know it should be painted now.
Don't wait until spring.
Architects and carpenters agree that a building not properly paint-protected during the winter season depreciates 5% at least.
Fall is a good time to paint.
The lumber is dry—no flies and insects to stick to the fresh paint.
The painter is not so busy as in the spring and can give you a better job.
We are carrying a stock of

**ROBERTSON'S PAINT**

and can confidently recommend them.
It's the guaranteed paint—the only paint specially made for Ontario weather conditions.
Call for our color-card and special prices.

### His Trick.

A pearl belonging to her brooch has got fastened in the lace of her collar. He offered to disentangle it.

"That's a great trick of mine," he said as he wrestled with it. "Separating pearls from"—

"Pearls?" she interrupted in a fright. "No," said he; "from lace."—New York Press.

### Knew What He Was Doing.

Bunky (from whom old aunt has just received 8 screechings at 4 to 1)—Now, then, Santa Claus, what are you letting 'em in for? Do you think I'd give you wunky uns? Cold Comb—Naw, kid-do. It's no thin; I'm just making sure that I haven't got that one tooth which I passed off on them.—London Punch.

### A Poetry Fiend.

She has returned to her post and found it empty.

"Gone away," said she; "I can never find things where I lay them."—Boston Globe.

### Victim Identified.

Chicago, Sept. 9.—The young man who was killed near the G.T.R. station Wednesday night has been identified as Wilbur Gordon, whose family was in Belleville. Two young men have been employed in the Fort Rouge fire factory. Coroner Elliot is holding an inquest.

### TURKISH WOMEN.

**They Are Curiously Fastidious in Some of Their Ways.**

The habits of the Turkish women of Constantinople are wonderfully fastidious. For instance, when they wash their hands at a tap from which water runs into a marble basin the fair ones will let the water run until a servant shuts it off, inasmuch as to do this themselves would render them "unclean." They cannot open or shut a door, as the handle would be unclean.

One of these fastidious women was not long ago talking to a small niece who had just received a present of a doll from Paris. By and by the child laid the doll in the lady's lap. She was horrified and ordered the child to take it away. As the little girl would not move it and no servant was near and the lady would be defiled by touching a doll that had been brought from abroad, the only resource left her was to jump up and let the doll fall. It broke in pieces.

Another Turkish woman would not open a letter coming by post, but required a servant to break the seal and hold the missive near her that it might be read; also should her handkerchief fall to the ground it was immediately destroyed or given away, so that she might not again use it.—Exchange.

### Defoe and Savings Banks.

Though Duncan of Duthwell was the founder of our first savings bank, the first suggestion came from Daniel Defoe. When he found himself compelled to hide from the bailiffs in a small Bristol inn he turned his enforced leisure and financial failure to account by writing the "Essay on Projects." It deals with savings banks, friendly societies, insurance, academies and bankrupts. On all these subjects Defoe offers from his fertile brain suggestions that startle the reader by their modern ring. On bankrupts and savings banks Defoe naturally wrote with feeling. During his stay in Bristol he was known as "the Sunday gentleman," owing to his natural unwillingness to take the air except on that day of the week which deprived bailiffs of their sting.—London Chronicle.

### New Engineer for London.

London, Sept. 9.—Engineer Van Cleve of Niagara Falls will, it is expected, be appointed chief engineer of the City of London within a few days at a salary of $4,000. He has been here all the week and made a most favorable impression on the aldermen. The engineering department of the city is being given a thorough reorganization at the present time.

### New Tunnel Inaugurated.

New York, Sept. 9.—Intercity tunnel train service under the East River, between the new Pennsylvania terminal in Manhattan and Long Island City, was successfully inaugurated yesterday. Suburban points on Long Island are brought on an average of about 25 minutes nearer the heart of Manhattan Island by the new service.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Harbour Works at Hamilton, Ont.," will be received at this office until 4 p.m., on Wednesday, September 28, 1910, for the construction of a wharf and two retaining walls at the City of Hamilton, County of Wentworth, Ont.

Plans, specification and forms of contract can be seen and forms of tender obtained at this department and at the offices of H. J. Lamb, Esq., District Engineer, London, Ont., J. G. Sing, Esq., District Engineer, Confederation Life Building, Toronto, Ont., and on application to the Postmaster at Hamilton, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied and signed with their actual signatures stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for the sum of seven thousand (7,000.00) dollars, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
A. U. Transcription,
Secretary.

# THE EVENING CHIT-CHAT

By Ruth Cameron

Well may we say our infelicity is of ourselves; since there is nothing we do that we should not do, but we know it and yet do it."
—William Penn.

"It's horrid, I know, but I can't help it," philosophically remarked my quick-tempered friend after one of her outbursts had spent itself. "It's just my disposition to go off the handle and say what I mean and a good deal more."

That's the kind of philosophy that keeps the world from getting better any faster than it does—the philosophy of "I can't help it. It's just my disposition."

It is almost universal philosophy. Everybody says it once in awhile and some people say it continually.

If you think that's exaggerated, watch for it. Ten to one, you will hear that or its substance half a dozen times in the next few days. And the same odds that you will be one of the offenders.

Hardly an hour after I had decided to write about the prevalence of the habit I actually caught myself answering, when I was accused of worrying unduly over something, "I can't help it. I've always been frightened to death of typhoid."

"I can't help feeling that way. I've always been terribly jealous."

"I can't help being so nervous when I'm in a boat. I've always been afraid of the water. I think it was born in me."

"I can't help sitting up late. I know it isn't good for me, but I do so hate to go to bed."

"I can't help losing my temper with him. He is so exasperating."

These are a few of the "I can't help it's" that I have gathered in the last two or three days since I have been specifically watching for them.

And not one of the people who said it seemed to be in the least ashamed of himself or to realize that he was using a word which ought not to be allowed to exist.

That's the worst about the "I can't help it" people. They are so complacent. They seem to feel that that settles the matter in a very simple and comfortable way.

Some of them even seem to be rather proud of it. "I can't help it. I'm made that way," they announce as complacently as if they felt that, by becoming part of them, the fault or weakness was transformed thereby into something rather nice.

As a matter of fact, it seems to me that the admission "I can't help it" is a much greater weakness than the fault you admit.

Honest acknowledgment of a fault is splendid—as a beginning. To recognize your imperfections, it has been said, is half their cure. The grain of salt to take with that epigram is, "if with the recognition comes the intention and expectation of curing them."

"I can't help it" is the white feather shown by that which should be the proudest part of man—his will power.

Ruth Cameron

# KEFNE DUCK HUNTERS LOOK FORWARD TO GOOD SPORT

**General Opinion is That the Extension of Close Season to Sept, 15th is a Wise Move---Indians Ready to Commence Their Rice Harvest Now.**

Special to The Examiner.

KEENE, SEPT. 6.—Miss Sarah Thompson, Belleville, is visiting friends in Keene.

Master Harold Smith left last week for Brockville where he will attend St. Albans School.

Mr. and Mrs. A. Marsh, who have been the guests of Mr. James Ashburn at Oak Lodge, have returned to Toronto.

Mrs. Bryce, Toronto, has returned home after spending her holidays in Keene.

A number of Alderville Indians are camped at Sugar Island ready to commence harvesting the wild rice as soon as the crop ripens. It is likely that the rice-harvest will commence in a week or ten days' time. Although the rice beds are small this year and hundreds of acres that usually are thickly covered with rice are without a blade, the small area that remains of the rice beds is covered with an excellent crop, and if weather conditions are favorable there may be a good-sized crop harvested.

Mr. McEachran, who has been the guest of Mr. James Ashburn at Oak Lodge, has returned to Toronto.

Mr. Harry Smith left Monday for Kingston where he will resume his studies at the Royal Military College.

Mr. Yeates, Peterborough, is spending the week fishing at Keene.

Lang public school, which did not open on the fifteenth of August with the other country schools on account of the trustees having been unable to secure a teacher, is at last reopened, a teacher having been engaged last week.

Local duck-shooters are looking forward to a good season's sport this year as the ducks are said to be unusually plentiful on Rice Lake. It seems to be the general opinion among sportsmen that the government made a wise change when they extended the close season to September 15th instead of allowing shooting to commence on the first of September.

The party of ladies from Keene who have been camping at Foley's Landing broke up camp and returned home last week.

Miss Mary McCarthy, who has been spending her holidays in Keene, returned to Rochester last week.

Miss Lumsden has returned from spending the summer with friends in Calgary and Edmonton.

Mr. James McNeil left Saturday to visit relatives in Montreal.

Master Max Davidson, Peterborough, is the guest of his grandfather, Mr. Z. Ticker.

Mrs. A. Campbell, Peterborough, spent Labor Day in Keene.

Miss Katie Skinner has returned from a visit to Bethany.

Mr. and Mrs. Thomas Starke, who have been the guests of Mr. Robert Humphries, left for their home in Chicago Thursday.

Mr. Thomas Walsh, Edmonton, Alta. is the guest of his father, Mr. Timothy Walsh.

Mr. Thomas Wallace has returned to Toronto after spending a couple of months camping on Rice Lake.

Mr. Pallin is visiting friends in Lakefield.

Mr. H. C. Duff, the representative of the Department of Agriculture for the county of Peterborough, was in Keene on business with the work of the Department Thursday.

We are pleased to state that Mr. Theodore Haycock, who was very ill last week, has recovered and is able to be at work again.

Mrs. Campbell, Warkworth, is visiting her mother, Mrs. George Hunter.

Miss Lexa Howson is the guest of Miss Jean Campbell.

Miss Nellie Plunkett, Havelock, who has been visiting at the home of Mr. and Mrs. Mark Plunkett, returned home Friday.

Mrs. William Carter, who has been spending the summer in the North West, returned home Thursday.

Mrs. J. S. McNeil is visiting friends in Montreal.

About seventy-five people took in the Orange Lodge's excursion to Peterborough and over the lift lock last Thursday and had a very enjoyable day's outing.

The Grand Trunk Railway is running a special train this week from Campbellford to Toronto, which is a great convenience to local people who wish to attend the Exhibition. Were it not for this special train, the connection from Keene for Toronto would not be very good and it would not be possible to go to Toronto and return the same day. A great many people are taking advantage of the special train and the cheap rates to attend the Exhibition.

Miss Clara Roach is spending her holidays with her parents in Keene.

Mr. and Mrs. George Gainor and Miss Viola Gainor, Peterborough, spent Labour Day in Keene, the guests of Mr. Gainor's sister, Mrs. John Hore.

Mr. A. St. A. Smith spent Sunday in Peterborough.

The death occurred Sunday evening, from lung trouble, after an illness of several months' duration, of Miss Elizabeth MacFarlane, daughter of Mr. and Mrs. Duncan MacFarlane. The deceased was in her seventeenth year and was a bright and popular young lady. She leaves to mourn her loss, besides her parents, two sisters, Katie and Belle. The funeral was held Tuesday afternoon from the late residence of the deceased and was largely attended. Rev. D. D. MacDonald, pastor of the Presbyterian church, of which the deceased was a member, conducted the service at the house and the grave.

## CARD OF THANKS

**Mr. and Mrs. Irwin Grateful to Friends Who Were Kind to Them in Their Bereavement**

The funeral of little Earl Irwin, the four-year-old son of Alex. Irwin, 362 Water street, passed down George street Wednesday afternoon. He was a bright and winning child and a general favourite with young and old and his demise will be much regretted.

Mr. and Mrs. A. Irwin wish to extend a word of thanks to the many friends for the floral tributes and sympathy shown in their bereavement by Mr. and Mrs. J. Isbister, South Monaghan, Mrs. and Miss Irwin, Millbrook; Mrs. S. J. Melville, Mr. and Mrs. W. McMillan; Mr. and Mrs. Sutherland, Miss Huston, Mr. and Mrs. T. Thornton, Miss Ellen Werry, Master Orland Morrow, and Allen Kingscote, Mr. A. Allison, Mr. and Mrs. Davey, Mrs. Jas. Campbell, Mr. J. A. Plott, Master Roland and George Blanchard, Miss Christina Pappas, Miss Chambers, Mrs. Ed. Files and Miss C. Miller of Peterborough.

**You Need a Good Salve** in the house. Davis' Menthol Salve is the best. It cures sunburn, mosquito, and insect bites and stings; piles, old sores, skin diseases, etc. 25c. per tin.

# BUILDING PERMITS FOR CITY SHOW A DECREASE

**According to Figures Secured by "Construction" Building Here in July, 1910 Was Less Than for Same Month Last Year.**

**INTERESTING STATISTICS**

Contrary to the somewhat quiet order of things which usually prevails in the mid-summer season, building operations in July showed a strong and substantial forward trend. An average gain of 47 per cent., as based on comparative figures supplied Construction from centres in practically every section of the Dominion, bespeak for the month a growth and progress which stand out far ahead of even the highly satisfactory records made in the same period during the past few years. The force of activity for this season of the year is more significant than would appear on the surface, particularly so in view of the heavy operations of the preceding months, in that it is a pretty good sign of an uninterrupted continuance of the present prosperous condition as well as an indication of a volume of fall work greater than has ever been carried out at any previous time.

Montreal's tremendous total in itself reflects a development in new buildings and structural improvements that augurs mightily for the expanding industrial and commercial strength of the country, and would be a big credit to even a more thickly populated and equally as prosperous a centre. Her aggregate value for permits issued amounting to $3,206,708 and equivalent to an increase of 470 per cent., gives the metropolis priority for the month over all other cities in the Dominion in volume of work undertaken together with the second highest standing as regards percentage gain. From Montreal east the returns to hand show no break in the situation, and the assumption is, in view of the universal activity manifest in the more important Maritime cities, that the intermediate points experienced their full quota of the month's work. Halifax and St. John reversed the less favorable order of the preceding month by noting increases of 33 per cent. and 183 per cent. respectively, while Sydney adds to her prestige by again annexing a gain of 154 per cent.

Ontario, however, was less assertive, although Toronto in a total of $1,953,285, representing a 5 per cent. gain, registers the second highest amount recorded. A retrograde condition, as far as comparative figures indicate, is noted in this province in five instances, viz., Fort William, 16 Peterboro, 28 per cent. In most of these cases, however, the decrease denotes no serious decline as far as actual investment is concerned. On the other hand, Port Arthur turns to good account with an increase of 51 per cent.; Hamilton advances 30 per cent.; and Brantford and Windsor annex gains of 12 per cent. in either case.

In the West, the progress of the immediate past gives but little indication of diminishing. Winnipeg notes an aggregate total of $1,044,800 and a gain of 8 per cent.; while Regina's phenomenal uplift of 490 per cent. is the biggest increase noted for the month. Saskatoon and Calgary are also on the safe side of the ledger with an advance of 187 per cent. and 185 per cent. respectively; as is likewise Brandon, which has to her credit an increase of 40 per cent. over the corresponding period in 1909. Victoria and Lethbridge, however, fail to equal their last year's amount for the month, the loss in order named being 40 and 30 per cent.; although the falling off in the latter case can be ascribed to the fact that in July, 1909, the permits included an item of $50,000 for the erection of a municipal power plant. The outlook in both of these places, as in all western cities, is encouraging. Calgary reports a heavy volume of warehouse and business property scheduled for this Fall, while Vancouver expects August to establish a record month.

# BOTH ATTACKED BY A BURGLAR

**Masked Robber Found in Closet, Chokes Mother and Kicks the Young Girl**

Examiner Special.

NEW YORK, Sept. 7th.—After nearly suffocating a woman who found him in a closet, and knocking her twelve-year-old daughter down a flight of stairs and kicking her until unconscious, a masked burglar at Nutley, N.J., Friday night, escaped in a desperate chase. He waded a river, ran through the streets of the town, exchanged shots with his pursuers and finally lost himself in the woods.

Mrs. Margaret Windheim, No. 428 Franklin Avenue, and her daughter Clara were the victims of the burglar.

Entering her room early in the evening, Mrs. Windheim opened the door of a closet to hang up her coat. As she did so a masked man sprang out and seized her. He threw her on a bed and taking up a quilt wrapped it around her head. She tried to scream, but the man caught her by the throat and threw her to the floor, attempting to stifle her cries by choking her.

Hearing some one approach, the burglar fled and encountered Clara. He struck her on the head, knocking her down the stairs, and as he ran out of the front door he kicked her on the head.

Mrs. Windheim recovered sufficiently to scream and her fourteen-year-old son Arthur and Fritz Weischedel, a neighbour, gave chase.

Seeing his pursuers closing in the burglar plunged into Third River, followed by the man and boy, who waded waist deep to the other side.

Reaching Nutley Avenue the burglar drew a revolver and fired two shots at his pursuers, but young Windheim kept up the chase. As they reached Passaic Avenue Simon Blum seized his shotgun and ran from his store. He fired several shots after the fugitive, but the man disappeared in a piece of woodland. The burglar had ransacked the Windheim house, but nothing was carried away.

# BEATEN AND ROBBED, SHE CHASED AND CAUGHT HER ASSAILANTS

**Mrs. Letovitz Ran Down One With Detective's Aid—Captures Another Alone—Handled and Clung to Him Despite His Blows.**

**NOW SEEKS THIRD**

Examiner Special.

NEW YORK, Sept. 7th.—Mrs. Lina Letovitz lives at No. 1,503 Park Avenue. Last Friday night three young men entered her apartment, tried to choke her, and ran away with her pocketbook. Thanks to her, two men are already locked up charged with being concerned in the crime and Mrs. Letovitz is looking all over Harlem for Young Man No. 3.

And she'll get him too, if the determination she showed in running the others to earth is a sign.

Mrs. Letovitz, who is the wife of Karl Letovitz, employed in a livery stable at No. 1,505 Park Avenue, was sitting in the window of her home on the ground floor of No. 1,503, Friday night. On a table close beside her was her pocketbook. Suddenly three youths climbed into the window. While one tried to choke her the others made for the pocketbook. She screamed loudly, bringing her husband from the livery stable. One of the young men, she said, then picked up a paving stone and hurled it at her husband's head. He warded it off with his arm, which was almost broken by the stone. Then the three made off. With them went the pocketbook.

When Mrs. Letovitz regained her senses she felt sick and dizzy, but insisted on accompanying Detective McAvoy of the East One Hundred and Fourth Street station when he started on a hunt for the guilty trio. Not far from her home Mrs. Letovitz pointed out a young man as the one who had thrown the paving block at her husband. On seeing her and the detective the youth started to run.

TURNS AND ATTACKS WOMAN

McAvoy and Mrs. Letovitz separated as they pursued him, whereupon he doubled on his tracks and attacked Mrs. Letovitz. As the two were fighting, McAvoy ran up and arrested the man. He said he was Max Flaik, nineteen, of No. 120 East One Hundred and Nineteenth Street. He was arraigned in Harlem Court yesterday and was held in $2,000 bail for trial, charged with assault and robbery.

Yesterday afternoon the indefatigable Mrs. Letovitz, while on the lookout for the other two men who assailed her, thought she recognized one of them near One Hundred and Thirteenth Street and Park Avenue. She followed him, but he suddenly disappeared inside a doorway on the avenue. Mrs. Letovitz hid behind a pillar of the elevated railroad structure on Park Avenue and waited till he reappeared, when she sprang at him.

With Mrs. Letovitz close at his heels the man ran to One Hundred and Sixteenth Street, thence to the west side of Park Avenue, where he disappeared into a hallway. Up went the two to the roof, then down the stairway of another house, the number of which Mrs. Letovitz didn't notice in her excitement, to the street floor, where she grabbed him.

SHE CLINGS TO HIM

He fought desperately to get away, striking her several times, but she would not loosen her grip. The fight soon brought people from the neighborhood, who summoned Policeman Ingelberg of the East One Hundred and Fourth Street station. When he came up the man gave Ingelberg the real thing in fights before he was subdued.

Ingelberg finally got him to the station. There he said he was Benjamin Stein, nineteen, of No. 44 West One Hundred and Seventeenth Street, an insect exterminator. He, too, was locked up charged with assault and robbery. He will appear in court to-day.

"And now for Number Three!" said Mrs. Letovitz, after being assured that the other two were safely behind the bars.

# OLD FASHIONED COMEDY

**FURNISHED BY TOURISTS WHO "DO" EUROPE EVERY YEAR.**

**The English Matron Whom Everyone Likes, the German Who Is Sobered by Travel, and the Brusque American Are Everywhere In Evidence on the "Continong"—The French Do, Not Gad About.**

No theatregoer should feel lonesome on a trip to Europe, writes a globe trotter. Good old-fashioned comedy characters happen along at every turn. All the old friends are present, and then some.

There is the Englishman with his drawl and his tub; the English woman with her reversible figure, also her implacable feet; the French waiter, seething and frothing with language; the demi-mondaine, whose department is so discreet that you can scarcely believe that it goes down with the sun; the German, who according to circumstances is either a lump or an explosion; the Italian with—you would swear it—10 hands and 40 fingers on each hand.

Of course there are plenty of new types, but these old friends are so familiar that they give you almost as homy a feeling as fellow-countrymen do.

As a contrast to a certain disagreeable, snobbish type of British tourist one welcomes the nice, old perennial type of English woman whose shadow, though generous, will never grow less if the prayers of travelers shall have their way. She is allied with the clergy. She may be the wife of a vicar or even of a bishop. She is always the same.

You will see her in a thousand moderate priced Continental hotels. Her smooth gray hair is topped with a fussy little beribboned cap. Her good, homely face has settled into lines of peace. She has long ago given up that desperate struggle which young English women are always making to be "lively," and having temporarily escaped the parish or the diocese and her husband's patrons and the necessity of pushing her daughter's social prospects she can just relax and be her own simple, commonplace, comfortable self.

Her train of daughters traipse about at "p'pah's" heels, but she sits near the public drawing-room fire in winter or by the best window in summer, her broad feet on a footstool, an embodied spirit of domesticity calming the most feverish traveler. She is frequently occupied with what she calls "wools," for the motto of the English woman of all classes is: "What is home without an antimacassar?"

Occasionally you run across a duchess and her friends with their cigarettes, blandly smoking on terraces and in restaurants. You know it must be a duchess; nobody else would show such sublime indifference to fashion plates and to prejudices.

On his native heath the German takes life gayly and easily. He is a jolly good fellow and a first-rate friend, but he is a different creature when sobered by the responsibilities of travel. He sightsees with the energy and the concentration of one of his own Krupp guns. He booms and blunders around like a burly bumble bee drunk with the hunt for honey. He wears a foolish little green felt hat with a fussy bit of feather stuck in the band at the exact middle of the back. Words cannot express how trifling this little contrivance looks atop of his big bulk; especially when that bulk is increased, as it is on all possible occasions, by immense flapping cape overcoats or mackintoshes. These cape affairs, flaring widely through museums, churches, open squares, sometimes get so one expects bly funny.

The familiar French types are plentiful enough at home in France, but you can do a good deal of traveling without catching any kind of a Frenchman outside his own country. Only the exceptional ones have money enough to travel, and not very many of them care to spend their substance that way. For a nation which is not infrequently taunted with having no word for "home" the people of France display an extraordinary fondness for staying pretty close to their own firesides.

The same is true of the Italians. Precious few of them travel, except to come to America. You see more Italians in New York in one day than can be seen in a year in all Europe outside of Italy.

When it comes to comedians of travel Americans furnish their share of the entertainment. Their clothes, manners, way of talking, are just as conspicuously their own as those of any other people are peculiar to them.

That Americans often look and sound ridiculous in other countries no one can doubt who has made protracted stays abroad. The writer remembers one summer when after a year or two in Europe he couldn't suppress a grin of tolerant but very real amusement whenever he ran across a bunch of young American fellows in hats of the coarsest braid, with dinky brims about an inch wide and almost as thick. If the Americans had never worn those thick, knuckly little sailors, but had found a lot of German youths sporting them, it would have been a subject of inextinguishable mirth to the Yankees.

**Red Tuberoses.**

Chinese florists have tuberoses of a red color, which, however, is not inherent in the plant, but is produced in two ways—either by placing the flower stalk in water in which a red earth is dissolved or by supplying the roots of the plant with water in which the coloring matter has been dissolved.

# Young Couple Fear That Man Who Married Them Never Was A Minister

Examiner Special.

MIDDLETOWN, Conn., Sept. 7th.—When Chester H. Sweet came to the Congregational Church at Durham in the fall of 1908 as a candidate his sermons were orthodox and written, and his general appearance and manner such as to command respect and admiration. The church had been supplied with students from a theological school for several months and the change was so apparent and pleasing that there was not a dissenting voice when it was proposed to engage Mr. Sweet as the regular minister.

The enthusiasm was so honest it was not thought necessary to look up his antecedents and his statement that he had been serving the Union Congregational Church at Boston as pastor and was a regularly ordained clergyman was not questioned. During his ministry at Durham he was admitted to membership by letter from the clerk of his former church. As the clerk of the local church was ill at the time the letter was not [illegible] the officers of the Union Church assert that he never acted as pastor there and that no letter was given him.

Mrs. Sweet and several young ladies uniting with the church were baptized by Mr. Sweet. Inquiry at the congregational headquarters in Boston fail to reveal any record of the ordination of Chester H. Sweet or that he was in charge of a church previous to the Durham one. That he was not ordained is causing much uneasiness to Mr. Alton L. Stone and Miss Fannie Hubbard, both well known residents of Durham, who were supposedly united in marriage by the Rev. Chester H. Sweet last year and were enjoying their honeymoon when the minister disappeared under a cloud.

Diligent search is being made to learn if he was ever entitled to preach, but as yet nothing is found to prove the fact. It is said that Mr. Sweet also married several other couples in other towns. He was released Friday night. City Engineer Hiram Miller giving bonds for his appearance befor the superior Court and he returned to New Haven, where his family is living.

# No Wedding Ring After Seven Years---Woman Sues Her Husband

Examiner Special.

NEW YORK, Sept. 7th.—A courtship of seven years that failed to produce a wedding ring landed Michael Meyers, twenty-five years old, proprietor of a flourishing plumbing business at No. 142 Jackson Avenue, Long Island City, in the Queens County Jail last evening on an order of arrest sworn out before Justice Putnam in the Brooklyn Supreme Court by Miss Minnie Goldsmith, twenty-two years old, energetic and handsome, who lives at No. 155 Dumont Avenue, Brooklyn. She charges Meyers with breach of promise and demands damages in the sum of $10,000.

The arrest yesterday was a sequel to a scene which occurred in Meyers's plumbing establishment about a week ago, when, it is alleged that Miss Goldsmith, accompanied by a friend, broke into Meyers's private office at his store in Long Island City and demanded that he marry her. Instead, Meyers had Miss Goldsmith summoned before Magistrate Smith in the Lond Island City Police Court, who told Miss Goldsmith to make her appeal to a civil court. The order of arrest was obtained yesterday. It proved a most inopportune time for Meyers. With the aid of his stenographer he was just getting his pay roll in shape and fixing up his business for two weeks' holidays. He had complete the business of the day, and was allowed to take his books and stenographer with him to the jail, where they finished up the pay roll and other ends of the business.

Miss Goldsmith claims Meyers has been courting her seven years. She also alleges she gave him $800 of her savings to invest in his business when Meyers not only agreed to marry her but also to make her a partner in his business. August 13 last, in company with her sister, Mrs. Annie Weinstein of Detroit, Mich., she went to Meyers's place of business in Long Island City and asked him to keep his promise, which he refused.

An affidavit made by Mrs. Rachel Glass goes to confirm Miss Goldsmith's allegations. Miss Goldsmith has been living with her for the past six years. Meyers was a constant visitor at the house. Furthermore, Mrs. Glass says she was the custodian of Miss Goldsmith's savings and that at one time she gave Meyers $500 of the money to use in paying off a mortgage on lots owned by him and that in return he agreed to make Miss Goldsmith a partner in his business.

# MASKED ROBBERS KILL TWO TO GET BOOTY OF $5,000

**Four Desperadoes Hold Up Paymaster Fowler and Driver Ragsdale, in Wagon —Shoot Them Down, Near Hudson, N.Y.**

Examiner Special.

HUDSON, N. Y., Sept. 7th.—Just outside the city limits, shortly after noon to-day, within sight of the yards whither he was carrying $5,000 to pay wages, Denton Fowler was mortally wounded and robbed, and George Ragsdale, his negro driver, was instantly killed, by four masked desperadoes, who sprang from a clump of trees and shot them down in their buggy. Fowler died later in the afternoon at the City Hospital.

After the murder and robbery the band escaped. Down to late to-night none of them had been captured. It is believed they are hiding in the woods. A sheriff's posse has the woods surrounded. All roads and trains are being watched.

Denton Fowler, who was twenty-three years old, was the third son of Everett Fowler of Haverstraw, one of the principal stockbrokers in the Atlas Building Material Company, of which Senator John B. Rose of Newburg, is President, and which has yards at Roseton and at North Bay here. It was to these latter yards that Fowler was making his way when killed. After graduating from Yale last year, Fowler joined the Atlas Company, took up his home at Roseton, and became the company's paymaster.

WHAT FOWLER TOLD

Fowler left Newburg this morning by train to Hudson with the money to pay the staff their two weeks' wages. It was his custom to do this every other Saturday. He was met at the depot here by Ragsdale, a negro driver from the yards. They drove out of the city by the main street. Some distance after that the road led through woods for about three-quarters of a mile. At the outskirts of the woods lie the brick yards. Fowler, as was his wont on the journey, carried a revolver. Ragsdale was unarmed. On account of the rain they had the hood of the wagon up and were probably sitting well back in it. They were within a hundred yards of the Atlas Company's property when the attack was made.

Before he died Fowler managed with great difficulty to tell something of what occurred. He was dying in the hospital when he spoke.

"We were nearing the end of the woods," he said, "when suddenly four men jumped out from the brush and demanded that we stop. I was armed, having made it a practice to have a gun with me on these trips, but we were covered before I had any suspicion of danger. All four of the highwaymen were masked, and all had revolvers. I saw that it was useless to put up a fight, and so threw up my hands. Ragsdale, however, kept his hands down and tried to urge his horse to a gallop. One of the men then fired, and Ragsdale fell out of the wagon."

Fowler was so weakened at this point he was unable to continue the story. A little afterward he died.

WORKMEN HEARD THE SHOTS

Men at the yards heard the reports of the shots, and they ran to the scene. They found Ragsdale lying dead in the road. Two bullets had torn away the side of his head. Fowler, they discovered, had fallen in the bed of the buggy. A bullet had entered his chest, penetrating the lungs and glancing down from the vertebrae into the stomach, the doctors afterward found.

Before help came in sight the desperadoes had snatched the money satchel from the young paymaster's hands, and disappeared. When reached, Fowler was rapidly bleeding to death internally. He was able only to murmur incoherently that four men had attacked him and gone into the woods. It could be seen that he was struggling to explain, but he sank into unconsciousness, and was hurried to the hospital.

POSSE IN PURSUIT

Five shots in all were fired. Two struck Ragsdale behind the left ear, killing him on the spot. Only one of the three others hit Fowler. Two passed through the hood of the buggy.

Under Supt. Van Ellen of the Atlas Works a posse of Sheriff's deputies and 100 workmen from the yards started at once to beat the woods. But the undergrowth is very dense, and the desperadoes would have had no difficulty in getting away.

The scene of the crime is a solitary spot. Two curves in the lane prevent anything from being seen from a distance. In addition, the road is lined with tall shade trees and edged with thick bushes.

Fowler's father, mother and two sisters reached here this afternoon. They are prostrated. They were too late to see the young man alive.

**Politician and Novelist.**

Blessed with the gift of being able to speak as well as he can write, Mr. Quiller-Couch, the distinguished Cornish author who has been knighted, has done much useful political work. For many years he was connected with The Speaker. Then he took to writing novels, and sought solitude in the delightful Cornish village of Fowey. Here he spends his leisure time fishing and sailing. He can handle a small yacht in a manner which satisfies even the oldest inhabitant.

## PERSONAL AND SOCIAL

Miss Victoria Bell is visiting friends in Toronto.

Miss Irene Howden, Romaine St., has returned from a visit to Toronto.

The Misses Ada and Bertha Nicholls are the guests of friends in Toronto.

Mr. W. Comstock left on a business trip to Berlin and Grand Rapids yesterday evening.

Miss Mary Davidson and Miss Mitchell, of Montreal, are spending a few days in Toronto.

Mrs. J. W. Browett has returned home, after a pleasant visit with her sister, Mrs. T. McGillicudy, Toronto.

Miss Lyle McMillan has returned after spending the holiday, the guest of Mrs. F. W. Moeser, Montreal, Que.

Miss Maude Landry, Perry street, left last night for Montreal, where she will spend her holidays with relatives.

Mr. and Mrs. J. P. Finn from Enterprise, are visiting their aunt, Mrs. Walker, 571 Elm street, on their wedding tour.

Rev. W. H. Redman, pastor of South Hill Baptist church, Vancouver, B. C., is visiting his sister, Mrs. T. A. Rebell, 149 George street.

Mr. Thomas E. Mann, one of Bridgenorth's popular young men, left yesterday for Medora, Manitoba. His many friends join in wishing him every success.

Mrs. A. S. Simpson, of Chicago, who has been visiting at Skibbereen, Otonabee, for the past two months, returned home to-day, accompanied by her sister, Miss Ellen Hayes, who is also making Chicago her home.

**The Oddfellows are requested to meet at the hall at 1.30 p. m. to-morrow, Saturday afternoon, to attend the funeral of Brother Vaughan. Busses and hacks will leave the hall at 2 p. m. and will call at the corner of Park and Albert Streets.**
1d-58. **B. GOOLD, N. G.**

**HOUSEHOLD MAGIC.**

Not all the magicians of the Fair are on Midway. In the Process Building, badly tarnished silver is being cleaned like magic by simply dipping it in "Wonder-Shine." Every housewife should see this demonstration, and obtain a package of "Wonder-Shine" before leaving the Exhibition.

## POST CARD COLUMN

To the Editor of Post Card Column:

Dear Sir,—I saw in Tuesday's Examiner that Mr. Cressman had given $25 to the fireman's fund, (or greenhorn's, as Ald. Morgan and Ald. Metheral called them), for their work at the fire connected with his store last Sunday week. We citizens should be proud of them and glad to think that Chief Howard has trained his men to that perfection that he can take a holiday, knowing full well that his work will be accomplished in his absence.

A. CITIZEN.

P. S.—I think we have got to look to the Council for the greenhorns not the fire brigade.

**Rheumatism Cured by Fig Pills**

Not often do you hear of a 25c. preparation being sold with a guarantee to cure you. An absolute guarantee goes with every box of FIG PILLS. They will cure Rheumatism, Backache, Bladder Trouble, Frequent Urinating, Burning Sensation, Painful Stitches, Sluggish Liver, and all Stomach Trouble. If not, your money back. At all druggists.

## OBITUARY

**JAMES HAROLD WATSON.**

The death occurred this morning of James Harold Watson, the one-year-old son of Mr. and Mrs. John Nicholas Watson, 425 Chambers street.

The funeral will take place to-morrow afternoon at 2 o'clock from the above address to the Little Lake cemetery for burial. Rev. Canon Davidson will officiate at the funeral service.

**GERALD PATRICK McGARRITY.**

The death occurred yesterday evening of Gerald, Patrick McGarrity, infant son of Mr. and Mrs. Thomas McGarrity, 650 Concession street. The funeral will take place to-morrow morning at 9 o'clock in Douro.

**Compare the Cost.**

As a matter of economy Clarks Porkand Beans have a great advantage over butcher's meat. Further they make a most agreeable change and are just as nourishing and are welcomed at the table by everyone. Wm. Clark, Mfr., Montreal.

## WEDDING BELLS

**HENRY—BRODIE.**

The Toronto Star [illegible] the following reference to the [illegible] of Miss Marjorie Brodie, [illegible] daughter of Magistrate Edmison, [illegible] this city. The bride was well known here, having visited at her grandfather's home on numerous occasions.

A pretty wedding took place this afternoon at three o'clock, when the marriage of Miss Helen, only daughter of Mr. and Mrs. A. W. Brodie, and Mr. Norman F. Henry, son of Mr. K. J. Henry, of Rockliffe, Ottawa, was performed by Rev. Mr. Stephens. The wedding took place in the Avenue Road Presbyterian church, which was beautifully decorated with palms, ferns and pink asters. The guests' seats were tied with white satin ribbons and large bunches of white asters.

To the strains of Lohengrin's Wedding March, played by the organist, the bride entered the church on the arm of her father. Her gown was handsome in its simplicity. It was ivory duchess satin, silver net yoke, Dutch neck, and short kimona sleeves. She wore a tulle veil caught with a coronet of orange blossoms which had been worn by her mother. Her bouquet was a shower of lilies of the valley and roses. Her only jewelry was the groom's gift, a gold chased bracelet.

Miss Lesley Forbes was bridesmaid, wearing white corn spotted net over white satin, a wide sash of satin ribbon threaded through large medallions tied the skirt in near the hem. The sleeves were made in kimona style, a berth of applique touched with pale blue being draped around the yoke. Her hat was a Charlotte Corday shape trimmed with blue plumes and pink roses. She carried a large bouquet of Killarney roses tied with satin ribbon. The groom's gift to her was a pearl bow-knot brooch.

The ushers were Mr. Kenneth Green and Mr. Austin Reiffenstein, both of Ottawa. The groom's gift to them was pearl tie pins. Mr. Willis O'Connor of Ottawa was best man, and received gold cuff links.

Before the ceremony the guests sang "The Voice that Breathed o'er Eden" and during the signing of the register Mrs. Herbert Plant sang "O Fair, O Sweet, O Holy." Mrs. Plant wore her wedding gown of satin and chiffon and a large white picture hat with lilacs. On leaving the church the organist played Mendelssohn's Wedding March. The groom gave Mrs. Plant a pretty pearl brooch.

Mrs. Brodie had a reception at their residence, 125 Kendall avenue. Refreshments were served from a table decorated with lilies of the valley and roses. About eighty guests were present. Mrs. Brodie wore a becoming pearl grey crepe de chine, lace garnitures. Her hat was of grey velvet with plumes to match.

Mr. and Mrs. Henry left for a trip to New York and then Bermuda for a month. On their return they will reside at 125 Kendall avenue. The bride's traveling gown was of Alice blue Rajah silk and a felt toque, silk and Persian touches, and a feather mour[illegible]

**McGREGOR—DIXON.**

A very pretty wedding took place at the residence of Mr. and Mrs. John Dixon, Drummond's station, on Wednesday, Sept 7th, at 6 o'clock, when their second daughter, Alice Jean, was united in marriage to William James McGregor, son of Mr. W. J. McGregor, of Peterborough. Rev. Dr. Langfeldt, rector of St. Luke's, officiated.

The bride entered the drawing-room to the strains of the wedding march, played by her sister, Miss Emma Dixon, leaning on the arm of her father, and looked charming in a dress of cream mulle, trimmed with Irish lace and carrying a shower bouquet of white roses, while the bridesmaid, Miss Matilda McGregor, of Peterborough, sister of the groom, in a dress of pale blue mulle, carried pink roses. The groom was supported by Mr. Fred Dixon, brother of the bride.

The groom's gift to the bride was a gold watch; and chain, to the bridesmaid a bracelet, to the groomsman, a tie pin, set with pearls. The presents were both numerous and costly, testifying to the high esteem in which the young couple were held. After congratulations had been bestowed, the guests sat down to a sumptuous wedding supper, after which the young couple took the 9 o'clock train for Toronto, and points west. The bride travelled in a suit of Alice blue broad cloth, with a hat to match. On their return they will reside in Otonabee. The young couple have the best wishes of a large circle of friends for a long and happy wedded life.

**LEWIS—BATES.**

A quiet but pretty wedding was solemnized in St. Mark's church, Outlook, Sask., on Monday evening, Aug. 29, when Miss Ella M. Bates, of Burbeigh Falls, Ont., was united in marriage to Mr. Walter M. Lewis, of Dinsmore, Sask., formerly of Goodwood, Ont.

The ceremony was performed by the Rev. James Williams, vicar of Outlook, and the church was tastefully decorated with flowers for the occasion.

The bride was becomingly attired in cream Crepoline with trimming of embroidered net, and bands of satin, and wore a black velvet turban hat with white plumes.

The bridesmaid was Miss A. Bates, sister of the bride, while the groom was supported by Mr. Robert Way, of Dinsmore.

Mr. and Mrs. Lewis left Tuesday afternoon for Dinsmore, where they intend taking up their residence, the bride travelling in a suit of Alice blue striped Venetian.

A number of handsome gifts were received from friends in Ontario, testifying to the high esteem in which the young couple are held.

## MEMORIES OF MARK TWAIN.

**Two Letters the Humorist Wrote to Henry Watterson.**

"Mark Twain—An Intimate Memory," is the title of Henry Watterson's article about his cousin as it appears in the American Magazine. Mr. Watterson recites the following incident as being typical of Mark Twain's whimsical point of view:

"His mind turned ever to the droll. Once in London I was living with my family at 103 Mount street. Between 103 and 102 there was the parochial workhouse—quite a long and imposing building. One evening, upon coming in from an outing, I found a letter he had written on the sitting room table and left with his card. He spoke of the shock he had received upon finding that next to 102—presumably 103—was the workhouse. He had loved me, but had always feared that I would end by disgracing the family—being hanged, or something—but the 'work'us,' that was beyond him; he had not thought it would come to that. And so on through pages of horseplay, his relief on ascertaining the truth and learning his mistake, his regret at not finding me at home, closing with a dinner invitation. Once at Geneva, in Switzerland, I received a long, overflowing letter, full of buoyant oddities, written from London. Two or three hours later came a telegram: 'Burn letter. Blot it from your memory. Susie is dead.'"

Susie was Mrs. Clemens.

**Orchards.**

Experiments have shown that, while orchards are injured by cattle, they yield better results with sheep or hogs than when not pastured at all.

**Driving Rivets.**

Ordinarily on boiler work, where the rivet must be steam tight and well driven, 1,000 or 1,500 rivets might be considered a good day's work, while on structural work, such as girders, 3,000, 4,000 or more are generally driven, and on such irregular work as trusses probably 2,000 or 2,500.

# TURNBULL'S SATURDAY BARGAIN LIST

## BARGAINS IN THE NEW CLOAK SECTION

**Satin-lined Suits**

Smart Tailored Suits made of fine broadcloth in taupe, navy, cadet, new green, dark red and black; coat is in plain tailored style in popular length and is lined with good quality satin to match; skirt is in the new banded effect, all sizes. Saturday Special ..... **15.00**

# Disinherited, Is Now His Father's Political Rival

**Chas. Stuever, Disowned by St. Louis Man on Account of Marriage, to Oppose Father at the Polls.**

**INVADES HIS WARD**

ST. LOUIS, Sept. 9.—Disinherited and disowned for marrying his childhood sweetheart, Charles A. Stuever, only son of Anton C. Stuever, better known as "Tony," has not only "come back" financially by his own efforts, but to-day capped the climax of his remarkable career by entering politics as a Republican, in opposition to his father, a leading Democrat.

Young Stuever has invaded his father's own ward, the Twenty-fourth, and can see, from his front porch, the red walls of the wealthy brewer's mansion. They have been estranged for nearly three years.

The senior Stuever has long been a power in the Democratic party. His son says the appointment of Republican precinct committeemen has been promised him, and he does not expect to stop there.

CREDITS WIFE WITH SUCCESS

Young Stuever, who is twenty-three years old, ascribes his success in winning his own way without the aid of his father to the assistance of his wife, a blue-eyed girl of nineteen, with the face and figure of a child. But the youthful husband's square jaw, level-glancing eyes and sturdy frame demonstrate that he has his own share of determination and pugnacity.

He braved his strong-willed father for love of Miss Beatrice Klauber, daughter of a merchant. The girl was sixteen years old.

"Tony" Stuever menaced his son with disinheritance if he married Miss Klauber. The youth promptly eloped with his sweetheart and wedded her in March, 1908.

DISINHERITED BY FATHER

"I think marriage is the very finest form of graduation," said the girl to her parents, who wished her to complete her term in school.

The indignant brewer ordered his son to shift for himself. He obtained enough money to take his bride and himself to Philadelphia and to purchase a small bioscopeondeon. By rigid economy and attention to business, success came to them, but not until they had passed through many months of severe privations.

"Those were certainly raw, ugly times," said Stuever to-day. "I could not have succeeded without the aid and encouragement of Mrs. Stuever. A good wife is better than everything else, even an inheritance."

TOO YOUNG, SAYS FATHER

"I wanted to do more," said the girl wife. "I was cashier and bookkeeper for our theatre and wished to play the piano besides. I could have done it, but Charley thought it would be too much of a strain."

The elder Stuever laughed aloud when told of the political aspirations of his son.

"Why," he said, "the boy has only voted once. He hasn't had any experience. He's too young."

"But he's of age, and if he wants to get into politics, it's his privilege. It's up to him. Of course, I can't tell whether he'll succeed, but he's still a boy."

## SERMON FROM SHAKESPEARE

*Take heed, be wary how you place your words.*
*—Henry VI., Part v., Act. III., Sc. 2*

These words were uttered by La Pucelle (Joan of Arc) to her soldiers as they were about to enter the town of Rouen in disguise. She dreaded lest their speech might betray them. Peter was betrayed to the enemies of J. Galilean tones. Words betray not only nationality, but also give an indication to character. In the former case it is by the manner of speaking; in the latter it is by the substance of the thought. Care should be exercised as to what words are allowed to come out of the mouth. According to them, men are deemed coarse or refined, shallow or thoughtful, unlearned or cultured.

Words are the winged messengers of the mind. Once let loose they cannot be recalled but journey on doing good or evil, blessing or banning. Words are fossils containing the history, social and moral of past ages. They are seeds from which action grows. They are flowers which spread perfume abroad. They may be daggers that stab the heart, or upas trees that poison all who come under their influence. Too great care cannot be taken as to how words are placed. The tremendous power of words is well expressed by Byron:

"But words are things, and a small drop of ink,
Falling like dew, upon a thought, produces
That which makes thousands, perhaps millions, think."

A good deed or an evil deed affects only those immediately concerned, but when the story of it is told it may affect the whole world. Shakespeare has won more battles than did Henry V. His written words have stimulated the spirits and strengthened the arms of thousands of English soldiers.

How great is the power of words! A word may be a torch to set men's hearts on fire. Marc Antony's words inflamed the Roman mob against the murderers of Caesar. Lincoln's words at Gettysburg, by firing the spirit of the nation with true patriotism, did as much to bring the Civil War to a successful conclusion as did Grant's sword at Richmond. The words of Adams, of Franklin, of Payne, and of Alexander Hamilton made the American War of Independence. The words of Rousseau, Voltaire and the Encyclopedists roused France to bloody revolution. A spark carelessly dropped may set a city on fire, so a word or phrase may make a war. "Remember the Maine!" drove Spain from the North American seas and the Philipines.

Words are beacons directing and guiding men on the journey of life. "Do it now" is on many a business man's desk. They are a light which says that the harbor of success can be safely gained by application to the work in hand. The spiritual world is studded with word-beacons that point the way in storm and darkness. Words sometimes are wreckers' lights luring goodly vessels on to rocks and shoals; many a life has had a vicious bent given to it through impure literature.

Words are a safety-valve.

"Give sorrow words; the grief that does not speak
Whispers the o'er-fraught heart, and bids it break."

There is relief in expression. To relate one's sorrows to another human being often brings surcease from sorrow. It is true that,

"Sorrow ebbs, being blown with wind of words."

Words are a sword. Evil is in the land. The pulpit, the platform and the press have in their hands a two-edged sword with which to drive it out. Slavery was abolished in the civilized world by means of words that roused to action. Intemperance is being driven rapidly by the same force from its strongholds. Virtue and vice exist in a nation in proportion as the words of the inhabitants are clean or unclean. When the monster vice is abroad it requires the angel with the flaming sword of words that stir men's blood to slay it.

Words are a balm. The soul is suffering; how soothing is a word of sympathy. In the heat of the day at the height of the struggle a man is smitten down. Left to himself he despairs. His thoughts are gloomy and he is incapable of action. The true friend comes along; he places his words well. The despairer is strengthened and under their influence can once more begin the battle of life. There is balm in Gilead so long as the friend with the sympathetic word is near at hand to be a physcian to the soul.

The advice: "Take heed, be wary how you place your words," is excellent if taken in the very broadest sense. Men are judged by their words. They do evil or good by their words. By their words they strengthen or cast down. Words should be placed with care and not thoughtlessly uttered. Scott truly wrote:

"And many a word, at random spoken, may soothe or wound a heart that's broken."

Let every word be consciously aimed at a mark, or so cultivate the spirit that even random words which emanate from it will have power to soothe and strengthen.

# BIG TROUT LIVES INSIDE OF A RATTLER

LOS ANGELES, Cal., Sept. 9.—With a tail of a trout which was swallowed by a rattler and which flopped back into the water and swam away when the rattler was killed and ripped open, Southern California claims to have the boss fish story of the season. This yarn, which even Roosevelt could not class as a nature fake, is vouched for by a Sunday school teacher and an evangelist. Professor J. Williams, of San Bernardino, is the Sunday school teacher, and T. Evans is the gospel expounder.

These men, with six others, went hunting in the San Bernardino Mountains. They saw twelve big rattlers on the edge of a pool, in an isolated section back of old Mount San Bernardino.

The hunters concealed themselves and spent an hour watching intently, when they were startled to see the biggest of the snakes suddenly dart into the pool. Its movements were as quick as lightning. It had barely disappeared in the water before it threw itself back upon the bank with a large trout in its mouth. For a moment the trout reflected all the colors of the rainbow (it was a rainbow trout), then it disappeared down the snake's throat.

And now for the climax, which [illegible] by the Sunday school teacher and the evangelist. The hunters fired at the snake and they killed [illegible] of 'em. When they ripped open the big fellow the [illegible] the trout in its [illegible] whole, but it was [illegible] and the trout, [illegible] away, apparently [illegible]

In token of the gospel truth of this story the hunters exhibited twelve big rattler skins, in themselves an unusual sight.

If any part of the Pacific Northwest can beat this yarn, the South is willing to take a back seat along wth Jim Jeffries.

# CANNED HIS SWEAR WORDS

Examiner Special.

VIENNA, Sept. 3.—Swearing by gramaphone is a punishable offonce in Hungary, as Herr Schwarz, of Arad, has found to his cost. Schwarz, a dealer in gramaphones, complained that the singing of milliner girls in a neighboring workroom disturbed his rest in the early mornings. His protests to the management were without result.

One morning the girls were horrified to hear a stream of abuse, interlarded with high-flavored Hungarian oaths, directed at them from a gramaphone placed in Schwarz's window. As the cerulean outburst had been heard by neighbors, the girls brought a slander action against Schwarz.

The gramaphone man's explanation in court was that he had been testing some new records, and added the remarkable statement that there was a demand for "swearing" records to amuse parties. But Schwarz's own voice was recognized when the offending record was played in court, and he was ordered to pay $5 damages.

## *The Cause*

of Eye Troubles is usually not disease, but defect in the structure or muscles of the Eye.

Consider the incessant work of the Eye, the instantaneous and exact adjustment demanded that sight may be always equal, single and ready to every change in position, distance and light. The nerves compel and control the mechanism in these instant adjustments. The mechanism may be defective, that is—

There may be defects in the structure, or focus of one or both Eyes;

The Muscles may be imperfectly balanced, so that both Eyes do not work in harmony;

There may be inability to focus for close work;

There may be strain through overwork, abuse, poor lights, bright reflections, etc.

*An examination will tell you just what condition your Eyes are in.*

# AFTER FOUR YEARS OF MISERY

## Cured by Lydia E. Pinkham's Vegetable Compound

Baltimore, Md. — "For four years my life was a misery to me. I suffered from irregularities, terrible dragging sensations, extreme nervousness, and that all gone feeling in my stomach. I had given up hope of ever being well when I began to take Lydia E. Pinkham's Vegetable Compound. Then I felt as though new life had been given me, and I am recommending it to all my friends."—Mrs. W. S. FORD, 1938 Lansdowne St., Baltimore, Md.

The most successful remedy in this country for the cure of all forms of female complaints is Lydia E. Pinkham's Vegetable Compound. It has stood the test of years and to-day is more widely and successfully used than any other female remedy. It has cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion, and nervous prostration, after all other means had failed.

If you are suffering from any of these ailments, don't give up hope until you have given Lydia E. Pinkham's Vegetable Compound a trial.

If you would like special advice write to Mrs. Pinkham, Lynn, Mass., for it. She has guided thousands to health, free of charge.

SEALED TENDERS addressed to the undersigned, endorsed "Tender for Re-construction of Wharf at Lakeport, Ont.," will be received at this office until 4.00 p.m., on Tuesday, October 4, 1910, for the reconstruction of the wharf at Lakeport, County of Northumberland, Ont.

Plans, specifications and forms of contract can be seen and forms of tender obtained at this Department, the office of J. G. Sing, Esq., District Engineer, Confederation Life Building, Toronto, Ont., and on application to the Postmaster at Lakeport, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works for the sum of fifteen hundred ($1,500.00) dollars, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, September 6, 1910.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

## Prescription for Headache!

If you should go to your family physician and ask him for a prescription for headache, and he knew the very latest discoveries in medicine, he would prescribe the ingredients of ZUTOO tablets.

Yet he might not get the happy combination of the ingredients secured in ZUTOO tablets after long trial and experiment.

The ingredients of Zutoo Tablets are prescribed for headache by the very best physicians of the day.

Praised by all users, thousands gladly testify to the merits of this reliable cure for headache. 25c at dealers Try it.

# "THE PILLAR OF LIGHT"

By Louis Tracey, (Copyrighted)

(Continued from Friday)

At first they distinguished nothing save a chaotic blend of white and yellow foam, driving over the reef at an apparently incredible speed. Overhead, the black pall of the sky seemed to touch the top of the lantern. Around, in a vast circle carved out of the murky wilderness, the wondrous beam of the light fought and conquered its unwearied foes. Constance caught the three quick flashes of the Seven Stones lightship away to the right. She fancied she saw a twinkling ahead, but this was the St. Agnes light, and neither girl could make out other sight or sound until Brand pointed steadily twards one spot in the darkness.

Before they could follow his indication they were compelled to duck to avoid another wave. Then, as if it had just popped up out of the sea, they divined a tiny white spark swinging slowly across a considerable area. It was by that means that Brand had estimated the size and nearness of the steamer, and soon they glimpsed the red and green sidelights, though ever and anon these were hidden by the torrents of water sweeping over her decks. Of the vessel they could see nothing whatever.

Steadily she rolled along her fearful path. Having once found her, there was no difficulty in estimating the rapidity of her approach. Enid, whose eyes were strong and far-sighted, fancied she caught a fitful vision of a big, black hull labouring in the yellow waves.

Though it was difficult to speak, she crept close to Brand and screamed:

"Is she drifting on to the reef?"

"I fear so," he answered.

"Then she will be lost!"

"Yes. Unless they manage to pass s'uth'ard."

Luckily for poor human nature, mental stress and physical effort rarely unite forces. The mere attempt to resist the wind, the constant watchfulness needed to avoid the ambitious seas, though these, strange to say, appeared to be diminishing in size and volume as the tide rose, served to dull the horror of the threatened tragedy.

Brand quitted them for an instant to glue his eyes to the lantern, after wiping a space on the glass: he must see if the lamp needed tending. Satisfied by the scrutiny, he stood behind the girls, who had shrunk closely together the moment he retired.

"They are trying hard to steer clear of the reef," he shouted. "Twice they have got her head round, but the sea is too strong for them. I am afraid she is doomed."

Now, they unquestionably saw the great body of the ship. Her funnels showed most clearly, making sharply defined black daubs on the heaving desert of froth. The plunging whirls of the masthead light were enough to prove how the unfortunate vessel was labouring in what might prove to be her final agony.

And the pity of it! The wind was dropping. In another hour the weather might moderate appreciably, the tide would sweep her away from the horrible reef, and help would be forthcoming. Indeed, even then, a powerful steam trawler was preparing to fight her way out of Penzance harbour, with brave men on board ready to take any risk to save a ship in distress.

But the hour was grudged by fate. They could plainly hear the hoarse blasts of the steamer's foghorn, and again a rocket spurted its path to the clouds. She was barely a mile away, and, if anything, in a worse position than before as the wind remained fixed in the southwest, and the tide, at this stage, curved in towards the land ere it began to flow back again to the Atlantic.

"Can nothing be done?" screamed Constance, rendered half frantic by the thought that the steamer would go to pieces before their eyes.

"Nothing," was the answer. "Pray for them. They are in the hands of God."

In gruesome distinctness they watched the vessel's approach. The siren ceased. Had those on board abandoned hope? Pitching and rolling in a manner that suggested the possibility of foundering in deep water, she came on with fatal directness. Suddenly, a dreadful thought came to Brand's mind. The lighthouse stood on the easterly and most elevated portion of the reef, whose bearings ran southwest by west and north-northwest. At low-water, some two acres of jagged rocks were exposed. On all sides the soundings fell to sixteen and eighteen fathoms. What if this helpless leviathan, of ten thousand tons or more dead weight, were to strike the pillar. This was quite possible with the tide at its present level. It all depended whether her bows were raised or lowered at the moment of impact. In the one case she would smash away many feet of rock, and perhaps damage the foundations of the lighthouse; in the other, her sharp prow would stab into the vitals of the granite, and the huge column might collapse in common ruin with its colossal assailant.

One of the girls, he never remembered which of them, spoke to him. He could not answer. For a second time that night he knew what fear meant. He watched the onward plunging of the vessel with stupefied eyes. He saw, as in a dream, that her officers and crew were still making desperate efforts to weather the reef. But, with the utter malignity of fate, though they might have swung her to port, she would not budge a yard to starboard, for now both wind and waves assailed her most vehemently on the starboard quarter.

Then when she was little more than twice her own length distant, he was certain that a dim form on the bridge signaled to the chart-house. With a miraculous deftness, on the assumption that her wheel was put hard over she fell away from the racing seas. Her red light disappeared; her green light curved into full view. The next wave lifted her bodily, with a mad joy that it should be able to use her to batter its enemy, the rock.

Then she struck, with a sickening crash that was plainly audible above the roar of the reef. This was not enough. Another rush of foaming water enveloped her and smashed her again on an inner ledge. There she lodged, falling inertly over to starboard.

And Brand found his voice once more, for, as sure as this terrible night would have its end, so surely had the gallant captain of the steamer refused to imperil the lighthouse when all hope of saving his ship had vanished.

The tears were in Brand's eyes. His arms encircled the two girls.

"There goes a fine ship, commanded by a brave man," he cried.

And that was the beginning of the captain's requiem.

### CHAPTTR VII.

### THE LOTTERY.

Just as the spin of a coin may mean loss or gain in some trumpery dispute or game of the hour, in like manner, apparently, are the graver issues of life or death determined at times. It is not so, we know. Behind the triviality on which men fasten with amazement as the governing factor in events there lies an inscrutable purpose. Yet to those watching the destruction of the splendid vessel, there was little evidence of other than a blind fury in the fashion of her undoing.

The hoarse words had scarce left Brand's lips before a third wave, higher and more truculent than its predecessors, sprang right over the lost ship and smothered her in an avalanche of water. No doubt this monster swept away some of the officers and crew. It was impossible to be certain of aught save the one thing—but the steamer would surely break up before their eyes. The wind, now blowing in fierce gusts, the sea, rising each minute, the clouds of spray chasing each other in eerie flights through space, the grinding, incessant, utterly overwhelming noise of the reef, made all sights and sounds indefinite, nebulous, almost fantastic.

But when the giant billows receded, leaving the ship like a dark rock in the midst of innumerable cascades, the catastrophe took place which Brand would have foreseen were his thoughts less tumultuous. With the support of the sea withdrawn from half its length the huge hull must either slip back into deep water or break in two. The slender steel shell of an ocean liner is not constructed to resist the law of gravity acting on full five thousand tons. So the solid-looking Colossus cracked like a carrot, and the after part fell back into the watery chasm, there to be swallowed instantly, amidst a turmoil which happily drowned the despairing shrieks of far more than half of those on board.

Constance and Enid screamed bitterly in their woe, but again they were saved from utter collapse by the exeginicies of the moment. Brand, who expected to see the remainder of the ship blown up by the inrushing of the sea to the furnaces, dragged them forcibly below the level of the protecting balustrade.

Yet nothing of the sort took place. A vast cloud of steam rushed upwards but it was dissipated by the next breath of the gale. This incident told the lighthouse keeper much. The vessel had been disabled so long that her skilful commander, finding the motive power of no further avail, and certain that his ship must be driven ashore, had ordered the fires to be drawn and the steam to be exhausted from all the boilers except one. Therefore, her shaft was broken, reasoned Brand. Probably the accident had occurred during the height of the hurricane, and her steering gear, of little use without the driving force of the engines to help, might have been disabled at the same time.

When the horror-stricken watchers looked again at the wreck the forward part had shifted its position. It was now lying broadside on to the seas, and the lofty foremast thrust its truck to within a few feet of them.

They were spared one ghastly scene which must surely have bereft the girls of their senses. The majority of the first-class passengers had gathered in the saloon. Some clung like limpets to the main gangway. A number, mostly men, crowded together in the drawing-room on the promenade deck. Farther than this they could not go, as the companion hatchways had been locked by the officer of the watch, the decks being quite impassable.

When the hull yielded, the spacious saloon was exposed to the vicious waves. Finding this new cavern opened to them, great liquid tongues sprang into the darkness and licked out hapless victims by the score. Of this appalling incident there in the lighthouse knew nothing until long afterwards.

When the ship struck, the electric dynamos stopped and all her lights went out. The lighthouse lamp, owing to its rays being concentrated by the dioptric lens, helped not at all to dissipate the dim and ghastly vision beneath, but the great frame of the fore part of the vessel served as a break-water to some extent, and temporarily withheld the waves from beating against the column.

Hence Brand, straining his eyes through the flying rack, fancied he could make out the figure of the captain as he left the bridge, and, with some of the crew, took shelter behind the structure of the library and state cabins on what remained of the promenade deck. At the same moment the frenzied occupants of the library and gangway contrived to burst open the door of the main companion.

If they had to die they might as well die in the open and not boxed up in impenetrable darkness. As a matter of fact, the bolts were forced by a man who fired his revolver at them. The sea quickly discovered this new outlet. The next wave, passing through the saloon, sent tons of water pouring through the open hatch. One good result accrued. The strong canvas awning which prolonged the spar deck was carried away, and the group of survivors, benumbed with cold and wholly overcome by their desperate position, could see the entire height of the granite column in front crowned with its diadem of brilliance. The liberated passengers saw it for the first time.

This sight brought no hope. Between ship and lighthouse was a true maelstrom of more than sixty feet of water, created by the back-wash from the stone-work and the shattered hull. Even if the passage could be made of what avail was it? The iron entrance door was fully fifty feet above the present sea level of the sea. It could only be approached by way of the rungs of iron embedded in the granite and every wave, even in the comparative moderation caused by the obstructing wreck, swept at least twenty feet of the smooth stone tiers. It is this very fact that prevents rock light houses from seldom if ever serving as refuges for ship-wrecked sailors. The ascending ladder is so exposed, the sea usually so turbulent under the least stress of wind, that no human being can retain hand-hold or footing.

Yet, there was one faint chance of succour and it was not a sailor who grasped it. The first that Brand knew of the desperate venture was the sight of a spectral man climbing up the shrouds of the foremast. On a steamer, whose yards are seldom used for sails, the practicable rope-ladder ceases at the fore, main, or mizzen-top, as the case may be. Thenceforward, a sailor must climb with hands and feet to the truck, a feat which may occasionally be necessary when the vessel is in dock; it is hardly ever attempted at sea.

The venturesome individual who thus suddenly made himself the centre of observation carried a line with him. Not until he essayed the second portion of his perilous ascent did Brand realize what the other intended to do, which was nothing less than to reach the truck, the very top of the mast, and endeavor to throw a rope to the gallery.

And he might succeed, too—that was the marvel of it. The tapering spar came very near to them, perhaps twelve feet distant, and the wind would certainly carry the rope across the chasm if carefully thrown. A few strong and active men might use this aerial ferry. Well, better they than none. Brave fellow; would that the Lord might help him

Higher and nearer swung the stalwart youngster, for none but a lithe and active boy could climb a pole with such easy vigour. At last he reached the truck, and a faintly heard cheer from beneath mingled with the hysterical delight of Enid and Constance, when, with legs twined round the mast, he rested his arms for an instant on the flat knob of the truck.

Here his face came into the lower focus of the light—strong, clean-shaven, clear-cut features, a square, determined chin, two dark, earnest eyes, and a mop of ru ed black hair, for his deer-stalker cap had blown off 'ere he cleared the spar-deck.

"Look out for the line," they heard him shout. The wind brought his voice plainly, but evidently he could distinguish no syllable of Brand's answering hail:

"Shall I make fast?"

"Can't hear a word," he cried. "If you can hear me hold a hand up."

Brand obeyed.

"Catch the line," he went on. It is attached to a block with a running tackle. Haul in and make fast."

Peerless Peninsular

has a Sliding Damper that regulates the temperature of the oven to any degree

You know the old-fashioned flop-over damper. It has only two positions—shut tight, which throws all the heat around the oven—and wide open, which throws all the heat up the chimney.

With such a damper, the usual course to secure a moderate oven is to open the oven door. Many a pan of bread and cake has been spoiled because the oven was cooled off this way.

The "Peninsular" Sliding Damper gives you absolute control of the heat. You can set it for direct draft, or for quick or slow baking—wide open, a little shut, one-fourth shut, half open, or the tiniest draft possible.

Simply slide the damper along the groove, and the "Peerless Peninsular" oven responds, giving you the desired temperature for any kind of baking you wish.

A Thermometer is furnished in the oven door to give you scientific accuracy if you wish.

There are many other features of the "Peerless Peninsular" that appeal to every woman who takes pride in her home and wants a range that will do justice to her culinary skill.

"Peerless Peninsular" is the range shown above.

"Adanac Peninsular" is plain in design with swing door for those who prefer it.

"Harmony Peninsular" is similar in essentials but more elaborately decorated.

"Constant Peninsular" is different from the others mainly in plainer design and finish. 109

## The food for all folks

For old and young, in any season, in any clime, Shredded Wheat is the one perfect food. It contains all the rich, body-building nutriment of the whole wheat, made digestible by steam-cooking, shredding and baking. In the summer

# SHREDDED WHEAT BISCUIT

is a healthful and satisfying substitute for heavy meals and soggy pastries. It costs much less, tastes good, and is far more nourishing. Its continued daily use keeps the system in perfect trim and the brain clear and active.

Because of its porous shreds and its biscuit form, Shredded Wheat makes delicious combinations with berries, grated pineapple, sliced peaches, bananas, baked apples or other fruit, fresh or preserved. For breakfast heat the biscuit in the oven to restore crispness and serve with milk or cream, adding salt or sugar to taste. It is far better than mushy porridges or ordinary breakfast foods.

## THE PILLAR OF LIGHT

Continued from Page 2.

"The megaphone!" shouted Brand to Constance. She darted away to bring it, and when the adventurer, clinging to the fore-mast had thrown a coil successfully, Brand took the instrument.

"Why don't you come this way? The others will follow," he bellowed.

"There are women and children down below. They must be served first, and they cannot climb the mast" was the reply.

"All right, but send up a couple of sailors. We are short-handed here."

"Right-o," sang out the other cheerily, though he wondered why three men should anticipate difficulty.

Down he went. Without waiting, Brand and the girls hauled lustily at the rope. It was no child's play to hoist a heavy pulley and several hundred feet of stout rope. More than once they feared the first thin rope would break, but it was a good hemp, and soon the block was hooked to the strong iron stanchions of the railing. To make assurance doubly sure, Brand told Enid to take several turns of the spare cord around the hook and the adjacent rails.

Meanwhile, Constance and he saw that the rope was moving through the pulley without their assistance. Then through the whirling sand beneath they made out an ascending figure clinging to it. Soon he was close to the gallery. Catching him by arms and collar they lifted him into safety. He was one of the junior officers, and Constance, though she hardly expected it, experienced a momentary feeling of disappointment that the first man to escape was not the handsome youth to whose cool daring some at least of the ship's company would owe their lives.

The newcomer was a typical Briton.

"Thanks," he said. "Close shave. Have you a light? We must signal after each arrival."

Enid brought the small lantern, and the stranger waved it twice. The rope travelled back through the pulley, and this time it carried a sailorman, who said not one word but stooped to tie his boot-lace.

"How many are left?" inquired Brand of the officer.

"About eighty, all told, including some twenty women and children."

"All wet to the skin?"

"Yes, some of them unconscious, perhaps dead."

"Can you hold out?"

"Yes; a nip of brandy—"

"I will send some. We must leave you now. These with me are my daughters."

At last the crust of insular self-possession was broken. The man looked from one to the other of the seeming lighthouse-keepers.

"Well, I'm—," he blurted out in his surprise. "That American youngster wondered what the trouble was."

A shapeless bundle hove in sight. It contained two little girls, tied inside a tarpaulin and lashed to the rope. This, evidently, was the plan for dealing with the helpless ones.

Brand instantly divided his forces. Enid he dispatched to make hot coffee in the quickest and most lavish manner possible. Constance was to give each new arrival a small quantity of stimulant (the lighthouse possessed a dozen bottles of brandy and whiskey) and act as escort. The women and children were to be allotted the two bedrooms. Any bad cases of injury or complete exhaustion could be disposed of in the visiting officer's room, whilst all the men fit to take care of themselves were to be distributed between the entrance, the coal-room, the workshop and the stairways. The kitchen, store-room and service-room were to be kept clear, and the store-room door locked. Eighty! Brand was already doing problems in simple arithmetic.

A similar problem, with a different point to be determined, was occupying the active mind of the "American youngster" who had solved the knottiest proposition put forward during that eventful night.

He watched the forwarding of the shrieking, shuddering, or inanimate women. He timed the operation by his watch, as the reflected light from the lamp was quite sufficient for the purpose.

(To be continued)

# SKIN BEAUTY

# CUTICURA SOAP

In the treatment of affections of the skin and scalp, which torture, disfigure, itch, burn, scale and destroy the hair, as well as for preserving and purifying the complexion, hands and hair, Cuticura Soap and Cuticura Ointment are well-nigh infallible.

Sold throughout the world. Depots: London, 27, Charterhouse Sq.; Paris, 5, Rue de la Paix; Australia, R. Towns & Co., Sydney; India, B.K. Paul, Calcutta; China, Hong Kong Drug Co.; Japan, Maruya, Ltd., Tokio; So. Africa, Lennon, Ltd., Cape Town, etc.; U.S.A., Potter Drug & Chem. Corp., Sole Props., 135 Columbus Ave., Boston.

32-page Cuticura Book, post-free, giving description, treatment and cure of torturing, disfiguring humours of the skin and scalp.

### Quick Cure.

**Once there was a man who made life miserable for all he met by eternally harping about his aches and pains.**

**He would discourse on the subject of his dyspepsia, and he would almost interrupt a religious service to tell of his rheumatic symptoms.**

**If he had a stitch in his side he had to pester his friends with it, and a headache helped him make everybody unhappy.**

**At last a bright young woman, to whom the man applied for sympathy, cured him of all his ailments.**

**When he was in the midst of a catalogue of his sufferings she said sweetly:**

**"Yes, it is strange how many of these things afflict a man as he begins to grow old."**

**That man never even had a symptom after that.—Wilbur D. Nesbit in Judge.**

### When Men Were Branded.

**A curious relic of bygone times, probably the only one in England, still stands at Lancaster castle. It is a strong iron holdfast, into which the prisoner, who in olden time had been sentenced to be branded as a malefactor, had his hand thrust and locked. The branding iron after being made red hot at the end was pressed against the "brawne of the thumb," and on being withdrawn the letter M branded on the unfortunate prisoner's flesh indicated from henceforward that he was a malefactor. The ceremony was performed in the presence of the judge and jury and in open court, and the brander invariably turned to the judge after he had done his work and exclaimed, "A fair mark, my lord!" It is over 100 years since the instrument was last used on two men sentenced to imprisonment for manslaughter.**

## SUNDAY SCHOOL LESSON QUESTIONS

SEPTEMBE R11th, 1910

The King's Marriage Feast, Matt. xxii. 1-14.

Golden Text. Many are called, but few are chosen. Matt. xxii; 14.

Verse 1—Read the preceding chapter and say whether Jesus answered their words or their thoughts.

Verse 2—What points of resemblance are there between the kingdom of heaven, and a king making a marriage feast for his son?

Whom did Jesus mean the king, and the king's son to represent?

Who are the bride and the bridegroom in this wedding? (See Rev. 21; 9).

How does a marriage feast represent the gospel? (See Isa. 25; 6. I Cor. 5-8. Rom. 14; 17).

Verse 3—Who were the first bidden to the gospel feast, and why did they not come?

By whom did God send out His first invitation?

Verses 4-6—What are the luxuries offered to us in the gospel?

Why did the world, and the Jewish church alike, refuse the gospel invitation?

What excuses do people make today for not coming to the gospel feast? (This question must be answered in writing by members of the club.

Which were the more pronounced in their refusal to come to the marriage feast of the gospel: the world, or the Jewish church?

What part did the world take, in assisting the then organized church, in slaying Jesus and the apostles?

What is the demerit of a backslidden corrupt priest or preacher, compared to a worldly man, in the matter of their rejection of the invitation to the gospel feast?

Verse 7—What armies, as a matter of fact, destroyed the murderers of God's servants, and laid Jerusalem in ruins?

Verses 8-10—To whom was the gospel message first sent, and why was it then so restricted? (See Chap. 10; 5-6).

When was the invitation to this wedding feast first offered to the Gentiles?

To what nations is the gospel invitation being offered to-day?

Why are the bad bidden to this wedding feast, as well as the good?

Are there any so bad that the invitation is not intended for them?

About how many are living to-day, who have accepted the invitation to this gospel feast?

Verses 11-13—Whom does this guest represent who did not have on a wedding garment?

What proportion of hypocrites, or unsaved persons, are to-day members of evangelical churches?

What is the portion of the sinner and the hypocrite?

God calls everybody; why are so few chosen?

Lesson for Sunday, Sept. 18th, 1910. Three Questions. Matt. xxii; 15-22. 34-46.

### Sorry He Spoke.

**There is a certain West Philadelphia bachelor who is very fond of children. Recently when he was riding on a Chestnut street trolley car a woman sat opposite him with a baby in her arms. Suddenly the baby began to cry. Every one in the car seemed to be annoyed and a general scowl went around—that is, every one except the bachelor. He tried to show by the benign expression of his face that the crying of the baby was sweet music to him. He smiled at the youngster, but the noise only grew louder. Finally he leaned across the car.**

**"Perhaps there's a pin sticking him," he said in a stage whisper and after the manner of one who understands all the complexities and troubles of baby life. There was a profound silence in the car until the mother answered:**

**"No, there's no pin sticking him," she said at last in a tone of scorn and with much emphasis on the last word. Then she continued, "He's scared because you're making faces at him."**

**After that the bachelor lapsed into pensiveness.—Philadelphia Times.**

### The Starling's Tongue.

It is extraordinary how many persons are under the impression that, in order to enable a bird to talk, it is absolutely necessary to cut or slit its tongue. I have heard that this fallacy had its origin in the following story: A man had a number of starlings in a large cage marked "Fine Young Starlings—Only 1 Shilling Each," and as each would be purchased, arrived the man would say, "There's a fine bird there, sir," pointing out one of them, "but I want half a crown for him, because he's the only one with a cut tongue, so he is bound to be a talker." He would then proceed to catch the bird and show the cut tongue and invariably succeeded in effecting a sale. This dodge would be repeated as each new customer arrived and departed rejoicing at his good bargain. The reader perhaps is not aware that all starlings have a very peculiar formation at the extremity of the tongue, which gives the appearance of a little piece having been snipped out of it.—London Strand.

### The Crested Screamer.

"I was surprised to run across an old acquaintance up at the zoo the other day. The last time I saw him was in the lower part of Brazil when I was trying to push Yankee notions," said a commercial traveler. "This acquaintance is known as crested screamer. He is one of the best fighters I ever bet my money on. He is about as large as a turkey and as spry as they make 'em when his fighting blood is up. He has four sharp spurs instead of two, and the odd thing is the spurs are on the wings instead of the legs. The birds run wild, but the natives tamed them and taught them to fight hawks and other enemies of poultry. They are fine poultry protectors. A fight between two of them is the most exciting thing in the way of sport down there and is more popular than a cockfight."—New York Sun.

# SAVED FROM THE KNIFE

## Appendicitis Cured By "Fruit-a-tives"

NEWBURGH ONT., Feb. 12th. 1910.

"Just about a year ago, our daughter Ella (fourteen years), was taken with terrible pains in the right side. The pain was so severe that we had to carry her to bed. We at once put her under the care of a first-class doctor, who pronounced it a case of Appendicitis and advised an operation.

We took her to a hospital in Kingston where she was again examined by an eminent specialist. He said she had Appendicitis and *must be operated on at once if we wanted to save her life.* As we had taken her to Kingston to have this done, we were ready, but our daughter was afraid and cried and begged so pitifully, that we postponed it for that day. Luckily for us and for her an uncle came in with some 'Fruit-a-tives' and insisted on Ella taking them. Good results were apparent almost from the first dose, and the continuous treatment cured her.

'Fruit-a-tives' saved our daughter from the surgeon's knife and to-day she is enjoying the best of health."

J. W. FOX, (Father).
LILLIAN FOX, (Mother).

Words cannot express the gratitude of Mr. and Mrs. Fox, And Miss Ella will always remember "Fruit-a-tives"—the discovery of an eminent physician, and the only medicine in the world made of fruit. 50c. a box, 6 for $2.50, or trial box, 25c. At dealers, or sent, postpaid, on receipt of price by Fruit-a-tives Limited, Ottawa.

# VARICOSE VEINS CURED

NO NAMES USED WITHOUT WRITTEN CONSENT.

**Confined to His Home for Weeks.**

"Heavy work, severe straining and evil habits in youth brought on Varicose Veins. When I worked hard the aching would become severe and I was often laid up for a week at a time. My family physician told me an operation was my only hope—but I dreaded it. I tried several specialists, but soon found out all they wanted was my money. I commenced to look upon all doctors as little better than rogues. One day my boss asked me why I was off work so much and I told him my condition. He advised me to consult Drs. Kennedy & Kennedy, as he had taken treatment from them himself and knew they were square and skilful. I wrote them and got THE NEW METHOD TREATMENT. My progress was somewhat slow and during the first month's treatment I was somewhat discouraged. However, I continued treatment for three months longer and was rewarded with a complete cure. I could only earn $18 a week in a machine shop before treatment, now I am earning $21 and never loose a day. I wish all sufferers knew of your valuable treatment.

HENRY C. LOCUST.

## HAS YOUR BLOOD BEEN DISEASED?

BLOOD POISONS are the most prevalent and most serious diseases. They sap the very life blood of the victim and unless entirely eradicated from the system will cause serious complications. Beware of Mercury. It may suppress the symptoms—our NEW METHOD cures all blood diseases.

YOUNG OR MIDDLE AGED MEN.—Imprudent acts or later excesses have broken down your system. You feel the symptoms stealing over you. Mentally, physically and vitally you are not the man you used to be or should be. Will you heed the danger signals?

**READER** Are you a victim? Have you lost hope? Are you intending to marry? Has your blood been diseased? Have you any weakness? Our NEW METHOD TREATMENT will cure you. What it has done for others it will do for you. **Consultation Free.** No matter who has treated you, write for an honest opinion **Free of Charge. Books Free**—"Boyhood, Manhood, Fatherhood." (Illustrated) on diseases of Men.

**NO NAMES USED WITHOUT WRITTEN CONSENT, PRIVATE. No names on boxes or envelopes. Everything Confidential. Question List and Cost of Treatment FREE FOR HOME TREATMENT.**

# MANY PEERESSES FOLLOW ROYALTY IN THEIR LOVE OF SHOOTING

## ROYAL SHOTS ARE AMONG THE BEST

### King George Holds One of the Smartest Guns in England at Driven Partridges.

### HIS KILLS ARE RECORDS

### While Royalty Is Away Shooting on the Moors the Palace Is Being Remodelled.

(Special Dispatch.)

LONDON, Saturday.

Though King George during his holiday at Balmoral is very busy nearly every day shooting grouse, which are unusually numerous on the royal moors, as elsewhere, this year, His Majesty is not doing any entertaining, except in a very quiet way, owing to the mourning for his father. For a near neighbor he has Rear Admiral David Beatty and his American wife, who is a daughter of the late Mr. Marshall Field, of Chicago, herself considered a fine sportswoman. They have a lease of Invercauld and the surrounding grouse moor, and, outside some of the occupants of the royal residences at Balmoral, they were the first guests the King and Queen Mary had to dinner at the castle.

None among his subjects enjoys sport with the gun more than does King George. Speaking at the Keepers' Benevolent Society in 1904 the Duke of Abercorn remarked that the then Prince of Wales was one of the smartest shots in England at driven partridges, that he "always got his first and second barrel in, and very often the third and fourth."

KING ONE OF THE EIGHT BEST SHOTS.

That this estimate of His Majesty's ability as a shot is one generally held by sportsmen was proved on the occasion of a plebiscite carried out by a sporting monthly magazine some years ago, when King George was classed as one of the finest eight shots in the Kingdom, the eight crack shots including the Earl de Grey, now Marquis of Ripon; Lord Walsingham, Mr. R. Rimington Wilson and Mr. Headley Noble.

It can be imagined, therefore, that, given the birds, the bag when His Majesty is one of the party is anything but meagre and that his share of the same is a pretty big one. Indeed, the phrase "the Prince of Wales secures the biggest bag" used to be quite a stereotyped expression in reports from the moors.

Last year King George was one of the party at the opening of the shooting season at Bolton Abbey, the Duke of Devonshire's favorite Yorkshire seat, when the bag amounted to 700 brace. The magnitude of the bag coincided in a remarkable manner when King George visited the Upper Wharfdale Moors in 1908, when seven guns in two days killed 690½ brace.

At Didlington Hall, Norfolk, when the guest of Lord and Lady Amherst, in 1922, out of a bag of 784 head of game King George accounted for 147, but the most remarkable day's shooting that His Majesty has yet enjoyed within the confines of his realms took place two years later, when he and Queen Mary were the guests of Lord and Lady Lathom in Lancashire. The shooting party on this occasion, in addition to the Prince of Wales, included such notable shots as the Earl of Lathom, Lord Sefton, Lord Dartrey, Lord Crichton, Colonel Bromley-Davenport, Major Wynne-Finch and the present Duke of Devonshire, and that business was meant from the first can be gathered from the fact that the talented eight got under way for the "Big Wood" at nine o'clock.

THE LIST OF KILLS, 2,199.

By luncheon time the bag, thanks in a great measure to the keenness of the royal shot, who worked three guns and headed the list of kills, with Lord Sefton second and Colonel Bromley-Davenport third, numbered 1,500 head, and at four o'clock, when the proceedings terminated, the same totalled 2,199.

While the King is away shooting grouse around Balmoral workmen have been busy on his London home, now that the Queen Mother has vacated Buckingham Palace, and one of the meanest looking places in all London just now undoubtedly is the fore court of the palace. In the case of an ordinary house it would be called the back yard, the real front of the palace being around on the garden side, hidden from public view by the high walls that surround it.

Before taking the rooms in hand, workmen are now busy on the water supply, which has always been a source of trouble, and a more untidy, dirtier, drearier looking place it would be hard to find. The court is filled with men in clayey corduroys, digging into the water pipes, piling all around them mounds of earth and clay.

Sometimes you will see a sort of housekeeper in rusty black come down the steps and watch the workmen with an expression of discreet disapproval. The policeman's joke and chatter as they never do when they know that the next carriage may carry a king. There is a fine suggestion of holiday, too, in the way the sentried brigs their heels down on the pavement. No doubt they feel it hard that such fine fellows as they should be asked to guard a gang of navvies.

The King, during his stay at Balmoral, is discovering, so it is reported, with some of the old fashioned methods which have outgrown their usefulness. Instead of the old plan of sending frequent messengers over the long and costly journey between London and Balmoral His Majesty is content to rely on the Post Office for the prompt and regular transmission of the frequent communications between the metropolis and the Court in Scotland. Twice in every day the Post Office motors all letters and parcels and forwards them by the ordinary channels, thus saving delay as well as the cost of the special messengers.

### Duchess of Bedford and the Duchess of Newcastle Are Thorough Sportswomen.

### KING GEORGE'S SISTER SKILLED WITH A GUN

(Special Dispatch.)

LONDON, Saturday.

WHEN Mrs. Chapman, of Staines, shooting at Bisley among two hundred competitors in the London and Middlesex Counties Rifle Association competition, headed the list with the fine score of 103 out of a possible 105, just missing the bull's-eye by a mere shave only twice out of twenty-one shots, it was considered a remarkable performance for a woman. Women are not, as a rule, often seen at the rifle ranges in England, but there are many well known skilled gunners in the ranks of society now to be found out on the moors, and to some extent also engaged in the more arduous task of deer stalking.

Some of these women are possessors of no mean skill, who would scorn to pick out easy shots and let the difficult ones go by. Undoubtedly the best lady gunner in the United Kingdom is the Duchess of Bedford, who would put many good shots among the men to shame. She considers shooting an excellent pastime for women, but says they "should remember they are not butchers, but sportswomen."

She has her own ideas on costume, too, considering that a neat tailor made dress of some inconspicuous tweed that harmonizes well with the ground is best, the skirt being cut not longer than eight inches below the knee, with a strap round the waist to carry a coat.

HER WORK ON THE MOORS.

The Duchess of Bedford has accounted for as many as 3,427 head of game in the season, and has brought down fifty-seven birds with fifty-eight cartridges, while on another occasion she shot twenty-three pheasants and a hare with twenty-five cartridges. Her day's bag has amounted to one hundred brace of pheasants, and another time she shot one hundred and fifteen partridges in a single day's driving. A winter's day on some more shooting wild duck affords her as much pleasure as a day on the moors or a morning's work among the pheasants.

The Duchess of Newcastle is another thorough sportswoman to whom a day's shooting does not come amiss, and she is one, moreover, who has the benefit of a handsome physique that qualifies her for tasks of endurance and emulation in the open air.

Violet Lady Beaumont is another lady who is an accomplished shot. She scorns to select all the easy shots so that her day's bag may be a big one. Lady Juliet Duff, the stepdaughter of the Marquis of Ripon, can handle a gun with distinction, which is not surprising, as she was taught by the Marquis, who knows as much about game shooting as most men.

Wedding presents are usually supposed to give some indication of the tastes of the receiver, so that as the Earl of Chesterfield presented his bride with a gun on their marriage it is easy to understand that she was in the habit of going out on the Yorkshire moors during the grouse season. Lady Pentland also numbered a couple of guns among her wedding presents, and is another lady who can shoot well.

QUEEN IN THE LIST.

The Queen of Norway also takes after her brother, King George V., in that she can handle a gun with no little skill, an accomplishment possessed only by a few royal ladies.

Other ladies less exalted who welcome the shooting season are Lady Wolverton, Lady Pole-Carew, Lady Elena Wickham, and Lady Mary Barrington. Mrs. Asquith used to enjoy an occasional shoot, though she has given up the sport for some time back, and Miss Ellaline Terriss, the well known actress, is another first rate lady shot.

Deerstalking does not appear to appeal so much to women as grouse or pheasant shooting, but the Marchioness of Breadalbane is devoted to the sport, many a fine stag falling to her rifle in the Blackmount Forest. The Marchioness of Graham is also a deerstalker, while Lady Doune used to accompany her father, Mr. George Glen-Coats, into the deer forests before her marriage. Lady Loch also finds the sport to her liking, while a few years ago Lady Edina Brassey could claim that the best and wildest head bagged during the season in the Benmore Forest had fallen to her rifle.

## IS THE AMERICAN TOURIST MEAN?

### English Discovery About the Travellers Who Annually Spend $25,000,000 in London.

(Special Dispatch.)

LONDON, Saturday.

WITH the present great homeward rush of American visitors proving that more tourists crossed the Atlantic this season than ever before, and with the British metropolis again having exacted its share of American financial tribute, which no less an authority than Mr. J. Pierpont Morgan has estimated at $25,000,000 every summer, London, while doffing through its own vacation period, has found it convenient to talk much in its sleep about the bearers of this welcome golden largess. As a result we seem to be "in bad" in many ways.

In the first place, the Daily Despatch has found it necessary to make some remarks about this season's American representatives in general. It proceeds to opine as follows:—

"If you could see the gathering of taxis, char-a-bancs and wagonettes outside St. Paul's Cathedral at midday and toward the end of the next twelve hours the crowded condition of the Strand, you would realise that London is not really 'empty.' It is, in fact, thronged with American tourists, not those rich and vulgar sybarites of whose eccentricities we read almost daily, but the humdrum, ordinary, every day sort of Americans, a pale faced people, who dress with a curious primness and carry themselves with a scrupulous uprightness. They look tired.

FATIGUE CANNOT STOP THEM.

"To them religiously 'doing' the British Museum on some sweltering summer afternoon arouses feelings halting between scorn and pity in the stay at home Londoner. It is all so manifestly uninteresting to them, and they look so hot, tired and bored. But they have travelled three thousand miles to see the Tower, the British Museum and a score of other tiresome, dull show places, and mere fatigue will not serve to deter them.

"The meanness of the American tripper is almost a proverb," continues the Dispatch in voicing a new discovery. "Shopkeepers, hotel proprietors, tourist agents and boarding house landladies will tell you that for customers insistent on getting twenty shillings' worth of value for their sovereign the Americans whom they have met 'beat the band.'"

Even the visit of Duke Franz Josef, of Baaria, to the United States has been a cause of attracting further criticism.

It has been somewhat appalling to English correspondents versed in European feudal tactics," says the Birmingham Post, "to behold an American society reporter, without even the formality of pitching his hat, approach the Bavarian visitor without wincing and grasp him by the hand, with some such hearty salutation as 'Well, Duke, we're all glad to see you. What do you think of our town?' And Duke Franz Josef, with rare good instinct, has not rebuffed his democratic friends, but chatted with them, to quote one American journal, 'as man to man.'"

Then, too, critical arrows are being shied at our automobilists. The Illustrated Sporting and Dramatic News has played its hand in the game, asserting:—

THE AUTOMOBILIST ATTACKED.

"There has been growing up lately an objectionable practice of using the area presented by the radiator of motor cars for the purpose of advertising the make of the vehicle in question. Owing to there being no import duty on motor cars in this country, one noticed for the first time this season that a very great number of American visitors have brought their cars over with them. The immediate point that concerns us about these American machines is that most of them bear in very large lettering, chiefly in brass across the radiator, the name of the make of car. It is quite an eyesore, and why any private owner condescends to allow his vehicle to be used for a running advertisement for the manufacturer would be a marvel to most Europeans.

"This means, of course, that you can recognise any car as it goes along the streets and can tell practically to a dollar what the owner paid for it. In America a vast deal of the motor trade is done wholly by playing on the vanity of the owner by providing him with the means of publicly demonstrating to his fellow creatures the amount of money he has spent on his car."

## SEEK UNIFORMITY IN CONSULAR FEES

### Colonel Crowder Proposed Plan to Pan-American Conference at Buenos Ayres.

### WANTS AID OF EXPERTS

### Advised That Rates Should Never Be Excessive or, in Character, Revenue Measures.

(SPECIAL CORRESPONDENCE.)

BUENOS AYRES, August 10, 1910.—Upon Colonel E. H. Crowder, U. S. A., has fallen much of the work of the eighth topic of the programme of the Fourth Pan-American Conference, which requires consideration of measures which might lead to uniformity among the American republics in consular documents, customs regulations and census and commercial statistics. A memorandum was submitted to the committee studying this subject by Colonel Crowder. The committee, which comprised one member from each of the twenty republics represented, voted to form a sub-committee composed of Colonel Crowder, Señor José A. Terry, of Argentina, and Señor Miguel Cruchaga Tocornal, of Chili, to wrestle with the problem. In the memorandum Colonel Crowder says:—

"My attention has been called to recent correspondence which indicates that shippers of the United States would be gratified if this conference should find it practicable to adopt uniform forms of manifest and consular invoice. They believe that it would be an effective means of facilitating commerce between the American republics, and express the opinion that much embarrassment results to trade from lack of uniformity in these regards.

DIVERSITY OF CONSULAR FEES.

"In regard to consular fees there is much diversity among the American republics; indeed, in no two do they seem to be exactly the same. Taking, for example, an invoice covering goods to the value of $300, we find that the charge for certification varies from a minimum of $1.65 to a maximum of $25.

"Three systems are in use—first, a flat rate irrespective of invoice value; second, a graduated scale of rates with a fixed certification charge corresponding to a fixed invoice value, and with increments in the former corresponding to increments in the latter, and, third, where the certification fee is a percentage charge on consular invoice value. In some countries the second and third of these systems are combined. Certain of the republics require manifests and bills of lading as well as invoices to be certified by consuls. A few dispense with such certification in case of invoices. In one at least a stamp tax is exacted where the invoice value exceeds a certain fixed amount. Under such conditions liability to error in computation of amounts due and generally in the documentation required of shipments is very great.

SOME ARE REVENUE MEASURES.

"It is further to be noted that consular tariff schedules of some of the American republics are in their nature distinctly revenue measures, while in others they seem to be reasonably adjusted to the cost of maintaining the consular service, in a comparatively few the amount collected may fall below the cost of such maintenance.

"Under these conditions it may be questioned whether uniformity of consular tariffs can be brought about, but it is suggested that uniformity as to the system of consular fees which would simplify computation might be found practicable, and, further that the principle might be approved by this conference that rates should never be so excessive as to restrict commerce, and should not be, in character, revenue measures.

"The Custom House formalities respecting entries of imported merchandise present an example everywhere of complicated administration. Local conditions require, for the proper safeguarding of revenues, different precisions in different countries, and considerable autonomy must, it is thought, be conceded.

SEEKS AID OF EXPERTS.

"In preparing its report on these more technical points the first conference had the assistance of high grade specialists in the Treasury Department at Washington and in the New York Custom House. It is submitted to the committee that with the aid of the corresponding officials of this capital whose co-operation might be requested it could be determined what degree of uniformity is practicable in custom house formalities as to entry of imported merchandise, with particular reference to the forms of declaration or petition required by the several countries, and that, aided in this way, the committee can cover the entire subject of unification and simplification of customs and consular administration."

## WAITRESSES NOW FOR LONDON BARRISTERS

### Women Will Replace Men Attendants in Dining Rooms and Bars of Law Courts.

(Special Dispatch.)

LONDON, Saturday.

WHEN the new courts reassemble after the long vacation a startling innovation will confront the legal fraternity. From the "big wigs" in silk gowns to the lowliest office boy intrusted with his master's brief bag. Not only in the tea room, but in the bars, the dining room and the grill room at the Palace of Justice, off the Strand, waitresses will replace the waiters of the old days.

Old traditions, however, are to be allowed some consumption. The judges, as heretofore, will find their creature comforts ministered to by waiters.

## HINT TO THE STAGE MANAGER ABROAD

### American Theatre "Trust" Ways Will Not Be Accepted by the English, Says Mr. Farren.

(Special Dispatch.)

LONDON, Saturday.

MR. WILLIAM FARREN, of Wimbledon, is among the chief hammer wielders who have accepted the vacation period as the proper time of "teaching American theatrical managers a lesson."

"It is time that a needed warning is given," he has proclaimed. "The American 'trust' system, what are its guiding principles? In effect, restriction of trade at its very worst. The American theatre trust assumed to itself the power to beat down opposition by every unfair means. The American 'trust' system will, fortunately, never succeed in England. The type of man in management on our side is very different. Managers and actors have the good sense to realize that to-day, as in Garrick's time, 'the drama's laws the drama's patrons give.'

"The American 'trust' system might buy up our theatres, shoulder out our managers, corner our authors and dictate its terms to our actors, but it would find in the English public a master, not a servant, and it is well to give the American trust operators a timely and friendly hint."

So far as the theatrical phase of the general "lecturing" is concerned, Mr. Nat M. Wills, the American comedian, has been the target of some "opinions." He has been doing his "tramp monologue" at the Palace Theatre, creating much diversion by adjuring his English audiences to "take their time to see the joke."

"Mr. Nat Wills is the funniest thing that has been blown across the Atlantic for a very long time," declared The Tatler. "It is not exactly what he says, it is the irresistible way he says it, that is so amusing. His encouragement to his audience as to when to laugh and his patience in waiting until they have fully seen his joke are quaint in the extreme. The house simply rose at him. He is a comedian we shall all want to see again."

## *MARVELS IN OLD ENGLISH VILLAGES RIVAL WINSTED'S*

### *British Emulators of Connecticut People Not Backward in Supplying Cows Milked or Kidnapped by Snakes, Showers of Frogs and Apparitions.*

(Special Dispatch.)

LONDON, Saturday.

WINSTED, Litchfield county, Conn., seat of so many marvels, as recently cabled across the ocean, will do well to keep an eye on its laurels. British emulators are entering the field. The little Gloucestershire village of Oddington made the first bid by promulgating the report that the cows of the countryside were being milked by snakes. This report flourished so by travelling that yards of articles published in rural newspapers related how a farm laborer had had a desperate struggle with a boa constrictor which he caught in the act of kidnapping a valuable Alderney cow.

Investigators journeyed to the environs of the little village, and found a farm hand owning only to the name of "Jarge," who explained that a cow, Daisy, had for thirteen years given milk with the regularity of a penny-in-the-slot machine. Then, without warning, this milk supply failed.

"I watched that there cow," he related, "and once when I made her git up I see two snakes wrigglin' away through the grass. I struck out with a stick and killed 'em dead. They'd been a-suckin' of Daisy's milk for days."

"That's right," corroborated the owner of the bovine. "Daisy's had twelve calves, and I reckon if 'Jarge' hadn't been so hasty with them serpents she'd ha' reared 'em up and trained 'em to bellow and give milk, same as cattle. See?"

Meantime, spurred to action by all the attention showered upon Coddington, the village of Temple Bottom, near Cruwys-Morchard, in Devonshire, took a hand in the game. Mr. Jac' Ayre awoke his neighbors one night with the report that, having just travelled on foot over a long stretch of road from an adjacent village, he had found the ground covered with thousands of frogs that "cried like rabbits."

It was midnight when this adventurer made this discovery, and he opened the frogs had been showered down from the clouds. A few frogs were found in the roadway the ensuing morning, but it was suggested by sceptics that they might have been washed out of the fringing forests by the heavy rains, while the question of just how a rabbit "cries" has not yet been decided.

"My solution of this phenom's right," insisted Mr. Ayre, who remains the village candidate for Carnegie's medals. "I've had experiences with monsoons. In the stillness which precedes them monsoons in the tropics all sorts of creeping things come out of their hiding places and croak. Then they're often carried up into the air by whirlwinds. So, when the monsoons break, down they come again. You can figure out, you see, just how the shower came about near Cruwys-Morchard."

Then Uttoxeter, in Staffordshire, got into the limelight. A ghost was reported as doing queer things at Losley Hall Farm, near by. Strange noises were heard about the farmhouse nightly. Furniture was moved about, ornaments disappeared, rabbits were spirited all over the premises, all sorts of articles were thrown in through the doors, the investigating tenants were made targets for knives, forks, bottles and similar missiles, twenty-seven panes of glass were broken by flying objects, and neighbors who rallied to aid the besieged were forced to retire before the invisible artillery. It was held that a real high geared "haunt" was at work.

The ghost proposition is a pretty much worn out factor, however, and has been properly tabooed by those who have made Winsted famous. So the police took a hand and quickly discovered that the "spook" causing all this excitement was a girl of fourteen years who had been demonstrating just how lively she could be.

Now English competitors of Winsted are much downcast by discovering that France has headed them off so far as the pronunciation of a number of additional marvels are concerned.

## UP TO DATE WORK OF THE BURGLAR

### Attempt to Rob Jewellers in Birmingham Reveals Astonishing Scientific Machinery.

(Special Dispatch.)

LONDON, Saturday.

A STORY of up to date burglary, scientific in its way but not very successful, comes from Birmingham. The attempt was made on the establishment of a large firm of jewellers, and was lucky for them that the thieves' supply of oxy-hydrogen gas failed them; otherwise there might have been a very different tale to tell.

When a policeman on the beat found the place had been broken into, an investigation revealed an attempt at burglary of a character which was quite new to the English police at least.

Having located the strong room in the shop, the thieves cut a large hole in a brick and cement wall eighteen inches thick. How they removed the débris, which amounted to about two cart loads, is a mystery. Then they made their way to the door of the strong room, which is of heavy steel, and using gas cylinders got to work with an oxy-hydrogen blowpipe. By this means they burned out of the steel door a circular hole a couple of inches deep. Behind this two inches of steel, however, was a packing of asbestos and another inch of solid steel.

Apparently at this stage the supply of gas failed, and the thieves had to leave their work unfinished. Whether the men were disturbed or not is not known, but they left behind them their gas apparatus, a complete set of burglars' tools of up to date pattern and a portable electric plant, by which communication was made with an upper room, in which a man could be placed to give an alarm on the approach of danger.

### BOERS TO REVISIT FATHERLAND

(Special Dispatch.)

LONDON, Saturday.

Mr. Charles A. Douglas, of Washington, is at present in Edinburgh making arrangements for an organized tour of representative Scotsmen in the United States and Canada through Scotland during next summer.

## CHICKEN FAMINE STIRS ENGLAND

(Special Dispatch.)

LONDON, Saturday.

It is just as well that "Jack" Johnson is not in London just now. He might starve, because a chicken famine is one of the features of this remarkable summer.

"Never in the history of the poultry industry," says Feathered Life, "has the demand for table chicken been so great as at the present time and the supply so utterly inadequate to the demand.

"Everywhere one hears the cry, 'No chickens to be had!' The poultry salesman cannot supply the retailer; the retailer has to decline orders because he cannot supply restaurants and private customers with tender chicken.

"It is during the summer months, when [illegible] with repugnance from [illegible] and would be glad of the meal to be made off the [illegible]'s plump, toothsome fowl; but [illegible] be had, because the farmer [illegible] are blind to their own [illegible]."

For a pound bird, which costs only about [illegible] to rear, farmers can easily get [illegible] five cents, and yet chicken rearing [illegible] becoming a decaying industry.

# MANY PEERESSES FOLLOW ROYALTY IN THEIR LOVE OF SHOOTING

## ROYAL SHOTS ARE AMONG THE BEST

King George Holds One of the Smartest Guns in England at Driven Partridges.

HIS KILLS ARE RECORDS

While Royalty Is Away Shooting on the Moors the Palace Is Being Remodelled.

(Special Dispatch.)
LONDON, Saturday.

Though King George during his holiday at Balmoral is very busy nearly every day shooting grouse, which are unusually numerous on the royal moors, as elsewhere, this year, His Majesty is not doing any entertaining, except in a very quiet way, owing to the mourning for his father. For a near neighbor he has Rear Admiral David Beatty and his American wife, who is a daughter of the late Mr. Marshall Field, of Chicago, herself considered a fine sportswoman. They have a lease of Inverranald and the surrounding grouse moor, and, outside some of the occupants of the royal residences at Balmoral, they were the first guests the King and Queen Mary had to dinner at the castle.

None among his subjects enjoys sport with the gun more than does King George. Speaking at the Keepers' Benevolent Society in 1904 the Duke of Abercorn remarked that the then Prince of Wales was one of the smartest shots in England at driven partridges, that he "always got his first and second barrel in, and very often the third and fourth."

KING ONE OF THE EIGHT BEST SHOTS.

That this estimate of His Majesty's ability as a shot is one generally held by sportsmen was proved on the occasion of a plebiscite carried out by a sporting monthly magazine some years ago, when King George was classed as one of the finest eight shots in the Kingdom, the eight crack shots including the Earl de Grey, now Marquis of Ripon; Lord Walsingham, Mr. R. Rimington Wilson and Mr. Headley Noble.

It can be imagined, therefore, that, given the birds, the bag when His Majesty is one of the party is anything but meagre and that his share of the same is a pretty big one indeed, the phrase "the Prince of Wales secures the biggest bag" used to be quite a stereotyped expression in reports from the moors.

Last year King George was one of the party at the opening of the shooting season at Bolton Abbey, the Duke of Devonshire's favorite Yorkshire seat, when the bag amounted to 339 brace. The magnitude of the bag coincided in a remarkable manner when King George visited the Upper Wharfdale Moors in 1908, when seven guns in two days killed 694½ brace.

At Didlington Hall, Norfolk, when the guest of Lord and Lady Amherst, in 1902, out of a bag of 784 head of game King George accounted for 147, but the most remarkable day's shooting that His Majesty has yet enjoyed within the confines of his realms took place two years later, when he and Queen Mary were the guests of Lord and Lady Lathom in Lancashire. The shooting party on this occasion, in addition to the Prince of Wales, included such notable shots as the Earl of Lathom, Lord Sefton, Lord Dartrey, Lord Crichton, Colonel Bromley-Davenport, Major Wynne-Finch and the present Duke of Devonshire, and that business was meant from the first can be gathered from the fact that the talented eight got under way for the "Big Wood" at nine o'clock.

THE LIST OF KILLS, 2,199.

By luncheon time the bag, thanks in a great measure to the keenness of the royal shot, who worked three guns and headed the list of kills, with Lord Sefton second and Colonel Bromley-Davenport third, numbered 1,500 head, and at four o'clock, when the proceedings terminated, the same totalled 2,199.

While the King is away shooting grouse around Balmoral workmen have been busy on his London home, now that the Queen Mother has vacated Buckingham Palace, and one of the meanest looking places in all London just now undoubtedly is the fore court of the palace. In the case of an ordinary house it would be called the back yard, the real front of the palace being around on the garden side, hidden from public view by the high walls that surround it.

Before taking the rooms in hand, workmen are now busy on the water supply, which has always been a source of trouble, and a more untidy, dirtier, drearier looking place it would be hard to find. The court is filled with men in clayey corduroys, digging into the water pipes, piling all around them mounds of earth and clay.

Sometimes you will see a sort of housekeeper in rusty black come down the steps and watch the workmen with an expression of discreet disapproval. The policemen joke and chatter as they never do when they know that the next carriage may carry a king. There is a fine suggestion of holiday, too, in the way the sentried bring their heels down on the pavement. No doubt they feel it hard that such fine fellows as they should be asked to guard a gang of navvies.

King George, during his stay at Balmoral, is dispensing, so it is reported, with some of the old fashioned methods which have outgrown their usefulness. Instead of the old plan of sending frequent messengers over the long and costly journey between London and Balmoral His Majesty is content to rely on the Post Office for the prompt and regular transmission of the frequent communications between the metropolis and the Court in Scotland. Twice in every day the Post Office collects all letters and parcels and forwards them by the ordinary channels, time saving being as well as the fact of frequent relays of special messengers.

## *Duchesses, Countesses and English Women of Lesser Title Hold Rank Among Some of Britain's Fine Shots*

FROM NAVY AND ARMY
DUCHESS OF BEDFORD.
COUNTESS OF CHESTERFIELD FROM NAVY AND ARMY.
QUEEN MAUD OF NORWAY
FROM THE SKETCH
LADY JULIET DUFF.
LADY BEATRICE POLE-CAREW FROM THE EYSTANDER.
DUCHESS OF NEWCASTLE FROM THE GRAPHIC
FROM THE SKETCH
MISS ELLALINE TERRISS.

Duchess of Bedford and the Duchess of Newcastle Are Thorough Sportswomen.

KING GEORGE'S SISTER SKILLED WITH A GUN

(Special Dispatch.)
LONDON, Saturday.

WHEN Mrs. Chapman, of Staines, shooting at Bisley among two hundred competitors in the London and Middlesex Counties Rifle Association competition, headed the list with the fine score of 103 out of a possible 105, just missing the bull's-eye by a mere shave only twice out of twenty-one shots, it was considered a remarkable performance for a woman. Women are not, as a rule, often seen at the rifle ranges in England, but there are many well known skilled gunners in the ranks of society now to be found out on the moors, and to some extent also engaged in the more arduous task of deer stalking.

Some of these women are possessors of no mean skill, who would scorn to pick out easy shots and let the difficult ones go by. Undoubtedly the best lady gunner in the United Kingdom is the Duchess of Bedford, who would put many good shots among the men to shame. She considers shooting an excellent pastime for women, but says they "should remember they are not butchers, but sportswomen."

She has her own ideas on costume, too, considering that a neat tailor made dress of some inconspicuous tweed that harmonizes well with the ground is best, the skirt being cut not longer than eight inches below the knee, with a strap round the waist to carry a coat.

HER WORK ON THE MOORS.

The Duchess of Bedford has accounted for as many as 3,427 head of game in the season, and has brought down fifty-seven birds with fifty-eight cartridges, while on another occasion she shot twenty-three pheasants and a hare with twenty-five cartridges. Her day's bag has amounted to one hundred brace of pheasants, and another time she shot one hundred and fifteen partridges in a single day's driving. A winter's day on some mere shooting wild duck affords her as much pleasure as a day on the moors or a morning's work among the pheasants.

The Duchess of Newcastle is another thorough sportswoman to whom a day's shooting does not come amiss, and she is one, moreover, who has the benefit of a handsome physique that qualifies her for tasks of endurance and emulation in the open air.

Violet Lady Beaumont is another lady who is an accomplished shot. She scorns to select all the easy shots so that her day's bag may be a big one. Lady Juliet Duff, the stepdaughter of the Marquis of Ripon, can handle a gun with distinction, which is not surprising, as she was taught by the Marquis, who knows as much about game shooting as most men.

Wedding presents are usually supposed to give some indication of the tastes of the receiver, so that as the Earl of Chesterfield presented his bride with a gun on their marriage it is easy to understand that she was in the habit of going out on the Yorkshire moors during the grouse season. Lady Pentland also numbered a couple of guns among her wedding presents, and is another lady who can shoot well.

QUEEN IN THE LIST.

The Queen of Norway also takes after her brother, King George V., in that she can handle a gun with no little skill, an accomplishment possessed only by a few royal ladies.

Other ladies less exalted who welcome the shooting season are Lady Wolverton, Lady Pole-Carew, Lady Elena Wickham, and Lady Mary Barrington. Mrs. Asquith used to enjoy an occasional shoot, though she has given up the sport for some time back, and Miss Ellaline Terriss, the well known actress, is another first rate lady shot.

Deerstalking does not appear to appeal so much to women as grouse or pheasant shooting, but the Marchioness of Breadalbane is devoted to the sport, many a fine stag falling to her rifle in the Blackmount Forest. The Marchioness of Graham is also a deerstalker, while Lady Douro used to accompany her father, Mr. George Glen-Coats, into the deer forests before her marriage. Lady Loch also finds the sport to her liking, while a few years ago Lady Edina Brassey could claim that the best and wildest head bagged during the season in the Benmore Forest had fallen to her rifle.

## IS THE AMERICAN TOURIST MEAN?

English Discovery About the Travellers Who Annually Spend $25,000,000 in London.

(Special Dispatch.)
LONDON, Saturday.

WITH the present great homeward rush of American visitors proving that more tourists crossed the Atlantic this season than ever before, and with the British metropolis again having exacted its share of American financial tribute, which no less an authority than Mr. J. Pierpont Morgan has estimated at $25,000,000 every summer, London, while dozing through its own vacation period, has found it convenient to talk much in its sleep about the bearers of this welcome golden largess. As a result we seem to be "in bad" in many ways.

In the first place, the Daily Despatch has found it necessary to make some remarks about this season's American representatives in general. It proceeds to opine as follows:—

"If you could see the gathering of taxis, char-a-bancs and wagonettes outside St. Paul's Cathedral at midday and toward the end of the next twelve hours the crowded condition of the Strand, you would realise that London is not really 'empty.' It is, in fact, thronged with American tourists, not those rich and vulgar sybarites of whose eccentricities we read almost daily, but the humdrum, ordinary, every day sort of Americans, a pale faced people, who dress with a curious primness and carry themselves with a scrupulous uprightness. They look tired.

FATIGUE CANNOT STOP THEM.

"To them religiously 'doing' the British Museum on some sweltering summer afternoon arouses feelings halting between scorn and pity in the stay at home Londoner. It is all so manifestly uninteresting to them, and they look so hot, tired and bored. But they have travelled three thousand miles to see the Tower, the British Museum and a score of other tiresome, dull show places, and mere fatigue will not serve to deter them.

"The meanness of the American tripper is almost a proverb," continues the Dispatch in voicing a new discovery. "Shopkeepers, hotel proprietors, tourist agents and boarding house landladies will tell you that for customers insistent on getting twenty shillings' worth of value for their sovereign the Americans whom they have met 'beat the band.'"

Even the visit of Duke Franz Josef, of Bavaria, to the United States has been a cause of attracting further criticism.

"It has been somewhat appalling to English correspondents versed in European social tactics," says the Birmingham Pat, "to behold an American society reporter, without even the formality of pinching his hat, approach the Bavarian traitor without wincing and grasp him by the hand, with some such hearty salutation as 'Well, Duke, we're all glad to see you. What do you think of our town?' and Duke Franz Josef, with rare good instinct, has not rebuffed his democratic friends, but chatted with them, to quote one American journal, 'as man to man.'"

Then, too, critical arrows are being shied at our automobilists. The Illustrated Sporting and Dramatic News has played this hand in the game, asserting:—

THE AUTOMOBILIST ATTACKED.

"There has been growing up lately an objectionable practice of using the area presented by the radiator of motor cars for the purpose of advertising the make of the vehicle in question. Owing to there being no import duty on motor cars in this country, one noticed for the first time this season that a very great number of American visitors have brought their cars over with them. The immediate point that concerns us about these American machines is that most of them bear in very large lettering, chiefly in brass across the radiator, the name of the make of car. It is quite an eyesore, and why any private owner condescends to allow his vehicle to be used for a running advertisement for the manufacturer would be a marvel to most Europeans.

"This means, of course, that you can recognize any car as it goes along the streets and can tell practically to a dollar what the owner paid for it. In America a vast deal of the motor trade is done wholly by playing on the vanity of the owner by providing him with the means of publicly demonstrating to his fellow creatures the amount of money he has spent on his car."

## SEEK UNIFORMITY IN CONSULAR FEES

Colonel Crowder Proposed Plan to Pan-American Conference at Buenos Ayres.

WANTS AID OF EXPERTS

Advised That Rates Should Never Be Excessive or, in Character, Revenue Measures.

(SPECIAL CORRESPONDENCE.)

BUENOS AYRES, August 10, 1910.—Upon Colonel E. H. Crowder, U. S. A., has fallen much of the work of the eighth topic of the programme of the Fourth Pan-American Conference, which requires consideration of measures which might lead to uniformity among the American republics in consular documents, customs regulations and census and commercial statistics. A memorandum was submitted to the committee studying this subject by Colonel Crowder. The committee, which comprised one member from each of the twenty republics represented, voted to form a sub-committee composed of Colonel Crowder, Señor José A. Terry, of Argentina, and Señor Miguel Cruchaga Tocornal, of Chili, to wrestle with the problem.

In the memorandum Colonel Crowder says:—

"My attention has been called to recent correspondence which indicates that shippers of the United States would be gratified if this conference should find it practicable to adopt uniform forms of manifest and consular invoice. They believe that it would be an effective means of facilitating commerce between the American republics, and express the opinion that much embarrassment results to trade from lack of uniformity in these regards.

DIVERSITY OF CONSULAR FEES.

"In regard to consular fees there is much diversity among the American republics; indeed, in no two do they seem to be exactly the same. Taking, for example, an invoice covering goods to the value of $300, we find that the charge for certification varies from a minimum of $1.65 to a maximum of $18.

"Three systems are in use—first, a flat rate irrespective of invoice value; second, a graduated scale of rates with a fixed certification charge corresponding to a fixed invoice value, and with increments in the former corresponding to increments in the latter, and, third, where the certification fee is a percentage charge on consular invoice value. In some countries the second and third of these systems are combined. Certain of the republics require manifests and bills of lading as well as invoices to be certified by consuls. A few dispense with such certification in case of invoices. In one at least a stamp tax is exacted where the invoice value exceeds a certain fixed amount. Under such conditions liability to error in computation of amounts due and generally in the documentation required of shipments is very great.

SOME ARE REVENUE MEASURES.

"It is further to be noted that consular tariff schedules of some of the American republics are in their nature distinctly revenue measures, while in others they seem to be reasonably adjusted to the cost of maintaining the consular service, in a comparatively few the amount collected may fall below the cost of such maintenance.

"Under these conditions it may be questioned whether uniformity of consular tariffs can be brought about, but it is suggested that uniformity as to the system of consular fees which would simplify computation might be found practicable, and, further that the principle might be approved by this conference that rates should never be so excessive as to restrict commerce, and should not be, in character, revenue measures.

"The Custom House formalities respecting entries of imported merchandise present an example everywhere of complicated administration. Local conditions require, for the proper safeguarding of revenues, different provisions in different countries, and considerable autonomy must, it is thought, be conceded.

SEEKS AID OF EXPERTS.

"In preparing its report on these more technical points the first conference had the assistance of high grade specialists in the Treasury Department at Washington and in the New York Custom House. It is submitted to the committee that with the aid of the corresponding officials of this capital whose co-operation might be requested it could be determined what degree of uniformity is practicable in custom house formalities as to entry of imported merchandise, with particular reference to the forms of declaration or petition required by the several countries, and that, aided in this way, the committee can cover the entire subject of unification and simplification of customs and consular administration."

## HINT TO THE STAGE MANAGER ABROAD

American Theatre "Trust" Ways Will Not Be Accepted by the English, Says Mr. Farren.

(Special Dispatch.)
LONDON, Saturday.

MR. WILLIAM FARREN, of Wimbledon, is among the chief hammer wielders who have accepted the vacation period as the proper time of "teaching American theatrical managers a lesson."

"It is time that a needed warning is given," he has proclaimed. "The American 'trust' system, what are its guiding principles? In effect, restriction of trade at its very worst. The American theatre trust assumed to itself the power to beat down opposition by every unfair means. The American 'trust' system will, fortunately, never succeed in England. The type of man in management on our side is very different. Managers and actors have the good sense to realize that to-day, as in Garrick's time, 'the drama's laws the drama's patrons give.'

"The American 'trust' system might buy up our theatres, shoulder out our managers, corner our authors and dictate its terms to our actors, but it would find in the English public a master, not a servant, and it is well to give the American trust operators a timely and friendly hint."

So far as the theatrical phase of the general "lecturing" is concerned, Mr. Nat M. Wills, the American comedian, has been the target of some "opinions." He has been doing his "tramp monologue" at the Palace Theatre, creating much diversion by adjuring his English audiences to "take their time to see the joke."

"Mr. Nat Wills is the funniest thing that has been blown across the Atlantic for a very long time," declared The Tatler. "It is not exactly what he says, it is the irresistible way he says it, that is so amusing. His encouragement to the audience as to when to laugh and his patience in waiting until they have fully seen his joke are quaint in the extreme. The house simply rose at him. He is a comedian we shall all want to see again."

## *MARVELS IN OLD ENGLISH VILLAGES RIVAL WINSTED'S*

*British Emulators of Connecticut People Not Backward in Supplying Cows Milked or Kidnapped by Snakes, Showers of Frogs and Apparitions.*

(Special Dispatch.)
LONDON, Saturday.

WINSTED, Litchfield county, Conn., seat of so many marvels, as recently cabled across the ocean, will do well to keep an eye on its laurels. British emulators are entering the field. The little Gloucestershire village of Oddington made the first bid by promulgating the report that the cows of the countryside were being milked by snakes. This report flourished so by travelling that yards of articles published in rural newspapers related how a farm laborer had had a desperate struggle with a boa constrictor which he caught in the act of kidnapping a valuable Alderney cow.

Investigators journeyed to the environs of the little village, and found a farm hand owning only to the name of "Jargo," who explained that a cow, Daisy, had for thirteen years given milk with the regularity of a penny-in-the-slot machine. Then, without warning, this milk supply failed.

"I watched that there cow," he related, "and once when I made her git up I see two snakes wriggin' away through the grass. I struck out with a stick and killed 'em dead. They'd been a-takin' of Daisy's milk for days."

"That's right," corroborated the owner of the bovine. "Daisy's had twelve calves, and I reckon if 'Jargo' hadn't been so hasty with them serpents she'd ha' reared 'em up and trained 'em to bellow and give milk, same as cattle. See?"

Meantime, spurred to action by all the attention showered upon Coddington, the village of Temple Bottom, near Cruwys-Morchard, in Devonshire, took a hand in the game. Mr. Jack Ayre awoke his neighbors one night with the report that, having just travelled on foot over a long stretch of road from an adjacent village, he had found the ground covered with thousands of frogs that "cried like rabbits."

It was midnight when this adventurer made this discovery, and he opined that the frogs had been showered down from the clouds. A few frogs were found in the roadway the ensuing morning, but it was suggested by sceptics that they might have been washed out of the fringing forests by the heavy rains, while the question of just how a rabbit "cries" has not yet been decided.

"My solution of this phenom's right," insisted Mr. Ayre, who remains the village candidate for Carnegie's medals. "I've had experiences with monsoons. In the stillness which precedes them monsoons in the tropics all sorts of creeping things come out of their hiding places and croak. Then they're often carried up into the air by whirlwinds. So, when the monsoons break, down they come again. You can figure out, you see, just how the shower came about near Cruwys-Morchard."

Then Uttoxeter, in Staffordshire, got into the limelight. A ghost was reported as doing queer things at Losley Hall Farm, near by. Strange noises were heard about the farmhouse nightly. Furniture was moved about, ornaments disappeared, tables were spirited all over the premises, all sorts of articles were thrown in through the doors, the investigating tenants were made targets for knives, forks, bottles and similar missiles, twenty-seven panes of glass were broken by flying objects, and neighbors who rallied to aid the besieged were forced to retire before the invisible artillery. It was held that a real high geared "haunt" was at work.

The ghost proposition is a pretty much worn out factor, however, and has been properly tabooed by those who have made Winsted famous. So the police took a hand and quickly discovered that the "spook" causing all the excitement was a girl of fourteen years who had been demonstrating just how lively she could be.

Now English competitors of Winsted are much downcast by discovering that France has headed them off so far as the promulgation of a number of additional marvels are concerned.

## UP TO DATE WORK OF THE BURGLAR

Attempt to Rob Jewellers in Birmingham Reveals Astonishing Scientific Machinery.

(Special Dispatch.)
LONDON, Saturday.

A STORY of up to date burglary, scientific in its way but not very successful, comes from Birmingham. The attempt was made on the establishment of a large firm of jewellers, and was lucky for them that the thieves' supply of oxy-hydrogen gas failed them; otherwise there might have been a very different tale to tell.

When a policeman on the beat found the place had been broken into, an investigation revealed an attempt at burglary of a character which was quite new to the English police at least.

Having located the strong room in the shop, the thieves cut a large hole in a brick and cement wall eighteen inches thick. How they removed the debris, which amounted to about two cart loads, is a mystery. Then they made their way to the door of the strong room, which is of heavy steel, and using gas cylinders got to work with an oxy-hydrogen blowpipe. By this means they burned out of the steel door a circular hole a couple of inches deep. Behind this two inches of steel, however, was a packing of asbestos and another inch of solid steel.

Apparently at this stage the supply of gas failed, and the thieves had to leave their work unfinished. Whether the men were disturbed or not is not known, but they left behind them their gas apparatus, a complete set of burglars' tools of up to date pattern and a portable electric plant, by which communication was made with an upper room, in which a man could be placed to give an alarm on the approach of danger.

SCOTS TO REVISIT FATHERLAND

(Special Dispatch.)
LONDON, Saturday.

Mr. Charles A. Douglas, of Washington, is at present in Edinburgh making arrangements for an organised tour of representative Scotsmen in the United States and Canada through Scotland during next summer.

## CHICKEN FAMINE STIRS ENGLAND

(Special Dispatch.)
LONDON, Saturday.

It is just as well that "Jack" Johnson is not in London just now. He might starve, because a chicken famine is one of the features of this remarkable summer.

"Nowhere in the history of the poultry industry," says Feathered Life, "has the demand for table chickens been so great as at the present time and the supply so utterly inadequate to the demand.

"Everywhere one hears the cry, 'No chickens to be had!' The poultry salesman cannot supply the retailer; the retailer has to decline business because he cannot supply the hotels, restaurants and private customers with the tender chicken.

"It is now, during the summer months, that people turn with repugnance from beef and mutton and would be glad of the more appetising meal to be made off the breast or wing of a plump, toothsome fowl, but this cannot be had, because the farmer and poultry rearer are blind to their own interests."

For a three pound bird, which costs only about 2s cents to rear, farmers can easily get seventy-five cents, and yet chicken rearing looks like becoming a decaying industry.

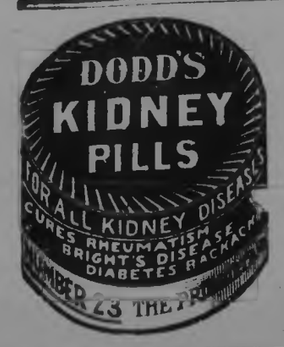
## WAITRESSES NOW FOR LONDON BARRISTERS

Women Will Replace Men Attendants in Dining Rooms and Bars of Law Courts.

(Special Dispatch.)
LONDON, Saturday.

WHEN the law courts reassemble after the long vacation a startling innovation will confront the legal fraternity, from the "big wigs" in silk gowns to the lowliest office boy intrusted with his master's brief bag. Not only in the tea room, but in the bars, the dining room and the grill room at the Palace of Justice, off the Strand, waitresses will replace the waiters of the old days.

Old traditions, however, are to be allowed one concession. The judges, as heretofore, will find their creature comforts ministered to by waiters.



MUSIC.

# THE FAMILY HEARTH

## THE HOME CIRCLE COLUMN
### SELF TAXATION

People in general seem to enjoy growling about the taxes. This subject makes a theme for conversation in the family. It inspires the loungers in the corner grocery, and it puts fire into many a political campaign. Why, our forefathers actually plunged into rebellion, fought seven years, and finally won our national independence from Great Britain, on a question of taxes. If you want to see a "hot" town meeting in a back-country township, just propose an extra tax for some new road and a bridge.

And yet there is one sort of tax that is not grumbled at. That is to say, the taxpayers themselves rarely denounce it or dispute it. They keep on paying it serenely all their lives unless they happen to tumble into the poor house. Their friends and relatives often scold about it, but they, while they feel its pressure, go right on paying out. Even the poor men keep these payments up when all others are cut off

We refer to the tax which men pay to passion and appetite. The sums thus expended every year—say for tobacco and liquors only—are stupendous. This sort of tax paying begins early in life, when the youngster gets into the habit of treating himself to root beer, ale, porter, whiskey, a cigarette, or a cigar. After a bit he finds himself to pay taxes to it all his life. He grows about his road tax when he grows up, his school tax, and his church tax, but his self-indulgence tax he passes out without a murmur even though it may have made him a poor man. Sometimes he is conscious of it, but he has become a slave to his habits and cannot free himself. The socialists do a great deal of growling about the burdens put by capital upon the poor. The worst burden poverty has to bear is the tax which it voluntarily pays to appetite and passion.

## HEADS OF HOUSEHOLDS

It is the mothers who are the heads of the households. The culinary department of your household is in your dominion. You decide all questions of diet. All the sanitary regulations of your house are under your supervision. To regulate the food, and the apparel, and the habits and decide the thousand questions of home life is a tax upon your brain and nerve and general health absolutely appalling if there be no divine alleviation.

It does not help you much to be told that Elizabeth Fry did wonderful things amid the criminals of Newgate. It does not help you much to be told that Mrs. Judson was very brave among the Burmesan cannibals. It does not help you much to be told that Florence Nightingale was very kind to the wounded in Crimea. It would be better for us to tell you that the divine friend of Mary and Martha is your friend, and that He sees all the annoyances and disappointments and abrasions and exasperations of an ordinary housekeeper from morn till night and from the first day of the year to the last day of the year and at your call He is ready with help and re-inforcement.

## BOYS DON'T

Don't cultivate a taste for liquor or tobacco. They do you no good. They are expensive, and until your tastes and stomach are perverted they rebel against them.

Don't go out of the hall between acts: It looks bad If you wish to let people know that you are there, you have the manager announce it. It's better taste.

Don't forget that you are to run this great country some day—fill all the public offices, make all the laws, decide all judicial questions, manage all the business enterprises, and in a word, own and control this great world.

Don't let your temper take the bits between its teeth, my boy, and imperil what little remains of self-control. Bear constantly in mind the Biblical injunction, that he who ruleth his own temper is greater than he who taketh a city or words to that effect.

Don't spend your entire income in fine clothes. Good manners, good sense and good habits will bind your friends closer to you, make you think more of yourself, be respected more by others, and better received into society than any amount of new clothes will that you can buy.

Don't consider it manly to be around with bowie knife and revolver; to carry a pipe and to swear. Keep well in mind that this is not what constitutes a man. No, boys, this will never gain for you the place that a true man may occupy. Not even the wearing of a big monstache makes the man. Uprightness in dealings and honorable convictions are what we admire in a man, and what constitutes manliness.

## IN THE MILLENNIUM.

(From the Chicago Record-Herald.)

When earth's last picture is painted and the tubes are twisted and dried,
When Christy and Harrison Fisher have put all their brushes aside,
When Wenzel is drawing no giants arrayed in the garb of the day,
They'll print all the magazine covers in drab and soberest gray.
The front of the Ladies' Home Journal will show pretty letters, at most.
And never a beautiful maiden will smile from the Saturday Post;
There will not be a magazine cover containing a glorious face,
And the news-stand will cease to attract us, we will even turn our backs on the place.
Then no man will hand out a quarter or fifteen cents, nay, nor a dime,
Because on the cover is printed an impossible face—but sublime.
And the matron, the maid and the bald-head, and the man with the tilted cigar
May read all the jokes and each poem and be thankful for things as they are.

### Simply Furnished Room.

A living room that gives a caller the feeling that he has strayed into a museum by mistake or reminds him of that vainglorious belle of the ball, who wore jewels of seventeen different descriptions, including every last gem in her possession, ought to have a general overhauling. At least good taste would urge it, the maid would approve it, and your own little duties might be reduced by one-half.

The living room should be as free of bric-a-brac and superfluities of furniture as possible. When the furniture is chosen with a view to ease, comfort and coziness rather than chilling splendour and exhibitions of art, some of the brittle and fragile stuff will have to be eliminated, for one doesn't care to move about in constant fear of brushing against something that will crash. A divan or davenport, deep and comfortably made, where you can sit with your embroidery or work basket; a reading chair with book rest attachment; a wide, homelike fireplace; two or three easy chairs, according to the number in your family; a table with a reading lamp; some musical instruments and a bookcase—that is, if you cannot arrange for a separate library—will amply provide the essentials of a living room.

Pictures, of course, add colour and warmth to any room, and too few of them would be worse than an overabundance. They should be of pleasant subjects, however. Portraits of deceased relatives and members of the family are better suited to the more serious atmosphere of a library than the joyous one of the living-room. Framed diplomas and samples of home drawings would be more appropriate for a den or private chamber than the semi-public living-room. Therefore, one's choice of pictures for the latter would almost be limited to water colours and oil paintings, prints and new photographs, and these need not be so numerous to give picture gallery effects.

The more simply and sensibly the living room is furnished the more time you can save in keeping it in order. As a rule it needs more brushing and dusting than any other in the house, and the patience and energy required to keep bright and shining every little vase and gewgaw and every bit of furniture that might be dispensed with is often considerable.

### Smart Toilets in Paris.

A design for the "jeune fille" is of mole-coloured cashmere-de-soie, trimmed with self-coloured silk embroidery, with a waistcoat of fancy metallic cloth, taking on lovely shades of Empire greens, combined with silver, and edges, with a fine cream guipure. The waist has a wide belt of Empire green satin, which also forms the simple trimming for the biscuit hat of tagel wreathed with dull-shaded roses.

A smart toilette is of white Shantung, embroidered in white soutache and cord. Into the cord is introduced a touch of black, and black velvet ribbon is prettily threaded through the cord, marking the high waistline. A white chip hat has entire crown and part of brim made of black velvet, adorned with big white and mauve velvet clematis. These velvet flowers have been, and still are, a feature of headgear.

In a very graceful black charmeuse and lace Casino costume the tunic of black Spanish lace, is held in place by a deep band of the charmeuse, and the sleeves and black drapery are of the same beautiful fabric. A very new turban toque is simply trimmed with loops of black velvet, and with an upstanding aigrette.

### Whitening the Skin.

It's drawing close to the time when the vacation girls will be flitting home from Muskoka or other lakesides to discover that their erstwhile creamy skins are dotted and marred with freckles, or bronzed with a coat of tan. One of the remedies that every one of our grandmothers kept on her beauty shelf was buttermilk. Sopped on the skin at night and morning and allowed to dry there, it is almost an infallible remover of freckles. Another old-fashioned remedy for whitening the skin is a tablespoonful of grated horse-radish in a cupful of sour milk. This must stand for six hours, and then be applied several times a day.

The secret of restoring tired and faded beauty is sleep, rest and a milk diet.

Dr. Charles Stuart Moody says: "A pimple can, if permitted to seal itself up in its own blood, will generally heal without any further interference."

### Fashion's Jottings.

Sashes will be very popular this autumn, and with the promised revival of old-fashioned 1850 styles we shall see the sash at the top of favour again. The new sash, however, must hang quite straight and simply against the skirt with no fluttering loops or ends; in fact, the smartest sashes are heavily weighted at the bottom to keep them down.

The rich Persian and Dresden ribbons are used as dress trimmings, and are used on wool and mohair frocks, in the same manner that embroidery insertion is used on lingerie costumes.

Short dressing jackets show ribbons at the throat, back, in front in long loops and ends at the waist line, which is usually rather short.

There are some beautiful parasols with eyelet embroidery to match suits of linen, and others are trimmed with embroidery "set in," matching the lingerie gown prepared. This is the season for bargains for next summer, as fashions in parasols change little.

Hay's Hair Health

Never Fails to Restore Gray Hair to its Natural Color and Beauty.

No matter how long it has been gray or faded. Promotes a luxuriant growth of healthy hair. Stops its falling out, and positively removes dandruff. Keeps hair soft and glossy.

Will not soil skin or linen. Will not injure your hair. Is not a dye.

# AUTOMOBILE KILLS TWO

## Steering Gear Broke and Machine Skidded Against Wall With Tragic Results

## ROAD WAS SLIPPERY

Examiner Special.

MIDDLETOWN, Conn, Sept. 8.—William H. Andrews, sixty-one years old, a retired member of the Manhattan Bar, living at Portland, Conn., and Mrs. Nicoline Neilson, forty-eight years old, his sister-in-law, were killed when the steering-gear of their automobile broke and the machine dashed down a steep embankment in the Durham Road three miles from this city at about half-past six o'clock to-night.

The accident happened near the Wilcox Reservoir, both occupants of the car being crushed when it came down upon them. Mrs. Neilson lived less than a minute after being picked up, while Mr. Andrews died three minutes later.

Dr. Harold A. Meeks, a physician of Meriden, Conn., saw the accident. He was in his automobile behind the motor of Mr. Andrews. He saw the car ahead veer to one side and crash into a stone wall guarding an embankment. The wall gave way and the car toppled down. Dr. Meeks on running down the bank found both Mr. Andrews and Mrs. Neilson pinned beneath the machine.

Unable to release them he ran to the home of Richard Davis, near by, and obtained assistance. The machine was lifted and the man and woman examined. Mrs. Neilson gasped once or twice and expired. Her head had been crushed. Mr. Andrews still was breathing, but did not live long.

Investigation shewed that when Mr. Andrews discovered that the steering gear of the car had been broken he had shut off the power, but was unable to keep the machine in the roadway because the roadway was slippery on account of mud. The machine was a single seated electric runabout and had been received by Mr. Andrews from a dealer in Hartford only a few days ago.

IT IS A PARASITE.

That Causes Itching Scalp, Dandruff, and Finally, Falling Hair.

The itching scalp, the falling hair and the dandruff that annoys are the work of a parasite hidden in the scalp. That parasite must be killed to cure dandruff; and the only preparation that will do that is Newbro's Herpicide. "Destroy the cause, you remove the effect."

C.H. Reed, of Victor, Idaho, says: "Myself and wife had dandruff and falling hair several years. Two bottles of Newbro's Herpicide completely cured us, after several other preparations had failed to do good." Makes hair grow glossy and soft as silk. Hundreds of other testimonials just as strong.

Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

For sale by McDermid and Jury, druggists; also Payne's drug store. $1 bottles guaranteed.

# BEATS WIFE SUICIDES

## Domestic Troubles Culminate in Self-Destruction of Man Just Released From Penitentiary

Examiner Special.

CORRY, Sept. 8.—The village of Youngsville, a short distance east of here, on the Pennsylvania Railroad, was the scene of an attempted murder and suicide yesterday.

Lynn D. Hodges, who had just been released from the Western Penitentiary at Allegheny, where he served two years for shooting his father-in-law, went to his wife's and engaged her in conversation. The subject was a demand for her to live with him again. She refused and Hodges, it is said, struck her again and again with a stick. It is believed he thought he had killed her, for he at once left the house and swallowed an ounce of carbolic acid, being dead when an officer reached him.

Hodges had had much trouble with his wife's family, it is said, which finally culminated in the shooting affray, which resulted in his incarceration in the prison.

Mrs. Hodges is doing well and will recover.

THE PIANO FOR THE HOME.

New Scale Williams Piano is especially suited to the home.

How long a piano will last, should not be the only question to be decided, but it should be carefully considered.

PETERBOROUGH SATURDAY SEPTEMBER 10 1910

# THE REVENUE OF CANADA MAY BE AT LEAST ONE HUNDRED AND TWENTY MILLIONS FOR THIS YEAR

**Total For August Over Ten Millions—Expenditure Is Not Increasing Nearly So Fast as the Revenue, Says Despatch From Ottawa.**

## VASTER SURPLUS THAN HAS BEEN

OTTAWA, SEPT. 9. The statement of Dominion revenue and expenditure for August and for the first five months of the current fiscal year shows that the promise of "a vaster surplus than has been" is being steadily borne out. The total revenue for August was $10,174,930, and for the five months $45,830,370, increases respectively, of $1,706,082 and $7,330,210. If the same rate of increase is maintained for the balance of the year this year's revenue will reach $120,000,000, or nearly eighteen millions more than last year. Expenditure, on the other hand, shows comparatively little increase. For the five months the expenditure on consolidated fund account was $27,540,017, or $1,492,858 more than for the same period of last year, and $18,284,353 less than the revenue.

Expenditures on capital account for the five months totalled $9,101,450, an increase of $84,798, as compared with the corresponding period of last year.

The net debt of the Dominion at the end of the month was $327,345,552, a decrease during the month of $1,270,135.

Here is a picture of the "Little Wonder," which the Canadian Miniature Railway Company is sending here for the Peterborough Exhibition next week, and it promises to be one of the most popular amusement devices along the midway. The "Little Wonder" runs on a quarter mile track, and consists of a complete train, with accommodation for a large number of passengers. At Ottawa last year, 39,000 people were carried during the week of the fair, and the company's miniature railways have carried over 300,000 since they have been in operation. The "Little Wonder" provides safe and enjoyable pastime for young and old, and will do doubt do record business at the Peterborough Industrial.

# THE WEIGHT OF THE EARTH

Examiner Special.

NEW YORK, SEPT. 10.—Admitting that he may be wrong to the extent of five or six grains, Reinhard A. Wetzel, instructor in physics at the City College, announces to-day that the earth weighs seven trillion tons. Wetzel has now set himself the task of weighing an ordinary sunbeam.

PITY THE BABIES.

All babies whose mothers do not know about Dr. Chase's Ointment are truly to be pitied. They are sure to have skin troubles of one kind or another, such as chafing, skin irritation, scald head, milk rash or baby eczema and nothing can bring them comfort so quickly as Dr. Chase's Ointment. It stops itching promptly and heals the skin beautifully.

# AFTER A RECORD

Examiner Special.

PARIS, SEPT. 10.—The submarine "Archimede," six hundred tons, the biggest vessel of its kind in the French Navy, is soon to leave Cherbourg on a twenty-five hundred mile experimental run in an attempt to break the world's record. The first intention of crossing the Atlantic to New York has been abandoned.

# DOWNEYVILLE PICNIC

# ALD. HICKS WRITES AN OBITUARY FOR "JIM CROW" IN WHICH HE ASKS THAT HE SHOULD COME OUT IN THE OPEN

**Chairman of Board of Works Writes Letter to the Examiner Dealing With Now Celebrated Epistle of July 19th, Which Referred to Ald. Hicks---Says "Jim Crow" Had a Dream.**

To the Editor of the Examiner.

Sir,—The late Jim Crow was a man of education and refinement, whose great ideal in his life was to sow the seed of brotherly love and goodfellowship among the different creeds in the city and count in bonds of friendship all within its borders. Jim Crow was consistent and sincere and many will miss his sayings and writings from the pages of his warm affection and promptings of his noble manhood he was wont to spread that broad mantle of charity around a bigoted heresy of a loose religion and the crowning act of his life and proof of his new character is pictured in his letter of July 19, which reads as follows:

Sir, At a meeting of the City Council last night it was decided to employ Mr. Willis Chipman as consulting engineer, he to appoint a resident engineer in connection with the sewer system in the south end.

I therefore move and second the following: "That whereas Robert Hicks is chairman of the Board of Works, and whereas the case of other sewer work in Peterborough, he, feeling himself responsible for the proper workmanship of same, objected to any foreign not "known" to him, and when the two engineers now to be employed are from outside the city, it be resolved, that every opportunity be given to the aforesaid Robert Hicks, and the Board of Worthies, knowing the aforesaid gentleman of ascertaining whether both or either of them are members of the Roman Catholic church." In case one or the other should be a Catholic, I suggest that the matter be referred to the Board of Works with power to act.

Yours truly,
JIM CROW.

Following the exertion of such writing Jim became weary—retiring early that evening "he dreamed" that he did not know the two following quotations had ever been written.

"Let him in a manly and straightforward manner disclose his identity, and not hide behind a name that every scientific jackass has brayed forth for the past hundred years."

He may retain his name if he wishes, but I certainly don't purpose following the ravings and wanderings of a man who will not come out in the open, who, like a social and religious misfit, has resource to most extravagant opportunities and is afraid of having his inflated reputation punctured by facts and arguments charged with wholesome truths.

In the morning after such a pleasant dream "Jim Crow" awoke—and the shock killed him.

The Doctor filled in the certificate "Died from Inconsistency."

The burial was private.

"And no man knows that sepulchre,
And no man saw it ere
The Angel of God upturned the sod,
And laid the dead man there."

R. HICKS.

# MONTREAL SONS OF ENGLAND MAKE A FORMAL PROTEST AGAINST FATHER VAUGHAN

Special to The Examiner.

MONTREAL, SEPT. 10.—Mother Vaughan, made in lecture at district council of Sons of England Monument National Tuesday last, as representing twenty-seven hundred Englishmen last evening entered a formal protests against statements of Protestant's faith, "Intemperate, abusive and unwarrantable."

# Was Given Music Book That He Had Used In Band Fifty Years Ago

A music book that Mr. Finch M[illegible] still alive, and was hale and hearty at used when he was a member of then Mr. Miller called on him. Before the band in his home town in England leaving his house, the old bandmaster took down this book, with the land fifty years ago, was presented name of Mr. Miller on it, and gave him this summer, when he visited the to its original owner. Mr. Miller old place for the first time since he agreeably surprised, never thinking left it, thirty-seven years ago. That there was such a book in existance. It is unnecessary to say that which Mr. Miller was a member, the prize is very highly valued.

# HAD LEG BROKEN

**Hugh Robertson, Ten-Year-Old Son of Mr. John Robertson, Cedar St., Was Victim of Painful Accident.**

## CAUGHT UNDER VEHICLE

Hugh Robertson, the ten-year-old son of Mr. John Robertson, Jr., 485 Cedar street, met with a painful accident this morning about 10 o'clock, when, very unfortunately, he had his leg broken. The lad seated himself on Mr. Stock's waggon and was waiting for the driver to come out so he could go for a ride. The man came out from a customer's house on Cross street, and jumped on the step of the waggon, at the same time hitting the horse. The animal turned sharply from its position and over turned the waggon. The driver managed to leap from the seat, but the youngster held fast to his place, and was thus lodged under the heavy vehicle.

At one o'clock the child was conveyed in the Dan Spence ambulance to Nicholls Hospital, where his injuries were attended to.

# JUMPED INTO BAY

Special to The Examiner.

TORONTO, SEPT. 10.—Mrs. W. S. Cole, of 108 Denison avenue, rendered insane by the recent death of her mother and ill health of her father, jumped into the bay shortly after midnight and was drowned.

# CRUSHED TO DEATH

Special to The Examiner.

TORONTO, SEPT. 10.—Robt. F. Carruthers of Dufferin street, a foreman for the Bell Telephone Co., was crushed to death this morning between a Metropolitan car and the station platform.

A rich, yet mild brew, like Regal Lager is good for the nerves, heart and stomach. Your physician knows this, and will tell you that Regal is a stimulant that cannot harm you. Try it.

# NATIONAL STRIKE IS IMPENDING IN ENGLAND

## Millionaire's Wife Offers Him $240 Year

**Grandson of John Jacob Astor is Hiding From His Friends and is a Broken, Despondent Man.**

### WEDDED OPERA SINGER

Examiner Special.

NEW YORK, SEPT. 10.—His income of thirty thousand a year transferred to the woman he married, who now offers him $240 a year to defray his personal expenses, Robert W. Chanler, the grandson of John Jacob Astor, and politician, society man and artist, to-day is hiding from his friends, a broken, despondent man. His bride of two months is in Paris. She is the fascinating opera singer, Lina Cavallieri. Young Chanler's courtship of a year was most spectacular.

## Queen's Own Men Are Seriously Ill; Typhoid Fever

**Captain Pellatt, Son of Sir Henry, in a Dangerous Condition at Aldershot—Other Canucks Are Also Ill.**

### THOUGHT IT INFLUENZA

Examiner Special.

LONDON, ENG., SEPT. 10.—Captain Reginald Pellatt, the son of Sir Henry Pellatt, who is at Aldershot with the Queen's Own Rifles, is dangerously ill of typhoid fever. Adjt. George, Captain Kirkpatrick, Lieutenants Massey and Gzowski, and Medical Health Officer Winnett are also seriously ill. It was given out up till to-day that they had influenza.

Miller's Grip Powders Cure. Wm. Madill, druggist.

## Indications Point To A Serious Crisis

**The Relations Between Capital and Labour in England Are Worse Than Ever Before —Trouble Sure**

### CONFERENCE LIKELY

Special Wire to the Examiner.

LONDON, ENG., SEPT. 10.—A national strike of unprecedented proportions is impending. The Labour leaders are agreed to-day that the relations between capital and labour in England are worse than ever before. All over England the rank and file of union men are showing defiance of their leaders. The situation is such that the Government is preparing to call into conference the labour leaders and heads of dissatisfied industries.

# CONROY BROS. ASKED FOR AN EXTENSION OF TIME

**Considered the Time Limit Was Too Short—Might Not be Able to Complete Sewer Work by November 15th—Matter Left in Mr. Chipman's Hands.**

### OBJECT TO PENALTY

At a meeting of the Board of Works held last evening, at which there were present, Ald. Hicks, chairman, Mayor Morrow, and Ald. Phelan, Duncan, Gillespie, Graham and Metherall, Mr. E. H. Hall, City Solicitor was also present. Mr. W. H. Moore appeared on behalf of Conroy Bros., who recently were awarded the contract for the construction of a sewerage system in the south part of the city, and asked that the time given in which to have the work completed, be extended. Messrs. Conroy were at the meeting, and on their behalf, Mr. Moore stated that they were not aware of the conditions, at the time of signing the tender. No date, he understood, was fixed in the qualifications, and Mr. Conroy was not shown any general conditions. Mr. Moore said that it would be impossible to do the work by the fifteenth of November. Mr. Moore would suggest that some time next summer be mentioned for the completion. Mr. Conroy certainly would not submit to having to complete it by November 15th under penalty of $100 a week.

Considerable discussion followed Mr. Moore's remarks, in which it was stated by Engineer Hay that the conditions were available for Mr. Conroy to read. However, the chairman and the mayor were of the opinion that the matter should be left to Engineer Chipman. Mr. Chipman had stated that the work could be done in two months, but if any unforseen difficulties were to arise or if the weather was unfavourable then the time could be extended another month. It was decided to leave the matter in Mr. Chipman's hands, and he would have power to make any extension necessary.

The agreement between the city and the Canadian General Electric Co. permitting the latter to lay water pipes along Albert street for their new factory was read and approved of.

**Other Business.**

A petition for a sidewalk on south side of Smith street, between Bethune and Stewart streets, was left in the hands of the engineer with power to act.

The sidewalks on Dale avenue and Inglehurn avenue will be constructed when five feet of land on Dale avenue necessary to leave the street of sufficient width is deeded to the city.

The sidewalk on north side of Victoria avenue will be constructed, the petition being sufficiently signed.

The sidewalks on west side of Rogers street, and south side of Downs will be built as the engineer reports, inside the curb.

The Board of Health's recommendation that a sewer on Inverlee street, from Water Street to the manhole opposite Lindsay, be built, was adopted.

The street and sidewalk opposite E. Oliver's store on Hunter street will be put into decent condition.

The request for a sewer from the factory across Romaine, Dundas and Manning streets will be complied with on petition of property owners.

# HAND GOT CAUGHT IN MACHINE AND FINGER WAS AMPUTATED

**Wilbert Soucie, Hunter Street East, Met With Painful Accident at C. G. E. Works Yesterday Afternoon---Another Young Man Receives Bad Gash in Arm---Arm Broken Twice in Two Months.**

Wilbert Soucie, who resides on Hunter street east, and who is employed in the Punch press department of the Canadian General, met with a somewhat serious accident yesterday afternoon, by which he loses the second finger of his right hand. He was at work in his department when his hand got caught in a machine. His hand was badly lacerated and when he was removed to Nicholls Hospital, Dr. Young who attended him, found it necessary to amputate the second finger. The young man this morning is doing as well as could be expected.

A young man by the name of Anthony, employed at the C. G. E. works, had his face badly cut and was attended by Dr. Young. Another young man in the machine shop, suffered a sever gash in the arm, which will render it impossible for him to work for a few days.

**Arm Broken Twice.**

For the second time within the last two months, little Bergetta Conroy, the youngest daughter of Mr. Ed. Conroy, Mark street, East City, has had the misfortune to have her right arm broken. Yesterday afternoon the little girl was riding a bicycle and she fell, alighting with all her weight on her arm. The fracture is not in the some place as the previous one. A doctor was called and set the injured member.

# London Aviator Makes A Spectacular Flight Over City

Special to The Examiner.

LONDON, ENG., SEPT. 10.—Two million London people went wild to-day over an aeroplane flight by Orvuest Willows. He flew from Crystal Palace to St. Paul's Cathedral, twice encircled the giant dome of the old church, and then cruised over the city, for the return trip to Crystal Palace. He flew fifteen miles and took a course that would not have permitted him to alight had his machine gone wrong. Willows had a flight from Cardiff to London to his credit.

# Both Countries To Stand By Award Of The Tribunal

Examiner Special.

THE HAGUE, SEPT. 10.—Both United States and Great Britain, having signified their intention of standing by the award of the International Court of Arbitration in the Newfoundland fisheries dispute, the tribunal was disbanded to-day. Each nation has five days in which to lodge a protest, but assurances to-day say they accept the decision.

# More Prizes For Mr. Stratton's Horses At The Exhibition

Mr. Stratton's horses won some fresh laurels for themselves and their owner at Toronto Exhibition on Thursday and Friday of this week, winning several more prizes. In the single action and high-stepper class, 15.2 and over, Mr. Stratton's horses took first and second. In the single high stepper, under 15.2, his entries took first and third.

In addition, Mr. Stratton carried off third in the tandem and four-in-hand classes.

# PETERBOROUGH EXHIBITION--BEST IN ITS HISTORY

Sept. 15, 16, and 17.
Remember the dates.

Peterborough's Industrial Exhibition will be held on Thursday, Friday and Saturday of next week.

All that is needed is good weather to make the Exhibition the biggest success in the history of the Association.

[illegible] of town this year than ever before. [illegible] rent points and reduced rates [illegible] Excursions will be run from [illegible] on railroads and steamboats.

[illegible] is in line with the crowd. Help to [illegible] History by attending the big [illegible]

[illegible] is called Children's Day [illegible] There will be more visitors from [illegible] have a full holiday

There will be more fun for the youngsters than ever.

The fifth Band is preparing some choice programmes for the Exhibition. Mr. Gliddon's organization will be in full strength and will give a concert on Friday afternoon and evening, and on Saturday afternoon.

Friday night will be an opportunity for those who cannot attend in the afternoon. The grounds will be illuminated and there will be a splendid display of fireworks under the direction of Fred Mabel of Hamilton.

The Peterborough Fire Brigade will give an exhibition of their drill on both days of the Exhibition. The Firemen of Peterborough and Lakefield were the leaders of the Canadian National, and Peterborough's contingent were styled by Sir R. Baden-Powell as the smartest and [illegible] parade on parade. [illegible] Boys at the last Exhibition.

Read Mr. Stratton will exhibit his string of thoroughbred horses, which won so many prizes at Ottawa and Toronto, on Friday at the Peterborough Industrial. They will be shipped to Cobourg on Saturday.

## LAWN JUDGING.

A trip with the judge over the lawns entered for the competition of the Horticultural Society, reveals evidences of a great deal of taste and interest in beautification of private premises. But it also reveals the fact that there is too much intensive horticulture in spots. The competition is not general enough, not so general nor satisfactory as would be the adoption of Mr. John Riddell's suggestion that streets or sections of streets should be included in the competition. Then more householders would be enlisted in the work of improvement and the area of beautiful, tidy, well kept streets as well as private premises, would be greatly extended. Besides, by this plan the city authorities would be drawn in and probably induced to take some little interest in keeping tidy streets and helping citizens to maintain those in front of their premises in similar condition. In default of the police department enforcing the law or by-law against weeds, a prize might be offered for the tidiest, cleanest vacant lot and most free from weeds.

## SOCIAL PURITY.

The integrity and soundness of the home are foundation stones of stable and rightly ordered society; and the quality of the home depends upon the character and quality of its component members. The undesirable and deteriorating influences in society are particularly associated with laxity of life and morals. The Bishop of London, Right Rev. A. F. Winnington Ingram, in his great work among the submerged tenth of the great city, has seen more perhaps than any other man in his position, of the seamy side of life, has studied its causes, and has a right to speak with authority. He has seen how the absence of social and personal purity eats like a rodent ulcer into the vitals of society and poisons domestic and personal life. The Examiner has received from Wells, Gardener, Darton & Co., publishers, London, neatly printed copies of addresses delivered by the Bishop of London, who is now in Canada attending the Bicentenery of the Church of England. Two of these little books deal with the questions of social and personal purity. These subjects are dealt with in a masterly way, but in a style which, while it does not sacrifice the expression of truth to other considerations, is marked by language and sentiment which cannot shock the most prudish, or offend the most fastidious mind. The writer describes in beautiful words man's wonderful body, and impresses the idea that it is intended to be used for the glory of its Creator, and is the temple of the Holy Ghost. These little books should be widely circulated and carefully read. They deal in a delicate way with a delicate subject, and if the truths they teach were widely disseminated and wisely [illegible] heart, a [illegible] tion of society would result. A mother or a father could place no better and more wholesome books in the hands of daughter or son. The Social Reform League of Peterborough could not more profitably use the interval of its comparative inactivity—between local option campaigns—than by the distribution of Bishop Ingram's splendid little books.

## PROFESSION AND PRACTICE.

A great many sensitive Protestants have taken much to heart the offence they see in Cardinal Vaughan's rather energetic denunciation of Protestantism in a recent address in Montreal. Their cue is not to take offence, but if they think Cardinal Vaughan is wrong to prove him wrong. Our religious beliefs are only justified by their fruits. If we do not practice what we preach, do not live our belief, our belief is vain. There has always been and always will be difference of religious belief, always will be controversy. Revelation is not so full as not to leave wide margin for diverse interpretation. We can do nothing by boasting of the orthodoxy of our beliefs. All our boasting should be made through putting them into our lives; in showing that they are right, judged by results. There are thousands who boast of their goodness, whose lives are a direct negation; a boast of an honesty is vain if we live lives of deceit and dishonesty. A Roman Catholic organ of English-speaking Catholics neatly puts its finger upon the quick. Referring to the beliefs of the church it says:

"We believe we are right and we think we can prove it, and, as we have already said, our Protestant friends are looking for proof—not abuse."

Yet, what is regarded as "abuse" is not unexpected or deprecable or even unwelcome. Our blessed Lord tells us that it involves beatitude—"Blessed are ye when men shall revile you and persecute you and say all manner of evil of you falsely, for my sake." We can avoid persecution and reviling, if we live colourless, neutral, compliant lives, if we dodge the hard spots in the line of duty; if we walk the straight and narrow way we are bound to collide more or less fall under more or less harsh criticism. But if we practice what we preach, we can't go wrong—we shall have shown that we have the courage of our convictions. It may not be irreproachable theology, but is certainly good morals expressed in Pope's summary of the situation—

For modes of faith, let graceless zealots fight—
His can't be wrong, whose life is in the right.

Herein profession and practice are consistently enjoined.

## EDITORIAL NOTES.

Many anagrams can be made which have neither sense nor fitness. The same cannot be said of the anagram composed of the letters in the name of Florence Nightingale—Flit on Cheering Angel.

Both Great Britain and the United States have signified their intention to abide by the award of the Hague Tribunal. A protest on some points would renew discussion and possibly lead to a renewal in part of the happily settled dispute.

Those politicians who are looking for Sir Wilfrid Laurier's vacant shoes may have a weary wait. In his recent tour of the West, Sir Wilfrid covered 10,000 miles and "finished strong." It may be, and may it be, many years before Sir Wilfrid takes the long journey that knows no earthly return.

Twenty years ago the McKinley tariff of the United States was adopted. It was thought by some at that time that it would be a severe blow to Canada. It has been a blessing in disguise; it threw us upon our own resources, and has led to greater internal development and greater fiscal independence. Twenty years ago Canada was seeking reciprocity, now Uncle Sam is begging for it.

## GENERALLY SPEAKING

### Oil on George Street.

The smell from the oil that has been sprinkled along George street is certainly terrific. The way that people hold their noses and catch their breath as they walk along the street is quite sufficient evidence of the fact. But there is really no great reason to make a fuss about it. The smell will soon pass away and the oil will leave the street in a splendid condition, proof of which is seen along Hunter street, in East city. Dust is really more deadly to merchants' wares than offensive odours, and there are many people who, if given the choice of a foul smell or of having their food garnished with anthrax-laden dust, would willing choose the smell.

### In Lindsay.

Here is a good story vouched for by a Toronto tourist who happened to be staying over in Lindsay recently for dinner. He went to one of the leading hotels, accompanied by a friend, and picking out ham and eggs from the menu as his choice for the repast. He waited patiently for the maid to place the order before him, but waited in vain. Presently, above the hum of voices in the dining room, above the clatter of dishes in the kitchen he heard the voice of the hand maiden, as she despairingly called to the cook, "Say, Maria, 'ere's a gent asking for 'am and beggs in the dining room and there's only one begg in the 'ouse and that's missin'."

PILES

Dr. Chase's Ointment will in a certain and speedy manner cure any case of Itching, Blind, Bleeding or Protruding Piles. National Drug and Chemical Co. of Canada, Limited. Montreal.

## THE NATIONAL MENACE OF FREQUENT FOREST FIRES

The National Conservative commission has issued the following important bulletin (No. 4) in regard to forest fires:—

During the past summer forest fires have been devouring the growth of centuries with ruthless rapidity. Northern Ontario, Manitoba and British Columbia have suffered most. Fine tracts of merchantable timber, worth millions of dollars have been destroyed square mile upon square mile of young growth coming on to supply the demands of the future has been wiped out of existence. In Northern Ontario, where but a thin layer of vegetable mould covers the rocks, the soft, oozy forest floor, the only hope of vegetation and equable stream flow has been completely destroyed, leaving a cheerless rocky waste for generations to come. Even if no thought be given to the number of lives lost, it must be admitted that the loss occasioned this year by forest fires has been nothing short of appalling.

Can nothing be done, then, to prevent this loss? The answer is that much can be done. The solution of the problem is indicated in two words—public sentiment. The two principal causes of forest fires are campers and railways, and public opinion must be brought to bear upon these. The tourist-camper does not at all realize the extent of the damage which his unextinguished camp fire may do. Laws against leaving camp fires burning are already on the statute books, but it is quite evident that their observance rests *mainly* with the tourist himself. He must be impressed with the very serious nature of his offence. If a man sets fire to a building, he is convicted of arson and sent to prison as a felon, but if his unextinguished camp fire burns down millions of dollars worth of timber and perhaps destroys human life as well, he is, at best, made to pay a small fine. When public opinion views this carelessness of the camper as a criminal act and frowns upon him accordingly, considerable progress will have been made in lessening the number of forest fires from this cause.

But it is the railways that spread the most destruction. Traversing, as they do, the great lone stretches of uninhabited timber areas, the sparks from their locomotives start numerous fires that gain great headway before being detected. Too often the right-of-way, piled thick with inflammable rubbish, furnishes a tinder-box for these conflagrations. The owner of destroyed property along the line has found it almost impossible under the present laws to get damages from the railway company, so difficult is it to fix the responsibility and so expensive is the process of litigation. In order to lessen the number of fires due to this cause, the Committee on Forests of the Commission of Conservation has proposed to make the railways pecuniarily responsible. It has recommended that there be added to the Railway Act a clause making them liable to a fine of $1,000, recoverable by summary prosecution before a stipendiary magistrate or two Justices of the Peace, for every fire started by sparks from their locomotives. It makes no difference whether the fire begins outside the right-of-way or spreads therefrom to adjoining land. The railways are exempt from this fine if they can show that they have the best modern appliances on their locomotives to prevent the emission of sparks, that their employees have not shown negligence in conducing to the starting of the fire, and that they have maintained an efficient and properly equipped staff of fire-rangers. In other words, the Committee proposes to lessen the number of fires caused by sparks from locomotives by caution to prevent such damage. This is obviously a fair recommendation as regards both the railways and the public, and the effort to have it made law is worthy of public support. Every Canadian is deeply interested in the protection of our forests; for each forest fire means that he and his children will have to pay higher prices for every foot of lumber they use. Such a measure, for the preservation of our forests, as that recommended by the Committee on Forests of the Commission of Conservation should, therefore, commend itself to every public-spirited citizen and newspaper in Canada.

### Fahrenheit.

Prior to the 17th century, men were only able to judge of the heat and cold by their personal sensations. Halley and Newton, and various scientists of the day had made experiments with oil, spirits of wine and other substances in order to fashion a workable thermometer, but all their efforts had been more or less of failures. But what baffled the ingenuity of master minds was solved by a humble native of Danzig, who, having sailed as a merchant, took to the making of thermometers for a livelihood. That man was Fahrenheit—a name that is to-day used more extensively and whose origin is less known than possibly any other in the vocabulary of civilized nations. Very little is known of the inventor of the thermometer that bears his name. In 1720 or thereabouts, he left Dansig for Amsterdam, as the latter place seemed to offer a wider field for his energies. At the latter place he died—conjecture placing the date of the event sometime in the year 1740.

Fahrenheit's thermometer, notwithstanding the fact that the placing of the graduating figure for extreme cold; zero, at 32 degrees below freezing point, is obviously wrong and misleading, is certainly far in advance of all other systems that have been produced, in point of popularity. Among these may be mentioned the graduating scale of Celsius of Stockholm, who suggested what is known as the centigrade scale, the placing of 100 degrees between freezing and boiling points and that of Reaumur, the Frenchman, whose scale places 0 degrees as the freesingpoint and 80 degrees as the boiling point. Fahrenheit's scale, as is well known, places freezing point at 32 degrees and boiling point at 212 degrees above zero.

### The Peterborough Exhibition.

The near approach of the opening of the exhibition calls once again to our minds the fact that in this gathering together of the various forces that make for the great progress of the city and county, Peterborough possesses a very great and very valuable asset. That she has been indebted to a large extent to the public-spirited and self-denying efforts of a select few among her residents is, of course, well known. That the city councils of the past might have aided her more than they did is also well known, as is the fact that when they had the chance of helping towards the purchase of the desirable location that it at present occupies, they allowed the opportunity to slip through their hands. There is no location that can compare with the present one. It is admirably situated for access by street cars or by boats. There are 31 acres in the property. The race track cost, over $1,000 to construct, the buildings over $2,000 to erect. The fencing around the grounds was put up at an expense of $1,000. This property is offered to the Association for the sum of $20,000, and now, if ever, is the chance to purchase it. The [illegible] express next year. What are the members of Peterborough [illegible] such financial advantages from the annual exhibition going to do to help the directors towards purchasing the grounds, and acquiring for all time a property that is bound to gain in value year by year.

STOP SCRATCHING

Just as Long as You Have Dandruff Your Head Will Itch

It's the little microbes that are gnawing down into the hair roots. It may take a long time for these persistent pests to get down to the vital part, but when they do they will destroy the life of the hair in a very short time.

"I write in short that my head was almost running me crazy, and I saw your ad in the Times-Union. I bought a bottle of arisian Sage at once and tried it, and in a week I could see that my head was almost well, and my hair was growing wonderful, and I continued using Parisian Sage, and now my hair is beautiful and everybody admires it. My scalp is always clean." Mrs. S. Dingle, Jacksonville, Fla., Oct. 15, 1909.

Parisian Sage, the most delightful hair restorer, is guaranteed by Wm. Madill, druggist, to stop falling hair, to cure dandruff and all diseases of the scalp, or money back. It is the most refreshing hair dressing in the world. Ladies use it extensively because it makes the hair beautiful, soft and luxuriant. 50 cents a bottle at Wm. Madill's or charges prepaid, from Giroux Mfg. Co., Fort Erie, Ont. The girl with the auburn hair is on every bottle.
